FABULOUS FOOD!

Food can be grown in your kitchen, but what if it could? What if you could get it all in the energy that helps you move, think and play before you even get to school? You could! It's called smart food!

VITAMINS
Vitamins help your body work as it should. There are 13 known vitamins and they all have different jobs.

MINERALS
Minerals are salt-like substances that help your body work properly. They are found in many different foods.

DIETARY FIBRE
This is a kind of fibre that is found in many fruits and vegetables. It helps your digestive system work properly.

Nutrients
Nutrients are important things found in food that help your body grow and stay healthy. They are found in many different foods.

THE DIGESTION QUESTION

How does the food you eat turn into energy inside your body? How does it travel? The process is called digestion. Together, the parts of your body that help break down our food are called the digestive system.

Teeth
The teeth in our mouth help us to chew our food into small pieces that are easier to swallow.

Salivary Glands
These glands produce saliva, which helps to break down food into smaller pieces.

Stomach
The stomach is where food is broken down into even smaller pieces.

Small Intestine
The small intestine is where most of the nutrients from food are absorbed.

Large Intestine
The large intestine is where the remaining nutrients are absorbed and the waste is removed from the body.

LET'S CELEBRATE!

Although food is important for our survival, it has become so much more than that. It's something that we enjoy. Food has even become a big part of many celebrations around the world!

Eid
Eid is a special day in many Muslim countries. It is a time to celebrate the end of Ramadan, a month of fasting.

Let's go to work!
Over one-third of the food produced around the world is wasted. We need to be more careful about how we use our food.

FINDING FOOD

Usually, food appears in front of you at the dinner table. But how did it make its way there? Where does food come from? Many foods go on a journey from farms to factory to finished feast. Some food comes from much closer to home too!

Fantastic farms
A farm is a place where animals might be used to produce food, and crops are grown there too. Some farms grow all sorts of fruits and vegetables. Some grow wheat. Others raise cows for milk and hens for eggs.

Factory stop

In the garden
Some food is grown in your very own garden! People can grow delicious vegetables, such as carrots and cucumbers, and fruits, such as cherries and plums, at home. Local farms might grow food you like too.
