## ETERNITY ISLE BIOMES

Eternity Isle is a truly fascinating place, full of ancient wonders. It's home to three additional biomes, with twelve distinct regions, but these require Mist to unlock, rather than Dreamlight. Here's what you can expect to find in each region.

### ANCIENTS' LANDING

Upon arrival at Eternity Isle, you'll find yourself in Ancient's Landing – a mysterious set of ruins that appear to be very old indeed. The Docks show evidence of market activity, and are a great spot for fishing. The Marketplace is a small, enclosed area with a narrow passage to a tiny beach complete with Treadwater Table. The Overlook boasts fantastic views of the ocean, with some ancient ruins of its in the distance – perhaps the area was once used as a lookout post. The Ruins are all that remains of an ancient castle. Largely unused by nature, there's a small courtyard and a staircase leading to a balcony with a magnificent view of the surrounding landscape.

36

### GLITTERING DUNES

The vast Glittering Dunes are a vast area of desert with little in the way of plant life and evidence of ancient civilisation. The Ruins is a wide expanse of flat ground with the remains of some ancient sandstone archways and steps. The Bazaarlands at the end of a hill leading up to the Palace, and are a gift across the land. The Villages show signs of ancient civilisation – there's a signpost partially buried in the sand, and it's home to the Great of Villagers, too. The Oasis is a rare, lush area within the desert landscape – it's covered in grass and flowers.

### WILD TANGLE

The Wild Tangle is the most remote of the Glittering Dunes. Within the Dunes are barren and arid, the Wild Tangle is lush, verdant and teeming with all sorts of life. The Greenlands is the area of low-lying, with a river running through the center. The Promenade is a small, enclosed area with a narrow passage to a tiny beach complete with Treadwater Table. The Overlook boasts fantastic views of the ocean, with some ancient ruins of its in the distance – perhaps the area was once used as a lookout post. The Ruins are all that remains of an ancient castle. Largely unused by nature, there's a small courtyard and a staircase leading to a balcony with a magnificent view of the surrounding landscape.

## MULAN

Mulan is a warrior princess and the hero who saved China. She believes in honour, discipline and strength. While training with the army she learned that discipline is the foundation of all skill and that you can learn to do almost anything with practice and determination.

### DEVELOPER NOTE

Working on Mulan's wardrobe was a labor of love for our team. We wanted to create a look that was both traditional and modern, reflecting her character and the game's aesthetic.

### MERMAID BEACH

True to its name, Mermaid Beach is a beautiful tropical beach with palm trees and a clear blue ocean. It's a great spot for fishing and relaxing.

A princess like Ariel deserves a stretch of beach that helps her to feel as at home on land as she does in the ocean.

Mulan inspired items in purple, purple and blue are ideal decor for this mermaid-themed beach. You'll find plenty of pieces in the Little Mermaid furniture set, including the Enchanted Table, the Sea Shell's Chandelier and the Enchanted Bed. Remember to check the Mermaid collection, too – it includes everything from Balinese-style Potted Plants, Coral, Shells and Beach Puffs and Cane Chairs to Comfortable Armchairs and Potted Plants. You can build up the beach with grass and flowers, too – you'll be able to see the princess here work well. Finish off with a sprinkling of items, including, oysters and starfish.

## THE BASICS

Before you begin your adventure, it's a good idea to familiarise yourself with how Dreamlight Valley works – there are lots of ways to play, get creative and share the fun with friends.

### HOW TO PLAY

You can play Dreamlight Valley on PC, Mac, Xbox, Nintendo Switch and PlayStation. You can also play the Arcade Edition on Apple Arcade.

Dreamlight Valley lets you choose what kind of adventure you want to have each day. You might want to focus on completing quests to level up your friendships, or you may prefer to get creative and focus on designing your Valley and decorating your house.

Friendship is important in Dreamlight Valley, so naturally there's a Multiplayer option. You'll be able to invite your friends to visit your valley – and visit theirs – once you've completed Vanellope von Schweetz's quest, Valley Visits.

And there's more – a paid expansion pack called A Rift in Time is available, opening up a whole new island of exotic biomes, rare plants and materials and even some new friends.

10

### THIS IS YOU

The first thing you'll do when you start your game is design your avatar. This is your opportunity to express your individuality, and there's loads of scope to be creative. The avatar you'll see throughout this guide is based on the author, so here are just a few other avatar designs to inspire you.

**Puzzle 29**  
**ARCHERY PRACTICE**

Merida's practising her archery skills. To prove what a great archer she is, Merida must hit one number in the outer ring, one number in the inner ring and one number in the centre that add up to each of the three numbers below.

Can you figure out which three numbers she must hit to make each of the target scores?

**Puzzle 39**  
**MICKEY'S MAGICAL MIX UP!**

**SOLVE THE RIDDLE OF THE CAVE!**

Each square needs to be filled with a number between 1 and 9, but you can use numbers more than once. The functions surrounded by stars are carried out first.

**Puzzle 23**  
**SHY COCONUTS**

Some Kakamora have hidden themselves among Moana's coconut harvest. You can tell which coconuts are Kakamora in disguise, because the numbers they have stuck to them have made the questions they're hiding in incorrect.

**Make the sums correct by removing 1 digit from each question.**

 $32 + 70 = 73$

 $42 + 35 = 37$

 $41 - 60 = 35$

**THE ARTS: LITERATURE**

The first book that combined words and pictures, and was read by children, was *Jack and the Beanstalk* in the 15th century.

Samuel Pepys was an inhabitant of London in the 17th century who became famous for the diary he wrote between 1660 and 1669. His personal accounts of the Great Fire of London and the Plague helped historians understand the events of the period.

Beatrix Potter first wrote an illustrated story about 'Two Rabbits' to cheer up a friend's child while he was recovering from a bout of scarlet fever. She went from writing letters to him for many years until she published *The Tale of Peter Rabbit*.

The fastest-selling book in history is *Harry Potter and the Deathly Hallows*, which was the last book in the series. It sold over 8.1 million copies on its first day and went on to sell more than 500 times that amount across the world, in over 60 languages.

Queen Blake, best known for being the illustrator on the books of *Charlie and the Chocolate Factory*, has been the artist on over 100 different books. More recently her illustrated books for David Williams, such as *George's Marvellous Medicine*.

**THE ARTS: LITERATURE**

The album of J.M. Barrie's *Peter Pan* wasn't even written by Captain Jack. It was meant to be Peter Pan himself! It started as a play before it was turned into a novel, but the stage crew needed more time to change sets, so a pirate scene was added in between scenes and that became the final act.

Aladdin is One Thousand and One Nights wasn't actually from the Middle East. The story began with the words 'Aladdin was a little Chinese boy, although the collection of stories does have lots of influences from the Middle East.

The story *Happy Cendrillon* came from a piece of office equipment! Cendrillon was playing around with a hole punch and a stack of paper when he had the idea for the story about the mouse with a big appetite.

A.A. Milne, the author of *Winnie the Pooh*, was taught by another famous author named H.G. Wells, who wrote *The War of the Worlds*. However, at that time Wells wasn't a published author and was having a media crisis.

The monster in *Frankenstein* has no name - the doctor who made the monster is called Frankenstein! However, there is a part where Mary Shelley has the monster refer to himself as 'Adam' when speaking to the doctor.

The only book printed in Latin to make the New York Times Best Seller list is *Winnie the Pooh*. The book was completely translated into the dead language and released as *Winnie de Po*.

**HISTORY: THE PREHISTORIC AGE**

Phonemes, the prehistoric, aren't technically dinosaurs - instead they're 'flying reptiles' in the Mesozoic Era. Creatures that lived in the oceans during the same era, such as plesiosaurs and ichthyosaurs, aren't called dinosaurs either, but 'aquatic dinosaurs' instead.

The Pterosauridae was a herbivorous dinosaur that had a big heavy crest on top of its head filled with tubes. Scientists think it used these tubes to help it find its way to communicate with other members of its group.

The spiky plates on the back of a Stegosaurus are still a mystery to scientists today. They could measure up to 50 centimetres, but nobody is sure what they did - some think they were used to cool the Stegosaurus down, while others think they were used to scare away predators.

The biggest difference between the size of a dinosaur and the size of its brain is found in the size of the Stegosaurus. These herbivores were the size of a cow, but their brain was comparatively tiny - about the size of a loaf!

The Eohippius is the earliest known dinosaur that we've found so far, dating back around 230 million years. It came from a small stream that became a river at the dawn of the dinosaur age. An Eohippius dinosaur was first discovered in Argentina in 1998.

If you think something in the sea was very rare, go back to the time of the dinosaurs! The sea was a place of a shark called the Megalodon, which measured more than three times the size of today's sharks.

**HISTORY: THE PREHISTORIC AGE**

Paleontologists - the scientists who study dinosaurs - often make mistakes when putting dinosaur fossils together. In the 19th century, one of them put the shoulder of an iguanodon on the end of its nose, while another connected the head of an Eleutheromastax to the end of its tail.

We now only accept that dinosaurs weren't just the giant bulky lizards that we commonly think of - they were much more likely covered in feathers! Some even think that the first dinosaurs were like birds, but others think they were like lizards, or even like fish!

We're finding more dinosaur fossils now than ever before, at an average of one new species per week. Sometimes the fossils found by paleontologists change what we think we already knew about dinosaurs like the T-Rex.

By the time 'paleontology' - known as the 'study of fossils' - was naming the planet, the Stegosaurus was already a fossil. Though we often use the word 'fossil' to describe dinosaurs together in fiction, the Stegosaurus had been extinct for millions of years!

The oldest dinosaur discovered is the Argentinosaurus, which was thought to reach a height of around 3 metres! It's also thought the dinosaur was the heaviest, estimated at around 80,000 kilograms - it would need to eat a lot to power that huge body after all.

**SCIENCE: SPACE**

The lower gravity on the Moon has a surprising effect on astronauts. When they're on the surface, the dots of their space suits under the reduced pressure, which can make them up to 5 centimetres taller.

The temperature of the first man on the Moon was still there today. There's no atmosphere on the Moon, so there's no wind to cool them down, which means they're still there today and will be for millions of years, unless someone sweeps over them!

A mechanical phenomenon known as 'tidal locking' occurs in space when two metals touch. Because there's no air or atmosphere around the pieces of metal, the molecules don't know that they're separate pieces and join together, without needing to be melted like they would on Earth.

From Earth, we can spot so different galaxies, as well as our own Milky Way. The closest one is Andromeda, but we can also see the Triangulum, Omega Centauri and the Sagittarius Dwarf Spheroidal Galaxy, as well as both Magellanic Clouds.

You might be able to see a giant red spot on images of Jupiter - it's a giant storm that's been raging for years, but it's shrinking! When it was first observed in the 17th century, it was the size of three Earths, but now it's only the size of one.

The largest object that humans have sent to space is the International Space Station. It's 359 metres long and weighs around 4,200 tonnes, which is about the same as 27,000 elephants on land.

Scientists have observed that not galaxy, the Milky Way, is quite shaped, but it wasn't the first one or observed. That honour belongs to the Whirlpool Galaxy, sometimes called M51. The M stands for Messier, as the first person to spot it was Charles Messier, who lived in 1773.

The rain on Venus isn't made of water like on Earth - it's sulfuric acid. It's 600 times hotter than Earth, so it's not that it can't melt, turning them into gases, which then cool as they get higher up in the atmosphere and fall as scorching hot liquid.

The estimated size of the Milky Way galaxy is 100,000 light years, meaning it would take something travelling at the speed of light over 100,000 years to reach one end from another. With our current technology, it would take us 400 million years to reach across that distance.

The same side of the Moon is always facing Earth! We never see the 'dark side of the Moon' because the moon spins at precisely the same speed as it orbits the planet, which is a phenomenon called tidal locking or synchronous rotation.

The first person to spot a meteor called 'the Geminid' - he reached space on 27 May 1955, heading the American film *Phantom*, who arrived on 5 May in the same year, by two weeks!

**NATURE: ANIMALS**

Most fish have some sort of skeleton, but a shark doesn't have any bones at all. Its whole skeleton is made of cartilage. This means sharks are very flexible and can twist themselves quickly to catch speedy prey.

Flying squirrels have flaps of skin that stretch from their front to rear paws. A flying squirrel can jump from a tall tree, then spread its legs wide to create air resistance as it falls. This force slows the squirrel down so that it glides instead of falling.

Some animals can walk on water! Lizards called basilisks can run for about 4.6 metres before sinking underwater. Birds called western grebes also run on water during take-off. A combination of speed, webbed feet, and surface tension makes this feat possible.

An animal called the pistol shrimp has a built-in blaster. This little critter has one huge claw that it can snap with incredible force. The snap makes a blast of sound and heat strong enough to stun other animals. Syndrome from *The Incredibles* would be proud!

There are very few native land mammals in the Pacific Islands. In Fiji, the only native land mammals are bats. But what about Pua and Heihei from *Moana*? Pigs and chickens were brought to the Pacific Islands thousands of years ago.

**NATURE: ANIMALS**

Some types of flea can jump up to 200 times the length of their body! They have a powerful springy protein that they squeeze when their legs fold, ready to jump. When they stop squeezing it, the protein creates explosive energy that makes the legs spring forward powerfully.

As well as reaching speeds of up to 96 km/h, the hummingbird is known for another fast feat. The tiniest species can flap their wings at a rate of 80 beats a second, or 4,800 times in one minute. And that's not all - their hearts can beat 1,200 times per minute too.

You might think that flamingos are pink, but those feathers are actually dyed. They eat a diet of blue-green algae and brine shrimp that contains a dye called carotenanthin, which gives their feathers their pink colour.

Many animals have natural armour. The pangolin, for instance, is covered with hard, overlapping scales, while crocodiles are covered with bony knobs. Crabs and many other creatures have exoskeletons - where they wear their skeletons on the outside to protect the soft organs inside.

Lots of animals live in the harsh tundras of Earth. These include owls, foxes, wolves and reindeer. Foxes and reindeer have thick fur that protects them from the cold. Arctic wolves have fur on their paws that give them a better grip on the icy ground. Some animals, like huskies, even help people get around! These dogs are very strong and can pull sleds for a long time.

What do you think the world's deadliest animal is? The surprising answer is the mosquito. This annoying insect kills over 700,000 people a year by spreading diseases, such as malaria and yellow fever, when they bite.
