

Fleurus

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- Sample contents: The First Prosthetics, Jack E. Steele - Father of Bionics, Arne Larsson - The First Pacemaker Patient, How Cochlear Implants Work, Eye Replacements, Keith Hayman - The First Bionic Eye, How Bionic Limbs Work, Campbell Aird - The First Prosthetic Arm, Exoskeletons, Neural Implants, The Paralympics, Neil Harbisson - The First Cyborg, Ethics
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- As told by UK Sepsis Ambassador Patrick TJ Kane
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics

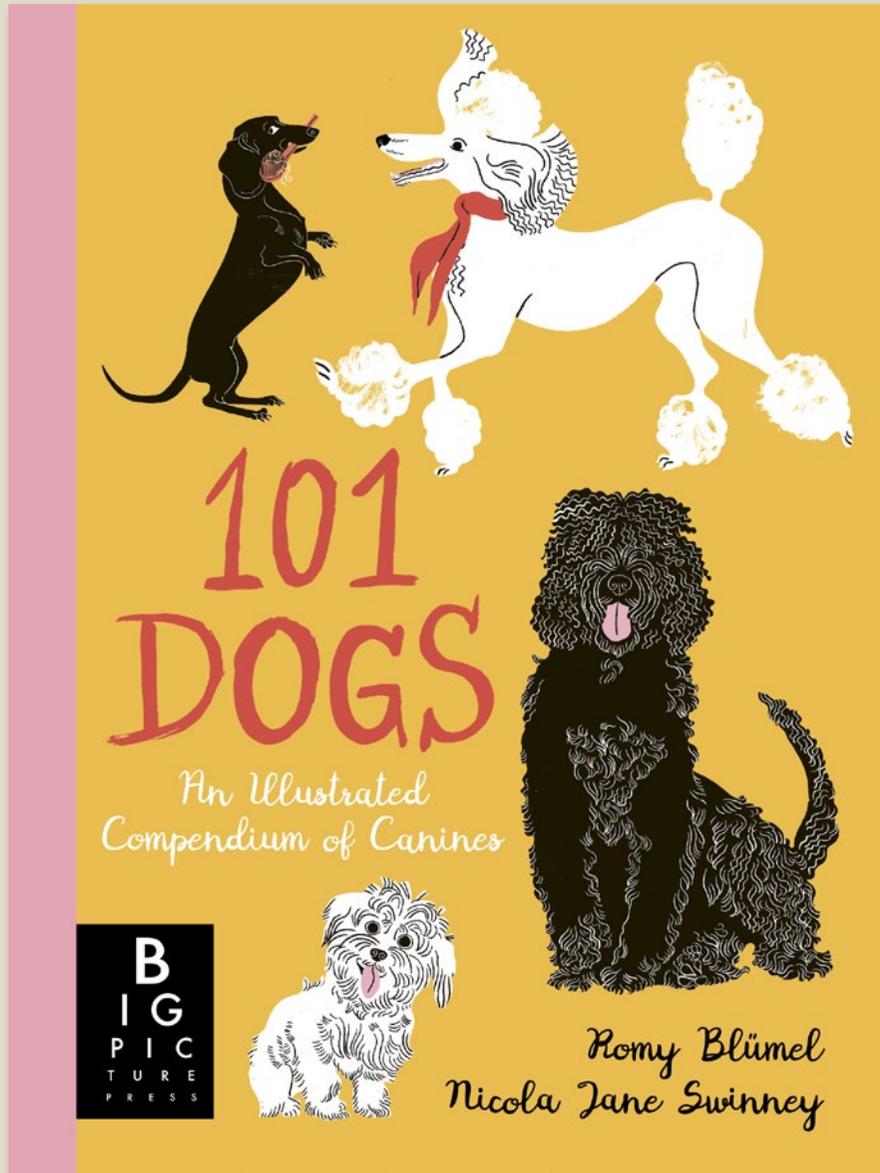

New materials have allowed frames for glasses to become lighter and more durable. The colour of lenses has changed too, creating the first purpose-built sunglasses. These work by adding cerium oxide (a type of chemical compound) into the glass to filter out harmful ultraviolet light from the sun. Sunglasses quickly became fashionable, and in 1938, it was reported that 20 million sunglasses had been sold the year before in the US. Interestingly, only a quarter of those people needed sunglasses for medical reasons. This development is an example of a product that was initially designed to benefit a few but ended up benefitting many. It is testament to the importance of innovation within the disabled community.

The latest breakthrough in eyewear has come more recently, with EnChrome® glasses first launching in 2012. These special glasses are designed to help alleviate problems caused by colour-blindness.

People who are colour-blind find it difficult to distinguish between certain colours, such as red and green. EnChrome® glasses use the same principle as cerium oxide in the first sunglasses, but instead of filtering out harmful UV light, EnChrome® glasses filter out the wavelengths of light that get confused by the brain in those people with red-green colour vision deficiency.

Gorgeous canines of every shape, size and colour bound through this book - all 101 of them!

- The perfect gift for dog lovers big and small
- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

Basenji

In the native Africa, the Basenji is known as 'the dog that doesn't bark'. While many dogs are often said to be 'sage to please', that just doesn't apply to this one. It is lively, imaginative and playful, but it does have a children's streak. The Basenji will usually follow when you want to touch it, but whether it will obey your commands depends entirely on its mood. That impertinent mind can be a problem, too, as anything you have lying around is likely to be investigated by your Basenji – usually by means of chewing. All that said, the Basenji makes a lovely pet as it adores people and playtime.

Life Expectancy 12-15 years | Height 45-50cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Tibetan Mastiff

If you look like a giant teddy bear but this mighty mastiff is not the dog for everyone. While it has a gentle and loving nature, its sheer size can be a bit off-putting, and it is strong-willed. The Tibetan Mastiff sees itself as an equal, rather than a pet, and can be very stubborn. It is thought these amazing dogs lived in Tibet thousands of years ago and were used as guards (not many people would stand up to a 60kg dog) for monks, known as 'lamas'. This is where they developed their thick coat to cope with the harsh climate.

Life Expectancy 10-14 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but doesn't shed much | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I can get up there!

Shiba Inu

The resident of its dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. But it's like a little single warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, *harae* (upright backbone), *oyasoi* (good nature) and *ishiki* (stoicism). It also tends to be possessive – like a nosey toddler, the Shiba Inu doesn't like to share and if it could spare, it's first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

Life Expectancy 12-15 years | Height 35-40cm | Trainability It has a stubborn streak | Grooming Very little | Exercise Needs to play | Most likely to say I can get up there | Least likely to say I'll be on your side

Parash Hound

This elegant hound was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Parash loves people and simply loves life. It's a natural clown – you can even teach a Parash to 'roll' and it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting hound, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

Life Expectancy 12-15 years | Height 50-60cm | Trainability Easy | Grooming Very little | Exercise Needs to play | Most likely to say I can get up there | Least likely to say I'll be on your side

Saluki

Praised by the travelling people of the Middle East, this ancient breed is thought to take its name from the Arabian city of Sals. To the Greeks, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their heads had to be fast of foot. There were once two different types of Saluki – short and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging...

Life Expectancy 12-15 years | Height 50-70cm | Trainability Average but sometimes | Grooming Weekly brushing | Exercise Vigorous walks | Most likely to say I can get up there | Least likely to say I'll be on your side

Alaskan Malamute

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahomet people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored – and a bored Malamute is trouble in waiting. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

Life Expectancy 10-12 years | Height 60-70cm | Trainability Good for children | Grooming Lots of brushing | Exercise Needs plenty of room to move | Most likely to say Look how beautiful I am! | Least likely to say Give me a cuddle

Tibetan Spaniel

This little dog likes to climb! Almost cat-like, it will try to find the highest perch from which it can watch over everyone and everything. Resembling a small lion (a powerful symbol in Tibet), it was highly prized as a watchdog. This watchful quality has been bred into the Tibetan Spaniel for thousands of years and it takes its role very seriously – don't even think about farting and blaming it on someone else in its presence! But don't expect your dog to be happy on its own. Tibetan Spaniels like company and get bored quickly – left to themselves they are likely to bark.

Life Expectancy 12-15 years | Height 25cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Afghan Hound

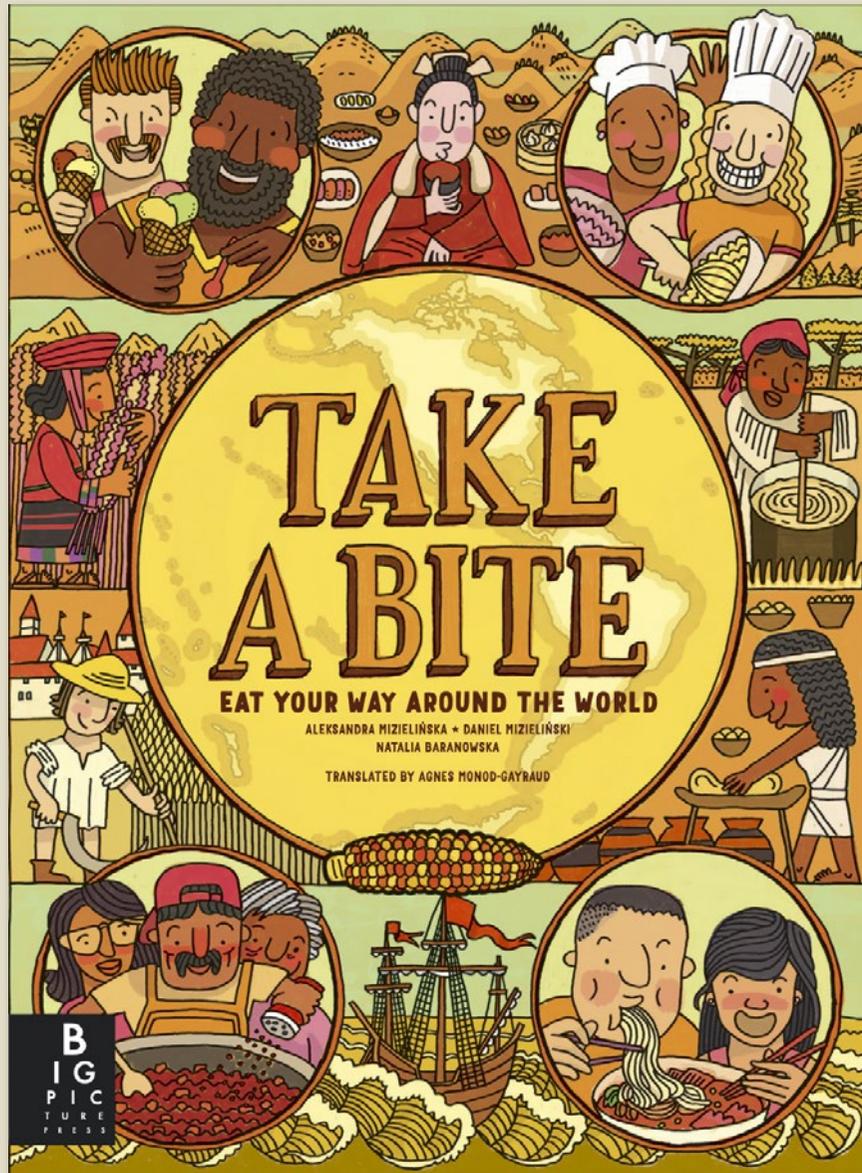

With its slender, exotic face, long silky hair and lithe body, the Afghan Hound is surely the supermodel of the dog world. And as well as being one of the most beautiful breeds in the world, the Afghan is possibly the oldest. It comes from Afghanistan, where it was known as the Tazi, and was used to hunt dangerous animals, such as leopards. It was not only brave, but also extremely fast, capable of running at speed for many kilometres. Its independent nature means it does like attention, but on its own terms.

Life Expectancy 10-12 years | Height 60-66cm | Trainability This independent mind can be challenging | Grooming Lots of brushing | Exercise It needs plenty of room to move | Most likely to say Look how beautiful I am! | Least likely to say Give me a cuddle

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

SYMBOLISM

Protest art often makes use of symbols, which can quickly convey powerful meaning.

Paper Cranes

In Japan, it is believed that someone who folds 1,000 origami cranes will be granted a wish. In 1945, two-year-old Sadako Sasaki was in the vicinity of the atomic bomb dropped on Hiroshima. She suffered long-term effects from that exposure, including developing leukaemia. Before she died at the age of 12, Sadako folded more than 1,000 cranes, and the paper crane went on to become a symbol of peace.

The Peace Sign

The peace sign was created by the British artist Gerald Holtom in 1958 as the logo for a campaign for nuclear disarmament in the UK. It has since become an iconic symbol of calls for peace.

Umbrellas

During protests for democracy in Hong Kong in 2014, activists used umbrellas as shields against tear gas and other aggressions by the police. The umbrellas came to symbolize the protests and gave the movement its name (read more on pages 52-53).

The Clenched Fist

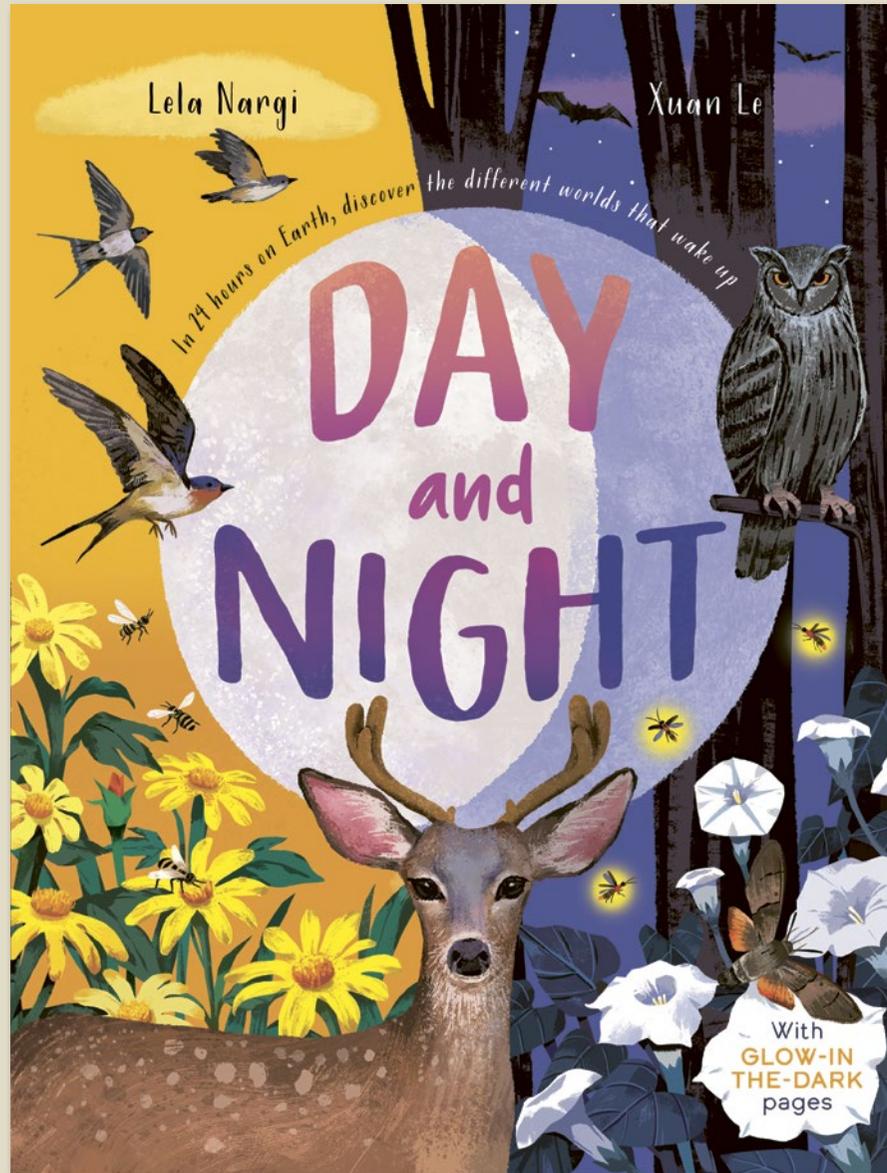

The image of an upraised clenched fist is a powerful symbol of protest and resistance. Some of its first uses were by labour unions in the early 1900s, before it grew in popularity and became a symbol of many causes, including Black Power, the anti-apartheid movement and the feminist movement.

The Rainbow

The rainbow is the most iconic symbol of the LGBTQ+ movement. It represents diversity, acceptance and the spectrum of human sexualities and genders.

Day and Night

A narrative non-fiction story of a day on Earth

- Sample contents: TWILIGHT Mule deer and mountain lion (North America); DAWN Spiders weaving webs (Australia); EARLY MORNING Hummingbirds & sweat bees (Mexico); LATE MORNING Andean condor (South America); NOON Cicadas (Western Europe); EARLY AFTERNOON Caracal, python (Africa); EARLY EVENING coral reef (Fiji); DUSK Moonflowers & sphinx moth (South Asia)
- Glow-in-the-dark ink on the nighttime pages
- This book can be read as a gentle story at bed time or to learn more about the world
- Cover treatment: matt lam + spot UV + glow-in-the-dark-ink (cover and nighttime pages)

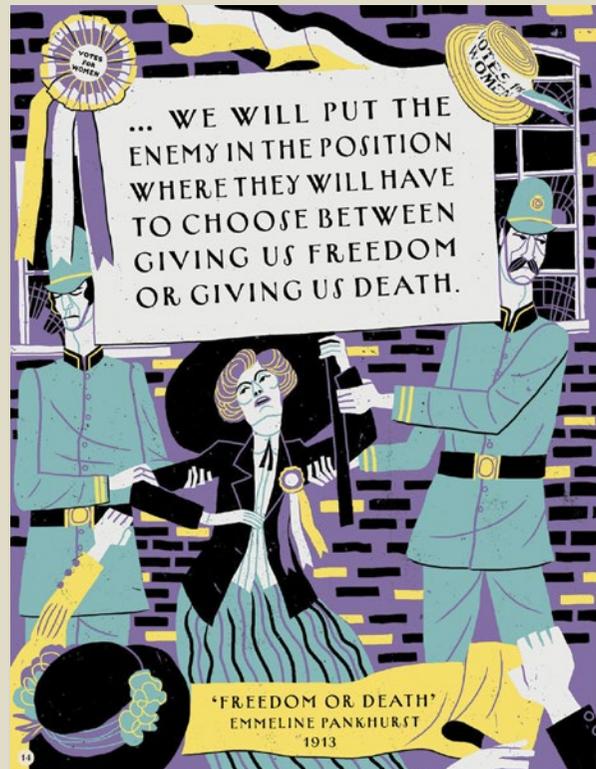

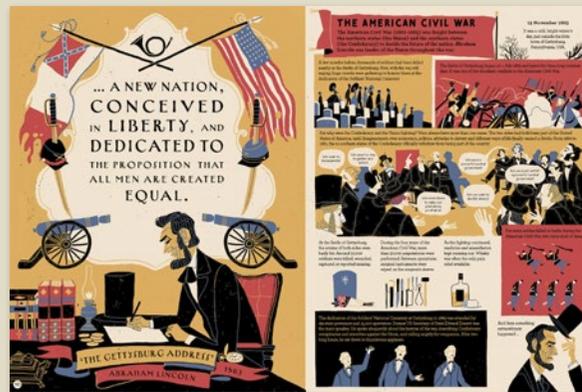

Talking History

150 years of world-changing speeches

- An accessible look at political and social history, and issues that remain pertinent today
- Contemporary design and illustrations from André Ducci accompany engaging text
- Authors are experienced children's writers and academics with expert knowledge on the topics discussed. In 2021, Joan Haig was selected as one of prestigious Scottish Book Trust's authors in residence, working with a school in Aberdeen
- Sample contents: Abraham Lincoln, 'The Gettysburg Address', 1863; Jawaharlal Nehru, 'A Tryst with Destiny', 1947; Nelson Mandela, 'Speech from the Dock', 1964; Harvey Milk, 'The Hope Speech', 1978; Angela Merkel, 'Address to 68th Session of the WHO', 2015 and Severn Cullis-Suzuki, 'Listen to the Children', 1992,

Talking History

In 1903, in the city of Manchester, UK, Emmeline Pankhurst and her eldest daughter Christabel founded the Women's Social and Political Union (WSPU). The organisation campaigned fearlessly for women's right to vote.

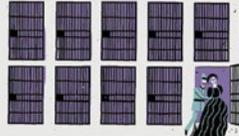

THE SUFFRAGETTE MOVEMENT

This wasn't the first time that women in Britain had fought for the vote. Since the mid-nineteenth century, female campaigners called 'suffragists' had tried to win rights for women in society through peaceful petitions and, later on, by refusing to pay their taxes.

But this campaign was slow with few results. After years of unsuccessful peaceful protest by the suffragists, the WSPU decided that it was time for action - 'Deeds Not Words', as their motto said. Members of the WSPU took part in 'civil disobedience' to literally fight for their cause. They chained themselves to railings, heckled politicians, placed bombs in empty buildings, and smashed windows in public places, constantly clashing with the authorities. They were so determined to achieve their political aims that they deliberately took part in violence and vandalism to influence the public and the government.

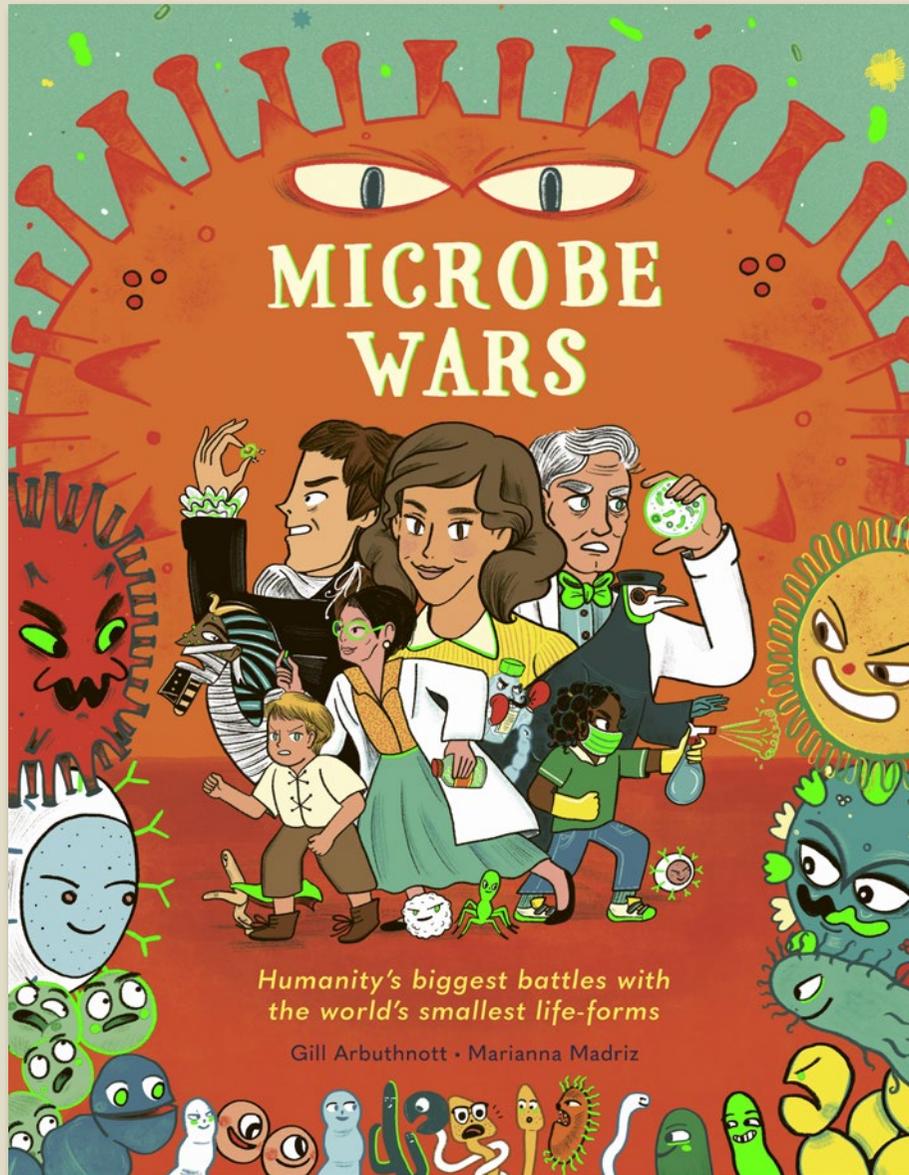

THE CAT AND MOUSE ACT

Around 1,000 suffragettes were imprisoned for their 'substance' behaviour. While in jail, some continued to fight by going on hunger strikes, refusing to eat or drink. At first, they were released to prevent them from starving, but, by 1910, prison wardens began to force-feed them. Women were badly hurt, prompting public outrage at what was seen as government torture. The government responded by passing the 1913 'Prisoners' (Temporary Discharge for Ill Health) Act. Under this new law, when women on hunger strike became critically weak, they were sent home. As soon as they recovered, they were promptly returned to continue their sentence. It was dubbed the 'Cat and Mouse Act' because of the way a cat plays with its prey repeatedly letting it escape before catching it again.

Microbe Wars

A fascinating account of the world of microbes, what they are and how humans have tried to defeat them.

- Sample contents: The Black Death; Diseases that Changed the World; Covid 19; Pandemic!; Germ Warfare; Edward Jenner and Vaccination; Your Immune System; How Immunisation Works; How Penicillin Won WWII; Antibiotic Resistance; Our Microbe Friends
- The perfect title to explain Microbes to ages 8-12. In a time when a new disease has changed our world, understanding microbiology is vitally important.
- Written with great energy and humour by former science teacher Gill Arbuthnott.

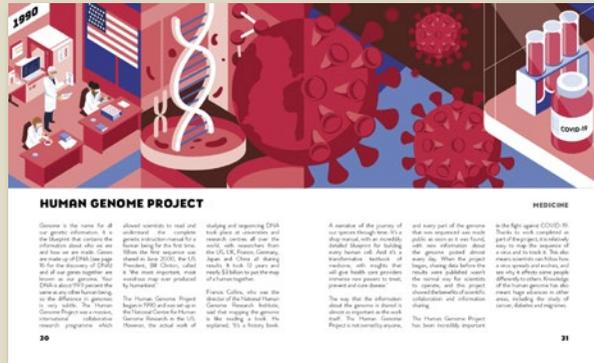

Together We Can

40 inspirational stories about teamwork

- Sample contents: **Science** Dark Matter (US), Marie and Pierre Curie (France) **Medicine** Penicillin (UK), Louis and Marie Pasteur (France), **Technology** Apple Inc. (US), **Conservation and Rescue** The Black Mamba Anti-Poaching Unit (South Africa), **Politics and Activism** The Magna Carta (UK), The United Nations (global) **Sport** The Olympic Games (global), The All Blacks (New Zealand), **Culture** LEGO (Denmark), BTS (Korea)
- A fully-illustrated anthology of 40 true stories about what human beings can accomplish when they work collaboratively.
- Includes stories from the fields of science, medicine, technology, conservation, politics and activism, sport and culture.

Together We Can

HUMAN GENOME PROJECT

In the same way, all the projects that require the information about who we are and how we are made. Come and see the genome project in the history of 20th century. The genome project is a massive project that has been going on since 1990. It is a project that has been going on since 1990. It is a project that has been going on since 1990. It is a project that has been going on since 1990.

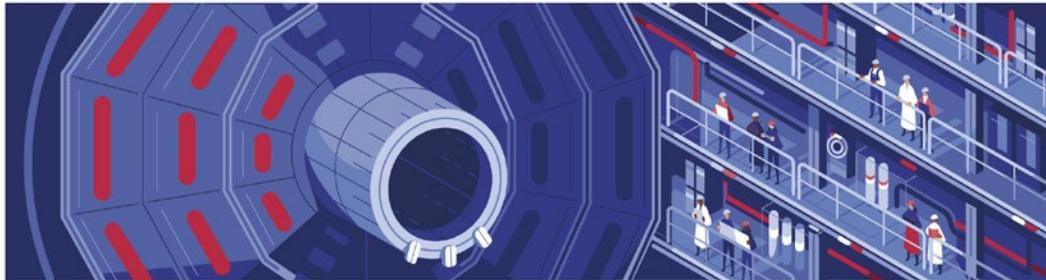

THE 2010 COP18 MING ACCIDENT

On 5 August 2010 there was a large-scale accident in the city of Ming. The accident was caused by a crane that was lifting a large structure. The crane was lifting a large structure. The crane was lifting a large structure. The crane was lifting a large structure. The crane was lifting a large structure.

POLITICS AND ACTIVISM CLIMATE CHANGE ACTIVISM

The dangers of climate change are becoming more and more apparent. The temperature of the Earth is rising.

SCIENCE CERN AND THE LARGE HADRON COLLIDER

CERN (Conseil Européen pour la Recherche Nucléaire) is the European Organisation for Nuclear Research. It is an international scientific research organisation for the study of high-energy particle physics. There is a huge CERN laboratory on the border between France and Switzerland which brings thousands of scientists from all over the world together to collaborate on groundbreaking

scientific research. Over 12,500 scientists of more than 110 nationalities collaborate at CERN.

CERN promotes the Open Science movement, which aims to make scientific research accessible to everyone. This means that all publications by CERN authors can be accessed by anyone, and the data and software are also available.

Sharing research means that scientists all around the world can collaborate and build on each other's work.

CERN is the home of the Large Hadron Collider, which is the largest and most powerful particle accelerator in the world. It cost around \$10 billion to create. It is a 27-km (17-mile) ring of superconducting magnets,

which is big enough to circle the entire city of Geneva. It works by creating two beams of energy, then firing them at each other at nearly the speed of light. When the beams hit each other, tiny subatomic particles smash into each other and break apart, which gives scientists a glimpse of the building blocks of creation. It's incredibly difficult work, as the particles involved are so small. It's the equivalent of firing two needles 10 km (6 miles) away from each other and making them hit in the middle. The Large Hadron Collider has a special cryogenic cooling system to keep it at -271.3°C (-456.34°F), which

means that it is colder than outer space.

The Large Hadron Collider was able to confirm the existence of the Higgs boson. The Higgs boson is a fundamental particle associated with the Higgs field, which gives mass to other particles. The Large Hadron Collider is the only place in the world where Higgs bosons can be studied. Previously, scientists had predicted the existence of these particles, but we did not have the equipment to study them. It's a very important piece of scientific discovery and helps us understand not only the past, but also the future of our

universe. Hundreds of scientists, engineers and programmers worked together on the Large Hadron Collider to make this scientific feat possible.

While it is one of the most important pieces of scientific research to have ever been attempted, the Large Hadron Collider is still at the mercy of outside influences. Animals have managed to damage the Collider twice. In 2016 a weasel chewed through electrical wiring which meant the power had to stop, and there was another power outage in 2019 when a bird dropped a bit of baguette onto electrical equipment!

We Are Palestinian

Celebrating all things Palestinian!

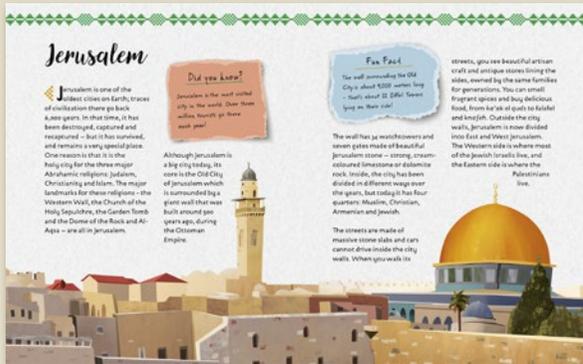

- Reem Kassis is a bestselling writer and cookbook author, popularising her cuisine with *The Palestinian Table*.
- Full-colour illustrated hardback with gloss lam finish.
- Chapters include: Geography, Cultural Symbols, Creative Minds, Agriculture, Cuisine, Performing Arts and History and Religion.

We Are Palestinian

Geography

There are so many beautiful places in Palestine that it would be impossible to cover them all. So in this section, we're going to explore some of the most famous cities and find out what makes them so special. Some of these cities are now in Israel, but they still have big Palestinian populations, and our culture and rich history flourishes in the landmarks and traditions.

Jerusalem

Did you know?

Jerusalem is the most visited city in the world. Over three million tourists go there each year!

Although Jerusalem is a big city today, its core is the Old City of Jerusalem which is surrounded by a giant wall that was built around 3000 years ago during the Ottoman Empire.

Fun Fact

The wall surrounding the Old City is about 1500 metres long. It's about 12.5km! There's a lot to see!

The wall has six watchtowers and seven gates made of beautiful Jerusalem stone – strong, cream-coloured limestone of dolomite rock. Inside, the city has been divided in different ways over the years, but today it has four quarters: Muslim, Christian, Armenian and Jewish.

The streets are made of massive stone slabs and cars cannot drive inside the city walls. When you walk its streets, you see beautiful artisan crafts and antique stores lining the walls, owned by the same families for generations. You can smell fragrant spices and bag, delicious food, from lab to qatfeh to khaleel and knefeh. Outside the city walls, Jerusalem is now divided into East and West Jerusalem. The Western side is where most of the Jewish Israelis live, and the Eastern side is where the Palestinians live.

Gaza

Did you know?

There are about four million people living in Gaza, which is about the same size as the city of Beirut, which has a population of 4,000,000.

Most of the people in Gaza are refugees – people who fled their homes because of war. They came from other places in Palestine, like Yaffa and Ramla and even for north like the Galilee. They hoped they would be able to go back after the 1948 Arab-Israeli War, but have now been displaced for over 70 years.

Gaza was once famous for its beautiful beaches on the Mediterranean Sea and its fishing industry. However, since Israel's control of the waters restricts Gaza fishermen from going far out to sea to fish, which means it's increasingly difficult to make a living as a fisherman. Unfortunately, Gaza is also practically sealed off from the rest of the country, making it almost impossible for anyone to visit or leave it.

While these things are sad, the people of Gaza are strong and hopeful, and we can learn many lessons from them about how to live life in the face of hardship. Famous artists like Malik Maftah (p. 56) who paints beautiful pictures, and musicians like Mohamed Assaf (p. 84) are from Gaza. On a day-to-day basis, the people of Gaza do the same activities people across the world do, like going to school, working, cooking, even singing and dancing.

Supported and empowered by their families, their faith and by each other, the people of Gaza continue to live their lives.

Jericho

People believe that Jericho is the oldest city in the world. It is also the lowest city on earth, sitting 258 meters below sea level. To understand what that means, picture yourself walking away from the beach and hiking down a valley – you would have to go down about 80 flights of stairs to reach Jericho.

Did you know?

When archaeologists explored Jericho, they found remains of early settlements going back 11,000 years!

The name of the valley it sits in is Wadi Qelt, which itself sits in the larger Jordan Valley in the West Bank.

People have always lived in Jericho, from the age of hunter-gatherers to the present day. It's also one of the first places in the world to have agriculture and probably where irrigation, the process of supplying water to plants, was invented. It is the kind of city you call an oasis, or a fertile land in a desert environment. Ein es-Sultan (or The Sultan's Spring), which produces about 1,000 gallons of water per minute, is what waters the whole area.

Jericho can get hot in the summer, but its winters are quite mild, rarely dipping below 10°C. This pleasant weather makes it a very popular place to visit for

both Palestinians and tourists. People from all over the world visit Jericho to see its rich history, and visit landmarks like Hisham's Palace, an ancient castle built over 1,200 years ago during the Umayyad Dynasty.

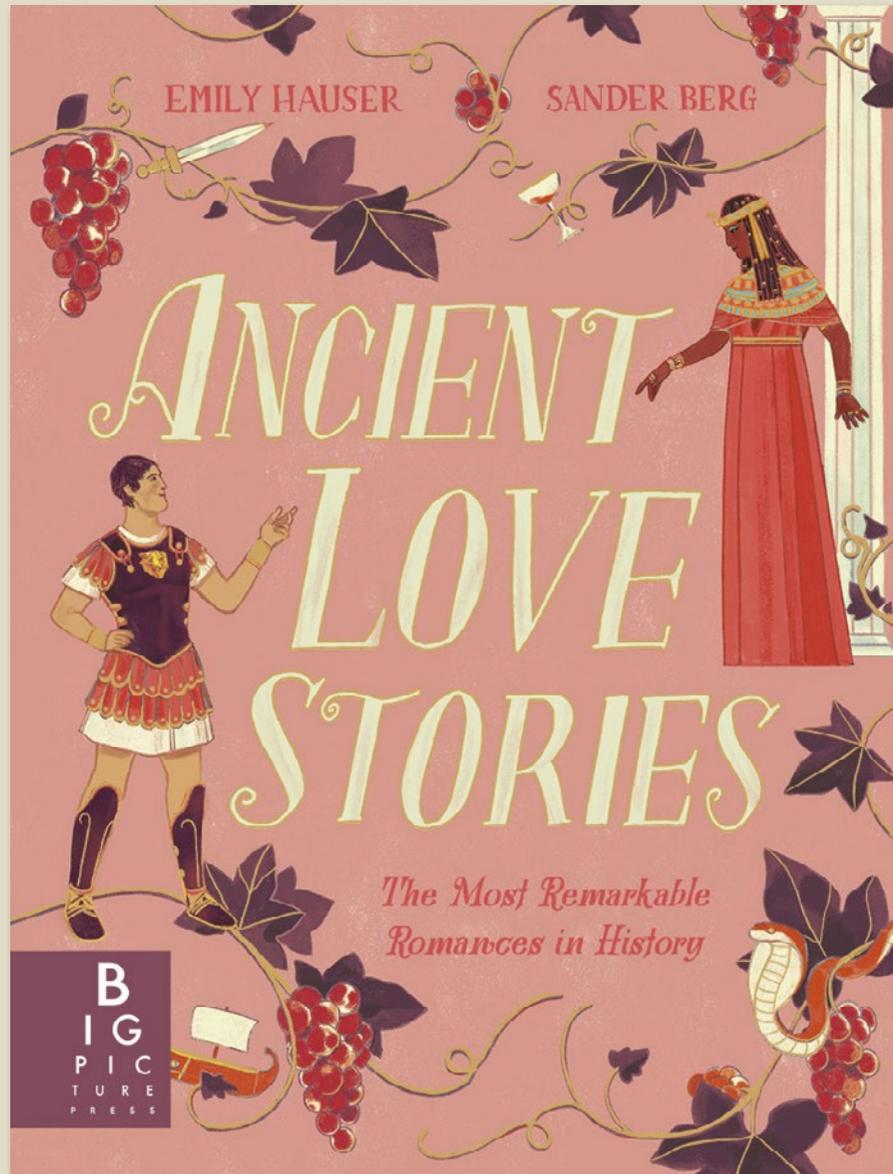

Fun Fact

More than 40,000 people visit Hisham's Palace each year.

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Ancient Love Stories

THE SACRED BAND OF THEBES

This was the final meeting place of the Sacred Band of Thebes, one of the most remarkable and most loyal armies that had ever lived. A bold experiment in an open town square by attacking war and heroes alike, who had died fighting for the freedom of the Greeks. As warriors, not just of soldiers, but of a hundred and fifty noble boys.

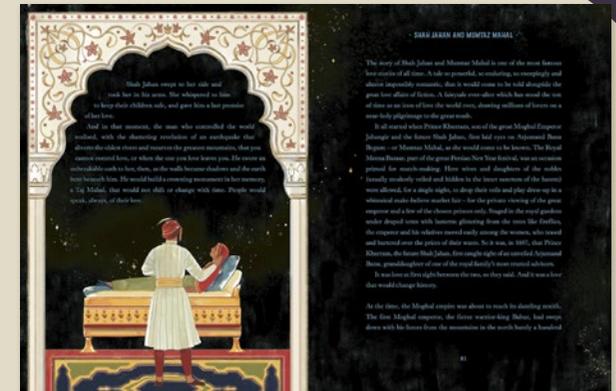

Born together by love loyalty to each other, the crack team of warriors was founded in Thebes in 378 BC by an extraordinary visionary by the name of Pammenes. It began as a resistance corps against the looming military power of Sparta (recovered the world over for its legendary military prowess across the continent to the south. These were chivalry, aristocratic, open, splashing blood across the pages of history, and well suited to the birth of a new kind of army.

HERODIAS AND ANTHOCHUS

These parts first crossed across years earlier, when Herodias - ruler of the Roman world and self-proclaimed prince of peace - took a summer jaunt across the Roman province of Bithynia, in northern Turkey, where Antiochus had his home. The emperor, busy with his job, probably did not spot Antiochus among the crowd of adoring subjects and eager petitioners. But one of his maids did - and, as usual, with an eye to the emperor's taste, spent a night in the maids' quarters, the kitchen-baked young man. Antiochus was duly offered a dinner invitation to the palace's imperial suite along with a tuition package to the emperor's personal academy in Rome. To his boy from a dusty village on the fringe of the Roman empire, this must have seemed an offer too good to be true - a one-way ticket to live among the stars. But, in any good market of opportunity, you'd have known, by reaction to the sun and you might get heated.

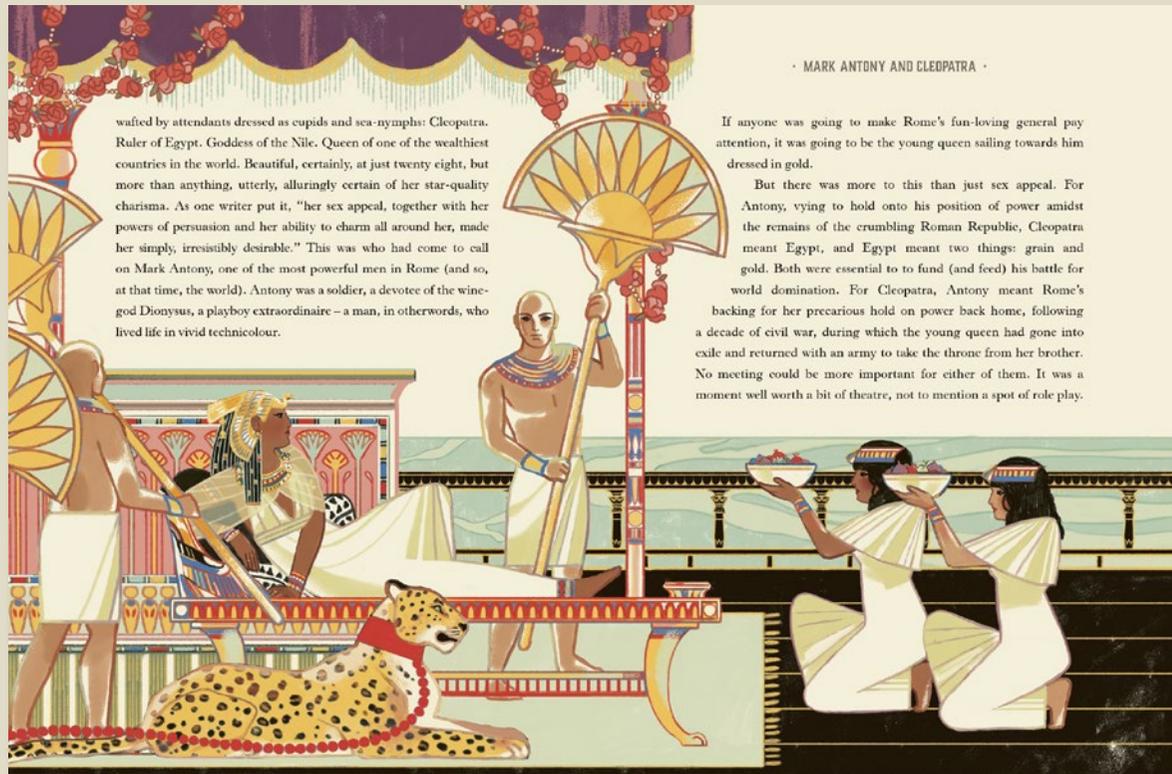

Antiochus' rise to the top was meteoric even by Roman standards, where there were plenty of holy emperors who made it to the big time. Set among the other staff of the imperial household, Antiochus - handsome, good-looking, smart, with a magnetic personality and a nose for the emperor's favored boys - quickly caught the emperor's eye. Herodias was instantly besotted, and Antiochus became his paragon. In the summer of 128 BC, at the age of seventeen, Antiochus was personally selected to accompany Herodias on a tour of Greece (Herodias was a notorious Greek sympathizer, then said - Asia Minor and, finally, Egypt.

SHAH JAHAN AND MUMTAZ MAHAL

The story of Shah Jahan and Mumtaz Mahal is one of the most beautiful love stories of all time. A tale of passion, devotion, tragedy and ultimate sacrifice, their love story is a testament to the power of love. Mumtaz Mahal, the great favorite of Shah Jahan, was a woman of extraordinary beauty and intelligence. Her father, the noble, family nobility, called and hidden in the lower reaches of the harem was allowed, for a single night, to sleep with him and play down his a substantial stake before making love - but the private meeting of the great emperor and a line of the harem princess only. Slipped in the royal garden under a night sky, Mumtaz Mahal, glowing from the moon, the emperor and his subjects turned early among the women, who would and honored over the years of their union. It was, in 1627, that Prince Khurram, the future Shah Jahan, first caught the eye of the beautiful Mumtaz Mahal, granddaughter of one of the royal family's most renowned scholars. It was love at first sight between the two, as they said. And it was love that would shape history.

At the time, the Mughal empire was about to reach its dazzling zenith. The Shah Jahan emperor, the future emperor, Shah Jahan, had made down with his father from the mountains in the north, finally a hundred

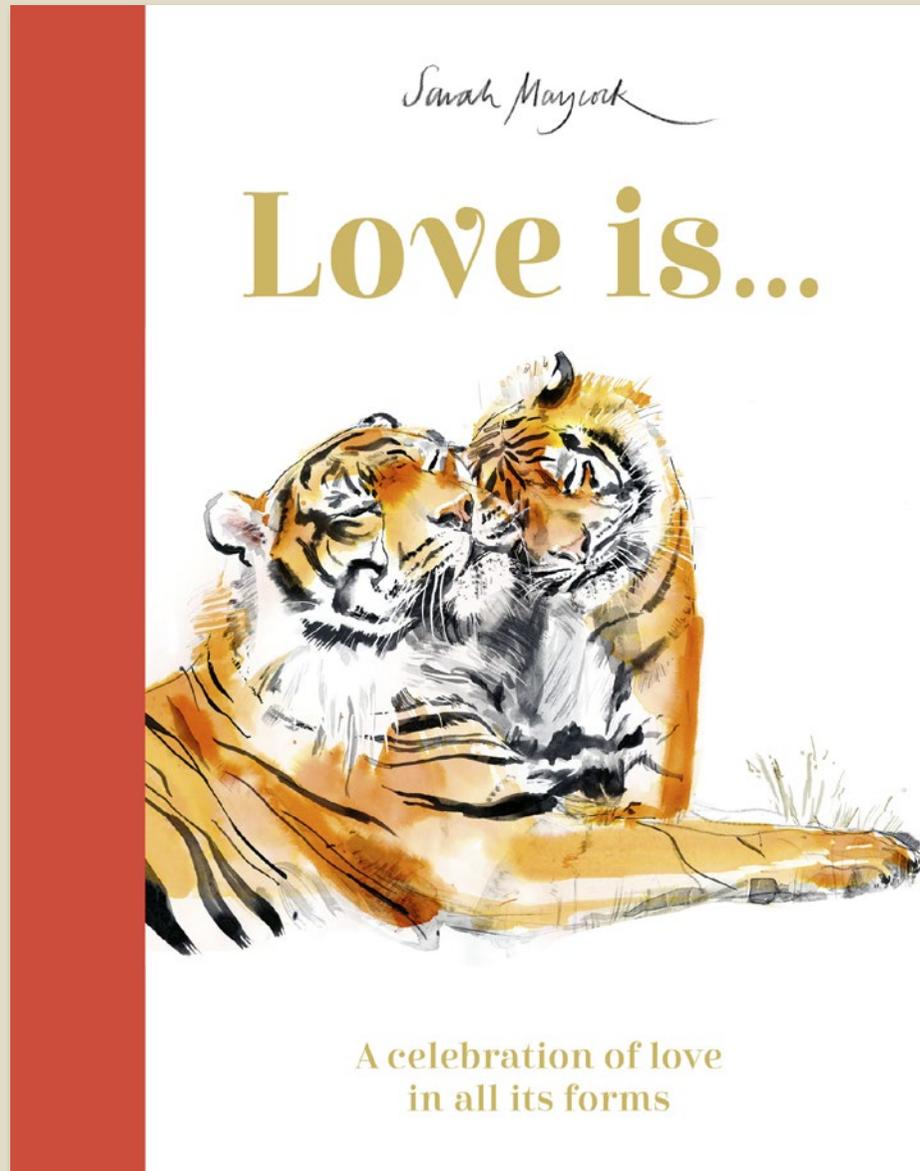

MARK ANTONY AND CLEOPATRA

wafted by attendants dressed as cupids and sea-nymphs: Cleopatra, Ruler of Egypt. Goddess of the Nile. Queen of one of the wealthiest countries in the world. Beautiful, certainly, at just twenty eight, but more than anything, utterly, alluringly certain of her star-quality charisma. As one writer put it, "her sex appeal, together with her powers of persuasion and her ability to charm all around her, made her simply, irresistibly desirable." This was who had come to call on Mark Antony, one of the most powerful men in Rome (and so, at that time, the world). Antony was a soldier, a devotee of the wine-god Dionysus, a playboy extraordinaire - a man, in other words, who lived life in vivid technicolour.

If anyone was going to make Rome's fun-loving general pay attention, it was going to be the young queen sailing towards him dressed in gold.

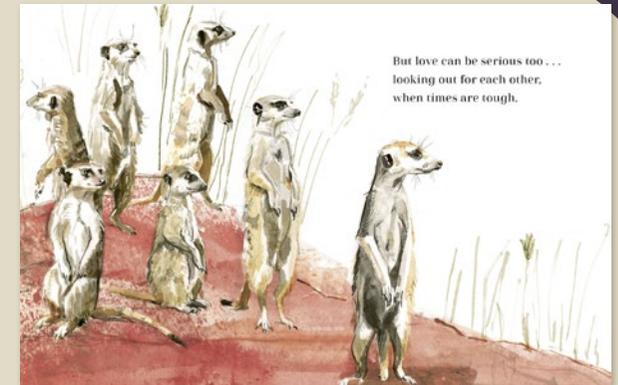

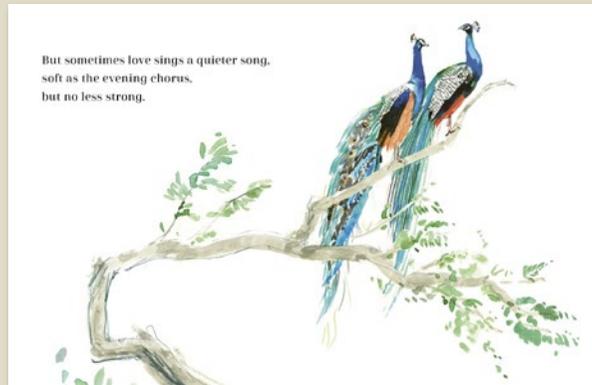

But there was more to this than just sex appeal. For Antony, vying to hold onto his position of power amidst the remains of the crumbling Roman Republic, Cleopatra meant Egypt, and Egypt meant two things: grain and gold. Both were essential to fund (and feed) his battle for world domination. For Cleopatra, Antony meant Rome's backing for her precarious hold on power back home, following a decade of civil war, during which the young queen had gone into exile and returned with an army to take the throne from her brother. No meeting could be more important for either of them. It was a moment well worth a bit of theatre, not to mention a spot of role play.

Art is Everywhere

A playful introduction to art history.

- Growing demand for children's art books that aren't biography or activity
- Fresh, inspiring take on a strong topic
- Highly accessible angle - discusses ideas and techniques that can be applied to art anywhere and everywhere
- Author is a knowledgeable art historian with a witty, unique tone, and years of experience with leading art workshops for children
- Both UK and international sales have seen demand for more 'art' titles. A great opportunity for us to show support for suffering creative arts scene and fill a gap on our list.
- Subjects covered - Why Do we Make Art?, Brush Strokes, Patterns, The Power of Colour, Art Can be Anything, Symbols

How Many Ways Can You Cook An Egg?

Apple and Sultana Pancakes with Cinnamon Butter

MAKES 8 PANCAKES

1. Peel and core the apples, then grate into the largest size of the large grater and rub the other size small sieve. Then the sultanas with the cinnamon and set to one side. Add the ground ginger to a large mixing bowl with the dissolved butter.

2. To make the batter, add the egg and milk to the mixing bowl, then stir to a good consistency. Mix in the baking powder, sugar (if using), plus any sultanas, sultana juice and cinnamon.

3. Take one of the butter (Cinnamon) about 1/2 tablespoon, and mix well with the remaining cinnamon. Put the tablespoon of butter into a non-stick pan on a medium heat.

4. Using a ladle, add the batter to the pan. The pancakes should be about the size of a Big Potato. Cook for two minutes on each side, then flip. Cook for a further two minutes. Repeat until you have eight pancakes. Stack them up, and serve with the cinnamon butter.

HEALTHY TIP These pancakes are not only great with apples, but you can also mix them with other fruits to match the season. Peach, grapes, kiwi, mango or kiwi become a natural choice with sultanas – once you know the texture of these fruits is possible, you can really branch out. Experiment with different types in the batter too, like banana or ground ginger.

Apple, Onion and Sage Relish

MAKES A LITTLE BITTING AND A BITTING

1. Wash the apples, onion and sage. Peel the apples, onion and sage. Cut the apples into small cubes. Cut the onion into small cubes. Cut the sage into small pieces.

2. Add the sliced apple to a bowl. Add the sliced onion to the bowl. Add the sliced sage to the bowl. Mix together.

3. Add the sliced apple to a bowl. Add the sliced onion to the bowl. Add the sliced sage to the bowl. Mix together.

4. Add the sliced apple to a bowl. Add the sliced onion to the bowl. Add the sliced sage to the bowl. Mix together.

5. Add the sliced apple to a bowl. Add the sliced onion to the bowl. Add the sliced sage to the bowl. Mix together.

HEALTHY TIP The sweetness of the Honeycomb apple is perfect for accompanying rich flavours, such as cheese, nuts, sausage and roast pork. This recipe will also work wonderfully with black pudding and chorizo, which are really flavoured and warm with onions. This relish can also be cooked 'just using the Honeycomb' with a more appropriate Honeycomb or Bramley, and serve on a low heat with a dash of water for a softer, jammy sauce. It's the perfect accompaniment to a lovely Sunday roast with all the fixings!

SWEETCORN FRITTERS

MAKES 10 FRITTERS

1. In a large mixing bowl, add the corn, spring onions, sweetcorn, milk, salt and egg. Stir well for 10 minutes. Add the flour, salt and egg. Stir well for 10 minutes. Add the oil. Stir well for 10 minutes. Add the oil. Stir well for 10 minutes.

2. For a non-stick pan on a medium heat, add a little oil. Add the batter. Cook for 2-3 minutes on each side. Repeat until you have 10 fritters.

HEALTHY TIP Sweetcorn fritters are a great way to use up any leftover sweetcorn. They are also a great way to use up any leftover spring onions. They are also a great way to use up any leftover flour. They are also a great way to use up any leftover salt and egg.

MEXICAN STREET CORN

MAKES 10 STREET CORN

1. Peel the corn. Cut the corn into small pieces. Add the corn to a bowl. Add the oil. Stir well for 10 minutes. Add the oil. Stir well for 10 minutes.

2. Add the corn to a bowl. Add the oil. Stir well for 10 minutes. Add the oil. Stir well for 10 minutes.

3. Add the corn to a bowl. Add the oil. Stir well for 10 minutes. Add the oil. Stir well for 10 minutes.

HEALTHY TIP Mexican street corn is a great way to use up any leftover corn. It is also a great way to use up any leftover oil. It is also a great way to use up any leftover salt and egg.

All About Apples

Although some apples are in season all year round, many of them are at their best when the leaves on the trees start to turn brown and the temperature cools. Crunchy, shiny, crisp, juicy apples make a welcome change to the often heavy, warming food of the colder months. But apples baked into pies and puddings are soft and comforting and are a delicious way to greet the autumn season.

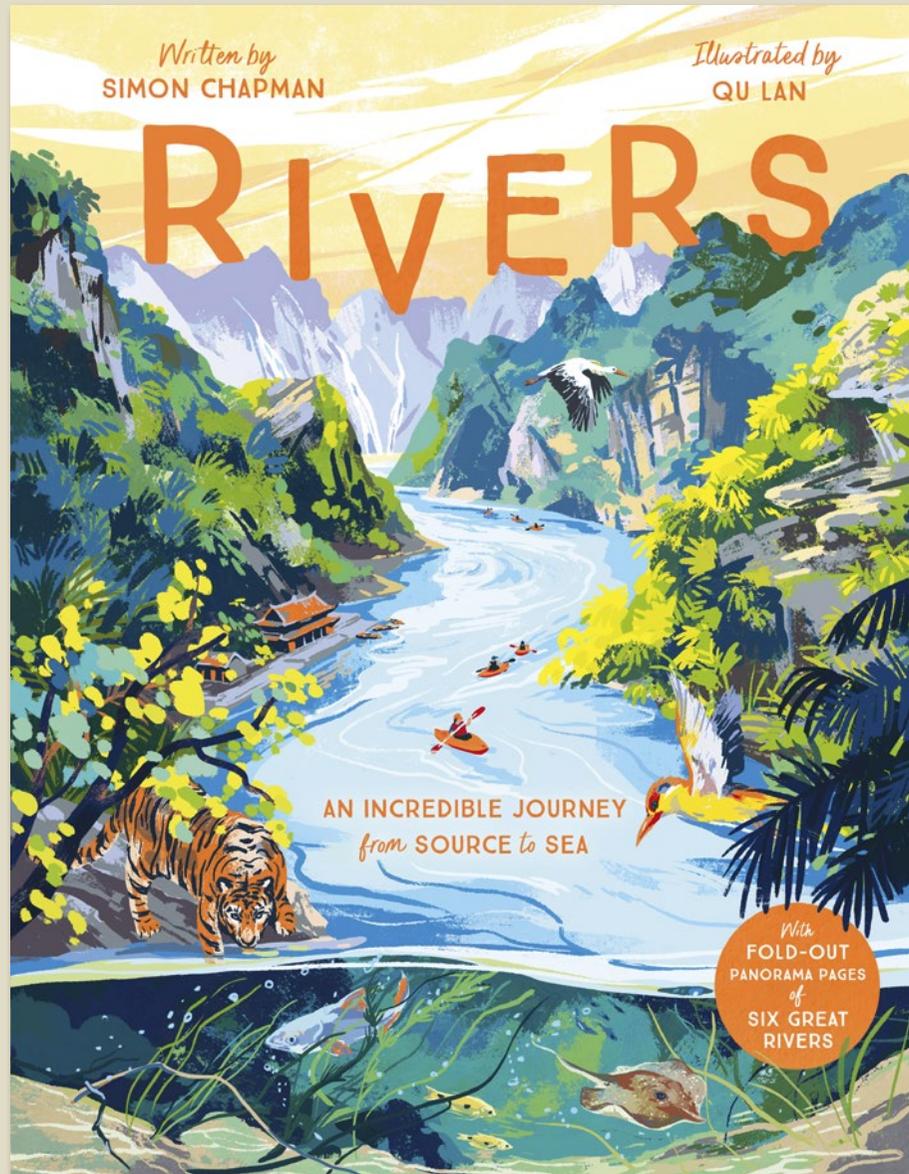

Experiment with combining a couple of different apples when cooking for more interesting flavours. If you're able, shopping at loose-pick green-grocers means you can buy a wider variety.

MOST TART

MOST SWEET

DO YOU KNOW? The world's heaviest apple was recorded in 2002 in Japan, weighing an enormous 2.4kg (5lb 2oz). That's three times heavier than a basketball!

Small text describing a new life.

Was Robert Smith's legend?
Small text describing Robert Smith's legend.

JUNKO Tabei

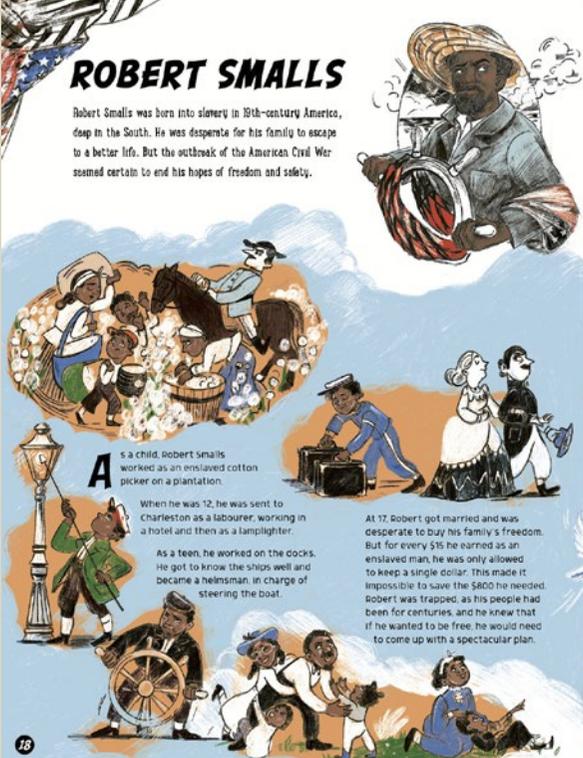

Small text describing the story of Junko Tabei, a Japanese mountaineer.

Small text describing the story of Junko Tabei.

ROBERT SMALLS

Robert Smalls was born into slavery in 18th-century America, deep in the South. He was desperate for his family to escape to a better life. But the outbreak of the American Civil War seemed certain to end his hopes of freedom and safety.

As a child, Robert Smalls worked as an enslaved cotton picker on a plantation.

When he was 12, he was sent to Charleston as a labourer, working in a hotel and then as a lamplighter.

As a teen, he worked on the docks. He got to know the ships well and became a helmsman, in charge of steering the boat.

At 17, Robert got married and was desperate to buy his family's freedom. But for every \$15 he earned as an enslaved man, he was only allowed to keep a single dollar. This made it impossible to save the \$800 he needed. Robert was trapped, as his people had been for centuries, and he knew that if he wanted to be free, he would need to come up with a spectacular plan.

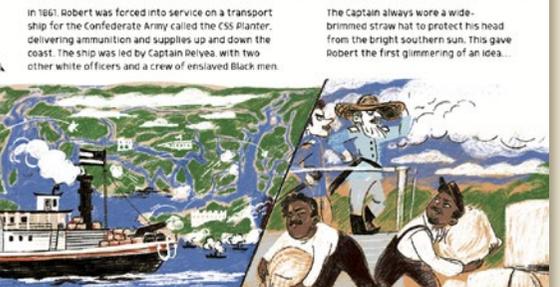

US CIVIL WAR 1861 - 1865

DREAMS OF FREEDOM
The American Civil War began in 1861 between the Southern States (the Confederacy) who wanted to keep slavery, and the Northern States (the Union) who did not.

In 1861, Robert was forced into service on a transport ship for the Confederate Army called the CSS Planter, delivering ammunition and supplies up and down the coast. The ship was led by Captain Bevela, with two other white officers and a crew of enslaved Black men.

The captain always wore a wide-brimmed straw hat to protect his head from the bright southern sun. This gave Robert the first glimmering of an idea...

Tell Me About: The Human Body

Big science for little readers

- The first in a brand-new series of non-fiction books for readers 4+.
- Written in friendly and engaging language by science educator and CBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung
- Cover finishes: matt lam and spot UV
- CONTENTS: Brilliant body; The skin; Skeleton; Muscles, Brain; Thinking; Nervous system; Eyes; Ears; Mouth and Nose; Digestive System; Blood; Water; Pumping blood; Lungs and breathing; Immune system; Feelings; Helping your body

Tell Me About: The Human Body

Brilliant Body

So many amazing things are happening in your body right now! Let's take a look at just a few of them...

As you breathe, spongy bags called lungs are sucking air in and putting it into your blood.

When you run, stretchy cords called muscles pull bones back and forward. Your bones connect together in a structure called a skeleton. And your skin wraps everything up.

Tiny electrical signals are making your heart beat - to-beat-to-beat - to pump blood around your body.

Your body is made from lots of different parts that work together to do important jobs. These parts are called organs.

If you look at the pictures in this book, you're using organs called eyes. And when you think about all of this, you use an organ called the brain.

When you think or laugh or wiggle your toes, you use energy. The energy comes from the food you eat. The food goes into your blood and all around your body.

The Skin

Let's begin our body tour with your skin. This stretchy waterproof layer wraps around your body keeping germs out and keeping your insides... inside!

Your skin is full of sensors that help you to touch and feel things. You can feel pain and warmth and the tiny footpads of an insect crawling on your arm.

Did you know...? The skin is the biggest organ in the body!

Touch sensors help you to feel how hard to press when you lift it and hold objects - so you don't drop or squash them.

The top layer of your skin is dead! Underneath it, new skin is being made. It pushes the old skin upwards until it flakes off as dust. Yes, your skin becomes dust!

Your hair and nails are made from the same stuff as skin. It's called keratin.

Your skin cools your body too. One way it does this is by making little drops of liquid called sweat.

When sweat drops are warmed by a hot body, they float off into the air taking heat away with them!

Skeleton

The thing that gives your body its wonderful shape and height is a skeleton. It is made from 206 bones that join together at hinges called joints.

Full your fingers! The bones are the hard parts, and the joints are where your fingers bend.

Strong bony bones called cartilage make up some parts of the skeleton including your ears, your nose and sections of your ribs.

The skeleton protects your insides too. Your ribs make a cage around your lungs and heart and your skull is like a helmet, protecting your brain.

Inside your biggest bones is a juice called marrow. New blood is being made in the marrow. That's right, your bones can make blood!

Bones are full of tiny holes that make them light. But the pattern of the holes makes them really strong too.

Muscles

Muscles are stretchy cords that pull body parts to make them move. If you wiggle your eyebrows and stick out your tongue, you did it using muscles!

Muscles can pull, but they can't push so they need to work in teams. One muscle pulls a body part one way, and another muscle pulls it back again.

Great teamwork muscles!

1. Bend your arm. The set of muscles at the front of your arm, called triceps, pulled it up by getting shorter.

2. Now straighten your arm. Another set of muscles at the back of your arm, called biceps, pulled your arm down to straighten it.

The muscles that move your bones around are called skeletal muscles. But they're not the only muscles you have!

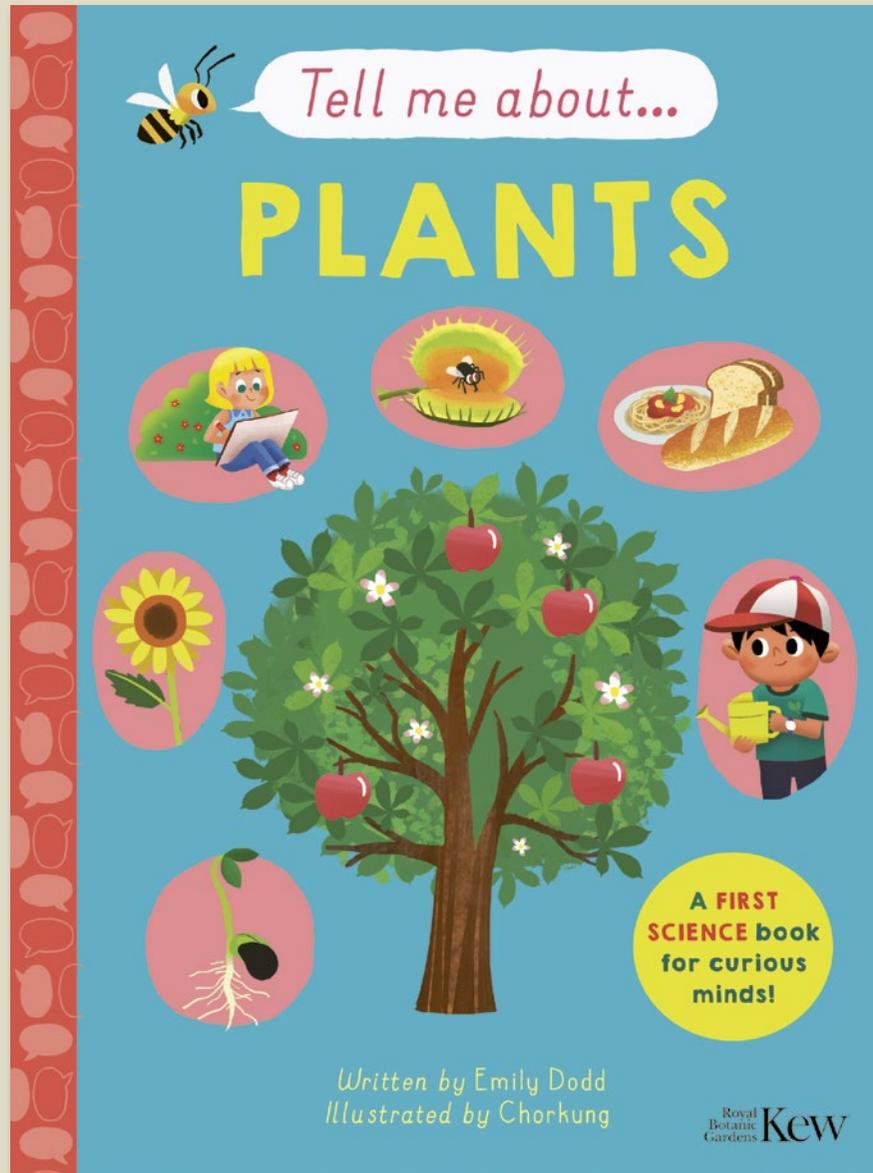

Cardiac muscles make your heart squash to pump blood.

Smooth muscles line the tubes in your body. They help push things through the tubes.

Did you know...? Muscles help you hold in pee until you're ready to let it go.
