There are Mammals Everywhere

An illustrated introduction to mammals.

- A combined quantity of over 100,000 copies worldwide (as of July 2022) has sold for Britta's *There Are...* series
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally
- Contents: There are mammals everywhere; It's a mammal! So what is that that?; Mammals have been around for ages; Where do mammals live?; The savannah; Staying alive; Feeding; Moving (elephant spotlight spread); Mammal parents; Mali elephants; Birds and people
- The colourful exploration of mammals follows on from Britta Teckentrup's *There are Fish Everywhere*, *There are Bugs Everywhere*, *There are Reptiles Everywhere* and *There are Birds Everywhere*.

There are Mammals Everywhere

IT'S A MAMMAL! (SO WHAT IS THAT?)

There are almost 6,000 species of mammal alive today. Mammals may look very different on the outside, but they all have **skulllets** that allow them to perform a wide range of movements. Some mammals have four legs and a tail, but others walk on two legs, fly using two wings, or have flippers and fins.

BIG BRAINS
Mammals have a large brain, which means they can think and learn. They have a large brain relative to their body size. This helps them to solve problems and learn from their experiences.

BREATHING AIR
Mammals breathe air. They have lungs and a diaphragm to help them breathe. This means they can live on land, in water, or in the air.

RECORD-BREAKERS
Mammals are the only animals that can fly, swim, and climb. They are also the only animals that can hibernate. Some mammals, like the blue whale, are the largest animals on Earth. Others, like the shrew, are the smallest.

MAMMALS HAVE BEEN AROUND FOR AGES

Mammals have been around for a really long time. The first mammals looked like shrews, which are tiny mammals with long, sharp teeth. They lived about 200 million years ago. Other mammals evolved like birds and some of these grew much bigger than a cat. They had long tails and some began to change and evolve into the cool range of creatures that live today.

PROBOSCIDEANS
The earliest mammals were small, shrew-like animals. They had long, sharp teeth and were very small. Over time, they evolved into larger mammals like proboscideans, which are mammals with long, trunk-like noses.

PRIMATE
Mammals evolved into primates, which are mammals with long, sharp teeth and a big brain. They are the ancestors of humans and other primates like monkeys and apes.

PLACENTAL
Mammals evolved into placental mammals, which are mammals that give birth to live young. They have a placenta that connects the mother to the baby.

WALKING
Mammals evolved into walking mammals, which are mammals that can walk on all fours. They have a strong back and legs.

WALKING
Mammals evolved into walking mammals, which are mammals that can walk on all fours. They have a strong back and legs.

WHY ARE MAMMALS UNIQUE?

Mammals are a large and very successful group of animals. They have been able to spread across the world and survive in all sorts of habitats because they have some unique ways to stay warm, find their young and get food.

WALKING
Mammals are the only animals that can walk on all fours. They have a strong back and legs. This allows them to move quickly and efficiently.

BIG BRAINS
Mammals have a large brain, which means they can think and learn. They have a large brain relative to their body size. This helps them to solve problems and learn from their experiences.

SEA OTTERS
Sea otters are the only mammals that live in the Pacific Ocean. They are the only mammals that use tools. They use sea urchins to hold their shells together so they can eat them.

CAN YOU FIND?
Sea otters are the only mammals that live in the Pacific Ocean. They are the only mammals that use tools. They use sea urchins to hold their shells together so they can eat them.

WHERE DO MAMMALS LIVE?

Nearly all species of mammals live on land - about 98 per cent of them. However, there are groups of mammals that spend most, or all, of their lives in water. These include **pinnipeds**, **whales** and **dolphins**. Other groups of mammals are superb swimmers and spend lots of time in the water, but choose to stay on land when they give birth or raise their young.

WHALES
Whales are perfectly adapted to life in the ocean. They have smooth skin and torpedo-shaped bodies that slip easily through the water. They have **flippers** instead of legs and they breathe using **blowholes** on the top of their heads.

BEAVERS
Beavers belong to a group of mammals called **rodents** that have super-strong front teeth. They use these teeth to gnaw trees and branches and use the wood to build their homes in the middle of a pond or slow-flowing river.

Blue whale babies are enormous and they grow a thousand times faster than a human baby!

A beaver's home is called a lodge. It contains rooms, called chambers, where young beavers are kept safe from predators.

Beavers are good swimmers. They enter the lodge through tunnels underwater and can stay safe and warm in their home during long, cold winters.

TUNDRA

The land around the Arctic is called the **tundra** and it is famous for its snowy blizzards and blustery winds. It is a difficult place to live - unless you can stay snug inside your own super-thick fur coat. **Musk oxen** have hair that almost touches their toes and they snuggle up next to each other to get the benefit of some buddy-body-warmth!

FORESTS
Tropical forests are packed with tall trees that bloom all year round, producing plenty of fruit for any animals that can reach it. **Orang-utans** spend almost all of their lives in the branches, using their strong arms to climb from tree to tree, following the fruit as it ripens.

DESERTS
Deserts are very dry habitats that experience extreme temperatures. **Bactrian camels** survive desert life by storing food and water as fat inside their two **humps**. They grow thick, shaggy fur for the icy winter, and shed it for the hot summer months.

CAVES
Many species of bats gather together in caves in big groups called **colonies**. They rest during the day by hanging upside down from the cave ceiling and go hunting at night. Some caves can house more than five million bats!

CAN YOU FIND?
Other animals like to camp out in a beaver's lodge, including **water voles**. Can you find one of those small, furry rodents with a long tail?

Discover the rich history, vibrant culture and unique identity of each nation through its flag!

- A vibrant exploration of our world's marvellous flags! Take a fact-filled and fun journey across the contents to discover all that lies in our national flags.
- Content is split into 5 chapters based on the continents: Europe, Asia, the Americas, Africa and Oceania. Each section features a chapter opener, 4-5 spreads looking at specific flags in detail, and a theme spread which looks at the world more broadly.
- Feature spreads look at an individual flag's history, symbolism and meaning, and also include 2 or more other flags which share a similarity in some way, whether that be a symbol, geographical location or a shared history.

Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 6–9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6-9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
Javelin was developed from the spear used by ancient warriors. The first javelin was made of wood and had a stone head. It was used for hunting and warfare. The modern javelin was invented in 1880 in Sweden. It is now made of aluminium and has a metal head.

LONG JUMP
The long jump is one of the oldest track events. It was first recorded in ancient Greece. The long jumper runs a short distance and then jumps as far as possible into a sandpit. The world record is held by Mike Powell of the USA, who jumped 9.94 metres in 1991.

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal at the 1996 Atlanta Olympics. She is the only woman to have won the world title in the long jump.

DISCUS
One of the oldest track events is the discus. It was first recorded in ancient Greece. The discus is a flat, circular object that is thrown. The world record is held by Garry Linnick of the USA, who threw it 64.26 metres in 1986.

JAN SZENTI
Jan Szeñti is a Hungarian discus thrower. He won the gold medal at the 1960 Rome Olympics. He is the only man to have won the world title in the discus.

AMERICAN FOOTBALL
American football is a team sport that originated in the United States. It is a contact sport where players use their bodies to move the ball down the field. The game is played on a rectangular field and is divided into four quarters. The team that scores the most points wins the game.

AIM OF THE GAME
The aim of the game is to move the ball down the field and score points. This is done by passing the ball to teammates or kicking it into the goalposts. The team that scores the most points wins the game.

MEET THE TEAM
There are 11 players on the field. They are divided into two teams: the offense and the defense. The offense is responsible for moving the ball down the field, while the defense is responsible for stopping them.

MAKING A PLAY
A play is a series of actions that take place on the field. It starts with the offense lining up at the line of scrimmage. The play is then executed, and the ball is moved down the field. The play ends when the ball is out of bounds or a player is tackled.

FOR READY
One of the most important skills in American football is blocking. This is when a player uses their arms to push or block an opponent. Blocking is essential for moving the ball down the field.

RUGBY
Rugby is a team sport that originated in England. It is a contact sport where players use their bodies to move the ball. The game is played on a rectangular field and is divided into two halves. The team that scores the most points wins the game.

AIM OF THE GAME
The aim of the game is to move the ball down the field and score points. This is done by passing the ball to teammates or kicking it into the goalposts. The team that scores the most points wins the game.

MEET THE TEAM
There are 15 players on the field. They are divided into two teams: the forwards and the backs. The forwards are responsible for moving the ball down the field, while the backs are responsible for scoring points.

MAKING A PLAY
A play is a series of actions that take place on the field. It starts with the forwards lining up at the scrum. The play is then executed, and the ball is moved down the field. The play ends when the ball is out of bounds or a player is tackled.

FOR READY
One of the most important skills in rugby is scrumming. This is when two teams of forwards bind together to push against each other. Scrumming is essential for moving the ball down the field.

BASEBALL
Baseball is a team sport that originated in the United States. It is a bat-and-ball game where players use a bat to hit a ball thrown by a pitcher. The game is played on a diamond-shaped field and is divided into nine innings. The team that scores the most runs wins the game.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field of play. The team that scores the most runs wins the game.

MEET THE TEAM
There are 9 players on the field. They are divided into two teams: the offense and the defense. The offense is responsible for hitting the ball, while the defense is responsible for catching it.

MAKING A PLAY
A play is a series of actions that take place on the field. It starts with the pitcher throwing the ball to the batter. The batter then swings the bat to hit the ball. The play ends when the ball is caught or reaches the base.

FOR READY
One of the most important skills in baseball is batting. This is when a player uses a bat to hit the ball. Batting is essential for scoring runs.

CRICKET
Cricket is a team sport that originated in England. It is a bat-and-ball game where players use a bat to hit a ball thrown by a bowler. The game is played on a rectangular field and is divided into two halves. The team that scores the most runs wins the game.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field of play. The team that scores the most runs wins the game.

MEET THE TEAM
There are 11 players on the field. They are divided into two teams: the offense and the defense. The offense is responsible for hitting the ball, while the defense is responsible for catching it.

MAKING A PLAY
A play is a series of actions that take place on the field. It starts with the bowler bowling the ball to the batter. The batter then swings the bat to hit the ball. The play ends when the ball is caught or reaches the base.

FOR READY
One of the most important skills in cricket is batting. This is when a player uses a bat to hit the ball. Batting is essential for scoring runs.

JUDO
Judo is a martial art that originated in Japan. It is a contact sport where players use their bodies to throw or pin their opponent. The game is played on a mat and is divided into two halves. The team that scores the most points wins the game.

AIM OF THE GAME
The aim of the game is to throw or pin your opponent. The team that scores the most points wins the game.

MEET THE TEAM
There are 2 players on the mat. They are divided into two teams: the offense and the defense. The offense is responsible for throwing or pinning the opponent, while the defense is responsible for avoiding this.

MAKING A PLAY
A play is a series of actions that take place on the mat. It starts with the offense throwing or pinning the opponent. The play ends when the opponent is thrown or pinned.

FOR READY
One of the most important skills in judo is throwing. This is when a player uses their body to throw their opponent. Throwing is essential for scoring points.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Pateca puripatka
Pateca puripatka was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

Mongolian cave paintings from 5,000 years ago show people wrestling in front of spectators.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Māori of New Zealand participated in a competition known as the Māori Games - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

World of Food

THE BEGINNING OF COUSINE

The very earliest humans hunted animals and gathered wild plants but they had to eat everything else. What people learned how to control fire, however, everything changed. They had learned cooking.

STONE-AGE DIET

The ancestors of modern humans may have used fire to cook meat. It is called game meat. Cooked meat was easier to digest, which made it more nutritious than raw meat. Cooking it also made it easier to store for a long time. In fact, some of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

OTZI THE CEMAN

One of the earliest people to be buried was Otzi, the Iceman. He was found in the Alps mountains in South America. Early people used to eat a lot of meat and some of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

EARLY FARMING

Cattle, sheep, chickens, goats and pigs were domesticated from about 10,000 years ago. The first people to farm were in the Middle East. They grew wheat, barley and other crops. They also raised animals like sheep, goats and pigs.

GROWING CROPS

Agriculture and domestication in many parts of the world, including China, India, West Africa, West Europe and the Andes Mountains in South America. Early crops included wheat, rice, maize, beans and other crops.

INVENTING FOR FOOD

Many early technologies were designed to make the gathering, production, preservation and storage of food easier.

POSSIBLE FOOD

Archaeologists have found evidence that early humans ate a variety of plants and animals. Some of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

ANCIENT ROMAN BANQUETS

In ancient times, the table, people liked to celebrate with feasts. In Rome, wealthy people enjoyed banquets so much they painted pictures of them on their walls. Archaeologists have found ancient Roman cookbooks and have reconstructed the menus of the food used. At its height, the Roman Empire spanned much of Europe and parts of North Africa and the East. Some were equipped with food from around the Empire and beyond.

A ROMAN FEAST

One was a celebratory meal or banquet. It often had five or six courses, served in a particular order. The first course was a soup, but food did not have to be eaten in that order. The guests were served by waiters called slaves.

RICH AND POOR

Wealthy Romans may have enjoyed more elaborate food. The food was often served on silver or gold plates. The poor ate simple food made from bread and vegetables. They often ate their food from earthenware bowls.

NEW FOODS

Other Europeans had used to the Romans. They brought many new foods to the Roman Empire, including grapes, olives and other crops. The Romans also used to eat a lot of meat and some of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

WHERE FOOD COMES FROM

Fruits, vegetables and other crops don't always originate from the places where they are grown today. Many of the foods we eat every day were first cultivated in just one country or island by thousands of years before they were spread by trade or migration.

TRAVELING APPLES

Some of the first crops that have been brought from Asia to Europe by traders were apples. The first apples were brought from Asia to Europe by traders about 10,000 years ago. One of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

FAR AND WIDE

Some foods have traveled a long way from where they were first grown. Some of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

SWEET POTATOES

The sweet potato, or yam, is native to the Americas. It was first grown in the Americas about 10,000 years ago. It was brought to Europe by traders about 10,000 years ago. One of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

FOOD CROPS

Some of the first crops that have been brought from Asia to Europe by traders were apples. The first apples were brought from Asia to Europe by traders about 10,000 years ago. One of the earliest tools found are for cooking and storing food. The first tools were made of stone and wood.

TERRIFIC TUBERS

Some plants develop starchy growths, called tubers, on their roots to store nutrients for winter. Our ancestors quickly discovered that these tubers tasted good and they have been a vital food source for thousands of years.

THE HUMBLE POTATO

Potatoes originate from South America. People in modern-day Peru and Bolivia started growing them by 5000 BCE and possibly as early as 10,000 BCE. In the sixteenth century, Spanish conquistadors introduced potatoes to Europe. At first, Europeans thought the knobby vegetables were poisonous, but they soon discovered that they were easy to grow, filling and could be cooked in lots of different ways.

In the eighteenth century, King Louis XVI of France and his wife, Marie Antoinette, wore potato flowers in their clothes. This encouraged French farmers to grow the new crop.

THE POTATO FAMINE

The humble potato changed the course of history. In the 1840s and 1850s, a disease called blight started to attack potatoes. A mould covered the vegetables with purple spots, making them rot in the fields. In some countries in Europe at this time poor people relied on potatoes for food. The potato famine had a devastating effect, especially in Ireland. Here, one million people died and another million left the country. This migration continued for decades, with four million people leaving the country in the 50 years after the famine.

POTATO DISHES AROUND THE WORLD

Potatoes are very versatile and can be cooked in almost any way. It seems every country has its own favourite dish.

Gnocchi (Italy)

Potato dumplings that are eaten with a variety of sauces.

Chips and fries

Sliced and deep-fried potatoes are enjoyed around the world.

Caissounn (Ireland)

A mixture of mashed potatoes and cabbage.

Gogogoon (Korea)

Fried savory pastiches made with potato or ground potatoes.

Saag aloo (India)

Spiced potatoes with spinach.

Hash browns (USA)

Fried shredded potatoes.

Graatin dauphinois (France)

Thinly sliced potatoes baked in milk or cream.

OTHER TUBERS WE EAT

Potatoes aren't the only tubers we eat. Jerusalem artichokes and dahlias have edible tuberous roots and some other tubers are even more popular than potatoes in parts of the world.

Cassava, also known as manioc or yuca, is a woody, brown tuber. It was originally from South America. Today, it is a staple food for nearly one billion people around the world. Many people cook with tapioca, a starch extracted from the cassava plant.

Yams come from Africa, Asia and the Caribbean. Their long, brown tubers are traditionally boiled or roasted. They can be white, yellow, pink and purple, and can taste sweet or bitter.

Unrelated to the regular potato or the yam, sweet potato is a sweet-tasting tuber full of fibre, vitamins and minerals. It is popular around the world.

Kat-kat manioc is a stew from Mauritius made with green vegetables, beans and cassava.

Yam is a classic base for jufu, a dish made of pounded starchy vegetables. Fufu originates in West Africa and is also found in the Caribbean.

In Korea, gogum-gogum (roasted sweet potatoes) are baked in big drums by street vendors in winter. They taste sweet and nutty.
