

# Earthlings

In news that has rocked the scientific community, a mysterious report about planet Earth has been discovered. *Earthlings* is an account of human life on Earth - written by aliens.

- This book presents a snapshot of life on Earth - touching on everything from geography and climate change to culture and cuisine
- Packed with humour and detail - perfect for young readers to pore over.
- Bold, retro-inspired artwork and a stylish design makes this feel like a vintage classic

# Earthlings

### OFFSPRING

Like all other living creatures on the planet, Earthlings reproduce and have children.

**Earthlings and their children**

Earthlings have a lot of children. In fact, there are about 7 billion of them on Earth. They are all different colors and shapes. Some are tall and some are short. Some are smart and some are not so smart. But they are all Earthlings.

### HAIR

Earthlings can have hair on their heads and all over their bodies.

**Earthlings can have hair on their heads and all over their bodies.**

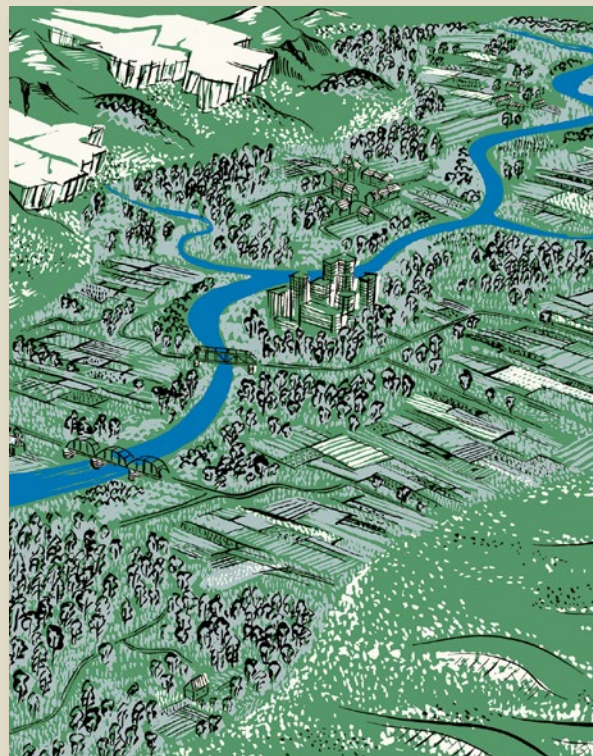

Some Earthlings have long hair, some have short hair, some have curly hair, some have straight hair, and some have no hair at all. Hair is made of a protein called keratin. It grows from the roots in the scalp. Hair is important for Earthlings because it helps them keep warm and cool.

### FROM LEFT TO RIGHT

Most Earthlings use their right hands for writing, eating or drinking, but some prefer to use their left. Some people are even ambidextrous and can use both hands.

Most Earthlings use their right hands for writing, eating or drinking, but some prefer to use their left. Some people are even ambidextrous and can use both hands.

### PLANET EARTH

Earth is a rather ordinary planet located on the outskirts of the Universe. Its inhabitants, known as Earthlings, hold a deep belief that their planet is exceptional.

**Earth is one of trillions of planets that exist in the Universe. It orbits around a star Earthlings call the Sun.**

JUPITER	EARTH	VENUS	SATURN
142,984 km	12,756 km	12,104 km	120,536 km
31.8 Earth radii	1 Earth radius	0.95 Earth radii	9.4 Earth radii
318 Earth masses	1 Earth mass	0.82 Earth masses	95 Earth masses
1.2 Earth years	1 Earth year	0.22 Earth years	29.5 Earth years
13 Earth days	1 Earth day	58 Earth days	9.5 Earth days
13 Earth hours	1 Earth hour	58 Earth hours	9.5 Earth hours
13 Earth minutes	1 Earth minute	58 Earth minutes	9.5 Earth minutes
13 Earth seconds	1 Earth second	58 Earth seconds	9.5 Earth seconds

**Earth isn't a particularly distinctive planet. It's one of the smaller bodies in its Solar System and is 11 times smaller than Jupiter.**

There are billions of Earth-like planets in the Universe. They are similar in size to Earth and all orbit their own stars, in the same way Earth orbits the Sun.

Pub Date	10/10/2024
Pub Price	£14.99
ISBN	9781800788763
H x W	300 x 235mm
Binding	Hardback
Age Range	7-9 years
Author	Druganoga
Extent	80pp
Word Count	9500 words
Rights Available	World English Language
