Anthology of Amazing Women

The awe-inspiring stories of 50 women from all around the world.

- Over 31,000 copies sold worldwide (as of September 2022)
- An inspiring introduction to women's history.
- The stories of 50 diverse women from all over the world.
- Quirky illustrations of all the amazing women and key objects from their amazing lives and careers.

Anthology of Amazing Women

WOMEN IN ART & DESIGN

Who knew who made the first painting? People always assume that was 'him' but just don't know, and most of these probably thought so even when we find out.

Although the age women have made us, even when they weren't supposed to, and sometimes when they were still very children. Take them and their work, all kinds of artists. They made their names in the world, and we can't help but be inspired by them. They made their names in the world, and we can't help but be inspired by them. They made their names in the world, and we can't help but be inspired by them.

ARTEMISIA GENTILESCI
Italy

One of the most accomplished painters of her time, Artemisia was a pioneer of Baroque art. She was the first woman to be elected to the Accademia di San Luca in Rome, and she was the first woman to be elected to the Accademia di San Luca in Rome.

OBI KATSUSHIKA
Japan

Oki Katsushika was the daughter of a famous traditional print artist who helped her to become a successful print artist in her own right. She was the first woman to be elected to the Accademia di San Luca in Rome.

MARY COLTER
USA

She was one of the only few female architects in the world to be elected to the American Institute of Architects. She was the first woman to be elected to the American Institute of Architects.

GUNNBORGA THE GOOD
Iceland

Gunnborga was the only woman to be elected to the Icelandic Parliament. She was the first woman to be elected to the Icelandic Parliament.

YOKO ONO
Japan

She had been a model and a singer before she became a peace activist. She was the first woman to be elected to the Japanese Parliament.

MARY QUANT
UK

She was the first woman to be elected to the House of Commons. She was the first woman to be elected to the House of Commons.

LEE MILLER

Lee Miller was a pioneer in the world of photography. She was the first woman to be elected to the Royal Society of Photography. She was the first woman to be elected to the Royal Society of Photography.

She was the first woman to be elected to the Royal Society of Photography. She was the first woman to be elected to the Royal Society of Photography.

GEORGIA O'KEEFE

Georgia O'Keeffe was a pioneer in the world of photography. She was the first woman to be elected to the Royal Society of Photography. She was the first woman to be elected to the Royal Society of Photography.

She was the first woman to be elected to the Royal Society of Photography. She was the first woman to be elected to the Royal Society of Photography.

FRIDA KAHLO

Frída celebrated her South American heritage by wearing traditional Tehuana dresses. She was the first woman to be elected to the Mexican Parliament. She was the first woman to be elected to the Mexican Parliament.

She was the first woman to be elected to the Mexican Parliament. She was the first woman to be elected to the Mexican Parliament.

FRIDA KAHLO

Frída Kahlo is one of the most recognizable artists of the twentieth century, not least because of her 143 paintings, 55 are self-portraits. "I am so often alone", she once said, "and I am the subject I know best."

Frída was born in 1907 in Coyoacán, a suburb of Mexico City. In 1925 she was nearly killed in a horrific bus crash. She suffered multiple fractures to her spine, collarbone, ribs, pelvis, and shoulder. From that day on, Frída was in constant pain and would endure over thirty operations in her short life. While in the hospital, Frída's father gave her some paints. Her mother made her a special easel so she could work lying down and rigged up a mirror so she had a subject - herself. In art, Frída found her voice, a way of expressing her psychological and physical wounds. She used symbolism to describe her distress: perhaps scissors, surrounded by her own fallen hair, or a broken heart lying at her feet. In other work she depicts herself more than once, showing different aspects of her personality. Some were shocked at the frankness with which she bared her soul; most found it exhilarating.

Oddly, during her lifetime, Frída was often talked of as the wife of the famous mural artist Diego Rivera. Today, he is remembered as Frída's husband! Their relationship was stormy and passionate. They once even divorced but remarried a year later. Everything she felt and experienced was poured into her work. The torment of her broken body after the bus crash became a painting called *The Broken Column*, referring to her own spine. Frída partly wore her colourful, embroidered Tehuana dresses to disguise her limp, but traditional attire was also a way of exploring her place in the history of South America.

Her first solo exhibition, in New York, 1935, was a huge success, and the Louvre in Paris bought one of her paintings the year after. Frída was internationally famous. She became a professor at La Esmeralda school of art but by now she was so sick she had to hold classes at home. She attended the opening of her first and only solo exhibition in Mexico in her bed.

Against the advice of her doctors, Frída, who had always been politically active, attended a demonstration, weakening her beyond repair. She died in 1954, in the house in which she had been born.

"They thought I was a surrealist but I wasn't. I never painted dreams, I painted my own reality."

Our Time on Earth

This book about animal life cycles is a celebration of creatures big and small.

- **WINNER of the Association for Science Education Award 2022**
- Sample contents: Mayfly; Honey Bee; Monarch Butterfly; Opossum; Etruscan Shrew; Giant Pacific Octopus; Axolotl; Trapdoor Spider; Grizzly Bear; Brandt's Bat; Orangutan; Laysan Albatross; African Elephant; Saltwater Crocodiles; American Lobster; Galapagos Giant Tortoise; Bowhead Whale; Greenland Shark; Immortal Jellyfish
- Consulted by wildlife cameraman and producer Fredi Devas, who has worked on David Attenborough's One Planet: Seven Worlds BBC series.
- Discover creatures who are born within a day of their mothers, or others who stay infantile for almost one hundred years.

A stunningly illustrated tribute for train lovers of all ages, celebrating the ingenuity of trains past, present and future.

- Sample contents: The First Railways; Steam Locomotions; The Ffestiniog Railway; The Orient Express; Freight Trains; The Baikonur Cosmodrome; Mail by Rail; The California Zephyr; Mountain Railways; The Darjeeling Himalayan Railway; Trams; Sky Lines; Railways At War; The Princess Christian; High-speed Rail; The Shinkansen
- Beautiful artwork by multi award-winning artist Ryo Takemasa
- Stunning journey through the history of locomotives, suitable for all ages
- Expertly written by railway historian, Alastair Steele

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

Protest art often makes use of symbols, which can quickly convey powerful meaning.

SYMBOLISM

Paper Cranes
In Japan, it is believed that someone who folds 1,000 origami cranes will be granted a wish. In 1945, two-year-old Sadako Sasaki was in the vicinity of the atomic bomb dropped on Hiroshima. She suffered long-term effects from that exposure, including developing leukaemia. Before she died at the age of 12, Sadako folded more than 1,000 cranes, and the paper crane went on to become a symbol of peace.

The Peace Sign
The peace sign was created by the British artist Gerald Holtom in 1958 as the logo for a campaign for nuclear disarmament in the UK. It has since become an iconic symbol of calls for peace.

Umbrellas
During protests for democracy in Hong Kong in 2014, activists used umbrellas as shields against tear gas and other aggressions by the police. The umbrellas came to symbolize the protests and gave the movement its name (read more on pages 52-53).

The Clenched Fist
The image of an upraised clenched fist is a powerful symbol of protest and resistance. Some of its first uses were by labour unions in the early 1900s, before it grew in popularity and became a symbol of many causes, including Black Power, the anti-apartheid movement and the feminist movement.

The Rainbow
The rainbow is the most iconic symbol of the LGBTQ+ movement. It represents diversity, acceptance and the spectrum of human sexualities and genders.

Gorgeous canines of every shape, size and colour bound through this book - all 101 of them!

- The perfect gift for dog lovers big and small
- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

Basenji

In the native Africa, the Basenji is known as 'the dog that doesn't bark'. While many dogs are often said to be 'sage to please', that just doesn't apply to this one. It is lively, imaginative and playful, but it does have a stubborn streak. The Basenji will usually follow what you want to teach it, but whether it will obey your commands depends entirely on its mood. That impertinent mind can be a problem, too, as anything you have going around is likely to be investigated by your Basenji – usually by means of chewing. All that said, the Basenji makes a lovely pet as it adores people and playtime.

Life Expectancy 12-15 years | Height 45-50cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Tibetan Mastiff

If you look like a giant teddy bear but this mighty mastiff is not the dog for everyone. While it has a gentle and loving nature, its sheer size can be a bit off-putting, and it is strong-willed. The Tibetan Mastiff sees itself as an equal, rather than a pet, and can be very stubborn. It is thought these amazing dogs lived in Tibet thousands of years ago and were used as guards (not many people would stand up to a 60kg dog) for monks, known as 'lamas'. This is where they developed their thick coat to cope with the harsh climate.

Life Expectancy 10-14 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but doesn't shed much | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I can get up there!

Shiba Inu

The resident of its dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. But it's like a little single warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, *harae* (upright backbone), *oyasoi* (good nature) and *ishiki* (stoicism). It also tends to be possessive – like a nosey toddler, the Shiba Inu doesn't like to share and if it could spare, it's first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

Life Expectancy 12-15 years | Height 40-45cm | Trainability It has a stubborn streak | Grooming Very little | Exercise Needs a good daily routine | Most likely to say I'll be on your side | Least likely to say I'll be on your side | Least likely to say I'll be on your side

Parash Hound

This elegant hound was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Parash loves people and simply loves life. It's a natural clown – you can even teach a Parash to 'roll' and it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting hound, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

Life Expectancy 12-15 years | Height 50-60cm | Trainability Easy | Grooming Very little | Exercise Needs a lot of exercise | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Saluki

Praised by the travelling people of the Middle East, this ancient breed is thought to take its name from the Arabian city of Sals. To the Greeks, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their heads had to be fast of foot. There were once two different types of Saluki – short and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging...

Life Expectancy 12-15 years | Height 60-70cm | Trainability Average | Grooming Weekly brushing | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Alaskan Malamute

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahomet people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored – and a bored Malamute is trouble in waiting. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

Life Expectancy 10-12 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but sheds a lot | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Tibetan Spaniel

This little dog likes to climb! Almost cat-like, it will try to find the highest perch from which it can watch over everyone and everything. Resembling a small lion (a powerful symbol in Tibet), it was highly prized as a watchdog. This watchful quality has been bred into the Tibetan Spaniel for thousands of years and it takes its role very seriously – don't even think about farting and blaming it on someone else in its presence! But don't expect your dog to be happy on its own. Tibetan Spaniels like company and get bored quickly – left to themselves they are likely to bark.

Life Expectancy 12-15 years | Height 25cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Afghan Hound

With its slender, exotic face, long silky hair and lithe body, the Afghan Hound is surely the supermodel of the dog world. And as well as being one of the most beautiful breeds in the world, the Afghan is possibly the oldest. It comes from Afghanistan, where it was known as the Tazi, and was used to hunt dangerous animals, such as leopards. It was not only brave, but also extremely fast, capable of running at speed for many kilometres. Its independent nature means it does like attention, but on its own terms.

Life Expectancy 10-12 years | Height 60-66cm | Trainability This independent mind can be challenging | Grooming Lots of brushing | Exercise It needs plenty of room to move | Most likely to say Look how beautiful I am! | Least likely to say Give me a cuddle

From Cells to Ourselves

From the Big Bang to the abundance of life that surrounds us today, this beautiful book is the story of evolution, from the very first cells to ourselves.

- The third title in the *Balloon to the Moon* series, which won the 12-16 category in the British Book Design and Production Awards 2019
- A wonderful combination of mythology, science and history that takes readers on a journey through one of the most fascinating subjects in natural history
- Gill Arbutnott is a former secondary school science teacher.
- Cover treatments: 100% foil, uncoated varnish

From Cells to Ourselves

HOW DID LIFE BEGIN?

THE 1920s American chemist Stanley Miller and British physicist James Watson conducted the first experiment to simulate the conditions of the early Earth. They used a mixture of gases and water vapor to create a 'primordial soup' from which life might have emerged.

THE 1950s British scientist Francis Crick and American physicist James Watson discovered the structure of DNA, the molecule that carries the genetic code.

THE 1960s American biologist Lynn Margulis and British microbiologist George Odling-Smee proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that became part of a larger cell.

THE 1970s American biologist James Watson and British physicist Francis Crick discovered the structure of DNA, the molecule that carries the genetic code.

THE 1980s American biologist Lynn Margulis and British microbiologist George Odling-Smee proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that became part of a larger cell.

THE 1990s American biologist James Watson and British physicist Francis Crick discovered the structure of DNA, the molecule that carries the genetic code.

THE 2000s American biologist Lynn Margulis and British microbiologist George Odling-Smee proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that became part of a larger cell.

THE 2010s American biologist James Watson and British physicist Francis Crick discovered the structure of DNA, the molecule that carries the genetic code.

THE 2020s American biologist Lynn Margulis and British microbiologist George Odling-Smee proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that became part of a larger cell.

THE DINOSAUR DETECTIVES

In the 19th century, scientists discovered, investigated and named many species of dinosaurs. But for a long time, these dinosaurs remained hidden.

MARY ANNING (1799-1847) was a fossil collector in Lyme Regis, Dorset. She discovered the first Ichthyosaurus fossil in 1830. Her discovery led to the discovery of the first pterosaur fossil in 1830.

WILLIAM BUCKLAND (1784-1861) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. His discovery led to the discovery of the first dinosaur fossil in 1824.

RICHARD OWEN (1804-1892) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. His discovery led to the discovery of the first dinosaur fossil in 1824.

OSBORN MARTELL (1790-1852) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. His discovery led to the discovery of the first dinosaur fossil in 1824.

THE GREAT OXFORD RIVALRY was a competition between two paleontologists, Richard Owen and Thomas Huxley, to discover the first dinosaur fossil. Owen discovered the first dinosaur fossil in 1824, while Huxley discovered the first dinosaur fossil in 1824.

THE END OF THE DINOSAUR AGE

For a long time, people believed that the dinosaurs were a separate group from the other animals that lived on Earth. But in the 19th century, scientists discovered that dinosaurs were actually a group of animals that lived on Earth.

THE 19th century scientists discovered that dinosaurs were a group of animals that lived on Earth. They discovered that dinosaurs were a group of animals that lived on Earth.

THE 20th century scientists discovered that dinosaurs were a group of animals that lived on Earth. They discovered that dinosaurs were a group of animals that lived on Earth.

THE 21st century scientists discovered that dinosaurs were a group of animals that lived on Earth. They discovered that dinosaurs were a group of animals that lived on Earth.

EARLY IDEAS ABOUT EVOLUTION

How long is a million seconds? Have you been alive for one billion seconds? What was happening a million days ago? We find it very difficult to comprehend these huge numbers. If we don't have a feel for how long a million seconds is, how can we possibly comprehend time spans of millions or billions of years? This is one reason why some people have a problem with evolution. The idea that single, primitive cells evolved into all the species that have ever lived seems incredible, unless you get to grips with the timespans involved.

In ancient Greece, philosopher Anaximander suggested that one type of animal could change into another, while Empedocles thought that new types of living things could be made from a range of parts that already existed.

There's NO WAY he's getting two elephants on that boat.

Zam, I've gotting two elephants on that boat.

The naturalist George-Louis Leclerc proposed a way for the Earth to have formed from debris in space. Although he believed in spontaneous generation, he thought that animals could change as they migrated to different conditions. This later explains the discovery of elephant fossils in North America, and mammoth fossils in Siberia, although living elephants are today only found in Africa and South Asia. He suggested the American ones had become extinct, while the mammoths had changed as they migrated south.

I've got it!

Erasmus Darwin was Charles Darwin's grandfather. He was a doctor, poet and naturalist, and in his book Zoonomia, or 'The Laws of Organic Life' he was one of the first people to propose a theory of evolution. He never hit on the idea of natural selection, but did recognise the importance of sexual selection (see page 59) and realised it could cause changes in species.

GRADUAL CHANGES

In the early 1800s Jean-Baptiste Lamarck, inventor of the terms 'invertebrate' and 'biology', was the first person to develop a coherent theory of the development of life on Earth and its evolution. He believed that life had originated by spontaneous generation, rather than creation by deity, and had then become more complex and varied over many generations. Lamarck suggested how this could happen. His idea is often called the 'Theory of Evolution by Acquired Characteristics'. In simple terms, he thought that the more an animal used an organ during its lifetime, the more well-developed it would become and that these changes could be inherited by offspring if both parents had the same developments.

THE EVOLUTION OF THE GIRAFFE'S NECK, ACCORDING TO LAMARCK:

- 1) Early giraffes had short necks.
- 2) Giraffes reach upward to graze on leaves.
- 3) This stretches their necks very slightly over their lifetimes.
- 4) The next generation of giraffes inherits these slightly longer necks.
- 5) This process is repeated over many generations until we arrive at modern, long-necked giraffes. Lamarck was not suggesting that their necks suddenly shoot out like telescopic poles!

THE PROCESS ALSO WORKED THE OTHER WAY:

- 1) Early penguins had wings with which they could fly.
- 2) Penguins spend most of their time swimming and very little flying.
- 3) Their wings become smaller, with smaller feathers, from lack of flying.
- 4) The next generation of penguins inherits these smaller, more flipper-like wings.
- 5) This process is repeated over many generations until we arrive at the modern penguin, which can no longer fly and whose wings are now adapted to help it swim instead.

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- Sample contents: The First Prosthetics, Jack E. Steele - Father of Bionics, Arne Larsson - The First Pacemaker Patient, How Cochlear Implants Work, Eye Replacements, Keith Hayman - The First Bionic Eye, How Bionic Limbs Work, Campbell Aird - The First Prosthetic Arm, Exoskeletons, Neural Implants, The Paralympics, Neil Harbisson - The First Cyborg, Ethics
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- As told by UK Sepsis Ambassador Patrick TJ Kane
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics

New materials have allowed frames for glasses to become lighter and more durable. The colour of lenses has changed too, creating the first purpose-built sunglasses. These work by adding cerium oxide (a type of chemical compound) into the glass to filter out harmful ultraviolet light from the sun. Sunglasses quickly became fashionable, and in 1938, it was reported that 20 million sunglasses had been sold the year before in the US. Interestingly, only a quarter of those people needed sunglasses for medical reasons. This development is an example of a product that was initially designed to benefit a few but ended up benefitting many. It is testament to the importance of innovation within the disabled community.

Tales of the Damned

An anthology of terrifying tales from around the world.

- Stories will be broken up with a series of 'theme' spreads, which will add a non-fiction element to the book. These spreads cover everything from the rise of the horror genre to famous monsters and vampire mass hysteria.
- There's a gap in the market for striking, beautifully illustrated horror anthology.
- Contents: The Mask of Red Death by Edgar Allen Poe; Edgar Allen Poe and the Birth of Horror Literature (NF); Dracula; Vampire Mass Hysteria (NF); The Monkey's Paw; Zombies and the Undead (NF); Red Riding Hood; The Original Dark Fairy Stories (NF); Frankenstein; Mary Shelley and the impact of Frankenstein (NF); Whistle and I'll Come To You; Ghosts and the Victorians (NF); Baba Yaga; Witches (NF); Bluebeard; Blood and Gore (NF)

The Ever-changing Earth

A spell-binding journey through the evolution of planet Earth

- Previous books from Grahame published by Templar include the Greenaway shortlisted *Leon and the Place Between*, *FARThER* which won the Kate Greenaway medal in 2011, and the first title in this series; *The Rhythm of the Rain* which won the English 4-11 Picture Book Awards.
- *The Rhythm of the Rain* has sold over 83,000 copies worldwide (as of July 2022)
- Narrative non-fiction that follows an extraordinary journey across planet Earth
- The fourth title in Grahame's *Elements* series will be published in 2024 - *The Flickering Fires*.

Automotive celebrates the ingenuity and usability of cars, trucks and motorbikes past, present and future.

- Sample contents: Steam and Electric Automobiles, Early Engines, Monte Carlo Rally, Mass Production, Motorways, Motorbikes, Isle of Man TT, Daytona 500, Concept Cars, History of Formula One, Iconic Bridges, Trucks and Road Trains, Monster Truck Races, Hot Rods, Drag Races, Special Cars, Cars in War, The Future of the Automobile
- The follow-up title to the stunning *Locomotive*
- Perfect for car lovers of all ages
- Super cool artwork by award-winning artist Ryo Takemasa

STEAM AND ELECTRIC AUTOMOBILES

Since their invention in the early 1800s, steam locomotives revolutionised the way people and freight were transported. However, some travellers wanted a more convenient vehicle that they didn't have to share and could use whenever they wanted. Some engineers created small, steam-powered road vehicles, while others decided to try electric battery automobiles. Many designs were created, but by the early 20th century it was clear that the internal combustion engine was going to be king of the road.

The first steam-powered road vehicle was designed by English inventor Richard Trevithick. Using a high-pressure boiler for more power, his Puffing Devil set off with six passengers in 1801 at a speed described by one witness as "faster than I could walk" (about 6km/h). Unfortunately, only a few days after this historic journey, the boiler caught fire and Puffing Devil was destroyed.

Electric cars were very popular in Europe and the USA from the late 1800s to the early 1900s. They were quieter and smoother, didn't produce smoke and were easier to use than steam-powered automobiles. One of the first successful models was the Flocken Elektrowagen. Designed in Germany in 1888, its 1hp electric motor drove the back wheels and could reach around 16km/h.

One of the last and most advanced steam automobiles was the Doble steam car. Designed in 1924, the Doble Model E only required 30 seconds to boil the water needed to drive the engine, was easy to control and could reach speeds as high as 120km/h.

EARLY ENGINES

The age of the automobile really began with the invention of the internal combustion engine. When fuels such as petrol, diesel or kerosene are burned (or 'combusted') inside the engine (using an oxidizer such as air), they produce kinetic energy, which makes the vehicle move. Internal combustion engines are more fuel-efficient than steam engines, and proved far easier and more convenient to start-up, operate and maintain.

German inventor Karl Benz developed the first automobile powered by an internal combustion engine in 1885. His revolutionary Motorwagen had a 5hp petrol engine, three-spoked wheels with solid rubber tyres and one forward gear. Its top speed was around 16km/h.

The first mass-produced car was the Oldsmobile Model R Curved Dash, 19,000 were built between 1901 and 1907. It was more affordable than most other cars at the time, had a 5hp engine, 2 forward and 1 reverse gear and came as either a 2-seater 'runabout' or a 4-seater family car.

Created in 1901 by German engineers Paul Daimler and Wilhelm Maybach as a racing car, the Mercedes 35 HP was a huge step forward in automobile design. It had a powerful petrol engine mounted at the front that drove the back wheels, a hand brake and a foot brake, 4 forward gears and 1 reverse gear.

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Ancient Love Stories

THE SACRED BAND OF THEBES

This was the final meeting place of the Sacred Band of Thebes, one of the most remarkable and most loyal armies that had ever lived. A bold experiment in an open town square by attacking war and heroes alike, who had died fighting for the freedom of the Greeks. As warriors, not just of soldiers, but of a hundred and fifty noble boys.

Born together by love loyalty to each other, the crack team of warriors was founded in Thebes in 378 BC by an extraordinary visionary by the name of Pausanias. It began as a resistance corps against the looming military power of Sparta (recovered the world over for its legendary military prowess across the continent to the south. These were chivalry, aristocratic, open, splashing blood across the pages of history, and well suited to the birth of a new kind of army.

HERODIAS AND ANTHOCHUS

This party first occurred over years earlier, when Herodias - ruler of the Roman world and self-proclaimed priestess - took a summer jaunt across the Roman province of Bithynia, in northern Turkey, where Antiochus had his home. The emperor, busy with his job, probably did not spot Antiochus among the crowd of adoring subjects and eager petitioners. But one of his maids did - and, as usual, with an eye to the emperor's taste, spent a night in the maids' quarters, the kitchen-baked young man. Antiochus was duly offered a dinner invitation to the palace's imperial suite along with a tuition package to the emperor's personal academy in Rome. To his boy from a dusty village on the fringe of the Roman empire, this must have seemed an offer too good to be true - a one-way ticket to live among the stars. But, in any good student of mythology would have known, by invitation to dinner and you might get burned.

Antiochus' rise to the top was meteoric even by Roman standards, where there were plenty of holy emperors who made it to the big time. Set among the other staff of the imperial household, Antiochus - handsome, good-looking, smart, with a magnetic personality and a nose for the emperor's favored boys - quickly caught the emperor's eye. Herodias was instantly besotted, and Antiochus became his pet. In the summer of 100 BC, at the age of seventeen, Antiochus was personally selected to accompany Herodias on a tour of Greece (Herodias was a notorious Greek sympathizer, then said - Asia Minor and, finally, Egypt.

It was clear to everyone that Herodias was willing to let Antiochus out of his sight - and together, they took part in many extraordinary experiences over their around-the-world trip. A night-long dip into mystical waters at the Thracian Mountain of Ganga. A bath house built in the highlands of Asia Minor. A quest - about the searching out of Herodias' much-loved Greek mythology books - to take down a mountain lion that had been terrorizing the people of Licia. On all these adventures, the new obsession with each other grew steadily.

MARK ANTONY AND CLEOPATRA

The story of Mark Antony and Cleopatra is one of the most famous love stories of all time. A tale of passion, seduction, and tragedy that has inspired countless artists, writers, and filmmakers. The great love affair of Rome. A love story which has moved the hearts of men as far as the ends of the earth, even showing millions of hearts over a new body of playwriting to the great world.

It all started when Julius Caesar, one of the great Roman Emperors, fell in love with the famous Mark Antony. One day, over an Egyptian feast, he met the beautiful Cleopatra, the most beautiful woman in the world. The first time they met, she was a young girl, just a few years old. Her father, Ptolemy, was a powerful man, and he had a lot of money. He was a very important man in the world, and he had a lot of power. He was a very important man in the world, and he had a lot of power. He was a very important man in the world, and he had a lot of power.

At the time, the mighty empire was about to reach its dazzling zenith. The last Ptolemy emperor, the three-year-old Ptolemy, had married a young girl, his daughter, the beautiful Cleopatra, but she was only a few years old. She was a very beautiful girl, and she was very smart. She was a very beautiful girl, and she was very smart. She was a very beautiful girl, and she was very smart.

MARK ANTONY AND CLEOPATRA

wafted by attendants dressed as cupids and sea-nymphs: Cleopatra, Ruler of Egypt. Goddess of the Nile. Queen of one of the wealthiest countries in the world. Beautiful, certainly, at just twenty eight, but more than anything, utterly, alluringly certain of her star-quality charisma. As one writer put it, "her sex appeal, together with her powers of persuasion and her ability to charm all around her, made her simply, irresistibly desirable." This was who had come to call on Mark Antony, one of the most powerful men in Rome (and so, at that time, the world). Antony was a soldier, a devotee of the wine-god Dionysus, a playboy extraordinaire - a man, in other words, who lived life in vivid technicolour.

If anyone was going to make Rome's fun-loving general pay attention, it was going to be the young queen sailing towards him dressed in gold.

But there was more to this than just sex appeal. For Antony, vying to hold onto his position of power amidst the remains of the crumbling Roman Republic, Cleopatra meant Egypt, and Egypt meant two things: grain and gold. Both were essential to fund (and feed) his battle for world domination. For Cleopatra, Antony meant Rome's backing for her precarious hold on power back home, following a decade of civil war, during which the young queen had gone into exile and returned with an army to take the throne from her brother. No meeting could be more important for either of them. It was a moment well worth a bit of theatre, not to mention a spot of role play.

The Little Gardener's Handbook

A vibrant introduction to gardening.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

The Little Gardener's Handbook

ALL ABOUT SOIL

Soil is the brown earth that plants grow in and it plays a very important role in supporting life on our planet. The best way to keep your plants happy is to take care of their soil!

Check a seed has sprouted, the soil helps to anchor the plant's roots in the ground. From here, the roots can absorb water, nutrients and minerals from the soil that help the plant to grow.

Soil is teeming with life. Did you know that there are more living things in a handful of soil than there are humans on earth? Look for all of these tiny organisms such as worms, fungi, insects and bacteria.

These organisms have special functions. Worms, for example, are little underground diggers. As they dig, they stir up what they have eaten, which is a valuable kind of food for the soil.

GET TO KNOW YOUR SOIL

Soil is not just dirt. It's a mix of organic matter, like, like, moisture and air. As a gardener, it's important to get to know your soil. If a plant is from a warm part of the world and you're growing it in a cool soil, it won't be happy! Similarly, a plant from a damp area won't like to grow in a sandy soil.

1. Bring a shovel from pages 10-11. Collect a soil sample from your garden. Cut it to a depth of 10cm, because any bigger bits, like twigs or stones, could mess up your test.
2. Next, get 100g of water and put the soil in a jar. Shake it up for 24 hours to settle.
3. You should now be able to see the different layers of your soil. The amount of soil in different layers and the texture when you touch it, tells you a lot about it. Use the table to help you.

GARDEN FOES

Sometimes your garden might be visited by some not so welcome wildlife visitors - something that eats through your plants and other things made of hard work. Rather than using harmful chemical pesticides, there are some natural ways you can discourage any unwanted visitors to your garden.

ENCOURAGE BENEFICIAL ANIMALS

You can encourage beneficial creatures naturally by encouraging beneficial visitors such as ladybirds, bees, hoverflies, birds and frogs in your garden. The planting of flowers that attract these insects, making a bug hotel or adding a bird bath.

PEST REPELLENTS

To repel insects, you can make your own natural repellents using a mixture of water, garlic, onion and chili.

PROTECT PLANTS

Use netting to protect plants from birds and other pests.

KEEP AN EYE OUT FOR PESTS

Slugs and snails can eat a whole batch of seedlings overnight. You can try adding a slug slug to your garden. Remember to check your plants every day for signs of pests - gently washing them and watering them in another part of your garden.

RAVENS ARE ON THE LOOSE!

They are very noisy and can be very destructive to your plants. They are also very smart and can be very difficult to catch. They are also very smart and can be very difficult to catch.

PLANTS THAT HELP OTHER PLANTS

Did you know that certain plants can help other plants grow? Some plants can help other plants grow by releasing chemicals that repel pests. Others can attract beneficial insects that help other plants grow.

GROW CUPS OF NASTURTIUMS

Did you know that you can eat the petals from certain flowers? Nasturtiums are bright and colourful, and they have a little peppery taste. You can add them to a salad for a burst of extra flavour.

YOU WILL NEED:

- Old cups or tins
- Water
- Nasturtium seeds
- Wool

1. In the bottom of each cup, add a layer of gravel. This is to allow the water to drain away from the roots because the cups do not have any drainage holes.
2. Fill each cup with compost.
3. Place a couple of holes in the compost and drop in the seeds.
4. Cover with a little extra compost and add water to the cups and to the water tank above each cup.
5. After a week or two, the seeds will start to grow. When they are about 5cm tall, they can be eaten. They are best eaten raw.
6. In a few more weeks, flowers will appear. You can harvest them whenever you like. If you do on the plants, cut and place them off with a scissors. They will grow again.

WELCOME TO THE WONDERFUL WORLD OF GARDENING!

Whether you have a big garden or a small windowsill, you can make the world a greener place. Gardening is one of the best hobbies in the world and it's good for you, your neighbourhood and our planet! People have been gardening in one way or another for thousands of years, so you will be continuing a very long and important tradition.

In this book, you'll learn about how plants work, how to grow your own vegetables, how to encourage wildlife to your garden and why protecting plants is important for our lovely planet. Along the way, there will be plenty of activities and experiments for you to try for yourself - mostly using everyday materials you can find at home.

What are you waiting for? Let's begin!

The General

Michael Foreman's debut picture book, first published in 1961, is reproduced in all its glory.

- Over 60 years since its first publication, this story about a tyrannical ruler who finds beauty in peace and manages to convince other world leaders to put down their guns and smell the flowers is as relevant now as it was then.
- The first book ever illustrated by the exceptional Michael Foreman OBE, one of the UK's best-loved and most prolific creators in children's books.
- Beautifully restored and reproduced, a children's book classic which will be treasured for generations to come.

The General

He heard the birds singing. All at once the General came upon a field of beautiful flowers. Never had he seen such a wonderful sight. There were more kinds of flowers than he had ever imagined, and more colours than any other had ever dreamed of.

General Jodhpur went upon all for a few minutes, and then he slowly walked across the field and sat down in the middle of the flowers. He watched the bees buzzing in and out, searching the pollen to make honey. He thought that one would be sure to land on his nose, but the bees were far too busy to notice even a famous general.

He knew that he and his soldiers must have scattered over thousands of beautiful flowers, and delighted small animals every time. "I will never harm or frighten anything again," he said. "I will try to help the animals and treat the flowers and plants and all other things the same."

In the evening he told his soldiers that he wanted them to leave the army and return to their homes and jobs, and to help him make their country the most beautiful in the world. Everyone was so happy. The soldiers were even happier than General Jodhpur.

General Jodhpur was very excited by all that was happening. When he visited his men to see how their work was progressing, and he did this every day - they were glad to see him.

His name was General Jodhpur. He wanted to be the most famous general in the world and to have his army admired by generals from all the other countries. And so he kept his soldiers busy cleaning their weapons, pressing their uniforms, and polishing their badges and boots.

Every morning very early, as soon as the sun was up, the soldiers had to be out on the parade grounds smartly dressed ready to practise marching.

When they had finished marching, the soldiers divided into several groups. The cooks went to the kitchens to prepare the meals. The cavalry went to the stables to groom and feed the horses.

Match the Colour

A first words book that's also a shape-sorter!

- An innovative board book design that lets toddlers place three chunky shapes into matching slots. Three shapes attach to the book via ribbon and feature 6 bright colours.
- A die-cut in the cover showcases the novelty and keeps the pieces securely in place when the book is shelved.
- Matching the colours aids children in their fine motor skills, hand-eye co-ordination and problem-solving skills.
- Introduces familiar first words on every spread.
- Illustrated in vivid colour and effortless style by Polish artist Susie Hammer.
- Also in the series: Match the Shape (2025).

Oh No, Flo!

A fantastically funny farmyard fiasco to read aloud!

- Taking recognisable and familiar farm animal characters to create a funny and fresh picture book for the very young.
- Featuring bold and bright illustrations from Mike Byrne, well-known for *This Book is Full of Unicorns*.
- Catherine Cawthorne is fresh to the picture book world but is already making her mark with: *We Went to Find a Woolly Mammoth* (Hachette, 2023) and *The Big Bad Wolf Investigates: Fairy Tales* (Bloomsbury, 2024).
- The light-hearted text and repeated 'OH NO, FLO!' refrain to join in with, makes it the perfect book to share with a group or individual child.
- Cover treatments: matt lam and SPUV.

A hilarious rhyming romp that perfectly encapsulates how being HANGRY really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

Bessie's Bees

An uplifting story about starting nursery with a courageous neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list, allowing us to grow our range of underrepresented voices and experiences.
- While there has been an increase in positive representations and neurodiverse voices in middle-grade fiction, this is yet to be seen in the trade picture book market. Templar can be one of the first to champion neurodiverse voices and stories in this space.

When a little boy refuses to tidy his room, his mess has dire consequences ...

- A topical story about looking after our world
- A subtle way of introducing complex and difficult subjects
- Pollution and climate changes are themes which are globally relevant
- Demand for picture books with strong messages
- A serious message conveyed in a fun and silly way.

Mythical Tales

A magical treasury of mythical tales.

- A timeless treasury that speaks to all ages, following on from the success of *Star Stories* (2018), *Winter Tales* (2020), *Enchanted Tales* (2023) and *Nature Tales* (2024)
- *Star Stories* sold into 12 territories, *Winter Tales* has sold into 18 territories and *Enchanted Tales* has sold into 11 territories.
- With universal appeal, this collection of stories includes stories from cultures on every continent.
- Cover finishes: arlin and foil

Under the Starlit Sky

This beautifully illustrated book takes readers on a journey from the roots to the canopy of a majestic old oak tree, right in the heart of Europe's most ancient forest ... with a huge fold-out surprise on the final spread.

- The follow up title to the beautiful *Up in the Canopy*
- As told by real life explorer and tree climber, James Aldred (winner of the 2022 Wainwright Prize for Non-Fiction)
- Illustrated by award-winning duo *Good Wives and Warriors*.

Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months
