- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

# 101 Dogs

## Japanese Chin

In Japan, the Chin was regarded not as a dog (inu) but as a separate being (shishi), bred to have a higher status among dogs and ideal for noble companionship. Modern Chinese make charming pets as they are loving and playful, and are one of the most out-like breeds. They like to climb, and often climb their face with their paws. Looking at their lovely, long fluffy coat, you might think this pretty little creature needs lots of brushing. Not so – the Chin is a 'wash and go' kind of dog, only needing a weekly tidy up.

**Life Expectancy** 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

## Akita

A strong and sturdy dog, the Akita was developed in Japan. It is a fiercely loyal, not for such an imposing breed, very loving. One Akita famously waited for his owner at the train station every day for nine years after he had died. One thing that can be startling is its habit of holding things in its mouth, including your wrist! It isn't going to bite you, it simply wants to take you to where it wants you to go – often to its bed to go for a walk or to its bed because it wants feeding. The Akita doesn't often bark but it does make a lot of noise when those owners say their dog matters under its breath!

**Life Expectancy** 12-14 Years | **Height** 50-60cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

## Shiba Inu

The smallest of six dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. It's like a little stoic warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, none of them negative, proud (good nature) and noble (demeanor). It also tends to be passionate – like a sturdy toddler, the Shiba Inu doesn't like to share and if it could speak, its first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

**Life Expectancy** 12-14 Years | **Height** 35-40cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

## Pharaoh Hound

This elegant breed was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Pharaoh loves people and simply loves life. It's a natural clown – you can even teach a Pharaoh to smile! And it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting breed, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

**Life Expectancy** 12-14 Years | **Height** 50-60cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

## Shar-Pei

This strange-looking breed looks like it needs ironing! These deep wrinkles serve a purpose, though. The Shar-Pei breed name translates as 'sand skin' – was sometimes called the 'Chinese lightning dog' and any attacker would have a tough job biting through those loose, thick folds and tough skin. They were once known as 'lion dogs' – an obvious nod to their lion-like appearance. They were used as 'lion dogs' – an obvious nod to their lion-like appearance. They were used as 'lion dogs' – an obvious nod to their lion-like appearance.

**Life Expectancy** 12-14 Years | **Height** 50-60cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

## Greyhound

This sleek and elegant creature is known as the Ferrari of the dog world. And this is no idle boast: the Greyhound can run at speeds of more than 70 kilometres per hour. Greyhounds were bred for Chaperos as well as Britain's great monarch, Elizabeth I. Their love of this breed led to greyhound racing being dubbed the 'Sport of Queens'. From that title, you might think the breed needs masses of exercise, but the Greyhound is surprisingly laid-back. It is a sprinter, not a long-distance runner, so a daily walk is enough. It is, however, most plenty of belly rubs!

**Life Expectancy** 12-14 Years | **Height** 50-60cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

## Saluki

## Alaskan Malamute

Prized by the travelling people of the Middle East, this exotic breed is thought to take its name from the Arabian city of Saluk. To the sheikhs, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their hounds had to be fleet of foot. There were once two different types of Saluki – desert and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging...

**Life Expectancy** 12-14 Years | **Height** 58-71cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Mike sure you get my best side | **Least likely to say** I'll sleep on the floor

14

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahlemut people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored... and a bored Malamute is trouble in waiting. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

**Life Expectancy** 12-15 Years | **Height** 53-64cm | **Trainability** Easy, but can get bored | **Grooming** Needed every day | **Exercise** None! This is an energetic breed | **Most likely to say** This looks like a good spot to dig! | **Least likely to say** (to anyone) You shall not pass

# Jane Foster's Baby's First Stories: 0-3 months

## A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

- Beautiful artwork by textile designer, Emily Carter
- Luxury finishes including 100% foil cover, and interior box.

# Welcome to the Museum: A Christmas Pop-Up Advent Calendar

## MAMMALS

### Reindeer

It is no coincidence that Father Christmas chose reindeer to pull his sleigh, as they are strong, hardy and capable of travelling more than 1,000km a year. As one of the earliest domesticated animals, reindeer share an ancient alliance with humans. These antlered deer thrive in colder climates of Europe, North America and Asia, residing in the frozen northern forests and the Arctic tundra. Covered in fur from head to hoof, reindeer use their useful dew claws to grip onto slippery surfaces and burrow through the snow, feeding on the ferns, fungi and lichen hidden below.

Unlike their magical counterparts, these animals do not need a glowing red nose to illuminate the way. As one of the few large mammals that can see ultraviolet light, reindeer are able to find food, locate predators and stay safe even in the dark, bleak winter when sunlight is scarce.

#### Key to plate

1: **White spruce**  
Pine genus.  
The large evergreen conifer is the most common species of North America. Christmas trees suggest the

Reindeer is a deer that lives in the north. Reindeer are found in the Arctic and sub-Arctic regions. Reindeer are also found in the mountains of Asia and Europe. Reindeer are also found in the mountains of Asia and Europe.

## BIRDS

### Wild Turkey

For many households, Christmas dinner would not be complete without one large, oven-roasted bird taking prime place. Hailing from Mexico, the domestic turkey was first introduced to Europe in the 16th century as an exclusive aristocratic delicacy. The turkey's Christmas connection emerged shortly after when Henry VIII famously feasted on the exotic fowl during his festive banquet. Since then, turkey as a food has risen in popularity and grown in affordability helped in part by advances in food production and Charles Dickens's iconic fondness for the bird.

Today, turkeys have a reputation as odd-looking, ungainly birds, but throughout history they have been venerated as powerful, majestic creatures. Wild turkeys come in a variety of dazzling colours, with beautiful iridescent blue bronze and green plumage. The Mayans venerated these noble fowl and valued their spectacular feathers highly, using them to make ornamental cloaks, garments and headdresses.

#### Key to plate

1: **Wild turkey**  
Megafauna phylum.

2: **American holly**  
Celtic shrub.  
These holly leaves are a favourite of wild turkeys.

3: **Wild turkey**  
Megafauna phylum.

## FRUITS AND SPICES

### Festive Flavours

As Christmas draws near, festive flavours walk through kitchens across the globe, filling the air with traditional aromas of nutmeg, ginger and clove. In Europe, roasted sweet chestnuts make a tasty Christmas treat, harvested from the *Castanea sativa* tree with its prickly husks and grooved bark. The gingy orange is another popular festive food, gifted to well-beloved children or peppered with cloves to make a pomander ball. This practice dates back to medieval times, when such spice-studded pomander balls perfumed the frosty air or to ward off bad spirits and winter illnesses.

The iconic Christmas pudding also has humble origins, dating back to a porridge-like prune dish served in the 14th century. Although it originally formed part of a British tradition, the Christmas pudding is a global festive phenomenon, enjoyed by families far and wide in countries like South Africa, Australia and Canada. This dessert is often seasoned with cinnamon, a warm, fragrant spice derived from the inner bark of the Ceylon tree of Sri Lanka.

#### Key to plate

1: **Christmas pudding**  
Fruit with the quintessential flavour of the festive season. Christmas puddings are packed with dried fruits, currants, cloves and spices, most of which are harvested from tropical trees.

2: **Orange**  
Citrus fruit.  
Gifting oranges at Christmas may be a tradition, but the orange is a fruit that is harvested from the subtropical trees of the Mediterranean region. It is a fruit that is harvested from the subtropical trees of the Mediterranean region.

3: **Star anise**  
Licorice root.  
Star anise is the same plant as the licorice root, but it is a fruit that is harvested from the subtropical trees of the Mediterranean region. It is a fruit that is harvested from the subtropical trees of the Mediterranean region.

## BIRDS

### European Robin

With its rust-coloured plumage and curious expression, the European robin is a plump, small-billed bird that breeds throughout Europe, Western Asia and parts of North Africa. A much-loved sight, the robin can be spotted all year round, the welcome sound of its melodic warbling filling the frosty air even during winter. As natural ground feeders, robins can be found hopping around gardens, woodlands and parks, foraging for insects and worms.

Despite being only 14cm long, these tiny birds are fiercely territorial, puffing up their scarlet chests and fighting off any feathered intruders that invade their patch. Robins are considered modern Yuletide mascots. They first appeared on Victorian Christmas cards as an ode to the vermilion-coloured uniform of the postmen who delivered them. These postal workers were aptly nicknamed 'redbreasts'.

#### Key to plate

1: **European robin**  
*Erithacus rubecula*

2: **Common holly**  
*Ilex aquifolium*

The evergreen holly bush is

the UK's most festive plant and for hundreds of years it has been used, along with ivy, to decorate homes at Christmas time. Today, this

prickly plant, with its water-resistant waxy leaves and bright red berries, makes the ideal festive wreath.

# Animal Homes: Ocean

**Dive in and explore the ocean in this introduction to habitats for the very young.**

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.
