

ANIMAL  
HOMES

# OCEAN

NATASHA DURLEY

The ocean is enormous,  
so there is lots of space for  
plants and animals to live here.

At the bottom of the ocean,  
it is chilly and very dark. Can  
you spot the strange, squishy  
creatures swimming around?

In the darkness, there are fish glowing brightly...

waiting quietly for other fish to swim towards the light.

Watch out for SHARP, POINTY TEETH!

WICKETFISH

EEL

FOOTBALLFISH

STOPLIGHT LOOSEJAW FISH

Finally, there is a little bit of light. But it is still very dim and gloomy.

KRILL

SQUID

WHALE

Some animals swim here to find tasty food to eat.  
Who is that diving down from above?

DOLPHIN

Swimming up and up,  
it gets brighter  
and warmer.

MANTA RAY

TURTLE

This is the perfect place  
for most of the wonderful plants  
and animals that live in the ocean.

SHARK

OCTOPUS

Near the surface, it is very colourful. The coral reef is like a busy underwater town!

How many creatures can you spot on the reef?

CLOWNFISH

ANGELFISH

SEAHORSE

CRAB

STARFISH

ANEMONE

GULL

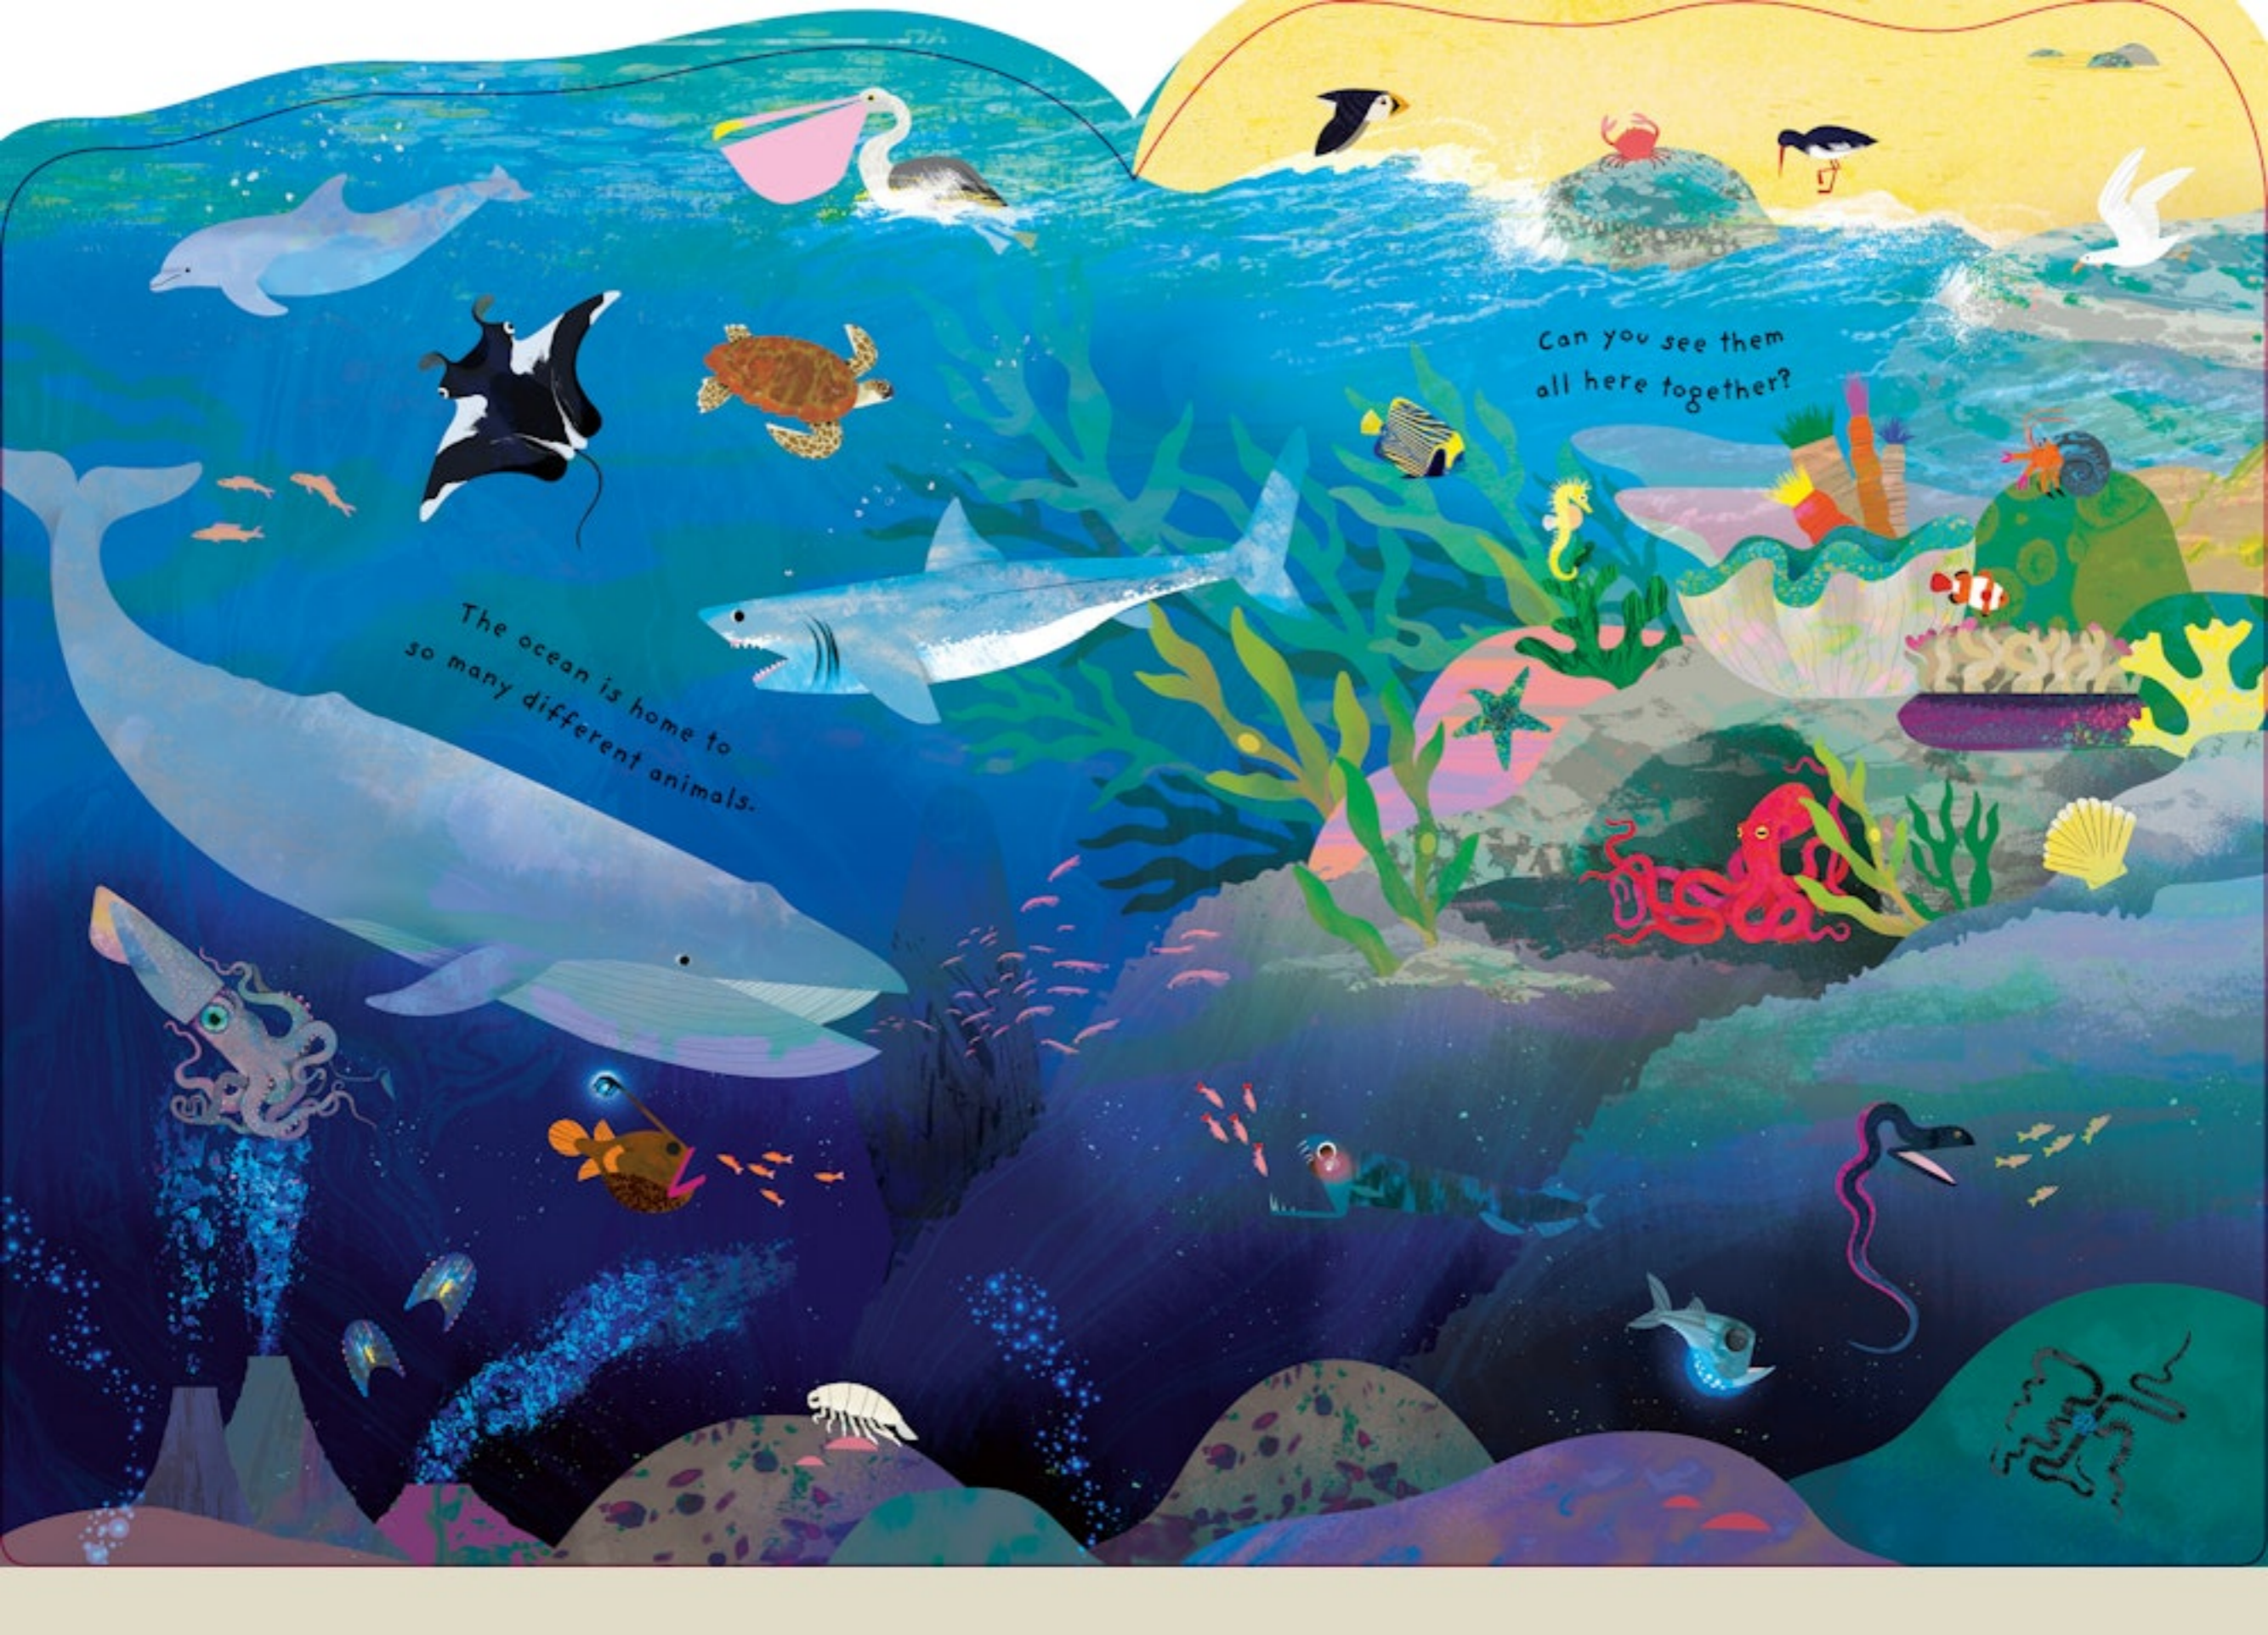

Above the rolling waves,  
lots of birds live on the seashore.

PELICAN

OYSTERCATCHER

Here you will see them **SWOOPING**  
in the sky and wading in the rock pools.

PUFFIN

The ocean is home to  
so many different animals.

Can you see them  
all here together?
