# RAINFOREST

NATASHA DURLEY

555 222

Deep in the rainforest, it is warm and wet. There are lots of tall trees, colourful plants and noisy creatures that live here.

On the forest floor, it is very dark. If you look closely, can you see the tiny critters in the fallen leaves?

Some animals  
are searching for  
fasty bugs to eat...

ANTEATER

LEOPARD

and others  
are hiding in  
the plants.

ARMADILLO

Follow the murky river as it twists and turns.  
Who is that splashing in the water?

Watch out for  
SNAPPING JAWS!

PINK RIVER DOLPHIN

CROCODILE

DRAGONFLY

High up in the trees, it is very busy and noisy.

The thick trees are like a roof, making the perfect home for many animals. There is also plenty of fruit and seeds to eat.

At the top of the tallest trees, it is sunny  
and thin branches blow in the wind.

The best way to get around is by **FLYING** or **GLIDING!**

BUTTERFLY

HUMMINGBIRD

PARAKEET

MACAW

MONKEY

SUGAR GLIDER
