Welcome to ballet school, where graceful dancers learn to leap, spin, and glide across the stage! Ballet is an exciting world full of practice, poise, and beautiful movements. From warm-ups to twirls, there's so much to discover!

In ballet school, dancers work hard to perfect each step, and their teachers guide them with care. Are you ready to join in and explore the wonderful world of ballet? Let's twirl into action with your stickers and bring the magic of dance to life!

Most ballet dancers start classes when they are just three years old.

Getting to class

It's time for ballet class, and the dancers are hurrying in with their shoes and leotards ready! Some students walk or cycle to class, while others ride in cars with their parents. Did you know many professional dancers practice every day? From the minute they step into the studio, the dancers are focused on learning new moves.

Pliés and Pirouettes

Now it's time for pliés and pirouettes! A plié is when dancers bend their knees gracefully, and a pirouette is a spinning turn. Dancers practice these moves until they are perfect!

Their teacher watches closely, offering corrections and encouragement. Ballet requires incredible discipline, but the dancers make it look effortless.
