

A lift-the-flap book

HELLO,  
MR TIGER!

Sam Boughton

A lift-the-flap book

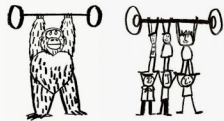

HELLO,  
MR TIGER!

Sam Boughton

Welcome to the jungle! This hot leafy habitat is full of INCREDIBLE animals.

Say hello to Gorilla.  
His arms are longer than his back legs!

A male gorilla is as strong as six men!

Gorillas ROAR and BARK to scare away predators.

HERBIVORE

(This means he eats plants, but gorillas sometimes eat termites too!)

These are the Poison Dart Frogs.  
They are one of the most poisonous  
animals in the WORLD!

They leap from leaf to leaf  
looking for food such as  
flies and ants.

**CARNIVORE**  
(That means he  
only eats meat.)

Their poisonous skin can kill  
animals much larger than them,  
such as birds and monkeys!

Hello, Mr  
Poison Dart frog!

The bright colours on  
their skin can scare  
away predators.

This is Tiger! He's the biggest and most dangerous cat in the jungle!

CARNIVORE

They can jump the length of a bus!

Every tiger has different stripes.

Meet the Spider Monkeys!  
They swing through the trees  
making lots of **NOISE!**

↑ **OMNIVORE**  
(This means they eat  
both plants and animals!)

They like to eat  
fruits and nuts from  
the trees.

Hello, Mrs  
Spider Monkey!

They use  
their tail like  
another **ARM!**

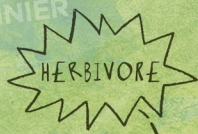

Monkeys live in **BIG**  
groups called **TROUPS.**

These are Blue Morpho Butterflies.  
They are one of the **BIGGEST** butterflies  
in the **WORLD!**

Their wingspan can be  
20cm long. That's longer  
than a BANANA!

They use their mouth like a  
straw to drink their food!

It's night time in the jungle and Anaconda has just woken up.

CARNIVORE

He's going out to look for his dinner!

Anacondas live near rivers and swamps and they love to swim.

Anacondas are VERY heavy. They can weigh more than two pandas!

Hello, Mr Anaconda!

Say hello to Sloth!

These hairy mammals love to hang upside down in the treetops.

Sloths only leave their tree every two weeks to go for a poop!

OMNIVORE

Hello, Mrs Sloth!

They have three long toes to hold on to branches.

These colourful birds are the Toucans.

Their beak looks heavy, but it is actually VERY light!

They use their beaks like a knife to peel fruit.

OMNIVORE

Both Mummy and Daddy toucans take turns to look after their chicks.

These birds can't fly very well. They hop from branch to branch instead.
