

All The Way Down: Dinosaurs and Other Prehistoric Creatures

An ingenious exploration of the dinosaurs!

- An innovative information book that allows children to travel back in time to the time when dinosaurs ruled, discovering what life resides at each level.
- Special material includes a ruler running down the side of each spread keep track of the different depths.
- Engaging STEM-focused non-fiction book for dinosaur lovers aged 7-8 years old.

All The Way Down: Dinosaurs and Other Prehistoric Creatures

ON THE GROUND - HERBIVORES

THE FIRST DINOSAURS APPEARED AROUND 231 MILLION YEARS AGO. THEY WERE SMALL CREATURES DARTING AROUND ON THEIR HANDS. LESS THE DINOSAURS FORMED TWO MAIN GROUPS: THE SAGRISCHIA (LIZARD-HIPPED) AND THE ORNITHISCHIA (BIRD-HIPPED). BIRD-HIPPED DINOSAURS WERE MOSTLY PLANT-EATERS. LIZARD-HIPPED DINOSAURS INCLUDED BOTH MEAT-EATERS AND PLANT-EATERS.

1. **HYPERODAPTEON (LIVED: 231-227 MYA)**
This weird-looking animal is a kind of rhycolosaur - a beaked reptile related to the dinosaurs. It had a scaly body and moved slowly, using its beak to cut through tough plants.

2. **PISANGSAURUS (LIVED: 228-216 MYA)**
This small, lightly built plant-eater weighed less than 10 kg (22 lb). It had strong hind legs and could run away quickly if a predator came near. We don't know if it was a true dinosaur or a close cousin.

3. **AETOSAURUS (LIVED: 228-209 MYA)**
This small, slow-moving, plant-eating archosaur had a long, slender body and short arms. Four rows of thick, bony plates covered its body, providing good protection against predators.

4. **MUSSAURUS (LIVED: 215 MYA)**
'Moose Lizard' got its name because the first fossils discovered were tiny. We now know these were infants. It was a sauropodomorph dinosaur - a bipedal ancestor of the giant sauropods that walked on all fours.

5. **PLATEOSAURUS (LIVED: 214-204 MYA)**
Plateosaurs was one of the biggest dinosaurs of the Triassic and another sauropodomorph. It had a small head on a long, flexible neck, short but muscular arms with large claws on its three fingers, and powerful hind legs.

6. **ASYLOSIAURUS (LIVED: 208-201 MYA)**
was one of the last sauropodomorph dinosaurs to walk on its hind legs. Its close cousins, the sauropods, all walked on four legs.

Pub Date	28/07/2022
Pub Price	£9.99
ISBN	9781800789012
H x W	292 x 260mm
Binding	Paperback
Age Range	7-9 years
Author	Alex Woolf Alex Woolf
Illustrator	Isobel Lundie
Extent	56pp
Word Count	11030 words
