

DK - LBF/BBF24 - Non-fiction

Discover the rich history, vibrant culture and unique identity of each nation through its flag!

- A vibrant exploration of our world's marvellous flags! Take a fact-filled and fun journey across the contents to discover all that lies in our national flags.
- Content is split into 5 chapters based on the continents: Europe, Asia, the Americas, Africa and Oceania. Each section features a chapter opener, 4-5 spreads looking at specific flags in detail, and a theme spread which looks at the world more broadly.
- Feature spreads look at an individual flag's history, symbolism and meaning, and also include 2 or more other flags which share a similarity in some way, whether that be a symbol, geographical location or a shared history.

This visually extraordinary book presents the history of money as it has never been seen before – from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

RICH AND POOR

THE HISTORY OF INEQUALITY

Inequality – the difference in wealth between the richest and the poorest – has been a feature of human societies since the dawn of time. In the early days, when everyone lived in small groups, the difference was not great. But as societies grew larger and more complex, the gap between the rich and the poor widened. In the 19th century, when the Industrial Revolution was in full swing, the gap became even wider. The rich became richer, and the poor became poorer. This was the beginning of the modern era of inequality.

WEALTH CONCENTRATION

One of the biggest reasons for inequality is the way that wealth tends to get concentrated in the hands of a few people. This is because the rich can invest their money in ways that the poor cannot. They can buy stocks and bonds, or they can start businesses. The poor, on the other hand, have to work for their money. This means that the rich can grow their wealth much faster than the poor can. This is why the gap between the rich and the poor has become so large.

THE COST OF WAR

War has also played a big role in creating inequality. When a country goes to war, the government spends a lot of money on the military. This means that the government has to raise a lot of money. It does this by taxing the rich. The rich, however, can often find ways to avoid paying taxes. This means that the government has to tax the poor more heavily. This makes the poor even poorer, and the rich even richer.

THE GREAT CRASH

The Great Crash of 1929 was another major event that led to inequality. When the stock market crashed, many people lost their money. This was especially true for the poor, who had invested all their money in the stock market. The rich, on the other hand, had diversified their investments. They had money in other places, so they were not as affected by the crash. This made the rich even richer, and the poor even poorer.

THE FUTURE

What will the future of inequality be? It is hard to say. But one thing is clear: inequality is a problem that we need to solve. We need to find ways to make sure that everyone has a fair chance to succeed. We need to make sure that the rich do not get too rich, and the poor do not get too poor. Only then can we have a truly equal society.

GOLDEN YEARS

AN INTERNATIONAL SYSTEM

In the 19th century, the gold standard was a system where the value of money was based on the amount of gold it contained. This was a simple and effective way to ensure that money was worth the same everywhere. It was the foundation of the international financial system of the time.

THE COST OF WAR

War has a huge impact on the economy. It can lead to inflation, as the government prints more money to pay for the war. It can also lead to unemployment, as many businesses close down. The cost of war is often paid by the poor, who have to live with the consequences.

THE GREAT CRASH

The Great Crash of 1929 was a disaster for the world economy. It led to a global depression that lasted for years. Many people lost their jobs and their homes. The rich, however, were able to recover more quickly than the poor.

THE FUTURE

The future of the world economy is uncertain. There are many challenges ahead, including climate change and global inequality. We need to work together to find solutions to these problems. Only then can we have a better future for everyone.

FROM COUNTERFEIT COINS TO FALSE NOTES

THE HISTORY OF COUNTERFEITING

Counterfeiting has been around since the beginning of time. In the past, people would make fake coins or notes to use as money. This was a way to get rich without working. But it was also a crime. Counterfeiters were often caught and punished. Today, counterfeiting is still a problem, but it is much harder to do. Governments have better ways to detect fake money now.

THE FUTURE

The future of money is uncertain. There are many new technologies being developed that could change the way we use money. Some people think that digital money will replace physical money. Others think that physical money will still be around. We will have to see what happens.

FINANCIAL MARKETS

At regular markets people buy and sell things like food and clothing. At financial markets, people trade money-related assets. These include stocks and bonds. Stocks are shares in a company that the company sells to raise capital. Shareholders are paid dividends (regular sums paid out of the company's profits). Bonds are certificates issued by a government or corporation, promising to repay borrowed money at a fixed rate of interest. Financial markets can be physical places, like the New York Stock Exchange, or they can take place online.

THE FIRST BONDS

In the twelfth century, the government of Venice came up with a new way of raising money to fight a war. It offered its citizens certificates, known as prestiti, in exchange for a loan, promising to pay them back by a certain time, plus 5 per cent interest. These were the first government bonds. Before long they became a popular investment, and a market developed for the buying and selling of prestiti.

THE FIRST STOCKS

Founded in 1602, the Dutch East India Company was the first company to sell shares in its business to the public. The money it raised from this funded its voyages to the East Indies, and it paid its shareholders out of the profits from its trade in enslaved people and spices. The shares were traded in the Amsterdam Stock Exchange, also established that year.

THE DAILY NEWS

OCTOBER 1929 NEW YORK CITY

THE WALL STREET CRASH

FINANCIAL MARKETS CAN BE VOLATILE. A RUMOR OR A MINOR PIECE OF ECONOMIC NEWS CAN CAUSE BIG SWINGS IN PRICES. THE DESIRE TO MAKE MONEY OR AVOID LOSING IT IS A POWERFUL ONE, AND A

HERD INSTINCT CAN SOMETIMES TAKE OVER WITH PEOPLE STAMPEDEING TO BUY OR SELL. THE MOST SPECTACULAR EXAMPLE OF THIS WAS THE WALL STREET CRASH OF 1929.

THE ROARING TWENTIES

The 1920s was boom time in the United States. There was a spirit of optimism in the country and it became fashionable to play the stock market. Share prices soon rocketed to a point where they represented a value far greater than the total worth of their companies' assets. This was now a 'mania' – a period when everyone, from wealthy financiers to common investors, lost touch with reality and seemed to believe that prices could keep rising forever.

DISASTER

The crash occurred at the end of October 1929, during three calamitous days of trading at the New York Stock Exchange on Wall Street, when huge numbers of people decided collectively it was time to sell. With so many sellers, there were few buyers, and share prices plummeted. In those three days, billions of dollars were wiped off the value of American companies. And over the following years the market kept on falling. By 1932, stocks had lost nearly 90 per cent of their pre-crash value.

AFTER EFFECTS

As a result of the crash, businesses were bankrupted, banks closed, millions lost their jobs and the world plunged into a deep and lasting economic depression. In Europe, extreme right-wing parties exploited the misery of mass unemployment, blaming 'foreigners' such as Jews. Germany's Nazi Party rose to power in 1933. The consequences for the world would be devastating.

- Super cool artwork by award-winning artist Ryo Takemasa

STEAM AND ELECTRIC AUTOMOBILES

Since their invention in the early 1800s, steam locomotives revolutionised the way people and freight were transported. However, some travellers wanted a more convenient vehicle that they didn't have to share and could use whenever they wanted. Some engineers created small, steam-powered road vehicles, while others decided to try electric battery automobiles. Many designs were created, but by the early 20th century it was clear that the internal combustion engine was going to be king of the road.

The first steam-powered road vehicle was designed by English inventor Richard Trevithick. Using a high-pressure boiler for more power, his Puffing Devil set off with six passengers in 1801 at a speed described by one witness as 'faster than I could walk' (about 8km/h). Unfortunately, only a few days after this historic journey, the boiler caught fire and Puffing Devil was destroyed.

Electric cars were very popular in Europe and the USA from the late 1800s to the early 1900s. They were quieter and smoother, didn't produce smoke and were easier to use than steam-powered automobiles. One of the first successful models was the *Flocken Elektrowagen*. Designed in Germany in 1888, its 1hp electric motor drove the back wheels and could reach around 15km/h.

One of the last and most advanced steam automobiles was the Doble steam car. Designed in 1924, the Doble Model E only required 30 seconds to boil the water needed to drive the engine, was easy to control and could reach speeds as high as 120km/h.

EARLY ENGINES

The age of the automobile really began with the invention of the internal combustion engine. When fuels such as petrol, diesel or kerosene are burned (or 'combusted') inside the engine (using an oxidizer such as air), they produce kinetic energy, which makes the vehicle move. Internal combustion engines are more fuel-efficient than steam engines, and proved far easier and more convenient to start-up, operate and maintain.

German inventor Karl Benz developed the first automobile powered by an internal combustion engine in 1885. His revolutionary Motorwagen had a 3hp petrol engine, three-spoked wheels with solid rubber tyres and one forward gear. Its top speed was around 18km/h.

The first mass-produced car was the Oldsmobile Model R Curved Dash; 19,000 were built between 1901 and 1907. It was more affordable than most other cars at the time, had a 5hp engine, 2 forward and 1 reverse gear and came as either a 2-seater 'runabout' or a 4-seater family car.

Created in 1901 by German engineers Paul Daimler and Wilhelm Maybach as a racing car, the Mercedes 35 HP was a huge step forward in automobile design. It had a powerful petrol engine mounted at the front that drove the back wheels, a hand brake and a foot brake, 4 forward gears and 1 reverse gear.

All The Way Down: Dinosaurs and Other Prehistoric Creatures

An ingenious exploration of the dinosaurs!

- An innovative information book that allows children to travel back in time to the time when dinosaurs ruled, discovering what life resides at each level.
- Special material includes a ruler running down the side of each spread keep track of the different depths.
- Engaging STEM-focused non-fiction book for dinosaur lovers aged 7-8 years old.

All The Way Down: Dinosaurs and Other Prehistoric Creatures

ON THE GROUND — HERBIVORES

THE FIRST DINOSAURS APPEARED AROUND 231 MILLION YEARS AGO. THEY WERE SMALL CREATURES DARTING AROUND ON THEIR HIND LEGS. THE DINOSAURS FORMED TWO MAIN GROUPS: THE SAURISCHIA (LIZARD-HIPPED) AND THE ORNITHISCHIA (BIRD-HIPPED). BIRD-HIPPED DINOSAURS WERE MOSTLY PLANT-EATERS. LIZARD-HIPPED DINOSAURS INCLUDED BOTH MEAT-EATERS AND PLANT-EATERS.

- 1 **HYPERODONTOPUS (LIVED: 225–227 MYA)**
This weird-looking animal is a kind of rhyconosaur – a beaked reptile related to the dinosaurs. It had a waxy body and moved by using its beak to catch and crush tough plants.
- 2 **PSIANAGSAURUS (LIVED: 228–236 MYA)**
This was a small, shaggy, short-eared, weighed less than 1 kg (2.2 lb). It had long legs and could run very quickly if a predator came near. We don't know if it was a true dinosaur or a close cousin.
- 3 **AETEOSAURUS (LIVED: 228–209 MYA)**
This small, slow-moving, plant-eating archosaur had a long, slender body and short arms. Four rows of teeth in the lower jaw covered its body, providing great protection against predators.
- 4 **MISSOURIAURUS (LIVED: 216 MYA)** or 'Monocle Lizard' got its name because the first fossil discovered was tiny. They now know these were infants. It was a giant sauropodomorph dinosaur – a bipedal ancestor of the giant sauropods that walked on all fours.
- 5 **PLATEOSAURUS (LIVED: 216–204 MYA)**
This was one of the largest dinosaurs of the Triassic and another sauropodomorph. It had a small head on a long, flexible neck, short but muscular arms with large claws in its three fingers, and powerful hind legs.
- 6 **ASTOSAURUS (LIVED: 208–204 MYA)** was one of the first sauropodomorphs to walk on all fours. It was close cousin the sauropod, all walked on four legs.

The brutal history of WW1 soldiers!

- The grisly truth about trench life, ideal for Horrible Histories fans.
- A funny, foul and fact-filled book that engages reluctant readers with history and the KS2 First World War curriculum.
- Combines funny text and comical illustrations to fascinating facts, managing to accurately convey historical realities in an engaging way.

You Wouldn't Want To Be In The Trenches In World War One!

Joining up

Even though you're under age, you join the queue at the local recruiting centre and get to enter with the army. When it's your turn to be interviewed, the recruiting sergeant asks for your age. You tell him and he says you're all right. You can't go in until you're 18 and can't fight until you're 19. Come back tomorrow and see if you're the right age. To get past the next day and give your age as 19. Then you'll be the great right hand and answer to get for long and counting. The sergeant winks and hands over your first day's wages. You realise that the army is no disgrace for soldiers, it's prepared to hand in your rules.

YOU

Swiftness and equipment

[illegible][illegible]

No-man's-land

You are selected as part of a patrol to venture into no-man's-land to discover information about the enemy. You must take control of a shell-hole in front of the enemy trench so you can spy on them. Your patrol goes out at night, crawling forward on your stomachs, faces blackened with burnt cork, trying to avoid getting caught in barbed wire. The Germans send up a flare and fire on your patrol. You dive for cover into the shell-hole and then must spend hours lying there silently in the mud, pretending to be dead.

Night raids
Men are often sent into no-man's-land at night on spying missions or to capture enemy soldiers for interrogation.

Light flares
To trap British night patrols, the Germans use light-shell rockets. The flare blazes brightly for up to a minute, giving defending troops a chance to fire at the patrol.

Barbed wire
It is placed in front of trenches to foil enemy infantry attacks. Night parties are sent out to repair these defences or cut the enemy's wire.

Handy hint
If sent on a night raid, take silent weapons such as knives, clubs, knuckledusters and hatchets.
