

Fleurus

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- **Winner of the 2024 SLA Information Book Award Judges' Choice Category 8-12**
- As told by UK Sepsis Ambassador Patrick TJ Kane
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics
- The forefront of diversity - featuring stories from celebrities and people around the world

Human 2.0

INTRODUCTION

Imagine a world where all around us are people with bionic limbs, machines attached to their bodies and connected to the world. This world would be a place where we can live without and communicate via their limbs, and even people who use robotic limbs to walk everywhere. In this world, children have to live with external ears, and people have without legs can walk using ones made of metal and carbon fibre. Some people use chips inside their bodies to get into their offices, or to get their coffee on their way into work. This world is full of incredible people who are using technology to do amazing things. But the most amazing part of all is that this world is the one we already live in. Technology has changed all of our lives, and not just with the machines we use to get things done. We have people who carry these with disabilities, and we have people who have created the means of the world's imagination, and we have people who have created the world of all the time. But bionic technology exists, and it's right in front of our eyes. Far from a scene from a science fiction film, the future is far away from us. This book explores the world of bionic technology, from bionic limbs (see pages 32-33) to internal implants (pages 40-41), and includes some of the most remarkable that get us there. We will also look at some of the amazing machines that are around the world, as well as what they mean for us as a species. Our journey to the future has already begun, and it's time to get to know Human 2.0.

THE FIRST PROSTHESES

For as long as humans have been around, we have been losing limbs, or we have lost them. Whether due to an injury or congenital impairment (a condition that is present from birth), people have been trying to replace missing arms, legs, fingers and toes for thousands of years. Early prostheses were made of wood, but over time, as their inventors did not have the technology needed to provide better functionality and comfort, some of these early prostheses closely resemble those that exist today.

The earliest known example of a prosthesis (an artificial body part) belonged to an Egyptian mummyman over 2,000 years ago. This wooden prosthesis replaced the leg on his right foot, and even had a ridge in the shape of a nail carved into it to make it appear more realistic. It would have been strapped onto his foot with string, and scientists believe that it would have greatly altered his balance.

Count Götz von Berlichingen Perhaps the most famous example of an early prosthesis is that belonging to the German knight Count Götz von Berlichingen, who lost his hand during battle in the early 1500s. Count Götz asked local craftsmen to make an iron hand with digits, fingers and thumb that could lock into place, so he could hold a horse's reins or a weapon. This hand was made of iron and leather, and some people believe it inspired the phrase, 'He rode with an iron fist'.

WHAT IS BIONIC?

Bionics refers to the transfer of technology between artificial objects and living organisms. The word 'bionics' comes from a combination of the Greek words for 'bio' (life) and 'bionics' (biology). It was coined by American engineer and science fiction writer Jack J. Good in the 1960s. Bionics is the science of learning from nature. It is the study of how nature has solved problems, and how we can use that knowledge to create new technologies. Bionics is a field of study that is growing rapidly, and it is expected to be one of the most important fields of study in the future. Bionics is a field of study that is growing rapidly, and it is expected to be one of the most important fields of study in the future. Bionics is a field of study that is growing rapidly, and it is expected to be one of the most important fields of study in the future.

BIONIC LIMBS AND IMPLANTABLE DEVICES

A prosthesis can be internal or external to the body. The ways in which people can replace parts of their body can largely be broken down into two groups: bionic limbs and implantable devices.

'Implantable devices' is a broad term describing anything that is surgically implanted inside the body. Because surgery is required to gain access, these devices cannot easily be removed, and are typically designed to stay inside the body forever. Examples of these include pacemakers and cochlear implants.

Bionic limbs are artificial body parts, which are intended to replace the function of a human body part, such as an arm or a leg. These are attached to the body, usually via a belt, strap or socket, and can be easily taken on and off by their wearer.

If either a bionic limb or an implant has batteries that need to be charged, they are called 'active'. Those that do not are called 'passive'. Some implants, such as cochlear implants, need batteries. These sit outside the body and attach to the implant via a wire, so the user does not need surgery every time the battery runs out (see pages 28-29).

Gorgeous canines of every shape, size and colour bound through this book – all 101 of them!

- The perfect gift for dog lovers big and small
- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

101 Dogs

Japanese Chin

In Japan, the Chin was regarded not as a dog (inu) but as a separate being (chin), bred to have a higher status among dogs and ideal for noble companionship. Modern Chinese make charming pets as they are loving and playful, and are one of the most out-like breeds. They like to climb, and often climb their face with their paws. Looking at their lovely, long fluffy coat, you might think this pretty little creature needs lots of brushing. Not so – the Chin is a 'wash and go' kind of dog, only needing a weekly tidy up.

Life Expectancy 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

Akita

A strong and sturdy dog, the Akita was developed in Japan. It is a fiercely loyal, not for much an imposing breed, very loving. One Akita famously waited for his owner at the train station every day for nine years after he had died. One thing that can be startling is its habit of holding things in its mouth, including your wrist! It isn't going to bite you, it simply wants to take you to where it wants you to go – often to its bed to go for a walk or to its bed because it wants feeding. The Akita doesn't often bark but it does make a lot of noise when those owners say their dog matters under its breath!

Life Expectancy 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

Shiba Inu

The smallest of six dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. It's like a little stoic warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, none it required boldness, elegant (good nature) and noble (adornment). It also tends to be passionate – like a sturdy toddler, the Shiba Inu doesn't like to share and if it could speak, its first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

Life Expectancy 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

Pharaoh Hound

This elegant breed was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Pharaoh loves people and simply loves life. It's a natural clown – you can even teach a Pharaoh to smile! And it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting breed, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

Life Expectancy 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

Shar-Pei

This strange-looking breed looks like it needs ironing! These deep wrinkles serve a purpose, though. The Shar-Pei breed name translates as 'sand skin' – was sometimes called the 'Chinese lightning dog' and any attacker would have a tough job biting through those loose, thick folds and tough skin. They were once known as 'lion dogs' – an obvious nod to their lion-like appearance. They were used as 'lion dogs' – an obvious nod to their lion-like appearance. They were used as 'lion dogs' – an obvious nod to their lion-like appearance.

Life Expectancy 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

Greyhound

This sleek and elegant creature is known as the Ferrari of the dog world. And this is no idle boast: the Greyhound can run at speeds of more than 70 kilometres per hour. Greyhounds were bred for Chaperos as well as Britain's great monarch, Elizabeth I. Their love of this breed led to greyhound racing being dubbed the 'Sport of Queens'. From that title, you might think the breed needs masses of exercise, but the Greyhound is surprisingly laid-back. It is a sprinter, not a long-distance runner, so a daily walk is enough. It is, however, most plenty of belly rubs!

Life Expectancy 12-14 Years | **Height** 20-25cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

Saluki

Alaskan Malamute

Prized by the travelling people of the Middle East, this exotic breed is thought to take its name from the Arabian city of Saluk. To the sheikhs, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their hounds had to be fleet of foot. There were once two different types of Saluki – desert and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging...

Life Expectancy 12-14 Years | **Height** 58-71cm | **Trainability** Intelligent but opinionated | **Grooming** Weekly brushing | **Exercise** Daily run | **Most likely to say** Make sure you get my best side | **Least likely to say** I'll sleep on the floor

14

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahlemut people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored... and a bored Malamute is trouble in waiting. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

Life Expectancy 12-15 Years | **Height** 53-64cm | **Trainability** Easy, but can get bored | **Grooming** Needed every day | **Exercise** None! This is an energetic breed | **Most likely to say** This looks like a good spot to dig! | **Least likely to say** (to anyone) You shall not pass

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

INTRODUCTION

When I was a kid growing up in Mississippi and Tennessee in the United States, I learned early on about social injustices that exist in the world.

I remember defending myself against bullies who did not like me because of my dark skin. I recall watching my favourite TV shows and learning about South African apartheid, police brutality, the global AIDS crisis and historic movements for civil rights through episodes that dared to highlight these causes. As I recognised the power of the media in expanding my knowledge, I began to create art in my teens that reflected the issues happening around me - 9/11, Hurricane Katrina, the Jena Six trials. And the time I found myself as an organiser on the ground in the Ferguson Uprising. I felt equipped with the experience to deploy a way of bringing people together to raise our collective voices.

Throughout this book, you will learn the art of protest through the many activities and strategies that have been created across the world to protest social injustices and advocate for the rights and liberties of diverse communities. You will learn a bit of my story as well as the stories of others – leaders, artists, youth and everyday people – who have used art as a tool for organizing communities and catalyzing change. However, I hope you will also take the art of protesting. Tips and strategies are shared throughout this book to help you exercise creative ways to mobilize groups, create and protest with others. Suggested art activities range from writing simple protest signs through to more sophisticated, multi-media, organized, and lasting cause-specific artworks.

With this, you might be more compelled to raise your voice about the issues, causes and global concerns that matter to you. Our society constantly experiences waves of social movements, campaigns for justice and fights against climate issues and disease on a global scale. And no matter where you live, or what language you speak or what cause you choose, it is my hope that this book will encourage and equip you to use art as a language and instrument that can help you champion your chosen cause.

01 WHY ART MATTERS IN SOCIAL MOVEMENTS

MY STORY AS AN ARTIVIST IN FERGUSON

On August 9, 2014, my life – like those of many in my home city of St. Louis, Missouri – was forever changed when I learned that a teenager had been killed by a police officer while walking along the streets of his grandmother's neighbourhood. His name was Michael Brown Jr. and his body lay in the street for four and a half hours as news media captured photos and people crowded around in dismay. Over the days that followed, hundreds of people began to march in protest across the small municipality of Ferguson, Missouri, where he lived. I was one of them, and after daily – and soon nightly – protesting, I wanted to do something more.

At that time, it was education of our local contemporary art movement. I got through graduate school in social work, and by then I was also in a community-based artist and designer in community work, with schools, museums, and artists all across the country. In response to the Reagan Revolution, I created a digital artist called Connected for Justice that helped artists connect and distribute resources to groups all the ground. I also collaborated with a photographer to create a series of photographs and photoshops series that depicted and amplified the stories of the oppressed and the oppressed. And my first book, *Shadows and Light*, came out in 1992. The book is a collection of photographs and text by the same artist, a collection of stories and images that are not only beautiful but also powerful. The book is a collection of stories and images that are not only beautiful but also powerful. The book is a collection of stories and images that are not only beautiful but also powerful.

signified and amplified the stories of people involved in the uprising. And my best friend, Soghra, and I even went door-to-door across Ferguson recording. Indeed, Soghra, a video series of stories featuring neighbors' families whose streets and homes became central to the growing protests. Others in our "activists" collective created murals that amplified movement slogans like "Hands Up, Don't Shoot," and performed flash mobs, and placed guerrilla installations in public spaces to help spread the message of the protests.

WHY ART MATTERS IN SOCIAL MOVEMENTS

Most art that is created in protest will not be acquired by museums, nor is this usually the goal of activists and artists working together. Most often, we aim to reflect and respond to the immediate causes that are grounded in our social movements. And whether used in a march, a social media campaign or as guerrilla art in a public space, protest art helps social movements inform the public of issues, challenge the status quo, convey collective goals and messaging, imagine a vision of change and persuade others to take action.

Informing the Public

When used in public spaces, protest art serves as a mighty tool to help people learn about social issues. As an example, *Chalked Unarmed* was a guerrilla art series by public performance artist and *Mirror Casket* collaborator Mallory Nezam. The project invited citizen collaborators to create chalk outlines, like police outlines of murder victims, on pavements across their communities. Each outline was filled with the name, date and location of a person who had been murdered by a police officer.

Making Messages Visible

Making Messages Visible
In protests across the globe, people tend to write and illustrate their calls to action on cardboard, posters or banners.

At marches, where it can be hard for target audiences to hear each individual's voice, signage allows each person's message to be seen, and the results are often full of creativity and passion.

Imagining a Vision for Change

protest art effectively helps people develop a language and create a vision for how outcomes in a community can be better. While projects like the *Mirror Gasket* challenge viewers to look inward to see themselves differently and empathise with those whose lives have been lost, other works may propel people forward to imagine a new reality.

Influencing Action

Efforts like Decolonize This Place and Theatre of the Oppressed use performances, flash mobs and "spect-acting" (whereby a member of the audience also becomes part of the performance) to engage with people across the world and explore how justice and equality can become reality. *East of the Sun, West of the Moon* facilitates is directly tied to demands for organizations and government leaders to change a policy, boycott unjust spaces, disinvest from harmful companies or stop violent or inequitable public actions. For example, Theatre of the Oppressed ran a performance in 2016 entitled *The Housing Circus*, based on the real life experiences of different individuals trying to receive affordable housing. Drawing from the perspective of LGBTQ+ individuals and war veterans living in New York City, Theatre of the Oppressed used this performance to suggest policy changes.

Challenging the Status Quo

One of the common impacts of protest art is to push against the norms and rules of society. Artists like Elizabeth Vega, Ai Weiwei, Banksy and others have mastered using art as dissent. Such works often take existing materials and cultural artefacts and re-purpose them, or they might remix messages from advertisements, buildings, monuments, news articles or political documents in ways that point to their hypocrisy, outdated messages or other flaws.

THE MIRROR CASKET

*Of the prospects that the artists and I created, we became most known for the **Minor Cassatt**. This project emerged from a series of dreams I had after my first night at protesting. Each dream included me walking into the night carrying a cassatt that I had painted. I would wake up while the image, so reached out to as many artists as I knew to ask for help to bring it to life. Six artists responded, and in a matter of weeks, we worked together to bring materials, paint the cassatts, and make it from their hands. When Michael Berman, Jr. was murdered by the police department where many had gathered night to protest, after his first use, the **Minor Cassatt** appeared in subsequent marches across the region and was exhibited throughout Missouri, including in the capitol. During the year that followed, I gained the attention of the Smithsonian Institution, which asked me for its library. The National Museum of American History and Culture in Washington, D.C. *Artists Against Guns* even wrote an article about it for Smithsonian magazine, titled "The Art of Protest".*

Eventually, the public awareness gained from the Mirror Casket project and other protest artworks allowed me to meet, connect and work with dozens of artists to conceive and develop more creations, performances, videos and even apparel that address women's rights, LGBTIQ+ issues, racial inequality, climate justice and education. Together we have used art to help grassroots groups and organisations lobby for policy changes and influence the ways in which our communities can thrive more equitably.

We Are Palestinian

Celebrating all things Palestinian!

- Reem Kassis is a bestselling writer and cookbook author, popularising her cuisine with *The Palestinian Table*.
- Full-colour illustrated hardback with gloss lam finish.
- Chapters include: Geography, Cultural Symbols, Creative Minds, Agriculture, Cuisine, Performing Arts and History and Religion.

We Are Palestinian

Geography

There are so many beautiful places in Palestine that it would be impossible to cover them all. So in this section, we're going to explore some of the most famous cities and find out what makes them so special. Some of these cities are new in Israel, but they still have big Palestinian populations, and our culture and rich history flourish in the landmarks and traditions.

Jerusalem

Jerusalem is one of the oldest cities on Earth, traces of civilization there go back 4,000 years. In that time, it has been destroyed, captured and renamed – but it has survived, and remains a very special place. One reason is that it is the holy city for the three major Abrahamic religions: Judaism, Christianity and Islam. The major landmarks for these religions – the Western Wall, the Church of the Holy Sepulchre, the Garden Tomb and the Dome of the Rock and Al-Aqsa – are all in Jerusalem.

Did you know?
Jerusalem is the most visited city in the world. Over three million people go there each year!

Although Jerusalem is a big city today, it is one of the oldest cities in the world. It is the holy city for the three major Abrahamic religions: Judaism, Christianity and Islam. The major landmarks for these religions – the Western Wall, the Church of the Holy Sepulchre, the Garden Tomb and the Dome of the Rock and Al-Aqsa – are all in Jerusalem.

Fun Fact
The wall surrounding the Old City is about 1,900 years old. It was built by King David around 1,000 BC.

Jerusalem is a beautiful city with a rich history. It is the holy city for the three major Abrahamic religions: Judaism, Christianity and Islam. The major landmarks for these religions – the Western Wall, the Church of the Holy Sepulchre, the Garden Tomb and the Dome of the Rock and Al-Aqsa – are all in Jerusalem.

The streets are made of massive stone slabs and cars cannot drive inside the city walls. When you walk the streets, you see beautiful art and antique items being sold.

Gaza

Gaza is a Palestinian territory that borders Egypt on one side and Israel on the other. It is made up of four main areas, the largest of which is Gaza City. It is also one of the most densely populated places on Earth. This means that there are many people living in a very small space.

Did you know?
There are about five million people living in Gaza. It is about the same size as the UK city of Belfast, which has a population of 335,000.

Most of the people in Gaza are refugees – people who fled their homes because of war. They came from other places in Palestine, like Haifa and Ramla, and even far north like the Galilee. They hoped they would be able to go back after the 1948 Arab-Israeli War, but have never been allowed to return to their homes.

Gaza was once famous for its beautiful beaches on the Mediterranean Sea and its fishing industry. However, Israel's control of the waters restricts Gaza fishermen from going far out to sea to fish, which means it's increasingly difficult to make a living as a fisherman. Unfortunately, Gaza is also geographically isolated from the rest of the country, making it almost impossible for anyone to visit or leave it.

While these things are sad, the people of Gaza are strong and hopeful, and we can learn many lessons from them about how to live life in the face of hardship. Famous artists like Mahatma (p. 50) who paints beautiful pictures, and musicians like Mohammed Assaf (p. 51) are from Gaza. On a day-to-day basis, the people of Gaza do the same activities people across the world do, like going to school, working, meeting, even singing and dancing.

Supported and empowered by their families, their faith and by each other, the people of Gaza continue to live their lives.

Jericho

People believe that Jericho is the oldest city in the world. It is also the lowest city on earth, sitting 258 meters below sea level. To understand what that means, picture yourself walking away from the beach and hiking down a valley – you would have to go down about 80 flights of stairs to reach Jericho.

Did you know?

When archaeologists explored Jericho, they found remains of early settlements going back 11,000 years!

The name of the valley it sits in is Wadi Qelt, which itself sits in the larger Jordan Valley in the West Bank.

People have always lived in Jericho, from the age of hunter-gatherers to the present day. It's also one of the first places in the world to have agriculture and probably where irrigation, the process of supplying water to plants, was invented. It is the kind of city you call an oasis, or a fertile land in a desert environment. Ein es-Sultan (or The Sultan's Spring), which produces about 1,000 gallons of water per minute, is what waters the whole area.

Jericho can get hot in the summer, but its winters are quite mild, rarely dipping below 10°C. This pleasant weather makes it a very popular place to visit for both Palestinians and tourists.

People from all over the world visit Jericho to see its rich history, and visit landmarks like Hisham's Palace, an ancient castle built over 1,200 years ago during the Umayyad Dynasty.

Fun Fact

More than 40,000 people visit Hisham's Palace each year.
