These slumbering sloths
love hanging around
in the tops of the trees,
so high off the ground.

Where's the sloth baby?
Does anyone know?
You've got time to look
because sloths are so slow!

These geese swim about
in the blue of the lake,
honking and splashing –
the noise that they make!

And paddling beside
her mum in the water
is a young gosling –
the goose's new daughter!

Hunting and creeping
through tall jungle trees,
these tigers' bold stripes
make them tricky to see.

But look once again
at these tigers, so wild,
and you'll see the one
with a small tiger child.

With trumpeting trunks
and thundering feet,
elephants march through
the still desert heat.

And right by his mum
with his skin just as grey,
is an elephant calf
who is running to play.
