There Are Amphibians Everywhere

WHERE DO AMPHIBIANS LIVE? SALAMANDERS Almost all salamanders live in the northern half of the world, with only about 30 species The place where an animal lives is called its habitat. Although amphibians like MOUNTAINS living south of the Equator. They are most common in North and Central America, to stay near watery habitats, they have been able to spread all across the world, Giant salamanders are the biggest amphibians in the world, and they can live for up to 50 years. The Japanese giant salamander lives in rocky, fast-flowing from dark caves to mountain streams and from lush tropical forests to hot, dry especially in forest habitats deserts. Some types even survive in dry habitats for most of the year but travel back to ponds to breed. FROGS AND TOADS Frogs and toads can be found all over the A STATE OF world, in in both cool and warm places. Their favourite habitats are in tropical areas where it is warm all year round and it rains Their Law WOODLAND most days. POLAR PLACES Brrr - it's too cold! There are no amphibians in rctic and just five species in the Arcti CAVES itats. forests or grasslands. From he Siberian wood frog has special chemicals Olms are salamanders that live in caves, where called antifreeze, in its blood to stop it from freezing in extreme cold. they swim in streams and hunt small animals to eat. They have pink skin and little legs. DRY GRASSLANDS bushveld rain frog lives in burrows beneath dry grasslands of southern Africa. It stays nes, when it pops out to fin DESERTS is hot and dry in the deserts of North America. where Couch's spadefoot frog lives. It copes with the heat by using its spade-like feet to dig a hole where It buries itself. It wraps itself in a cocoon made from ts own dead skin to stop it from drying out and wait PIVERS Cayenne caecilians have lungs, but they spend their lives in water. They use a Cayenn CAECILIANS Most caecilians live in most soil alongside streams, lakes and swamps, although a few species spend their whole lives in water. naddle-shaped tail to swim, like an oel VIII A ilians are found only in tropical areas of the world. PONDS POOLS AND MARSHES bathe on pond plants and dive into the water if they sense danger.
