**FUN PUZZLES
FOR BRIGHT MINDS**

INTRODUCTION

Puzzles are a great source of stimulation and exercise for your brain, and they can even be fun too. Using your brain to work out a logic sequence, to calculate a sum, or to deduct the answer from a series of clues can keep you happy and occupied for hours, and it is good for you. A positive mental activity like puzzle-solving keeps your brain on its toes, so to speak! Now, if those puzzles are themed around your favourite characters from your favourite movies, that can take it to another level of fun! Heroes and villains, Princesses, animated characters and many more Disney favourites take centre stage in the wide variety of puzzles you will find in this book. There are all sorts of brain games and puzzles, from simple mathematic challenges and wordsearches to complicated logic grids and even a few taxing quizzes to test your Disney knowledge to the full!

When you start a puzzle, remember to read the instructions carefully, because sometimes there will be important rules to follow that will make the puzzle the most enjoyable it can be. And if you

find yourself stuck, you can always “give a little whistle” and ask parents and carers or friends and family for help. You can even challenge your pals to a timed brain games battle!

So sharpen your pencil, calm your mind and get stuck in to this fun, stimulating series of games for your brain! Turn to the back of the book for the answers.

The Puzzles

Puzzle 1

THE MISSING NOTE

Héctor and Miguel share a passion for music, so they spend a lot of time singing and playing music together. They are rehearsing a song, but have encountered a problem – the song is missing the last note.

Find the path that connects the two singers, and discover which note is missing!

Cross off the notes in this list as you go:

C

D

E

F

G

A

B

The missing note is:

.....

Puzzle 2

HERCULES AND THE HYDRA

Hercules is battling the terrible monster Hydra in the cave where it dwells. At the start of the battle, Hydra has only one head, but each time Hercules cuts a head off, three grow in its place. He has already cut off twelve heads.

How many heads does Hydra have now?

Heads in total:

.....

Use this space if you need to work it out on paper.

Puzzle 3

I'M LATE, I'M LATE!

It's always "late" for the White Rabbit, and he's always checking his giant watch! Right now, it's 5:00 p.m. The White Rabbit's next appointment is in 100 hours' time but he is already worried about being late!

1. How many days is it until his appointment?

.....

2. What time will it be at?

.....

Use this space if you need to work it out on paper.

Puzzle 4

MEMORY SEQUENCE

During a test, Anger got into a fight with Fear, and that messed up Riley's memories. Luckily, Joy has a solution!

Start from memory O and plot the right path.
Remember: each memory is equal to the sum of the two previous ones!

Use this space if you need to work it out on paper.

Puzzle 5

THE GREAT RUG RACE

Woody has come up with a great idea to have fun with his toy friends: a rug race! But just after they cross the finish line, the toys hear Bonnie and they freeze.

Can you work out the order they finished in?

Bear in mind that:

Woody finished two places before **Buzz**

Hamm finished right after **Woody**

Buzz finished two places before **Rex**

Rex finished **last**

Use this space if you need to work it out on paper.

Puzzle 6

HEAD IN THE CLOUDS

Rapunzel and Eugene usually take a long walk through the streets of the kingdom, and they like to stop and look at the clouds. One day, they notice that there are clouds resembling their dearest friend, Pascal!

Count how many clouds in the sky are Pascal-shaped!

Pascal-shaped clouds in total:

.....

Puzzle 7

A SHORT CIRCUIT!

WALL·E's language circuit got stuck, and the little robot kept repeating his name. Luckily, he managed to solve the problem. But before he did, how many times did he repeat his name?

Look for them in the grid below, and count them.

REMEMBER: The name can be written from right to left and vice versa, from bottom to top, from top to bottom, and also diagonally.

Puzzle 8

MAKE A WISH

In Agrabah, many characters come into contact with the magic lamp and have the chance to be granted a wish. Can you work out who wished for what?

Use the numbers to connect each character to the right wish.

1

To be free to choose who to love.

ABU

2

To become rich.

IAGO

3

To find a husband worthy of my daughter.

ALADDIN

4

To have lots of food!

THE SULTAN

5

To become a prince and marry Jasmine.

JAFAR

6

To become the new sultan of Agrabah.

JASMINE

Puzzle 9

FINDING RELAXATION

Marlin is a little tired, and Dory invites him to go on holiday with her. Any destination is fine. The two friends don't have major requirements ... but there's one element that absolutely can't be missing.

Join different-shaded pieces of the puzzle to form the right word and find out what Marlin and Dory can't do without.

Puzzle 10 WI-FI AT FULL THROTTLE

Wi-Fi has been installed in the arcade to connect the games to the Internet, but it isn't active yet, because a password must be entered first.

Use logic and find the correct password, bearing in mind that it is the only word written twice in the displays below!

What's the password?

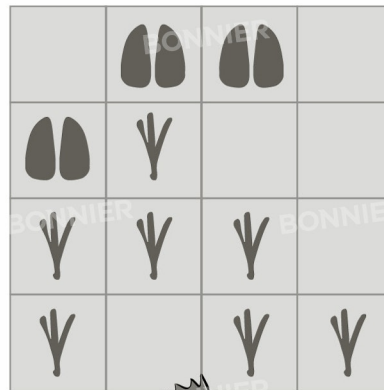

.....

Puzzle 11 FOOTPRINTS IN THE SAND

On a beautiful sunny day, Moana is playing a game on the beach with Heihei and Pua.

Can you complete the sequences in the grid with the footprints, bearing in mind that no row, column or diagonal can contain four consecutive matching footprints? There are two possible solutions!

Puzzle 12

WORDSEARCH

Find the hidden pasta names in the grid. They can be hidden horizontally, vertically or diagonally, and can read from right to left or from left to right.

CANNELLONI

FARFALLE

FUSILLI

GNOCCHI

LASAGNE

LINGUINE

MACARONI

PAPPARDELLE

PENNE

TORTELLINI

Puzzle 13

THE GREAT ESCAPE

Remy, Emile and their dad Django are in the kitchen of a well-known Parisian restaurant. Unfortunately the chef doesn't like rats very much. They need to find a way out, and fast! **Help the three rats escape!**

Trace a path, bearing in mind that you always have to follow this order:

REMY

EMILE

DJANGO

You can only move vertically and horizontally, never diagonally.

Puzzle 14

MONSTRO

All the whales on this page are identical apart from one.
Can you spot it?

Puzzle 15

A BERRY SPECIAL DAY

On a late summer afternoon, Pocahontas and Nakoma went in search of berries. But while they harvested them, their friends Meeko and Flit ate many berries in secret! **Read about what happened below and work out how many berries are in Pocahontas and Nakoma's basket now!**

In Pocahontas and Nakoma's basket there were **100 raspberries**.

Secretly, Meeko managed to eat **35** in a row!

Immediately after, Nakoma collected **as many raspberries as Meeko had eaten**, as well as some delicious **blueberries – 7** to be precise.

Then Meeko stole **55** raspberries and Flit stole **28!**

Eventually, Pocahontas collected a raspberry and a blueberry for every 5 raspberries Meeko stole a second time.

Berries in total:

Raspberries

Blueberries

Puzzle 16

CODEWORD

Can you crack the code to fill in the grid? Each letter of the alphabet has a number assigned to it and some are filled in for you. The words to fit into the grid are below – apart from one – **can you fill in the grid?**

Puzzle 17

BABYSITTER DORY

Dory promised Mr. Ray she'd look after his seven little pupils, but today they are nervous and often quarrelling. To avoid squabbling, Dory should split them into different sea areas, separated by seaweed. **Carefully read the rules below and find the correct distribution!**

Rules: Going from left to right, each area must contain more pupils than the previous one. There can't be two areas with the same number of pupils.

Example: The solution to the right doesn't work. The marked area doesn't have more pupils than the previous one, and there is already another area with only one pupil.

Fill in the number of pupils in each section below.

Puzzle 18

A MOUNTAIN OF NUMBERS

Anna and Elsa are trying to reach the top of the North Mountain, but finding the right path in the deep snow isn't that easy!

Example:

Fill in the empty boxes, bearing in mind that the number in each box must be the sum of the two numbers underneath it.

Puzzle 19

LET'S MAP PETER

Captain Hook and Mr. Smee have decided to draw a map of Peter Pan's movements. They've discovered that his movements form a large square - in fact, more than one!

Look at the grid opposite and count how many squares there are.

Squares
in total:

.....

Be careful: There are squares of many different sizes and each one could contain others. In the example on the right, there are five squares: four small ones and a larger one that contains them all.

Puzzle 20

SMALL AS A FLOWER

In Wonderland, it's easy to lose all sense of scale! Right now, Alice is 20 inches tall. Find the correct sequence of calculations to bring Alice back to her normal height of 5 feet and 5 inches. **Remember there are 12 inches in a foot!**

- 1 Shrink Alice by 10 inches.
- 2 Halve Alice's height.
- 3 Multiply Alice's height by four.
- 4 Make Alice grow by 30 inches.

The right sequence is:

.....

.....

.....

.....

Use this space if you need to work it out on paper.

Puzzle 21

TWO HEAVY SUMS

Hercules is a true hero: clever, courageous and very strong. Number each block using the six numbers on the right. The sum of the three blocks he's holding with his right hand is equal to the sum of the three blocks he's holding with his left hand. **You can do it... if you rotate your point of view!**

Use this space if you need to work it out on paper.

Puzzle 22

WORDSEARCH

Find the hidden words in the grid. They can be hidden horizontally, vertically or diagonally, and can read from right to left or from left to right.

- | | | | |
|----------|------------|------------|-------------|
| ACHILLES | ARCHDEACON | CLOPIN | SAROUSCH |
| DJALI | ESMERALDA | FROLLO | TROUILLEFOU |
| HUGO | LAVERNE | MADELLAINE | VICTOR |
| PARIS | PHOEBUS | QUASIMODO | ZEPHYR |

Puzzle 23

ALADDIN'S GREAT ESCAPE

Jafar craves control of the city of Agrabah. He accuses Aladdin of a crime he never committed and orders the guards to capture him!

Carefully read the rules below and find Aladdin's route out of the city.

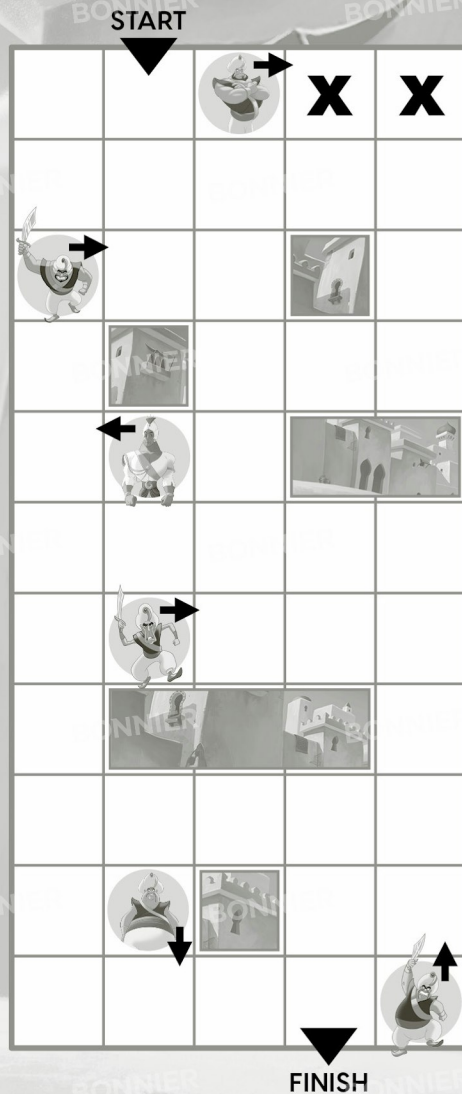

Rules:

The guards will arrest Aladdin if he crosses a square in their line of sight. The example in the first row of the grid indicates where the guard is looking, and the Xs show the squares Aladdin can't move through.

Move horizontally or vertically and use the buildings to hide from the guards' line of sight.

If you can't move in front of the guards' line of sight, you can always move beside or behind them!

Puzzle 24

MULAN, YES, MULAN

Mulan is playing with geometric shapes to come up with new moves for her training. At the bottom of the opposite page are the shapes she has to use to re-create each position, but in three cases Mulan changes the rule.

Look at the poses and cross out the wrong ones!

Puzzle 25

BELLE'S FRIENDLY STARS

Belle loves to look at the sky and find all the constellations.

A few of them really resemble some of her dearest friends and beloved objects. Can you spot all of them?

Look carefully at the sky, connect the stars of each constellation, and then match the silhouettes to the items below!

A

B

C

D

E

Puzzle 26

DON'T TRAP REMY!

If Remy moves two corners in a clockwise direction and the colander moves three corners in the opposite direction, how many turns will it be before Remy is captured under the colander?

Puzzle 27

MALEFICENT

Find the shadow that belongs to Maleficent.

Puzzle 28 CODEWORD

Can you crack the code to fill in the grid? Each letter of the alphabet has a number assigned to it and some are filled in for you. The words to fit into the grid are below – apart from one – **can you fill in the grid?**

3 letter words

Puzzle 29 LOGIC GRID

Fill in the empty boxes with the numbers 1, 2, 3, 4, 5, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

A number must not appear more than once in each shaded shape.

	A	B	C	D	E
1		4			3
2		2			4
3				3	
4			1		
5	5				

Puzzle 30

THE DEPTHS OF THE OCEAN

Marlin is swimming in the ocean with Dory. As he gradually descends into the depths, the light decreases and some fish appear only as dark shadows. **Bearing in mind that the fish lower down are all identical to those swimming higher up, how many fish does Marlin see, including Dory?**

Fish in total:

.....

Puzzle 31

FAMOUS PHRASES

Name the characters who said the following famous phrases, as well as the movies they are in.

1. "Magic mirror on the wall, who is the fairest one of all?"

.....

3. "Oh my fur and whiskers! I'm late, I'm late, I'm late!"

.....

5. "Rob the poor to feed the rich."

.....

2. "But mother, I don't want to grow up."

.....

4. "Am I a real boy?"

.....

6. "My only true love darling, I live for furs, I worship furs."

.....

8. "Remember who you are."

.....

9. "She only knows one simple fact. That you're a him and she's a her."

.....

7. "Before the sun sets on her sixteenth birthday, she shall prick her finger on the spindle of a spinning wheel, and die."

.....

10. "But you see, I have the other slipper."

.....

Puzzle 32

WORDSEARCH

Find the hidden words in the grid. They can be hidden horizontally, vertically or diagonally, and can read from right to left or from left to right.

ALICE ANITA ARIEL AURORA BELLE
 CINDERELLA JASMINE LILO MERIDA
 MULAN MOANA POCAHONTAS RAPUNZEL
 RAYA RILEY SNOW WHITE TIANA

Puzzle 33

A CUP OF TEA

After a hearty lunch, Belle wants to have a cup of tea with all the enchanted objects of the castle, but unfortunately there aren't enough cups for all of them.

Look closely at the number of cups in the boxes opposite and find out how many are missing.

TIP: Pay attention to the sequence. For example, if it were: 1-6-?-16, the missing number would be 11, because we always add 5 to the previous number.

Puzzle 34 MEMORY SQUARE

This memory puzzle will challenge your powers of recall! Each number in the square corresponds to a sign, shown below.

Take 30 seconds to memorise the equivalents, then cover them up.

Next, fill in the empty square with the sign equivalents of the numbers in the first square.

1 = & 2 = # 3 = % 4 = |

1	2	4	1
2	3	1	3
1	3	2	2
4	1	2	1

Puzzle 35 NUMBER SQUARE

Fill in the empty boxes with the numbers 1, 2 or 3, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

Each group of squares (shown by dotted lines) must contain only numbers that combine to equal to the number printed in the top left of the first square in the group, by using the method of calculation shown (\times , $+$, $-$, \div). For example, 3 \div can be calculated as 3 divided by 1.

Note that a number may appear more than once in a group of squares, as long as the two rules above are followed, for example:

4 $+$		
2		1
1		

6 $+$	2 \times	
		5 $+$
3 \div		

1	12 \times	6 \times
	4 $+$	

Puzzle 36

HOW A-DOOR-ABLE

Monsters, Inc. has received a supply of different types of new doors, but before they can be hung, Sulley and his colleagues need to count them all. **By doing the arithmetic, find out first how many doors of each type there are, and then how many doors there are in total.**

Use this space if you need to work it out on paper.

$$\begin{array}{c}
 \text{Door 1} + \text{Door 2} + \text{Door 3} = 15
 \end{array}$$

$$\begin{array}{c}
 \text{Door 1} + \text{Door 4} + \text{Door 5} = 25
 \end{array}$$

$$\begin{array}{c}
 \text{Door 1} + \text{Door 4} + \text{Door 6} = 23
 \end{array}$$

$$\begin{array}{c}
 \text{Door 4} + \text{Door 6} + \text{Door 7} = \dots\dots
 \end{array}$$

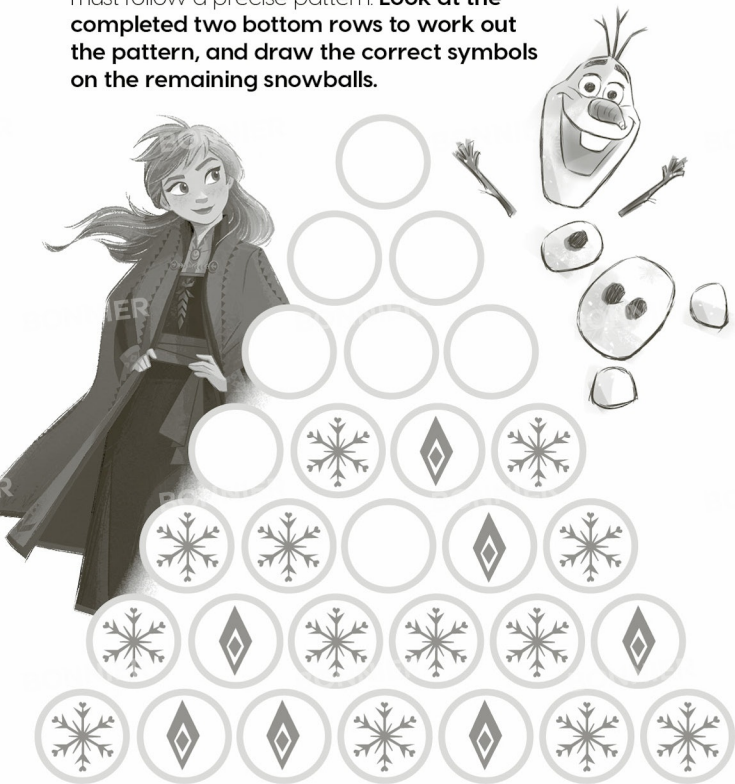

$$\begin{array}{c}
 \text{Door 1} + \dots + \text{Door 4} + \dots + \text{Door 6} + \dots = \text{Doors in total: } \dots\dots\dots
 \end{array}$$

Puzzle 37

THE SNOWBALL TREE

With Olaf's help, Elsa and Anna are decorating a tree made out of snowballs! Each snowball can bear one of two symbols, which must follow a precise pattern. **Look at the completed two bottom rows to work out the pattern, and draw the correct symbols on the remaining snowballs.**

Puzzle 38

SCARED!

Can you answer the questions below?

1. What is the only thing Captain Hook is afraid of?
.....
2. What is Piglet scared of?
.....
3. What does Dusty Crophopper suffer from?
.....
4. What is the sandpiper in Piper afraid of?
.....
5. What is Arlo afraid of?
.....
6. What scares Winnie the Pooh?
.....

Puzzle 40

REMY'S FAMOUS SOUP

Read the text below carefully once. Cover it up and then try to remember and fill in the missing words on the same text opposite.

Cut 800g of leeks into rounds and thinly slice
3 onions.

Melt some butter into a frying pan, add the
leek and onion, some salt and pepper. Cook
for 15 minutes, stirring from time to time.

Squeeze 3 oranges.

When the leeks and onions are cooked, pour
them into a mixer with the orange juice.

Mix together and pour into a pan.

Add 50cl of water and 30cl of cream.

Cook on a medium heat, stirring frequently.
Add salt and pepper to taste.

Cut of leeks into rounds and thinly slice
..... onions.

Melt some into a frying pan, add the
leek and onion, some salt and pepper. Cook
for 15 minutes, from time to time.

Squeeze 3 oranges.

When the leeks and onions are, pour
them into a with the orange juice.

..... together and pour into a pan.

..... 50cl of water and 30cl of

Cook on a medium heat, stirring frequently.
Add salt and pepper to taste.

Puzzle 41

IT'S TEATIME

Tweedledee and Tweedledum told two different versions of what happened at the Mad Hatter's last tea party. But only one is right!

Read them carefully, find out who is correct and guess how many cups each guest drank!

Bear in mind that:

- There were 4 guests.
- A total of 10 cups of tea were served.
- Everyone drank at least 1 cup.

MARCH HARE

10/6

MAD HATTER

ALICE

WHITE RABBIT

Tweedledee said that:

1. The Mad Hatter drank 3 cups of tea.
2. The White Rabbit drank 2 cups fewer than Alice.
3. The March Hare drank 1 cup of tea.

TRUE FALSE

Tweedledum said that:

1. The White Rabbit drank 3 cups of tea.
2. The Mad Hatter drank more cups of tea than Alice.
3. Alice drank 3 cups of tea.

TRUE FALSE

Puzzle 42

ODD ONE OUT

Which is the odd one out?

Puzzle 43

BEWARE OF THE HACKER

Randall is very jealous of Mike and Sulley's successes at Monsters, Inc. This time, to sabotage their scare session, he's changed their pass code to activate the doors. **Find the new code by doing the sums, and remember: it consists of numbers between 1 and 9 and each digit can be used only once.**

Cross off the numbers in the chart as you go:

.....	+	-	5	=	3
+		+		+		
1	2	3				8
.....	+	+	=	
+		+		+		
4	5	6				10
9	+	+	=	
+		+		+		
7	8	9				
15	10	12				

Use this space if you need to work it out on paper.

Puzzle 44

YAX

Study the grid below for 60 seconds, then cover it up. Try to fill in the blank grid with the letters from the original.

Y	A	A	X
X	Y	X	A
A	X	Y	Y

Puzzle 45 MADAM MIM'S CARDS

Using logic, can you work out the type (diamond, spade, club, heart) and the value (from 1 to 10) of the missing card?

Puzzle 46 NUMBER SQUARE

Fill in the empty boxes with the numbers 1, 2 or 3, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

Each group of squares (shown by dotted lines) must contain only numbers that combine to equal the number printed in the top left of the first square in the group, by using the method of calculation shown (\times , $+$, $-$, \div). For example, $3 \div$ can be calculated as 3 divided by 1.

Note that a number may appear more than once in a group of squares, as long as the two rules above are followed, for example:

4 ⁺	2	1
1		

1 -	2 -	
	4 ×	
4 +		

4 ×		7 +
6 ×		

Puzzle 47

MISSING LETTERS

The vowels have been removed from the following names. Can you work out who they are? The movie they appear in is given.

SRB
(The Lion King)
.....

LSTR KR
(Big Hero Six)
.....

MRSHMLLW
(Frozen)
.....

MLLY DVS
(Toy Story)
.....

MPHTRYN
(Hercules)
.....

FRNNY FRMGUCC
(Meet the Robinsons)
.....

WNFRD
(The Jungle Book)
.....

HRC BDN
(101 Dalmatians)
.....

Puzzle 48

LOGIC GRID

Fill in the empty boxes with the numbers 1, 2, 3, 4, 5, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

A number must not appear more than once in each shaded shape.

	A	B	C	D	E
1		4			
2	1			5	
3		5			
4			3	1	
5					2

Puzzle 49

THE CORN HARVEST

Nakoma challenges Pocahontas to store four corncobs using all three baskets below ... following some hard rules. You can try too, keeping in mind that each basket can fit inside the larger ones.

Rules:

The large basket must contain twice as many cobs as the medium one.

The medium basket must contain twice as many cobs as the small one.

Pocahontas has to store all four of the cobs and can't cut them.

Write your ideas here:

Puzzle 50

ODD ONE OUT

Can you spot the odd one out?

Puzzle 51

RIDDLES ... TO MUSIC

Miguel has decided to take part in a riddle contest with a string of riddles in the form of song lyrics. Can you find the solution to each one?

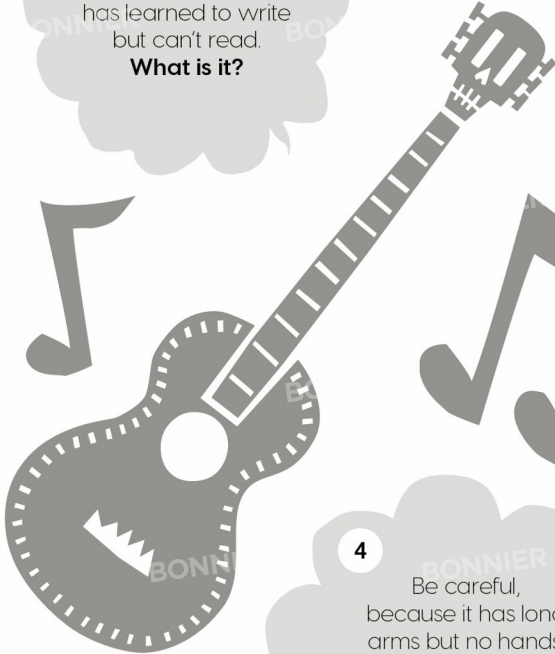

1
After a big dance,
back and forth,
with music or
without ... it
always falls.
What is it?

2
They are close to
each other. They rest
everywhere and they
cannot see themselves.
What are they?

3
It works hard and
has learned to write
but can't read.
What is it?

4
Be careful,
because it has long
arms but no hands.
You can see the
neck, but the head
is not there at all.
What is it?

Puzzle 52

WINNIE THE POOH'S HONEY CAKE

Winnie the Pooh's favourite food is honey, and the ingredients for a honey cake are detailed below. For this puzzle, study the ingredients list for one minute, then cover it up and answer the question.

200g flour

150g sugar

1 sachet of yeast

1 pinch of salt

3 large eggs

100g butter

100g ground almonds

4 tbsp honey

1/4 litre of milk

Icing sugar

Which of the following ingredients are not used in the recipe?

Yeast

Eggs

Cream

Ground almonds

Honey

Vanilla essence

Milk

Icing sugar

Flaked almonds

Salt

Butter

Flour

Sugar

Brown sugar

Puzzle 53

A TOY DOMINO

Buzz is playing a game of dominoes. Complete the path by inserting the right tiles in the empty spaces, but remember: two tiles can be in sequence only if they have the same characters at their ends.

To avoid mistakes, look carefully at the path before and after each tile.

Puzzle 57

NUMBER SQUARE

Fill in the empty boxes with the numbers 1, 2 or 3, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

Each group of squares (shown by dotted lines) must contain only numbers that combine to equal the number printed in the top left of the first square in the group, by using the method of calculation shown (\times , $+$, $-$, \div). For example, $3\div$ can be calculated as 3 divided by 1.

Note that a number may appear more than once in a group of squares, as long as the two rules above are followed, for example:

$4+$	2	1
1		

$3 \times$	$6 \times$	
	$6 +$	$1 -$

$8 +$	$6 \times$	
$1 -$		

Puzzle 58

THE GENIE'S MAZE

The Genie of the Lamp is a tricky character with various expressions. Can you find the four ways through the maze to connect each phrase with its face?

'Say, you're a lot smaller than my last master. Either that or I'm gettin' bigger.'

'Al, I can't help you. I work for Jafar now.'

'Excuse Me? Did you rub my lamp? Did you wake me up?'

'Hang on to your turban, kid, 'cause we're gonna make you a star!'

Puzzle 59

OFF WITH THEIR HEADS

The Queen of Hearts is not known for being a hospitable ruler. On the contrary, she is very good at finding intruders and chasing them away. In each of the five groups of playing cards there is one intruder. **Can you find it, and explain why it doesn't belong?**

1 The intruder is because

Puzzle 60

THE CASEBOOK

Judy loves making up strange crime cases and challenging Nick to solve them. **Can you help Nick figure out the two cases below?**

"The other day, two mothers and two daughters stole a rectangular painting, a square one and a round one. Although there were only three paintings, each thief took one home. How is it possible?"

Nick imagines he's a witness to the theft and immediately works out the solution – can you, too?

"Yesterday we locked up a suspect we'd been looking for for some time. Consider that he crossed the whole of Zootropolis, from one side to the other. It was a sunny day, and there were lots of people in the street, yet no one saw him. He didn't use any means of transport and no tricks. He was about to escape, but I figured out that he would come out of a damp, dark place."

Nick imagines he's the fugitive and again works out the solution – can you?

Puzzle 61

LOGIC GRID

Fill in the empty boxes with the numbers 1, 2, 3, 4, 5, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

A number must not appear more than once in each shaded shape.

	A	B	C	D	E
1	5				
2			3		
3		4			
4				4	
5		2		5	1

Puzzle 62

MAZE

Miguel is worried because he lost his guitar. **Can you find which two paths lead him to find it?**

The maze puzzle features Miguel and his guitar. Miguel is at the start of five paths labeled 1 through 5. The guitar is hidden in the maze. A dog is also present at the bottom of the maze.

Puzzle 63

RABBITS AND HARES

Can you match each rabbit or hare to the correct movie?

1

RABBIT

2

JUDY HOPPS

A

THE MANY ADVENTURES OF WINNIE THE POOH

B

ALICE IN WONDERLAND

D

ZOOTROPOLIS

3

THE WHITE RABBIT

4

THE MARCH HARE

5

THUMPER

C

Puzzle 64

WORDSEARCH

Find the hidden names in the grid. They can be hidden horizontally, vertically or diagonally, and can read from right to left or from left to right.

ANDY BILLY BOPEEP BUZZ DOLLY DUCKY
 GOAT GRUFF HAMM HANNAH JANIE
 JINGLEJOE LENNY MOLLY MONKEYS
 ROBOT ROLLERBOB SARGE SCUD SHARK
 SNAKE SOLDIERS TROLL WHISKERS WOODY

Puzzle 65 NUMBER SQUARE

Fill in the empty boxes with the numbers 1, 2 or 3, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

Each group of squares (shown by dotted lines) must contain only numbers that combine to equal to the number printed in the top left of the first square in the group, by using the method of calculation shown (\times , $+$, $-$, \div).
For example, $3\div$ can be calculated as 3 divided by 1.

Note that a number may appear more than once in a group of squares, as long as the two rules above are followed, for example:

Puzzle 66 LOGIC GRID

Fill in the empty boxes with the numbers 1, 2, 3, 4, 5, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

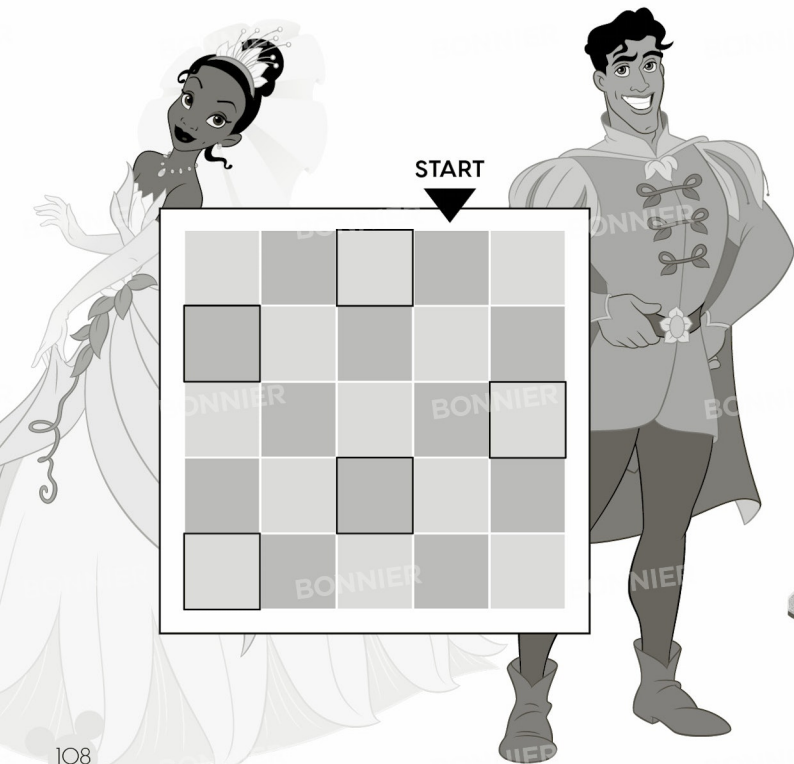

A number must not appear more than once in each shaded shape.

Puzzle 67 A CHECKERBOARD WALTZ

Tiana and Naveen are dancing in a hall with a chequered floor. During the dance they move 13 tiles, each time dancing horizontally or vertically, never diagonally. They never step on the same tile twice.

On which of the five framed tiles in the checkerboard below can their dance NOT end?

Puzzle 68 MAZE

With Wall-E's help, Eve has finally managed to reproduce some seedlings, crucial for Earth's future. Find out what route Eve took to get to the central room of the Axiom spaceship, then count how many seedlings she was able to find on the way.

Puzzle 69

MADAM MIM'S CARDS

Madam Mim engages in trickery of all sorts. Here she has laid out a sequence of cards that follows a pattern.

Can you work out which cards should come next?

Puzzle 70

THE PYRAMID

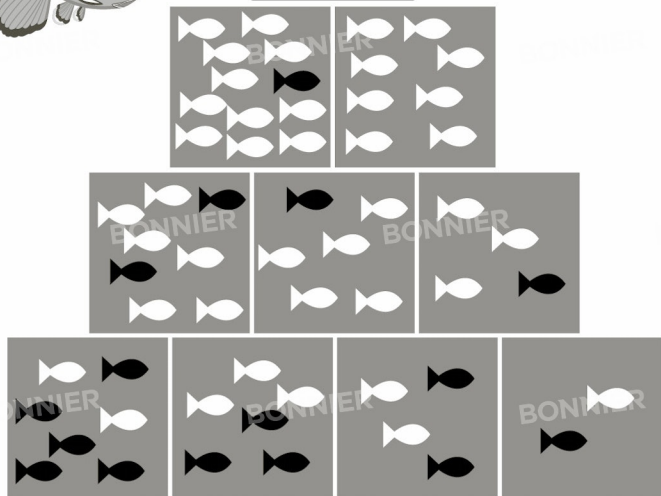

Dory and Marlin are counting fish in the sea and they notice a pattern.

Can you work out how many of each type of fish there should be in the box at the top of the pyramid?

White:

Black:

Puzzle 71

NUMBER SQUARE

Fill in the empty boxes with the numbers 1, 2 or 3, always following the three rules:

A number must not appear more than once in a row.

A number must not appear more than once in a column.

Each group of squares (shown by dotted lines) must contain only numbers that combine to equal to the number printed in the top left of the first square in the group, by using the method of calculation shown (\times , $+$, $-$, \div). For example, $3\div$ can be calculated as 3 divided by 1.

Note that a number may appear more than once in a group of squares, as long as the two rules above are followed, for example:

Puzzle 72

6+		12×	
1-	3÷		
		2-	6×
4÷			

Puzzle 81

JAQ AND LUCIFER

Lucifer  is trying to catch Jaq .

Can you work out how many turns it will take before Lucifer catches Jaq, if Lucifer advances 3 segments clockwise each turn and Jaq goes 4 segments in the other direction each turn?

Puzzle 82

LINGUINE!

Alfredo has a recipe for pasta that he's written down, but he has left it somewhere. **Can you study the recipe for a minute, then cover it up and answer the questions on the opposite page?**

Bring a large pan full of water with a pinch of salt to the boil. Drop in 500g of linguine pasta and cook it for as long as the instructions tell you.

During that time, cut up 6 slices of parma ham and prepare the sauce: tip 30cl of single cream into a small pan with 60g of grated parmesan, the juice of half a lemon, salt and pepper. Five minutes before the pasta is cooked, heat up the mixture over a medium heat.

To finish, drain the pasta. Place it back in the pan, pour the sauce over and stir. Serve it straight away with the ham on top, and sprinkle all over with grated parmesan cheese.

How much linguine pasta does the recipe ask for?

.....

What five ingredients do you use for the sauce?

.....

What type of ham is used in this recipe?

.....

What should you sprinkle on top before serving?

.....

Puzzle 83

ANIMATED CLASSICS

Can you answer these questions?

1. Who assigns Jiminy Cricket as Pinocchio's conscience?
a Geppetto

HIROHAMADA

Puzzle 17

BABYSITTER DORY

The only way to split up the pupils following the two rules is to have none in the area furthest to the left, and then respectively 1, 2 and 4 in the following areas:

0 => 1 => 2 => 4

Puzzle 18

A MOUNTAIN OF NUMBERS

Puzzle 19

LET'S MAP PETER

There are **30** squares: one 4x4, four 3x3, nine 2x2, sixteen 1x1.

Puzzle 20

SMALL AS A FLOWER

The correct sequence is **3, 1, 2, 4**. $20 \times 4 = 80$; $80 - 10 = 70$; $70 / 2 = 35$; $35 + 30 = 65$. 65 inches = 5 feet and 5 inches.

Puzzle 21

TWO HEAVY SUMS

The sum of the six blocks is 21. Since 21 is an odd number, you can't divide it exactly by two, so the task seems impossible. But if you rotate your point of view, the 6 can turn into a 9! In this way you can put 3, 4 and 5 in one hand and 1, 2

and 9 in the other.
The sum of the numbers
in each hand is then **12**.

5. Captain Hook – *Peter Pan*
6. Mother Gothel – *Tangled*
7. Edgar – *The Aristocats*

Puzzle 41

IT'S TEATIME

Tweedledum's version is false, because if the Mad Hatter drank more cups than Alice, it means that he drank at least 4; these added to Alice's 3 and the White Rabbit's 3 make 10, but then there wouldn't even be 1 cup left for the March Hare to drink. So we know that **Tweedledee's version is true**. The Hatter therefore drank 3 cups and the March Hare 1. That leaves 6 cups, and we know that the White Rabbit drank 2 fewer than Alice. Therefore,

if there are a total of 6 cups left, the only possible solution is that Alice drank 4 cups and the White Rabbit 2. To sum up: the March Hare drank **1** cup of tea, the White Rabbit drank **2** cups, Alice drank **4** cups and the Mad Hatter drank **3** cups.

Puzzle 42
