

All The Way Down: Amazon Rainforest

An ingenious exploration of our rainforests

- Each spread features colourful and eye-catching illustrations of different animal and plant species, plus easy-to-digest, bite-sized facts.
- Part of the All the Way Down series that takes a 'look down' approach at different ecosystems, from the animals that swoop across the tallest trees to the creatures that dwell near the bottom.
- Engaging STEM non-fiction book for aspiring conservationists and scientists aged 7-9 years old.

All The Way Down: Amazon Rainforest

HIGH FLYERS

THE EMERGENT LAYER OF THE AMAZON RAINFOREST IS HOME TO MANY SPECIES OF BIRDS. AT THIS LEVEL, THEY HAVE PLENTY OF SPACE TO ROAM THE FOREST, SWOOPING TO FEED ON PREY OR VEGETATION, AND THEIR NESTS ARE LESS VULNERABLE TO PREDATORS THAN THEY WOULD BE LOWER DOWN. THE APEX PREDATORS OF THIS LAYER ARE THE HARRY EAGLE AND THE WHITE-TAILED HAWK.

- 1 WHITE-TAILED HAWK** This bird of prey likes to hunt in the emergent layer, where there are fewer trees than below to hinder its flight. It hovers in its site, scanning its surroundings, before swooping for its prey. It eats small mammals and reptiles, as well as birds and insects.
- 2 SCARLET MACAW** These large, colourful parrots live in the emergent layer and upper canopy. Here they have the space to fly at speeds of up to 56 km/h (35 mph). They mostly fly alone or in pairs, but sometimes as a flock. They feed on fruits and seeds.
- 3 HARRY EAGLE** These huge, fearsome raptors have wingspans of up to 2 m (6.6 feet), and 13-cm (5 inch) claws - longer than a grizzly bear's. They soar high up in kapok trees and prey on sloths and monkeys, in addition to other mammals, reptiles and birds.
- 4 KING VULTURE** These large scavenging birds have very sharp eyesight. They perch in the topmost branches of the emergent layer and search for carrion (animal remains) below. If they see any, they swoop down in groups of up to twelve and push other scavengers aside to get at the food.
- 5 HUMMINGBIRD** This family of birds are amazing flyers. They can hover in mid-air, fly backwards and even upside down. Beating their wings at up to a 1000 times a second, they dart from flower to flower among the treetops of the emergent layer, drinking nectar and eating insects.
- 6 BLACK-AND-WHITE OWL** This bird of prey hunts at night for large insects, as well as bats, rodents, birds and tree frogs. It builds its nest in the emergent layer to protect its eggs and chicks from climbing predators.

Pub Date	28/04/2021
Pub Price	£9.99
ISBN	9781800788947
H x W	292 x 260mm
Binding	Paperback
Age Range	7-9 years
Author	Alex Woolf
Illustrator	Isobel Lundie
Extent	56pp
Word Count	11097 words
Rights Available	World
