- Learn to draw a range of cartoon characters and scenes, encouraging children to get creative and make their own stories
- Perfect beginners guide to introduce children to art. Ideal for 9 to 12 year olds.
- Continue the series with 55 other How to Draw titles available!

Perspective

If you look at any object from different viewpoints, you will see that the parts that are closest to you look larger, and the parts furthest away from you look smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

Two-point perspective drawing: Two-point perspective shows two vanishing points on the horizon line. The object is drawn so that its lines converge towards these points. This creates a strong sense of depth and three-dimensionality.

One-point perspective drawing: One-point perspective shows one vanishing point on the horizon line. The object is drawn so that its lines converge towards this single point. This creates a sense of looking down a long, straight path.

Rats

Animals like rats make great cartoon characters. You can give them personalities and expressions, just as you can with your cartoon people.

Start by drawing the body in simple shapes. Add a long tail. Sketch the head and ears. Add a small nose and whiskers. Draw the legs and feet. Add a bushy tail. Sketch the face with large eyes and a small mouth. Add a small nose and whiskers. Draw the legs and feet. Add a bushy tail.

Bulldog

The bulldog is a classic cartoon character. Its face is perfect for a grumpy expression, which instantly gives it a character all of its own.

Start by drawing the head and neck. Add a small nose and whiskers. Draw the legs and feet. Add a bushy tail. Sketch the face with large eyes and a small mouth. Add a small nose and whiskers. Draw the legs and feet. Add a bushy tail.

Figure work

Adding clothes to a figure can help to define the character. This figure is dressed as a Victorian maid.

Start by sketching these simple shapes for the figure. Draw an oval for the head. Add ovals for the body and hips. Draw straight lines to connect the ovals and show the positions of the limbs. Indicate the joints with dots. Draw tube shapes for the arms, using your construction lines as a guide. Draw two shapes for the feet. Make the legs into tube shapes. Add a small circle for the position of the big toe. This will help you draw the shoes.

Drawing hands

Follow these steps to help you draw the shape of a hand. As you get better you will be able to draw different hand gestures.

Two parallel lines show the soles of the shoes. Try drawing these hand gestures.

Finish the head by adding the hair and eyelashes. Shade above the eyes and inside the ear.

Sketch in the hair and add the cap. Draw the shape of the clothes going around the body. Sketch in the dress using curved lines. Add details such as cuffs, buttons and a collar. The hem of the dress covers part of the feet. Add lines to the apron and at the bottom of the dress to show folds in the material. Add shading to areas like this where light wouldn't reach.

- The Boredom Buster series are perfect for long journeys, waiting rooms and the summer holidays, keeping children mentally stimulated and engaged for long periods of time.

Boredom Buster: A Puzzle Activity Book of the Human Body

How you see

Light passes through a hole called the pupil, in the coloured part of your eye. It passes through the lens which focuses it on the retina at the back of the eye. This sends signals via nerves to your brain.

Tricking the eye

Look at this picture for a minute or two. Then close your eyes. You should see an image of the skull even though your eyes are closed.

Look at the circles in the centre. Which looks bigger? Now measure them with a ruler.

Colour the pictures

Check your pulse

Every time your heart beats, it sends a surge of blood through your arteries. These little surges are your pulse.

Feel your pulse by pressing two fingers on your wrist below the base of your thumb.

Eating and exercise make your heart beat faster. Time your pulse after doing different activities for two minutes. Record the results below.

Activity	Resting	Eating	Walking
Beats per 10 seconds			
Activity	Running	Shopping	Swimming
Beats per 10 seconds			
Activity			
Beats per 10 seconds			

Multiply the number of beats by 6 to find the number of beats per minute.

Match the skeletons

The adult skeleton contains about 206 bones. The smallest bones are in your ears!

Find the skeletons that match exactly!

How tall are you?

Measure your height and draw yourself between the two figures.

An adult's height is eight times the size of the head.

A baby's height is four times the size of its head.

How many times does your head fit into your height?

Follow the tail

Biggest and smallest

The tallest Man who ever lived, American Robert Wadlow, was 2.72 M.

Average human 1.65 M.

Chandra Bahadur Dangi of Nepal is the shortest Man, 0.55 M.
