

A lift-the-flap book

HELLO,
MR TIGER!

Sam Boughton

Meet the Spider Monkeys!
They swing through the trees
making lots of NOISE!

↑
OMNIVORE

(This means they eat
both plants and animals!)

They like to eat
fruits and nuts from
the trees.

Hello, Mrs
Spider Monkey!

They use
their tail like
another ARM!

Monkeys live in BIG
groups called TROUPS.

These are Blue Morpho Butterflies.
They are one of the **BIGGEST** butterflies
in the **WORLD!**

Their wingspan can be
20cm long. That's longer
than a BANANA!

HERBIVORE

They use their mouth like a
straw to drink their food!

Hello,
Mrs Butterfly!

It's night time in the jungle and
Anaconda has just woken up.

CARNIVORE

He's going out to
look for his dinner!

Anacondas live near rivers and
swamps and they love to swim.

Anacondas are VERY heavy.
They can weigh more than two pandas!

Hello,
Mr Anaconda!

Say hello to Sloth!

These hairy mammals love to hang upside down in the treetops.

Sloths only leave their tree every two weeks to go for a poop!

OMNIVORE

They have three long toes to hold on to branches.
