Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 6-9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6–9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,
Let's clean your paws and face.
Here's your spoon and here's your bib
And here's your bunny plate!

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Noah's New Home

A beautifully illustrated, sensitively told story about a young refugee.

- Reviewed and supported by Young Roots, a charity that works with child and young people refugees as they settle in a new place. It also includes back matter from them with a quote about the book and more information about the work they do.
- Zeshan Akhter's second book with Templar, following on from *My Name is a Gift*.
- Bringing illustration talent, Nabila Adani, to the Templar list. Nabila is known for books like *Not Now, Noor!* (Puffin) and *Sunny and the Birds* (OUP).
- Nabila effectively uses colour, texture and abstract compositions in her artwork to portray the multi-faceted and complex emotions that come with settling in a new place.

Noah's New Home

Oh No, Flo!

A fantastically funny farmyard fiasco to read aloud!

- Taking recognisable and familiar farm animal characters to create a funny and fresh picture book for the very young.
- Featuring bold and bright illustrations from Mike Byrne, well-known for *This Book is Full of Unicorns*.
- Catherine Cawthorne is fresh to the picture book world but is already making her mark with: *We Went to Find a Woolly Mammoth* (Hachette, 2023), *We Went to Find a T.Rex* (Hachette, 2024) and *The Big Bad Wolf Investigates: Fairy Tales* (Bloomsbury, 2024).
- The light-hearted text and repeated 'OH NO, FLO!' refrain to join in with, makes it the perfect book to share with a group or individual child.
- Cover treatments: matt lam and SPUV.

Jay Runs Away

A pirate-packed picture book about the arrival of a new sibling - with real lift-the-flap letters!

- Using clever paper-engineering, there are six differently-shaped, fold-out letters for little hands to open and peek inside - from postcards to pirate party hats!
- Humorous and light-hearted storytelling from Dawn McNiff (*Smiley Eyes, Smiley Faces*) is accompanied by hilarious and stylish artwork from Nicola Slater (*The Leaf Thief, Charlie Chooses, Jonathan the Magic Pony*).
- The perfect picture book for anyone welcoming a new baby into the family.
- With focus on letter-writing and a 'write a letter to the pirate captain' activity at the back of the book, this makes the perfect classroom companion.
- Cover treatment: matt lam and spot UV.

Bessie's Bees

An uplifting story about starting nursery with a bubbly neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list with a story featuring a main character with ADHD - and Bessie will be back in 2026 in *Bessie's Bathtime!*
- While there has been an increase in positive representations and neurodiverse voices elsewhere in children's books, this is yet to be seen in the picture book space. Templar can be one of the first to champion neurodiverse voices and stories.

A laugh-out-loud rhyming romp about how being **HANGRY** really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

The Bear and the Seed

An inspirational folktale about conservation and protection of the environment by Greenaway-shortlisted Poonam Mistry.

- Created by Greenaway-shortlisted and Carnegie-longlisted illustrator Poonam Mistry, nominated in 2024 for her other Templar book, *The Midnight Panther*
- Themes of conservation and protecting the environment, and a strong message that small actions that you can take will make a big difference.

A magnificently messy adventure to discover the importance of tidying up!

- Written by Irish author Eoin McLaughlin, whose book *The Hug* was one of the Guardian's Best Books of 2019. Illustrated by German illustrator Julia Christians, winner of the Leipzig Reading Compass Award for Templar's *The Best Bear Tracker*.
- The message of climate change is delivered through humorous text. A subtle way of introducing complex and difficult subjects.
- Pollution and climate changes are themes which are globally relevant
- A winning Templar formula - books with a powerful message, humour and heart.

Super Nani and Captain Yaz

A heartfelt celebration of family, Punjabi culture and the rag doll-making tradition with a dash of superheroes!

- A family-centred picture book that celebrates Punjabi culture and heritage from debut author, Saira Shah, and Brazilian illustrator, Maria Gabriela Gama.
- Inspired by Saira's own experiences with her daughter and her mother struggling to communicate.
- An uplifting and warm picture book that gives voice to the experience of multi-cultural heritage, second-generation Asians that belong to two different cultures.
- Includes step-by-step instructions of how to make your very own rag doll!
- Cover treatment: matt lam + spot UV.

The Circular Square

An uplifting rhyming story about becoming a well-rounded person.

- A quirky, philosophical rhyming picture book from the Waterstones Children's Book Prize shortlisted author, Simon Philip, offering him a new direction after the success of his *I Really Want to...* series.
- Bringing bold, graphic illustrator Neil Clark to the Templar list - a growing talent who is best known for his *CRASH, BANG, WALLOP* series with Ladybird.
- Includes back matter that encourages children to list the positives in their lives as well as lists of positives from the author and illustrator themselves.
- A meta picture book where artwork and characters engage with the layout, composition and size of the book - Square becomes the book in its square format!

Yetis Don't Exist!

A FUR-tastically funny rhyming adventure!

- Bringing rising talent, Kate Thompson, to the Templar list. She has two picture books with Welbeck and two new picture books coming with PRH in September 2024, and 2025.
- Bringing established quirky, commercial illustrator Loretta Schauer to the list with her bright palette and fantastic furry creatures. Loretta has previously worked with publishers like Ladybird, Farshore and Bloomsbury.
- Like *The Best Bear Tracker*, this book has a hilarious visual narrative alongside the text with the yetis and human explorer just missing each other more than once!
- The book's wintry, snowy setting offers the ideal seasonal gift without the story being explicitly Christmassy!
- Cover treatments: matt lam and foil.

Tiger's Last Roar

A beautifully lyrical story about grief, the loss of a pet and the unbreakable bond between child and furry friend.

- Bringing Harriet Howe, a debut, talented picture book voice to the Templar list with this breathtaking and lyrical text - and following with *A Skyful of Stars*, a story about divorce and separation, in 2027.
- The book is beautifully and sensitively brought to life by Waterstones Children's Book Prize shortlistee and Carnegie nominee, Katie Cottle - with luscious foliage, bright palettes and exquisite attention to detail on every page.
- A perfect encapsulation of the relationship between child and pet with thoughtful, yet humorous, depictions of cats that will be familiar to any cat-lover!

A Shelter for Sadness

A poignant and heartwarming picture book exploring the nature of sadness.

- Over 22,000 copies sold worldwide (as of July 2022)
- A poignant and heartwarming text addressing the hugely important and topical issue of sadness and depression
- Dealing with abstract emotions in an approachable and child-friendly way
- Anne Booth is known for the exceptional warmth and authenticity of her writing. She was inspired to write this book by the words of Etty Hillesum, a Holocaust victim.
- With superb illustrations from multi-award winning David Litchfield, who has sensitively visualized the nature of Sadness

A Shelter for Sadness

The shelter I will build for my Sadness will have light from the sun or from the moon and stars.

But the windows will have curtains that Sadness can draw when it wants to. And there will be candles or lamps if Sadness needs them.

THE ESCAPE

A story of 103 missing monkeys

XIMO ABADÍA

A monkey counting adventure

- A stylishly clever counting adventure from surrealist author-illustrator Ximo Abadía
- Encourages counting from 1 to 100, which children learn around age 5
- The number of monkeys to spot on each page increases through the book
- High-contrast black, white and red illustrations are both stylish and engaging for young readers
- Ximo's previous titles (including picture books *Toto*, 2018, and *I Can't Sleep*, 2020, and the STEM series including *The Speed of Starlight*, 2018) have sold more than 80,000 copies worldwide.
- Cover: matt lam + spot UV

Mythical Tales

A collection of mythical tales from around the world.

- A timeless treasury that speaks to all ages, following on from the success of *Star Stories* (2018), *Winter Tales* (2020), *Enchanted Tales* (2023) and *Nature Tales* (2024)
- *Star Stories* sold into 12 territories, *Winter Tales* has sold into 18 territories and *Enchanted Tales* has sold into 11 territories.
- With universal appeal, this collection of stories includes stories from cultures on every continent.
- Cover finishes: arlin and foil

Nature Tales

A collection of nature folk tales

- CONTENTS: The Bramble's Gift **Greece**; Fox's Tail **Norway**; Little Brown Mouse **Himalayas**; Pigeon and Bee **Ukraine**; The Magic Acorn **Russia**; Wild Strawberries **Britain**; Eagle and Owl **Wales**; Hare's Ears **Siberia**; The Hedgehog and Hare **Germany**; Little Lark, Robin Redbreast and Jenny Wren **France**; Little Red Squirrel **America**; Rabbit's Tale **Brazil**; The Healing Apple Tree **Poland**; The Pine Tree **Japan**; Badger Boy **Ireland**; Bringing Back Wolf **Mexico**; The Birth of Bear **Finland**; The Stork's Nest **Morocco**.
- A timeless, treasured classic that speaks to all ages, following on from the success of *Star Stories* (2018), *Winter Tales* (2020) and *Enchanted Tales* (2023).
- Includes stories from every continent, giving it a universal appeal.

Winter Tales

A collection of winter tales from cultures around the world, beautifully brought together with striking gilt artwork.

- A timeless, treasured classic that speaks to all ages - following on from the success of *Star Stories*
- Includes stories from cultures on every continent giving it a universal appeal
- Written by Dawn Casey - author of Templar's *My Nana's Garden*.
- Over 76,000 copies sold worldwide (as of October 2022).

Alice's Adventures in Wonderland

A stunning new edition of Lewis Carroll's classic children's tale.

- Part of a range of beautifully illustrated Templar Classics from the award-winning talent of Grahame Baker-Smith.
- Grahame has illustrated a range of picture books for Templar including the Greenaway shortlisted *Leon and the Place Between*, *Rhythm of the Rain* which won the English 4-11 Picture Book Awards and *FARTHER* which won the Kate Greenaway Medal in 2011.
- Over 100,000 Grahame Baker-Smith books sold worldwide
- Collectable package drawing on the market trend for Fox and the Star/Essex Serpent-style offerings
- Cover treatment: Debossing, foil and arlin

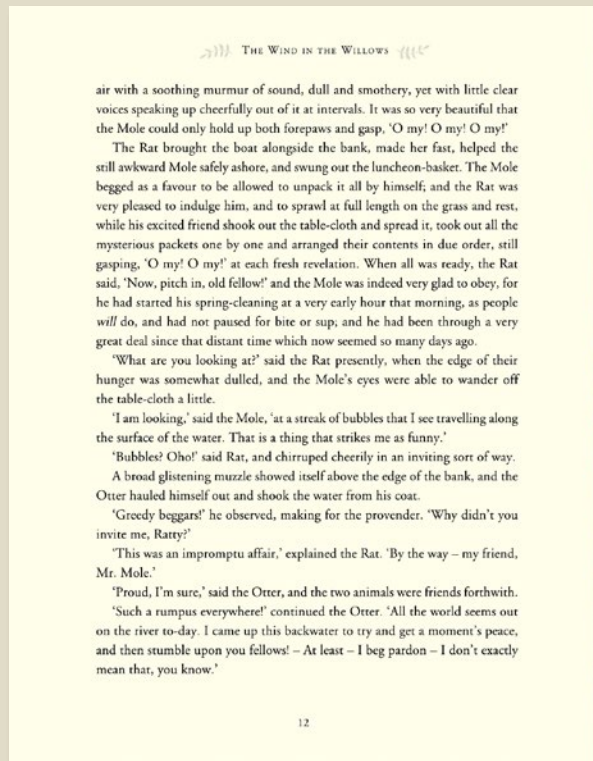

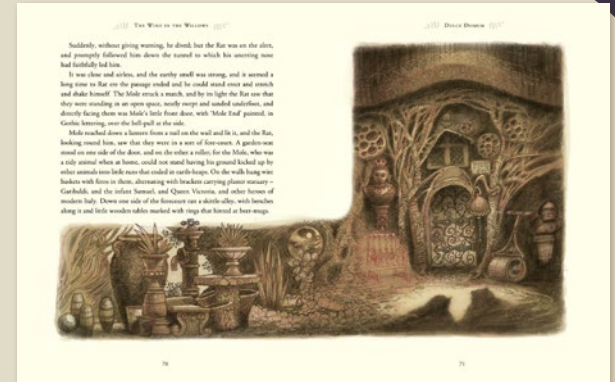

The Wind in the Willows

**Beautifully illustrated
by Kate Greenaway
Medal winner,
Grahame Baker-
Smith.**

- Over 74,000 copies sold worldwide (as of July 2022)
- A new range of Templar classics that replaces the Robert Ingpen range with titles we can sell internationally
- Grahame has illustrated four picture books for Templar: the Greenaway shortlisted *Leon and the Place Between*, *FARTHER* which won the Kate Greenaway Medal in 2011, *The Winter's Child* and *The Rhythm of the Rain*.
- Collectable package drawing on the current market trend for Fox and the Star/Essex Serpent-style offerings
- Cover treatment: Debossing, foil and arlin

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

Protest art often makes use of symbols, which can quickly convey powerful meaning.

SYMBOLISM

Paper Cranes

In Japan, it is believed that someone who folds 1,000 origami cranes will be granted a wish. In 1945, two-year-old Sadako Sasaki was in the vicinity of the atomic bomb dropped on Hiroshima. She suffered long-term effects from that exposure, including developing leukaemia. Before she died at the age of 12, Sadako folded more than 1,000 cranes, and the paper crane went on to become a symbol of peace.

The Peace Sign

The peace sign was created by the British artist Gerald Holtom in 1958 as the logo for a campaign for nuclear disarmament in the UK. It has since become an iconic symbol of calls for peace.

Umbrellas

During protests for democracy in Hong Kong in 2014, activists used umbrellas as shields against tear gas and other aggressions by the police. The umbrellas came to symbolize the protests and gave the movement its name (read more on pages 52-53).

The Clenched Fist

The image of an upraised clenched fist is a powerful symbol of protest and resistance. Some of its first uses were by labour unions in the early 1900s, before it grew in popularity and became a symbol of many causes, including Black Power, the anti-apartheid movement and the feminist movement.

The Rainbow

The rainbow is the most iconic symbol of the LGBTQ+ movement. It represents diversity, acceptance and the spectrum of human sexualities and genders.

- Cover finishes: matt lam and foil

Tiffany & Co.: The Story Behind the Style

The King of Diamonds: Charles Lewis Tiffany

Charles Lewis Tiffany, the man who would go on to win the moniker of New York's 'King of Diamonds', did not hail from a long line of jewellers. His start in life was more modest, making his name in high society all the more glittering.

Tiffany was born in 1812 in Canton and Ohio. Tiffany and grew up in the small town of Killbuck, Connecticut. The major business of the town was the production of cotton goods, and the family owned a manufacturing company. Tiffany was educated at local schools in the area before joining his father in the family cotton business.

By 1837, Tiffany felt restless. No longer satisfied by working at home with his family, he began to envision how he could make his own mark in business. He turned up with a school friend, J. R. Young, and the duo set in motion a plan to open a stationary store in New York City. With a \$1,000 loan from Charles' father, the ambitious 25-year-olds made the 150-mile journey north. The store, named Tiffany & Young, opened its doors at 259 Broadway that same year, and on its first day, \$4,98 rang through the till.

Tiffany & Young soon began to expand its remit, stocking glassware, cutlery, porcelain, clocks and jewelry, and began to develop a

OPPOSITE: Tiffany & Co. founder Charles Lewis Tiffany photographed by James Thomson Beach in 1902.

reputation as a purveyor of fine goods of taste. In 1841, the business expanded with the addition of a third partner, J. L. Ellis, and was renamed Tiffany, Young & Ellis. The trio expanded the store, doubling its size by moving the adjacent site, and continued to increase the quality of the goods they sold, with Young making buying trips to Europe to pick out English and Italian jewelry.

It was, in fact, political events in Europe that would be the making of this American luxury success story. In 1848, the status quo crumbled as republican revolutionaries sought to topple European monarchies and strip aristocrats of their power and wealth. It was a societal upheaval known as the Springtime of Nations. More than 50 countries were inspired by this, but none more so than France, where the monarchy was overthrown and replaced with a republic. Such widespread panic and disruption had an impact on the price of diamonds, and Tiffany, Young & Ellis reaped, by now, the full

OPPOSITE: An illustration of a jewelry store, inspired by the Tiffany & Co. store in New York.

OPPOSITE: A sketch of the Tiffany & Co. store at the Excelsior Hotel in Paris in 1902.

In 1853, Young and Ellis decided to retire from the business, but Charles Lewis Tiffany was far from finished. He found new partners to work with, and the business was, at this point, renamed Tiffany & Company. Tiffany would go on to build his empire, grabbing headlines along the way. By the 1860s, the business was well established as an exponent of choice for the rich and the famous, both for its jewelry and its top-quality silver. In 1862, President Abraham Lincoln purchased a set of pearl necklaces and earrings from Tiffany & Co. for his wife Mary Todd Lincoln, who wore them to her husband's inauguration ball.

In 1870, Tiffany & Co. moved into a large new store in New York's Union Square, marking the beginning of a major decade for the jeweller one in which Charles Lewis Tiffany would earn the title the King of Diamonds. It was a single purchase that would truly jettison Tiffany into the high-jewellery atmosphere – a 237-carat rough fancy yellow diamond. When cut and polished, what emerged was a diamond of staggeringly enormous proportions for a rare yellow diamond of that quality: it weighed 128.54ct and was named the Tiffany Diamond.

If the purchase of this new world famous stone, which is on permanent display at Tiffany & Co.'s Fifth Avenue store in New York, signalled Tiffany's intention to dominate the diamond market, his groundbreaking creation eight years later sealed the deal. Seeking to

celebrate the beauty of diamonds, Tiffany designed an engagement ring in 1886 that remains a sought-after classic to this day. The Tiffany Setting engagement ring kicked back against the over-fussy designs of the time with a clean, minimalist band and a six-prong setting that lifted the diamond above the ring. The purpose for this innovative setting was to allow light to flow through the stone, and therefore maximise the sparkle. It was a huge hit, and the iconic design has become synonymous with engagement rings.

Just 15 years before his death, Tiffany pulled off a final coup. The aftermath of the French Revolution that had gifted Tiffany an abundance of important gems in 1848 and its early credibility in high-jewellery circles rumbled on. In 1887, the French government was masterminding a plan to sell the crown jewels of its fallen monarchy. Outwardly, it claimed that a democracy such as France had no need for "objects of luxury, devoid of usefulness and moral worth". The rumour mill suggested that it was in fact afraid of a power grab by Bourbons, Orleanists or Bonapartists, who might use ownership of the jewels to claim a right to rule. Tiffany cared little for this political posturing, but he did see an opportunity in it. He travelled to Paris to attend the auction of the French crown jewels at the Louvre. He sat in the audience, ready to make his bids, along with fellow jewellers, including a young Frédéric Boucheron, and Orleanists, members of the French royal family, whose pockets proved too shallow on the day to win back their family heirlooms.

When the final strike of the gavel fell, Charles Lewis Tiffany had in his possession close to a third of the historic crown jewels. He placed them in specially crafted red-leather boxes, embossed in gold with the words *Diamants de la Couronne*, translating from French as Crown Diamonds. Inside, impressed on the silk lining in the lid, was Tiffany & Co. New York and Paris, thus securing Tiffany & Co.'s place in the history books as a purveyor of royal jewels and his own coronation as the King of Diamonds.

Cartier: The Story Behind the Style

The Beginnings of Cartier

The house of Cartier started with one man, Louis-François Cartier, but it would take a family to make it one of the most recognised and respected jewellers in history.

It was, in fact, Louis-François' father, Pierre Cartier, who set the dynasty in motion, although he could never have imagined the consequences of his actions at the time. Pierre had fought in the Napoleonic wars and spent time locked in the prison ships docked off the harbour at Portsmouth in Britain. When the war ended in 1815, Pierre returned to Paris, destitute and aimless. He would go on to find employment as a watchmaker and have five children with his wife Elisabeth, a watchwoman.

The eldest of the children born into this working-class Parisian family was Louis-François, and when he was barely out of school, his father sent him to work as an apprentice in a jewellery workshop owned by Adolphe Picard on Rue Montorgueil in Paris. It was a tough education – days were long and grueling and order was maintained with a whip – but he stayed and in 1847, at the age of 27, Louis-François bought the business from Picard, renaming it Cartier.

OPPOSITE: Cartier founder, Louis-François Cartier

PREVIOUS: Start of the house of Cartier, founded in Paris in 1847.

OPPOSITE LEFT: An illustration of Louis-François Cartier (1847).

OPPOSITE RIGHT: Pierre Cartier playing golf in Paris.

His makers mark – a symbol hallmark that every piece of Cartier jewellery no matter how small – was his initials, L.F.C., separated with an arc of leaves playing cool, perhaps as a nod to the financial gamble he was taking. Luckily, the risk paid off and the Cartier business thrived and expanded. In 1866, Princess Mathilde, a cousin of Emperor Napoleon III, purchased one of his jewels, and the Cartier name was suddenly whispered among Parisian high-society, even reaching the international elite. Three years later, Louis-François bought Gillon, a Parisian jeweller better known than his own, and renamed his business Cartier Gillon.

Louis-François' son Alfred Cartier took over the family business in 1874, but it was the arrival of his own three sons – the highly ambitious Louis, Pierre and Jacques – that would really shake up the jeweller and initiate its ascendance to the global brand we know today. The brotherly revolution started with Louis, who joined the nation in 1898. A year later he spearheaded the remaining

of the business, stripping over Gillon to once again be known simply as Cartier. At the same time, the business opened a boutique at 13 rue de la Paix, just a stone's throw from Place Vendôme, the heartland of luxury jewellery in Paris. This venture was funded by an enormous dowry levied through a strategic arranged marriage to Andine-Caroline Worth, granddaughter of world famous couturier Charles Frederick Worth.

Cartier garnered a reputation for innovation, and the title of jewellers would later live by a motto, 'Never copy, only create.' One of Louis' most successful experiments in the close of the 19th century was to use platinum in place of gold. This precious metal is now widely used by jewellers across the world, but at the time it was purely an industrial metal and thus revolutionary in the jewellery market. The white metal, which, unlike silver, does not tarnish, is highly malleable and allowed Cartier to create delicate, diamond-set jewels inspired by those created by 18th-century French aristocrats, a stark contrast to the heavier, colourful, Romantic Art Nouveau jewels popular at the time. A signature Cartier Gulland style emerged, swirling across platinum stems, necklaces and earrings, that won over well-heeled women, including royal, in Europe and the United States.

Pierre Cartier, the second eldest of the brothers, would be an agitator in his own right, championing the global expansion of the brand's retail empire. He started by opening a Cartier boutique on New Burlington Street in London in 1902, where the brand showcased a new style of geometric, abstract jewels with unusual colour combinations that would lay the foundations for the Art Deco jewellery movement.

The first decade of the 20th century was an important time for Cartier. In 1904, the jeweller received its first royal certificate from King Edward VII of Britain, and soon started to supply many other royal courts including those of Russia, Spain and Siam (now Thailand). In the same year, Louis Cartier created what he believed to be the first ever men's wristwatch for aviator Alberto Santos-Dumont.

Pierre, meanwhile, embarked on a journey to Russia; one that would prove profitable in commissions from its high society, but also as a source of inspiration that would shape Cartier's jewellery designs for years to come.

In 1909, Pierre would focus his wanderlust on America, opening a Cartier boutique on New York's Fifth Avenue; the precursor to its famous flagship store further up the street, the purchase of which he would famously broker a decade later in exchange for a string of pearls. Back in London, his younger brother Jacques stepped in to take over its British branch. That same year, Cartier moved uptown to a prestigious Bond Street address, where it remains to this day.

As Cartier's man in Britain, and, as such, jeweller to King George V, Jacques joined members of the aristocracy on a trip to India for the Delhi Durbar in 1911. It was an event

LEFT: Cartier platinum pendant watch set with diamonds, rubies and a pearl, c.1890-1910.

to commemorate the coronation of the King, with two weeks of festivities, during which King George V and Queen Mary would be proclaimed Emperor and Empress of India. This adventure to a new land would also prove to be a seminal trip for the house of Cartier. Jacques' sociable nature and love of travel would win ground-breaking commissions from India's rich, jewel-loving maharajas and inspire a whole new category of jewellery, pioneered by Cartier and much copied by other companies.

Vivienne Westwood: The Story Behind the Style

Derbyshire Days

Vivienne Isabel Swire was born on April 8 1941 to Gordon and Dora Swire at the Paragon Maternity Home, Glossop. The future fashion revolutionist had one sister, Olga Swire, born 1945, and one brother, Gordon Swire, born 1946. She grew up in the parish of Tintwistle, Derbyshire (which was formerly part of Cheshire until 1974), both during and after World War II, enjoying what has been recounted as a fairly idyllic childhood, living at the more secluded Millbrook Cottage and playing outside until late.

The young Swire clan were encouraged to be creative and make things more than they were encouraged to read. Vivienne knew from a young age that she was good at making things, notably models at school, and she especially enjoyed sewing classes. Her mother would often make their clothes, and worked as a weaver in a local cotton factory.

The young Vivienne – who remembers having a passion for art from an early age – attended Hollingworth and Tintwistle Primary Schools from 1946 to 1952, at which point she passed the scholarship exam for Glossop Grammar School. She continued to be good at art during her time at Glossop Grammar, and considered attending art school.

Among Westwood's most formative fashion memories are the make-do-and-mend philosophy that came to define

Britain in austerity, as well as the coronation of Queen Elizabeth II in 1953, when Vivienne was 12 years old. The influence of these two events can be seen throughout every era of her designs, and the make-do-and-mend philosophy is evident in the motto "Buy Less, Choose Well, Make it Last", which the brand still promotes to this day. She expertly blended the elements of customisation, tradition and austerity together to create her own unique brand, which is now contrasted by her husband Andrew Kwonahale.

LEFT: Vivienne Westwood wearing a t-shirt sporting a 'Buy Less' slogan. Right

Malcolm McLaren

Westwood met Malcolm McLaren in 1965. An art student and a friend of her younger brother, Gordon, he would go on to become her creative collaborator for almost the next 20 years. Malcolm is an entrepreneur with the punk movement as Vivienne, and their partnership is legendary. He was something of a maverick of marketing rascally and disruption, before such things became commonplace in contemporary fashion. The pair were in a relationship for a time but never seem to have married.

Malcolm was interested in politics and was fascinated by the French Situationists, a creative enclave of writers and artists who wished to eradicate capitalism through acts of everyday life. He was a driving force in bringing politics, provocations, society and culture into Westwood's world. She found him to be charismatic and knowledgeable, but also full of contradictions.

In 1967, they had a son, Joseph Ferdinand Cecil, who would go on to follow in his parents' footsteps and enter the world of fashion. He founded the very successful lingerie company, Agent Provocateur.

It was in the early 1970s that McLaren and Westwood began to build their empire. Malcolm, in this period, had left art school and Vivienne was about to quit teaching. The plan had been to sell vintage records together, and there was talk of setting up a stall. But a retail opportunity – via a new

friend – on King's Road was about to arrive.

Tommy Roberts, of the legendary Mr Freedom fashion business, took over the lease of 438 King's Road in 1969. He and his business partner, the fashion entrepreneur Trevor Miller, were well-known for their eclectic and discerning fashion eye which appealed to the glitterati of the 1960s. It was under Miller's control the shop was renamed Paradise Garage; the spot was already well-known for fashion.

Vivienne and Malcolm, who were regular on King's Road, ended up leasing the back of 438 King's Road, before taking the whole thing over and rebranding it. It would be known over the coming years as Let It Beak, The Fun To Live, The Young To Die and Sex and Sublimation, all of which would encompass the raucous, confrontational and non-conformist nature of McLaren and Westwood. Eventually the shop would come to define the varied-but-defined styles we know as punk today.

LEFT: Malcolm McLaren, teenage son of Vivienne Westwood, circa 1977.

A Revolutionary is Born

There are few British designers, or brands, that have made quite as much of an impact on the fashion landscape as Vivienne Westwood. A fashion designer of both cult and commercial success (which is a rare combination), she was a punk and a pioneer, a rebel and a provocateur, an activist and a change-maker.

Over the course of a career that spanned half a century, Dame Vivienne Westwood would become synonymous with the British punk scene. Punk is what immediately springs to mind for most when her name is mentioned, along with the King's Road, corsets, platforms, tarran, crinolines, pirate boots, sustainability and climate change awareness. The list goes on. Her shows and interviews have become legendary – she is famous for using fashion as a platform to speak out on the issues she cared most about.

There is no doubt that Westwood's affinity for fashion history has helped her designs stand out. They are often historically informed, yet never to the point that they look odd. Where something shouldn't work, it always did, thanks to Vivienne's ability to balance the old with the modern – she was a genius when it came to style mashups. And the original Vivienne Westwood aesthetic rooted in a DIY approach never fully went away. Her designs feel intrinsically British and perfectly eccentric.

Westwood was the original multi-hyphenate and, in many ways, light years ahead of her time. She has inspired generations of designers that came after her, whether established and successful or aspiring and eager. Fashion critics even noted whiffs of her spirit at the London Fashion Week collections of autumn/winter 2023, which took place in February 2023, after her death. It's no wonder that her name is up there with the likes of Yves Saint Laurent, Christian Lacroix and the late great Karl Lagerfeld.

Rolex: The Story Behind the Style

PROVIDER: Hans Wilsdorf, the founder of Rolex.

RIGHT: A watchmaker in Geneva in 1918.

more wearable product would one day make the larger pocket watch obsolete. He set about trying to change the image of wristwatches.

A fundamental step was finding a manufacturer called Angler in the Swiss town of Bienne that was making precision movements that could fit inside a wristwatch. Wilsdorf placed a large order, and soon Wilsdorf & Davis became one of the leading British wristwatch firms.

In a bid to establish his business as a brand rather than simply a dealer, Wilsdorf wanted to create a new name for the company: a catchy one that would look good on a dial and be easy to pronounce in many languages. He had experimented with many combinations of letters in search of this made-up name but failed to find anything that worked. Then, while riding through London's Cheapside on the upper

deck of a horse-drawn in 1908, it came to him. Or as he would later put it: "A gentle whisper: 'Rolex' in my ear."

Under this new name, Wilsdorf continued his quest to create reliable wristwatches with quality movements. In 1910, Rolex had a breakthrough when one of its products, powered by an Angler movement, became the first wristwatch in the world to receive the Swiss Certificate of Chronometric Precision – a mark of homological excellence. Four years later, another milestone would be achieved when the Kew Observatory in London awarded a Rolex wristwatch with a Class A precision certificate. This had previously only been given to marine chronometers used for navigation, and it further solidified the reputation of Rolex as a purveyor of precise timekeeping instruments.

In 1916, World War I broke out, and the following year the British government introduced a 33.3% customs duty as part of the war effort. By this time, Rolex's London office, which had a staff of 60 people, was exporting its watches all over the world and the tax change would make that difficult. As such, Wilsdorf made the decision to move the company to Bienne in Switzerland. It already had an office in La Chaux-de-Fonds, which it opened in 1917 for marketing purposes, but this move would remove it from the British watch industry altogether.

And, so, the legacy of Rolex's Swiss-made watches began, with the Swiss company Rolex S.A. registered in Geneva in 1920.

The Origins of the Oyster

With Rolex settled into its new home in Switzerland, the company continued to develop its watch offering with a focus on precision and durability, as well as building its brand. Though certainly catchy, the name Rolex had not become an overnight success. Tired of waiting for it to catch on, Hans Wilsdorf launched a major marketing campaign in 1925, pledging to invest at least £12,000 a year – nearly £1 million in today's money. He also increased the number of watches Rolex was producing with its own branding on the dial, as it has been producing both branded and unbranded watches up until that time.

A major leap forward for Rolex's brand was the launch of the Oyster in 1926. This new style of watch promised to be waterproof and dustproof thanks to a hermetically sealed case, proving its durability. It also made it an obvious choice for sporting activities, which would prove to be a rich source of marketing for Rolex in the years ahead.

The Oyster case had a patented system of screwing down the bezel, crown and winding crown against the middle case to seal the movement inside securely. The winding crown, which is made from 10 individual parts, was key as it acted as a go-between between the sealed inner world of the case and its functional external elements.

The Oyster case would become the backbone of Rolex. Nearly every watch in its contemporary range features an Oyster case, and the name of all the models reference it. A Submariner is technically named an Oyster Perpetual Submariner and a GMT-Master II is an Oyster Perpetual GMT-Master II, and so on. The only exception is the 1908 dress watch, which does not have an oyster case.

Rolex's iconic fluted bezel is a showstopper in the early Oyster cases. Although these fluted bezels are decorative now, the ridges originally served a purpose to allow a special tool to screw the bezel securely to the mid case.

COPYRIGHT: A 1959 Rolex Oyster Perpetual on a brown alligator strap.

ABOVE: A close-up of a Rolex Oyster Perpetual case and bezel bezel.

The World's Most Famous Watch Brand

Rolex has become shorthand for luxury. There is no watch you can strap on to your wrist that will be recognised for the status symbol it is quicker than a Rolex. And for many, this is the appeal.

Yet there was a time when the name Rolex – a word completely made up by the brand's founder Hans Wilsdorf – was not famous. It would take hard work, boundary pushing and a lot of self-belief on the part of Wilsdorf, a German orphan, to jettison the name into the upper echelons of horology; starting with convincing the pocket watch-wearing gentleman of the early 20th century that they wanted to wear the time on their wrist at all.

As you will discover, Rolex won its place in history by constantly questioning what was possible and innovating at all costs. It pioneered so many elements of watchmaking and design that are standard today, such as waterproof watches, placing a date window on the dial, and even removing the need to wind our watches.

It also found its way into some of the most exciting moments in history by placing Rolex watches on the wrists of adventurers and explorers. Its watches have travelled to the world's highest peaks and to the depths of the ocean; they have survived extremes of temperature, speed and pressure.

The story of Rolex is so much more than that of its watches. It is one of epic ambition and vision. What started out as a one-man band in London's Hatton Garden would become the epicentre of the Swiss watchmaking industry, and one of the most recognisable and coveted brands in the world.

Bulgari: The Story Behind the Style

Elizabeth Taylor

One of Bulgari's most famous clients in its *La Dolce Vita* era – and long afterwards – was Elizabeth Taylor. The American actress first discovered Bulgari when she was filming *Cleopatra* in 1962. Some of the film was shot on location in Italy, and it is said that when she had time between takes, or wished to escape the paparazzi, she would head to Via Condotti to try on Bulgari's masterpieces. When she did, she was allowed to enter through a secret side door that provided her with a private courtyard in which to park.

Taylor was a famous jewellery collector, and often negotiated pieces of jewellery as part of her film contracts. She even published a book about her obsession in 2001 titled *Elizabeth Taylor: My Love Affair with Jewellery*. Therefore, it was little wonder that downtime in Rome led her to Bulgari.

Taylor's portrayal of Cleopatra also helped to make a Bulgari icon truly iconic: the Serpenti watch. Although she

didn't wear her watch during filming, she was photographed wearing it on set for a publicity still, and the snake-like design chimed perfectly with the Egyptian theme of the film. Her endorsement of the Serpenti watch transformed a quirky accessory created by a local Roman jeweller into a global icon.

Bulgari wasn't the only burgeoning love affair in Taylor's life at that time. She was also starting a romance with her *Cleopatra* co-star Richard Burton, who would become her

movement made it another record breaker. The ultra-thin minute repeater movement – housed in a titanium case to amplify the sound of the chiming mechanism that is the hallmark of this complication – was 3.12mm thick.

The following year, Bulgari presented another ultra-thin watch. The Octo Finissimo Automatic was not complex in terms of watchmaking, but it set a new record for size as the thinnest automatic watch on the market at 5.17mm, with a movement just 2.23mm tall.

Bulgari's next attempt would break two records. In 2018, it presented the Octo Finissimo Tourbillon Automatic. It was the thinnest automatic watch at 3.95mm, and also the thinnest tourbillon in the world.

The obsession with record-breaking ultra-thin watchmaking rolled on. In 2019, the Octo Finissimo Chronograph GMT became the thinnest mechanical chronograph movement at 3.3mm, set in a 6.5mm titanium case. In 2020, the Octo Finissimo Tourbillon Chronograph Skeleton Automatic

was named the thinnest tourbillon chronograph with a case depth of 3.5mm. And in 2021, the Octo Finissimo Perpetual Calendar became the thinnest perpetual calendar watch at 5mm thick.

In 2022, to mark the 10-year anniversary of the relaunch of the Octo line, Bulgari presented another impressive watch that smacked the others out of the park. The Octo Finissimo Ultra became the thinnest mechanical watch on the planet, with a case size of just 1.8mm.

New York

New York was the location of the brand's first international store since Sartoris's early expansion ended. The brand's products were already being sold in the US through an agent, but in 1972 it opened a boutique within the Pierre Hotel on the edge of Central Park.

In America, Bulgari positioned itself as luxury jewellery for women who wanted to have fun. It was tapping into the easy-going, carefree zeitgeist. In a campaign starring the American singer Cher, Bulgari described its jewels as "real, but not too serious". In that campaign, Cher was wearing a collection called Stars and Stripes that Bulgari had created to celebrate the Pierre boutique opening. The collection used coral, lapis lazuli, enamel and diamonds to create stars

OPPOSITE: Nancy Reagan (above) in the Pierre Hotel in New York City. (Below) Nancy Reagan in 1966, wearing a Bulgari ring.

and stripes motifs in reference to the American flag.

Bulgari added pieces to the Stars and Stripes collection throughout the 1970s and into the early 1980s, but today it is a rare find on the secondary market, making it the holy grail for Bulgari collectors.

A special Stars and Stripes ring was made for former First Lady Nancy Reagan to wear at the centenary celebration of the Statue of Liberty. The flag on the gold ring was constructed with rubies, blue sapphires and diamonds. The ring came up for sale at Sotheby's in 2016 and fetched \$19,000.

By the late 1980s, Bulgari had expanded in Paris. Herlé boutique and moved to a larger location at 730 Fifth

Bulgari's First Signature Design

Every great jewellery house needs a signature design, and for Bulgari its first was the Trombino ring, which was created in 1932. The design was a labour of love for Giorgio

Bulgari, quite literally: it started out as a sketch for a ring with which he hoped to propose to Leonilde Gulienetti. For someone as passionate about jewels as Giorgio, the ring had to be perfect.

His design was for a ring that would elevate the central stone above the band, creating a sense of volume. This prominent setting is what inspired the name Trombino, which translates from Italian as "little trumpet", as the profile does indeed look trumpet-like.

He worked purely in white diamonds, as was the fashion at the time. As well as a central stone, diamonds crowded the band, but rather than simply creating a blanket of stones in a pavé setting, Giorgio sought to add a little flair.

In addition to pavé diamonds, he added graduated baguette-cut diamonds that led away from the central stone, almost like a ladder. This placement of baguettes created an even more prominent stage for that elevated central diamond, drawing the eye to it.

Giorgio was delighted with his final design, and steered his nerves for the proposal. Leonilde must also have been pleased with it, as she agreed to marry him.

So striking was the ring that it soon caught the attention of Rome society, and Giorgio realised that what had started as a personal project had huge potential for his company. And so, he began to produce the Trombino for his clients, and the 1930s design remains popular to this day.

OPPOSITE: An all-diamond and platinum Bulgari Trombino ring, which sold for US\$57,150 at Sotheby's in 2023.

Street Style: Dr. Martens

Visual history of the iconic street style brand.

- Illustrated with full colour photographs showcasing the brand's history.
- Cover finishes: mat lam and foil.
- Written by Jian DeLeon, the editorial director for Highsnobiety. Jian is an expert on the intersection of streetwear, sneakers and luxury fashion. He co-hosts 'The Dropcast', Highsnobiety's weekly news podcast,

Street Style: Dr. Martens

The original pair of Dr. Martens' AirWair shoes were still a far cry from the instantly recognizable models the brand is known for today. The uppers were much more minimal in decoration and the sides were much wider with a very visible contrast thanks to a lighter-colored sole.

The first more traditional designs have more in common with a modern-day hybrid dress shoe than the sleek, utilitarian shapes of popular Dr. Martens styles, now set atop a well-translucent lug sole. Perhaps the unintentionally fashion-forward aesthetic is one of the reasons why women gravitated towards them long before more conservatively-dressed men did. It's hard to imagine one trying to pull these off within the strict dress codes of the 1950s, where leather-soled, dark-hued bottom footwear was still the norm for doing business. But looking back now, it set the perfect stage for what Dr. Martens would become: the ultimate anti-dress shoe.

LEFT: A modern pair of Dr. Martens 1460 boots.

The Spring Behind Every Step

It's hard to believe that an orthopaedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Dr. Klaus Maertens first conceived of the footwear's signature 'AirWair' sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boot severely uncomfortable for his ailing foot, he utilised soft leather for

The Birth of Bouncing Soles

Now that you've briefly had a glimpse at Dr. Martens' future, it's time to rediscover the past. How did a German boot brand become so distinctly British? That story begins in 1901. A man named Benjamin Griggs and his business partner, Rufinus, have begun a company to manufacture boots in Wollaston, north Northamptonshire. By 1901, they had incorporated as R. Griggs & Co. Ltd., eventually becoming the R. Griggs Group.

In just a couple of decades, Wollaston had become one of England's shoemaking capitals. As early as 1881, one of its shoe factories was established as a workers' co-operative of local cobblers (known as 'The Buffers'), and it was now being run as the Northamptonshire Productive Society, still making shoes as NPS, where its manufacturers may well know high-end footwear brands.

But the R. Griggs Group continued to flourish well into the 1950s under the leadership of Bill Griggs, who inherited the family business around that time. His fortunes would grow even more when he decided to take a risk in 1958. Backing on the success of their fledgling footwear business, Dr. Klaus Maertens and Dr. Herbert Funk began soliciting advertisements for Dr. Martens' AirWair shoes in international magazines. Griggs saw the fit of this innovative air-cushioned sole by two German doctors and instantly recognised its potential. After

all, having grown up in factories his whole life, he understood the need for sturdy, robust work boots, but also knew how uncomfortable they could be.

Ironically, the rest of his family disagreed with his foresight, seeing the air-cushioned sole as a gimmick, the kind of fad in the past that would fade out over time while leather-soled boots would be around forever. But he treated his intuition and went ahead to meet with Dr. Maertens and Dr. Funk, later developing a rapport with them and taking the exclusive licence for their AirWair-soled shoes in the United Kingdom.

ABOVE: The Griggs brothers owner of the R. Griggs Group that went on to own all of Dr. Martens.

Mod Squad

One of the most prominent British music subcultures to arise in the 1960s and early 1960s was the Mod subculture – or 'Mod' for short. Musical taste was just one part of the complete lifestyle. Mods were associated with dress-cut fashion pieces like polo shirts, modish suits and military issue MCI (modified) parkas, respectively seen emblematised with the signature rounded of the Brompton Air Three. It was a subculture focused on everything with intention – the hair you had, the clothes you wore, the music you listened to and the scooter you drove.

An avid fan of The Who, it's no surprise that Dr. Martens became an inimitable part of Mod's uniform. The sleek lines of the boots looked good with suits and usually complemented the minimalist style of the subculture and could also be worn on the Mod vehicle of choice: the Vespa scooter.

RIGHT: Two custom riding mod's take a break outside Horse Bus Advertisement Agency in 1963.

In contrast, the slicker-shavened subculture of Rockers who favoured leather motorcycle jackets, creepers, engineer boots and denim saw the Mod obsession with current fashion, jazz and R&B as effeminate, and numerous physical altercations between the two groups led to a moral panic about the ease of overly youth. Style was the Mod's mortality was not as their way of dress slowly seeped into the British mainstream, leading to the Swinging London phase of the 1960s. But as all trends go, as one fad falls out of favour, another one is right behind it to take its place.

Street Style: Nike

Visual history of the iconic street style brand.

- Illustrated with full colour photographs showcasing the brand's history.
- Cover finishes: mat lam and foil.
- Written by sneaker connoisseur Gerald Flores. With over a decade of journalistic experience, Gerald is fascinated by the people, designers and stories behind sneakers. He has interviewed personalities including Kobe Bryant, Tinker Hatfield and Virgil Abloh.

Street Style: Nike

Nike's terms included \$500,000 in cash for five years, an endorsement figure that was unprecedented in that era. The highest number endorsement before 1984 was New Balance's deal with the Los Angeles Lakers. Larry Nystry for \$350,000 a year for eight years. Other perks offered to Jordan included stock options and a custom built shoe for the basketball to play in.

There were some stipulations, however. Nike wrote a clause in the initial contract that required Jordan to accomplish one of three things - win NBA Rookie of the Year, to become an All-Star, or to average 20 points per game within his first three years. If Jordan didn't, Nike reserved the right to end the deal two years early.

By the time Jordan's first year in the NBA ended, he averaged 28 points per game after playing every game of the season. Not only did he win Rookie of the Year honors during the 1984-85 season, but the rising star became the darling of the League with his acrobatic style of play that made the name of his signature Nike shoe acronym: Air Jordan.

Nike made over \$500 million in revenue thanks to the sale of Air Jordans by the end of that first year - a new industry standard for how brands would market, design and distribute through signature products was set.

Max Blackman's marketing campaign still made way for new shoes to step in to advertise the Air Jordan 7. Bugs Bunny and the Looney Tunes. Among the number three Jordan. Bugs joined Jordan for a series of memorable commercials and print ads promoting the Air Jordan 7. One notable iteration of the shoe was a white-based colorway nicknamed 'Yare,' paying homage to Bugs' involvement.

The Air Jordan 7 gained even more mainstream exposure when Jordan showcased the 'Bugs Bunny' colorway in Michael Jackson's music video for 'Jam.' This collaboration between the two biggest cultural icons of their time further solidified the Air Jordan 7's place in sneaker and pop culture history.

ABOVE: The 'Yare' Air Jordan 7, sometimes playfully referred to as 'Yare Jordan,' is a member of the Air Jordan 7 line that was designed by Bruce Knigge. Bugs Bunny also appeared in an original commercial for the shoe in an animated form.

OPPOSITE: Michael Jordan wearing the 'Yare' version of the Air Jordan 7. It is a member of the Air Jordan 7 line, which many regard as the greatest basketball shoe of all time.

Nike Air Max 180

The Nike Air Max 180 was a collaborative effort between two giants in the footwear design industry: Tinker Hatfield and Bruce Knigge. At the time of its creation in 1991, Hatfield was renowned for his groundbreaking work on previous Air Max models, pushing the boundaries of sneaker design and technology. Meanwhile, Knigge had achieved legendary status for his iconic creation, the Air Force 1. Together, they set out to make Air Max bigger and better than it had ever been.

The duo's goal for the shoe was to once again make Nike's patented Air technology larger and more visible than it had ever been. To achieve this, they based it on a horseshoe concept for the Air unit, which allowed for increased visibility along the sides and underfoot of the shoe. They utilized a blow molding process to create a version of the bag that provided maximum visibility and impact absorption. Moreover, the Air 180 was the first shoe to feature a swooshbase outside embedded

directly to the Air unit, further enhancing its visibility and performance capabilities. The heightened visibility of the Air technology directly inspired the name Air 180.

During a period when Michael Jordan's endorsement could significantly impact any product, he was photographed wearing a pair of Nike Air 180s in the 'Concord' colorway for a photo shoot preceding the 1992 Olympics. This high profile shoot provided the Air 180 model with exposure to a wider audience and bolstered its mainstream appeal.

While the Nike Air 180 didn't initially receive the same level of fanfare as its contemporaries, its significance and appreciation have grown considerably over the years. As time has passed, the Air 180 has emerged as a standout and essential release within the Nike Air Max series.

OPPOSITE: The Nike Air Max 180 is an original collaboration of white, crimson and blue red.

LEFT: Designer and former Nike collaborator Tinker Hatfield is seen with the Nike Air Max 180 in 2007.

'Well, I don't love it,' Knight was heard saying upon the first review. 'But it will grow on me.'

The Swoosh definitely grew on Knight as the shape also bore a resemblance to the wings on the Greek goddess that Nike was named after. It would go on to become one of the most well-known logos in the world.

While Davidson was initially paid just \$35 for her design, Knight saw her as one of the original minds behind the brand and wanted to acknowledge this. In 1983, the founder rewarded Davidson with 500 shares of Nike, as well as a golden ring

with a Swoosh-shaped diamond, which is possibly the biggest remuneration for any logo design in history.

The marking is such a part of Nike culture that every new athlete that signs with the brand is tasked to draw their own version of the Swoosh. There have been different evolutions of the Swoosh and you can see the various iterations if you look through Nike's back-catalogue of products. Designer and Nike collaborator Virgil Abloh nodded to Davidson's original Swoosh design on the cover of his book *Something's Off* and the marking has been reversed on signature product for eccentric players, like Dennis Rodman's Air Darwin sneaker. But the essence of the Swoosh remains in its simplicity, its elegance and the way it represents movement.

OPPOSITE: Giannis Antetokounmpo's first signature sneaker implemented its performance features in the midsole in the shape of a reverse Nike Swoosh.

ABOVE: A lightning bolt effect on the Nike Swoosh printed on a pair of track spikes.

Gorgeous canines of every shape, size and colour bound through this book - all 101 of them!

- The perfect gift for dog lovers big and small
- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

Basenji

In the native Africa, the Basenji is known as 'the dog that doesn't bark'. While many dogs are often said to be 'sage to please', that just doesn't apply to this one. It is lively, imaginative and playful, but it does have a children's streak. The Basenji will usually learn what you want to teach it, but whether it will obey your commands depends entirely on its mood. That impertinent mind can be a problem, too, as anything you have lying around is likely to be investigated by your Basenji – usually by means of chewing. All that said, the Basenji makes a lovely pet as it adores people and playtime.

Life Expectancy 12-15 years | Height 45-50cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Tibetan Mastiff

If you look like a giant teddy bear but this mighty mastiff is not the dog for everyone. While it has a gentle and loving nature, its sheer size can be a bit off-putting, and it is strong-willed. The Tibetan Mastiff sees itself as an equal, rather than a pet, and can be very stubborn. It is thought these amazing dogs lived in Tibet thousands of years ago and were used as guards (not many people would stand up to a 60kg dog) for monks, known as 'lamas'. This is where they developed their thick coat to cope with the harsh climate.

Life Expectancy 10-14 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but doesn't shed much | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I can get up there!

Shiba Inu

The resident of its dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. But it's like a little single warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, *Inari* (spiritual guardian), *oyashi* (good nature) and *akashi* (coloration). It also tends to be possessive – like a nosey toddler, the Shiba Inu doesn't like to share and if it could spare, it's first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

Life Expectancy 12-15 years | Height 40-45cm | Trainability It has a stubborn streak | Grooming Very little | Exercise Needs a good daily workout | Most likely to say I'll be on your side | Least likely to say I'll be on your side | Least likely to say I'll be on your side

Parash Hound

This elegant hound was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Parash loves people and simply loves life. It's a natural clown – you can even teach a Parash to 'roll' and it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting hound, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

Life Expectancy 12-15 years | Height 50-60cm | Trainability Good | Grooming Very little | Exercise Needs a good daily workout | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Saluki

Praised by the travelling people of the Middle East, this canine breed is thought to take its name from the Arabian city of Salsab. To the Greeks, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their heads had to be fast of foot. There were once two different types of Saluki – short and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging...

Life Expectancy 12-15 years | Height 60-70cm | Trainability Good | Grooming Weekly brushing | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Alaskan Malamute

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahomet people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored – and a bored Malamute is trouble to watch. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

Life Expectancy 10-12 years | Height 60-70cm | Trainability Good | Grooming Needs brushing but doesn't shed much | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Tibetan Spaniel

This little dog likes to climb! Almost cat-like, it will try to find the highest perch from which it can watch over everyone and everything. Resembling a small lion (a powerful symbol in Tibet), it was highly prized as a watchdog. This watchful quality has been bred into the Tibetan Spaniel for thousands of years and it takes its role very seriously – don't even think about farting and blaming it on someone else in its presence! But don't expect your dog to be happy on its own. Tibetan Spaniels like company and get bored quickly – left to themselves they are likely to bark.

Life Expectancy 12-15 years | Height 25cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Afghan Hound

With its slender, exotic face, long silky hair and lithe body, the Afghan Hound is surely the supermodel of the dog world. And as well as being one of the most beautiful breeds in the world, the Afghan is possibly the oldest. It comes from Afghanistan, where it was known as the Tazi, and was used to hunt dangerous animals, such as leopards. It was not only brave, but also extremely fast, capable of running at speed for many kilometres. Its independent nature means it does like attention, but on its own terms.

Life Expectancy 10-12 years | Height 60-66cm | Trainability This independent mind can be challenging | Grooming Lots of brushing | Exercise It needs plenty of room to move | Most likely to say Look how beautiful I am! | Least likely to say Give me a cuddle

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Ancient Love Stories

THE SACRED BAND OF THEBES

This was the final meeting place of the Sacred Band of Thebes, one of the most remarkable and most loyal armies that had ever lived. A bold experiment in an open town square by attacking war and barbarian allies, who had been fighting for the freedom of the Greeks. As warriors, not just of soldiers, but of a hundred and fifty noble boys.

Born together by love loyalty to each other, the crack team of warriors was founded in Thebes in 378 BC by an extraordinary visionary by the name of Pammenes. It began as a resistance corps against the looming military power of Sparta (renowned the world over for its famously trained soldiers) across the mainland to the south. These were chivalry, aristocratic, young, splashing blood across the pages of history, and well suited to the birth of a new kind of army.

HERODIAS AND ANTOCHUS

These parts first crossed across years earlier, when Herodias - ruler of the Roman world and self-proclaimed priestess - took a summer jaunt across the Roman province of Bithynia, in northern Turkey, where Antiochus had his home. The emperor, busy with his job, probably did not spot Antiochus among the crowds of adoring subjects and eager petitioners. But one of his mistresses did - and, as usual, with an eye to the emperor's taste, spent a night in the meeting in the beautiful, lock-up-locked young man. Antiochus was duly offered a domineering admission to the exclusive imperial circle along with a tuition package to the emperor's personal academy in Rome. To his boy from a distant village on the fringe of the Roman empire, this must have seemed an offer too good to be true - a one-way ticket to live among the stars. But, in any good student of mythology would have known, by invitation to the sun and you might get burned.

Antiochus' rise to the top was meteoric even by Roman standards, where there were plenty of holy emperors who made it to the big time. Set among the other staff of the imperial household, Antiochus' - infamous - good-looking, smart, with a magnetic personality and a sensitive taste for Herodias' beloved hair - quickly caught the emperor's eye. Herodias was instantly besotted, and Antiochus became his pet. In the summer of 100 BC, at the age of seventeen, Antiochus was personally selected to accompany Herodias on a tour of Greece (Herodias was a notorious Greek overlander, from what Asia Minor and, finally, Egypt).

It was clear to everyone that Herodias was willing to let Antiochus out of his sight - and together, they took part in many extraordinary experiences on their around-the-world trip. A night-long dip into mystical circles at the Thracian Mountain of Gaea. A bank heist in the highlands of Asia Minor. A quest - about the searching out of Herodias' much-loved Greek mythology books - to take down a mountain lion that had been terrorising the people of Licia. On all these adventures, the new obsession with each other grew steadily.

SHAH JAHAN AND MUMTAZ MAHAL

The story of Shah Jahan and Mumtaz Mahal is one of the most beautiful love stories of all time. A tale of passion, devotion, tragedy and ultimate sacrifice, their love story is a testament to the power of love.

It all started when Shuja Khan, one of the great Mughal Empire's legendary and the finest Shah Jahan, was led over an abandoned Persian Begum - or Mumtaz Mahal, as she would come to be known. The first Mughal Begum of the great Empire, she was beautiful, was a woman of great grace and beauty. Her father and her husband, the noble, family nobility, and her father-in-law, the first emperor of the Mughal Empire, were all dead. She was a widow, and her father-in-law, the first emperor, was a man of great power and influence. She was a woman of great grace and beauty, and her father-in-law, the first emperor, was a man of great power and influence. She was a woman of great grace and beauty, and her father-in-law, the first emperor, was a man of great power and influence.

At the time, the Mughal empire was down to its last days, and the first Mughal emperor, the first emperor, was a man of great power and influence. She was a woman of great grace and beauty, and her father-in-law, the first emperor, was a man of great power and influence.

MARK ANTONY AND CLEOPATRA

wafted by attendants dressed as cupids and sea-nymphs: Cleopatra, Ruler of Egypt. Goddess of the Nile. Queen of one of the wealthiest countries in the world. Beautiful, certainly, at just twenty eight, but more than anything, utterly, alluringly certain of her star-quality charisma. As one writer put it, "her sex appeal, together with her powers of persuasion and her ability to charm all around her, made her simply, irresistibly desirable." This was who had come to call on Mark Antony, one of the most powerful men in Rome (and so, at that time, the world). Antony was a soldier, a devotee of the wine-god Dionysus, a playboy extraordinaire - a man, in other words, who lived life in vivid technicolour.

If anyone was going to make Rome's fun-loving general pay attention, it was going to be the young queen sailing towards him dressed in gold.

But there was more to this than just sex appeal. For Antony, vying to hold onto his position of power amidst the remains of the crumbling Roman Republic, Cleopatra meant Egypt, and Egypt meant two things: grain and gold. Both were essential to fund (and feed) his battle for world domination. For Cleopatra, Antony meant Rome's backing for her precarious hold on power back home, following a decade of civil war, during which the young queen had gone into exile and returned with an army to take the throne from her brother. No meeting could be more important for either of them. It was a moment well worth a bit of theatre, not to mention a spot of role play.

Norse Myths, Monsters and Viking Voyages

A vivid comic-strip retelling of the greatest Norse myths.

- Contents: Myths - The Creation Myth; The Theft of Idun's Apples; Treasures of the Gods; Thor's Journey to Utgard; The Deal of Balder; Ragnarok; Sigurd and Fafnir Theme spreads - What are the Norse Myths?; Meet the Norse Gods; How the Myths Explained the World; Meet the Vikings; Mythical Creatures and Deadly Beasts; The Afterlife; How the Norse Myths Came to us; A Mythic Map
- Following on from the success of *Myths, Monsters and Mayhem in Ancient Greece* (which has sold over 50,000 copies worldwide as of July 2024) - this is the next title in a growing series for Big Picture Press.

Myths, Gods and Gladiators in Ancient Rome

A historical and humorous comic book retelling of the ancient Roman myths.

- These myths will be broken up with a series of 'theme' spreads, which will take a broader look at certain aspects of Roman mythology (mythical beasts and monsters, the gods, heroes etc.)
- Following on from the success of *Myths, Monsters and Mayhem in Ancient Greece* (which has sold over 50,000 copies worldwide as of July 2024) - this is the next title in a growing series for Big Picture Press
- Growing demand for graphic novels and comic books for children and adults alike
- Cover treatments - deboss and pantone

All in the Mind

Get microscopic and dive into the mind – learn all about the amazing brain!

All in the Mind

MEET YOUR BRAIN CELLS

All the information that you need to live is sent to your brain by tiny messengers called neurons.

How neurons talk to each other

Neurons are made up of long, thin parts called dendrites and a long tail called an axon. The dendrites receive messages from other neurons. The axon carries the message to the next neuron. The place where two neurons meet is called a synapse. The gap between them is called a synapse. The gap between them is called a synapse. The gap between them is called a synapse.

MEMORY

What's your earliest memory? Your most vivid memory? Your favourite memory? Memories are how your brain stores information about what you experience – and this is what allows you to learn.

MEMORY DIRECTORY

Memories are stored in different parts of the brain, depending on what type of memories they are.

Short term memory can store a small amount of information for about a minute, for instance the face of someone you've just met, or what happened in the last couple of pages as you read a book. After that, the information either goes into long term memory or is forgotten.

Working memory is a type of short-term memory that allows you to remember information while you work with it, for instance numbers you have to add in your head, or a code you need to put into your phone.

Long term memory can store an unlimited amount of information for many years. When you remember a holiday you had years ago or a grandparent tells you about their childhood, the information has been stored in long term memory.

Memories of specific events like holidays or films are stored in the **hippocampus**.

Memories involving strong emotions – love, grief and especially fear – are stored in the **amygdala**.

REMEMBER, REMEMBER! Why not test your memory? Get a piece of paper and something to write with, set a timer for thirty seconds, then turn to page 4 and follow the instructions!

PUZZLES & BRAIN TEASERS

CONFUSE YOUR BRAIN!

Use your right hand to hold the pencil. Use your left hand to hold the paper. Use your right hand to hold the pencil. Use your left hand to hold the paper. Use your right hand to hold the pencil. Use your left hand to hold the paper.

IT'S THE STRONG EFFECT!

What to see the Strong Effect in action? Don't have a drink – try this! This year you'll be seeing the Strong Effect in action. Don't have a drink – try this! This year you'll be seeing the Strong Effect in action. Don't have a drink – try this! This year you'll be seeing the Strong Effect in action.

Discover 12 upheavals which changed the world forever.

- A thought-provoking exploration of the idea of revolution: how upheavals, ideas and technology have irreversibly changed the world.
- Content split into three distinct chapters: power struggles, social revolutions and new technology. Chapter openers discuss what the word “revolution” means in each of these contexts, while showing how the idea is linked across all areas.
- Written by long-time author and history enthusiast Joan Lennon, who is a Royal Literary Fund Fellow at Dundee University and regular contributor on The History Girls blog. Her previous non-fiction book *Talking History* was shortlisted for the SLA Information Book Award 2023 and longlisted for the UKLA Book Awards 2023 in the Information Books category.

The science of movement in the natural world

- Die-cuts on every spread lead the reader through the book, providing a sense of movement
- With a lyrical story and captions, this book can be read on two levels
- Cover treatment: matt lam + spot UV
- Sample contents: AIR: Parachuting Spiders, Volcanic Ash Cloud, Migrating Butterflies, Birds; LAND: Seed Dispersal, Mangroves, Parasitic Plants, Tree-Dwelling Mammals; WATER: Driftwood and its Passengers, Marine Snow, Whales, Jellyfish, Icebergs.

Extra Terrestrial

Do aliens exist? Join the real-life hunt for alien life!

- Written by highly acclaimed science author, and Fellow of the Royal Astronomical Society, Colin Stuart, after who the asteroid (15347) Colinstuart is named in recognition of his efforts to popularise astronomy.
- Sample contents: Section 1 (Earth): No Place Like Home / Section 2 (Exoplanets & Techniques): Alien Hunter's Toolkit / Section 3 (Types found): Exoplanet File / Section 4 (Alien life): Searching for Alien Life
- Illustrated by the wonderfully talented Jasmine Floyd known for her vibrant colours and psychedelic vibes!

Automotive celebrates the ingenuity and usability of cars, trucks and motorbikes past, present and future.

- Sample contents: Steam and Electric Automobiles, Early Engines, Monte Carlo Rally, Mass Production, Motorways, Motorbikes, Isle of Man TT, Daytona 500, Concept Cars, History of Formula One, Iconic Bridges, Trucks and Road Trains, Monster Truck Races, Hot Rods, Drag Races, Special Cars, Cars in War, The Future of the Automobile
- The follow-up title to the stunning *Locomotive*
- Perfect for car lovers of all ages
- Super cool artwork by award-winning artist Ryo Takemasa

STEAM AND ELECTRIC AUTOMOBILES

Since their invention in the early 1800s, steam locomotives revolutionised the way people and freight were transported. However, some travellers wanted a more convenient vehicle that they didn't have to share and could use whenever they wanted. Some engineers created small, steam-powered road vehicles, while others decided to try electric battery automobiles. Many designs were created, but by the early 20th century it was clear that the internal combustion engine was going to be king of the road.

The first steam-powered road vehicle was designed by English inventor Richard Trevithick. Using a high-pressure boiler for more power, his Puffing Devil set off with six passengers in 1801 at a speed described by one witness as "faster than I could walk" (about 6km/h). Unfortunately, only a few days after this historic journey, the boiler caught fire and Puffing Devil was destroyed.

Electric cars were very popular in Europe and the USA from the late 1800s to the early 1900s. They were quieter and smoother, didn't produce smoke and were easier to use than steam-powered automobiles. One of the first successful models was the Flocken Elektrowagen. Designed in Germany in 1888, its 1hp electric motor drove the back wheels and could reach around 16km/h.

One of the last and most advanced steam automobiles was the Doble steam car. Designed in 1924, the Doble Model E only required 30 seconds to boil the water needed to drive the engine, was easy to control and could reach speeds as high as 120km/h.

EARLY ENGINES

The age of the automobile really began with the invention of the internal combustion engine. When fuels such as petrol, diesel or kerosene are burned (or 'combusted') inside the engine (using an oxidizer such as air), they produce kinetic energy, which makes the vehicle move. Internal combustion engines are more fuel-efficient than steam engines, and proved far easier and more convenient to start-up, operate and maintain.

German inventor Karl Benz developed the first automobile powered by an internal combustion engine in 1885. His revolutionary Motorwagen had a 5hp petrol engine, three-spoked wheels with solid rubber tyres and one forward gear. Its top speed was around 16km/h.

The first mass-produced car was the Oldsmobile Model R Curved Dash, 19,000 were built between 1901 and 1907. It was more affordable than most other cars at the time, had a 5hp engine, 2 forward and 1 reverse gear and came as either a 2-seater 'runabout' or a 4-seater family car.

Created in 1901 by German engineers Paul Daimler and Wilhelm Maybach as a racing car, the Mercedes 35 HP was a huge step forward in automobile design. It had a powerful petrol engine mounted at the front that drove the back wheels, a hand brake and a foot brake, 4 forward gears and 1 reverse gear.

This visually extraordinary book presents the history of money as it has never been seen before - from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

RICH AND POOR

THE HISTORY OF WEALTH

Wealth is the difference in wealth between the richest and the poorest. It has been around since the beginning of time, but it has become more important in the modern world. Wealth is the ability to acquire the things that we need to live, and it is the ability to acquire the things that we want to live. Wealth is the ability to acquire the things that we need to live, and it is the ability to acquire the things that we want to live.

WEALTH CONCENTRATION

One of the biggest reasons for wealth is inequality. In the past, wealth was concentrated in the hands of a few people. Today, wealth is concentrated in the hands of a few people. Wealth is the ability to acquire the things that we need to live, and it is the ability to acquire the things that we want to live.

WHAT'S WRONG WITH WEALTH INEQUALITY?

Wealth inequality is a problem because it means that some people have more money than others. This means that some people can afford to live better than others. Wealth inequality is a problem because it means that some people have more money than others. This means that some people can afford to live better than others.

GOLDEN YEARS

AN INTERNATIONAL SYSTEM

In the 1920s, the gold standard was finally adopted. This meant that all countries had to use gold as a standard for their money. This was a big step towards a more stable international system. The gold standard was a system where the value of a country's money was based on the amount of gold it had. This was a big step towards a more stable international system.

THE COST OF WAR

World War I had a big impact on the gold standard. The cost of the war was so high that many countries had to leave the gold standard. This was a big step towards a more stable international system. The cost of the war was so high that many countries had to leave the gold standard.

THE HOOR DUCKS

In the 1920s, there was a big boom in the stock market. This was a big step towards a more stable international system. The stock market was a big boom in the 1920s, and it was a big step towards a more stable international system.

FROM COUNTERFEIT COINS TO FALSE NOTES

ALVES dos REIS MASTER COUNTERFEITER

Alves dos Reis was a master counterfeiter who lived in Brazil. He was a very skilled counterfeiter who made a lot of money. He was a very skilled counterfeiter who made a lot of money. He was a very skilled counterfeiter who made a lot of money.

FIRST COUNTERFEITS

The first counterfeit coins were made in the 18th century. They were made by hand and were very similar to the real coins. The first counterfeit coins were made in the 18th century. They were made by hand and were very similar to the real coins.

THE FIRST COUNTERFEIT NOTES

The first counterfeit notes were made in the 19th century. They were made by hand and were very similar to the real notes. The first counterfeit notes were made in the 19th century. They were made by hand and were very similar to the real notes.

FINANCIAL MARKETS

At regular markets people buy and sell things like food and clothing. At financial markets, people trade money-related assets. These include stocks and bonds. Stocks are shares in a company that the company sells to raise capital. Shareholders are paid dividends (regular sums paid out of the company's profits). Bonds are certificates issued by a government or corporation, promising to repay borrowed money at a fixed rate of interest. Financial markets can be physical places, like the New York Stock Exchange, or they can take place online.

1. Fred buys shares in a company.
2. The company uses the money raised from selling shares to invest and grow, creating profits to pay. If the shares go up in value.
3. Fred sells his shares to Jill for a profit.

THE FIRST BONDS

In the twelfth century, the government of Venice came up with a new way of raising money to fight a war. It offered its citizens certificates, known as prestiti, in exchange for a loan, promising to pay them back by a certain time, plus 5 per cent interest. These were the first government bonds. Before long they became a popular investment, and a market developed for the buying and selling of prestiti.

THE FIRST STOCKS

Founded in 1602, the Dutch East India Company was the first business to sell shares to the public. The money it raised from this funded its voyages to the East Indies, and it paid its shareholders out of the profits from its trade in enslaved people and spices. The shares were traded in the Amsterdam Stock Exchange, also established that year.

THE DAILY NEWS

OCTOBER 1929 NEW YORK CITY

THE WALL STREET CRASH

FINANCIAL MARKETS CAN BE VOLATILE. A RUMOR OR A MINOR PIECE OF ECONOMIC NEWS CAN CAUSE BIG SWINGS IN PRICES. THE DESIRE TO MAKE MONEY OR AVOID LOSING IT IS A POWERFUL ONE, AND A HERD INSTINCT CAN SOMETIMES TAKE OVER WITH PEOPLE STAMPEDING TO BUY OR SELL. THE MOST SPECTACULAR EXAMPLE OF THIS WAS THE WALL STREET CRASH OF 1929.

THE ROARING TWENTIES

The 1920s was boom time in the United States. There was a spirit of optimism in the country and it became fashionable to play the stock market. Share prices soon rocketed to a point where they represented a value far greater than the total worth of their companies' assets. This was now a mania – a period when everyone, from wealthy financiers to common investors, lost touch with reality and seemed to believe that prices could keep rising forever.

AFTER EFFECTS

As a result of the crash, businesses were bankrupted, banks closed, millions lost their jobs and the world plunged into a deep and lasting economic depression. This had a big political impact. In Europe, extreme right-wing parties exploited the misery of mass unemployment, blaming 'foreigners' such as Jews. Germany's Nazi Party rose to power in 1933. The consequences for the world would be devastating.

DISASTER

The crash occurred at the end of October 1929, during three calamitous days of trading at the New York Stock Exchange on Wall Street, when huge numbers of people decided collectively it was time to sell. With so many sellers, there were few buyers, and share prices plummeted. In those three days, billions of dollars were wiped off the value of American companies. And over the following years the market kept on falling. By 1932, stocks had lost nearly 90 per cent of their pre-crash value.

The World's First Rollercoaster

Amazing inventions stories in comic-book form by Blue Peter Award-winner Mike Barfield.

- An irresistible way into science and technology with a dash of history from the brilliant Mike Barfield, author of *A Day in the Life of a Poo, a Gnu and You*, winner of the 2021 Blue Peter Award for a Book With Facts. Mike's books have sold in over 40 territories.
- Featuring the greatest inventions in architecture, travel, the home, food, fashion, toys, sports, technology and more, this book is packed with facts for curious minds. Includes tips on sending in a patent and profiles of young inventors alongside greats such as Diebedo Kere, Bertha Benz, Percy Spencer, Momofuku Ando, Kano Jigoro and Jawed Karim.

Dinosaur Desert

A dino-mite adventure story to inspire the next generation of scientists and explorers!

- Publishing on the 100th anniversary of Zofia Jaworowska's birth, the book has been created in collaboration with her family using extensive archive material.
- Beautifully illustrated by Polish artist Ola Plocinska, the book includes a mix of graphic novel spreads, kit lists and wonderful scenes of the Gobi Desert as well as detailed information on how to find fossils to inspire budding palaeontologists.

Locked in the Museum

An action-packed tour of the most marvellous museum in the world!

- A thrilling behind-the-scenes museum tour featuring six stunning gatefold scenes.
- Featuring artefacts from real-life museums around the world, the exhibits are organised into eight galleries: Dinosaurs and fossils, Nature, Human Origins, Art, Transport, Space, Science and Technology and Earth and geology
- A fun and accessible cross curricular title perfect for curious kids who are interested in everything from ancient history and art, to STEM topics.
- Features a section on the challenges faced by modern museums and a glossary of tricky terms.
- Cover finishes: gloss art + matt lam.

From Cells to Ourselves

From the Big Bang to the abundance of life that surrounds us today, this beautiful book is the story of evolution, from the very first cells to ourselves.

- The third title in the *Balloon to the Moon* series, which won the 12-16 category in the British Book Design and Production Awards 2019
- A wonderful combination of mythology, science and history that takes readers on a journey through one of the most fascinating subjects in natural history
- Gill Arbutnott is a former secondary school science teacher.
- Cover treatments: 100% foil, uncoated varnish

From Cells to Ourselves

HOW DID LIFE BEGIN?

THE 1920s American chemist Stanley Miller and British physicist Harold Urey conducted an experiment to see if life could be created from simple chemicals. They used a flask of water, methane, ammonia, and hydrogen gas, and passed an electric spark through it. After a few days, they found that the flask contained amino acids, the building blocks of proteins and enzymes.

THE 1950s British scientist James Watson and American physicist Francis Crick discovered the structure of DNA, the molecule that carries genetic information. They found that DNA is made of two strands twisted around each other, with a sugar-phosphate backbone and nitrogenous bases in the middle.

THE 1960s American biologist Lynn Margulis proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that were taken into a larger cell and became organelles.

THE 1970s American biologist Paul Berg developed recombinant DNA technology, which allows scientists to combine DNA from different sources. This has led to the development of genetic engineering and the creation of transgenic organisms.

THE 1980s American biologist Kary Mullis developed the polymerase chain reaction (PCR), which allows scientists to make millions of copies of a specific DNA sequence. This has revolutionized molecular biology and forensic science.

THE 1990s American biologist James Watson and British biologist Francis Crick discovered the structure of DNA, the molecule that carries genetic information. They found that DNA is made of two strands twisted around each other, with a sugar-phosphate backbone and nitrogenous bases in the middle.

THE 2000s American biologist James Watson and British biologist Francis Crick discovered the structure of DNA, the molecule that carries genetic information. They found that DNA is made of two strands twisted around each other, with a sugar-phosphate backbone and nitrogenous bases in the middle.

THE 2010s American biologist James Watson and British biologist Francis Crick discovered the structure of DNA, the molecule that carries genetic information. They found that DNA is made of two strands twisted around each other, with a sugar-phosphate backbone and nitrogenous bases in the middle.

THE 2020s American biologist James Watson and British biologist Francis Crick discovered the structure of DNA, the molecule that carries genetic information. They found that DNA is made of two strands twisted around each other, with a sugar-phosphate backbone and nitrogenous bases in the middle.

THE DINOSAUR DETECTIVES

In the 19th century, scientists discovered, investigated and named many species of dinosaurs. But for the first time, these dinosaur detectives:

MARY ANNING (1799-1847) was a fossil collector in Lyme Regis, Dorset. She discovered the first Ichthyosaurus fossil in 1830. She also discovered the first Plesiosaurus fossil in 1830. She was the first woman to be elected a Fellow of the Geological Society in 1842.

WILLIAM BUCKLAND (1784-1861) was a geologist and paleontologist. He discovered the first dinosaur fossil, Megalosaurus, in 1824. He was the first to name a dinosaur, Megalosaurus, in 1825. He was also the first to name a dinosaur, Iguanodon, in 1825.

RICHARD OWEN (1804-1892) was a geologist and paleontologist. He discovered the first dinosaur fossil, Megalosaurus, in 1824. He was the first to name a dinosaur, Megalosaurus, in 1825. He was also the first to name a dinosaur, Iguanodon, in 1825.

OSBORN MARTELL (1790-1852) was a geologist and paleontologist. He discovered the first dinosaur fossil, Megalosaurus, in 1824. He was the first to name a dinosaur, Megalosaurus, in 1825. He was also the first to name a dinosaur, Iguanodon, in 1825.

THE GREAT OCEAN WALKER was a geologist and paleontologist. He discovered the first dinosaur fossil, Megalosaurus, in 1824. He was the first to name a dinosaur, Megalosaurus, in 1825. He was also the first to name a dinosaur, Iguanodon, in 1825.

THE END OF THE DINOSAUR AGE

For a long time, people believed that the dinosaurs were the only animals that ever lived on Earth. But in the 19th century, scientists discovered that there had been many other animals that lived on Earth at the same time as the dinosaurs. This led to the discovery of the dinosaurs.

THE DINOSAUR AGE was a time when dinosaurs lived on Earth. It lasted from about 252 million years ago to 66 million years ago. It was a time when dinosaurs were the dominant animals on Earth.

THE END OF THE DINOSAUR AGE was a time when dinosaurs lived on Earth. It lasted from about 252 million years ago to 66 million years ago. It was a time when dinosaurs were the dominant animals on Earth.

EARLY IDEAS ABOUT EVOLUTION

How long is a million seconds? Have you been alive for one billion seconds? What was happening a million days ago? We find it very difficult to comprehend these huge numbers. If we don't have a feel for how long a million seconds is, how can we possibly comprehend time spans of millions or billions of years? This is one reason why some people have a problem with evolution. The idea that single, primitive cells evolved into all the species that have ever lived seems incredible, unless you get to grips with the timespans involved.

In ancient Greece, philosopher Anaximander suggested that one type of animal could change into another, while Empedocles thought that new types of living things could be made from a range of parts that already existed.

No, no. We're one quarter of the way there. We're definitely over that!

Yes, we're one quarter of the way there. We're definitely over that!

There's NO WAY he's getting into elephants on that one.

Yeah, but, perhaps they came later.

Theologians Gregory of Nazianzus and Augustine both thought that although God had created all the original animals and plants, new types had developed from them. Their ideas were in response to the practical problems that would have arisen from trying to get two of everything into the Ark.

The naturalist George-Louis Leclerc proposed a way for the Earth to have formed from debris in space. Although he believed in spontaneous generation, he thought that animals could change as they migrated to different conditions. This has been explained by the discovery of elephant fossils in North America, and mammoth fossils in Siberia, although living elephants are today only found in Africa and South Asia. He suggested the American ones had become extinct, while the mammoths had changed as they migrated south.

I've got it!

Erasmus Darwin was Charles Darwin's grandfather. He was a doctor, poet and naturalist, and in his book Zoonomia, or 'The Laws of Organic Life', he was one of the first people to propose a theory of evolution. He never hit on the idea of natural selection, but did recognise the importance of sexual selection (see page 59) and realised it could cause changes in species.

GRADUAL CHANGES

In the early 1800s Jean-Baptiste Lamarck, inventor of the terms 'invertebrate' and 'biology', was the first person to develop a coherent theory of the development of life on Earth and its evolution. He believed that life had originated by spontaneous generation, rather than creation by deity, and had then become more complex and varied over many generations. Lamarck suggested how this could happen. His idea is often called the 'Theory of Evolution by Acquired Characteristics'. In simple terms, he thought that the more an animal used an organ during its lifetime, the more well-developed it would become and that these changes could be inherited by offspring if both parents had the same developments.

THE EVOLUTION OF THE GIRAFFE'S NECK, ACCORDING TO LAMARCK:

- 1) Early giraffes had short necks.
- 2) Giraffes reach upward to graze on leaves.
- 3) This stretches their necks very slightly over their lifetimes.
- 4) The next generation of giraffes inherits these slightly longer necks.
- 5) This process is repeated over many generations until we arrive at modern, long-necked giraffes. Lamarck was not suggesting that their necks suddenly shoot out like telescopic poles!

THE PROCESS ALSO WORKED THE OTHER WAY:

- 1) Early penguins had wings with which they could fly.
- 2) Penguins spend most of their time swimming and very little flying.
- 3) Their wings become smaller, with smaller feathers, from lack of flying.
- 4) The next generation of penguins inherits these smaller, more flipper-like wings.
- 5) This process is repeated over many generations until we arrive at the modern penguin, which can no longer fly and whose wings are now adapted to help it swim instead.

Talking History

150 years of world-changing speeches

- An accessible look at political and social history, and issues that remain pertinent today
- Contemporary design and illustrations from André Ducci accompany engaging text
- Authors are experienced children's writers and academics with expert knowledge on the topics discussed. In 2021, Joan Haig was selected as one of prestigious Scottish Book Trust's authors in residence, working with a school in Aberdeen
- Sample contents: Abraham Lincoln, 'The Gettysburg Address', 1863; Jawaharlal Nehru, 'A Tryst with Destiny', 1947; Nelson Mandela, 'Speech from the Dock', 1964; Harvey Milk, 'The Hope Speech', 1978; Angela Merkel, 'Address to 68th Session of the WHO', 2015 and Severn Cullis-Suzuki, 'Listen to the Children', 1992,

Talking History

In 1903, in the city of Manchester, UK, Emmeline Pankhurst and her eldest daughter Christabel founded the Women's Social and Political Union (WSPU). The organisation campaigned fearlessly for women's right to vote.

THE SUFFRAGETTE MOVEMENT

This wasn't the first time that women in Britain had fought for the vote. Since the mid-nineteenth century, female campaigners called 'suffragists' had tried to win rights for women in society through peaceful petitions and, later on, by refusing to pay their taxes.

But this campaign was slow with few results. After years of unsuccessful peaceful protest by the suffragists, the WSPU decided that it was time for action – 'Deeds Not Words', as their motto said. Members of the WSPU took part in 'civil disobedience' to literally fight for their cause. They chained themselves to pillars, hacked politicians' names on to buildings, and smashed windows in public places, constantly clashing with the authorities.

They were so determined to achieve their political aims that they deliberately took part in violence and vandalism to influence the public and the government.

Newspapers began referring to militant WSPU campaigners as 'suffragettes'. By 1910, the WSPU had branches all over the country.

THE CAT AND MOUSE ACT

Around 1,000 suffragettes were imprisoned for their 'substance' behaviour. While in jail, some continued to fight by going on hunger strikes, refusing to eat or drink. At first, they were released to prevent them from starving, but, by 1910, prison wardens began to force feed them. Women were badly hurt, prompting public outrage at what was seen as government torture.

The government responded by passing the 1913 'Prisoners' Temporary Discharge for Ill Health' Act. Under this new law, when women on hunger strike became critically weak, they were sent home. As soon as they recovered, they were promptly returned to continue their sentence. It was dubbed the 'Cat and Mouse Act', likened to the way a cat plays with its prey repeatedly letting it escape before catching it again.

Emmeline Pankhurst was imprisoned and released 16 times! It was in 1913, in between prison sentences, that she visited the United States to campaign for support and funding. She addressed a group of women at the Parsons Theatre in Hartford, Connecticut, in a powerful speech attempting to justify the use of militant tactics in the fight for women's rights.

Inside Story: How the Internet Works

Get the inside story on today's most important topics and learn to navigate the internet like a pro!

- An all-encompassing guide to the internet, looking at how it's made and who by, how the internet plays a role in different areas of our lives (e.g. communication, entertainment, shopping and business), the latest issues surrounding the internet and how to work with parents and guardians to stay safe online.
- Written by an expert author - Craig Steele, a computer scientist and digital skills educator. Plus tips from other contacts in the industry who can provide first-hand knowledge.

Inside Story: How the Internet Works

THE INFRASTRUCTURE OF THE INTERNET

Some parts of the internet you can see easily, like your broadband router at home. But did you know most of the internet's structure is actually hidden? Below the sea there are long lines of cables, above you, thousands of satellites orbit Earth, and dotted around the globe are warehouses full of powerful computers. These work together to form the physical foundation of the internet – its infrastructure – and each one plays an important role.

Cables

There are hundreds of thousands of miles of internet cables zig-zagging across entire continents, and along the seabed, undersea cables are laid to connect countries and islands. These are used to transfer data across long distances. Most of these cables use fibre optic strands, which are super-thin threads of glass (each one thinner than a human hair) that transmit data as pulses of light.

5G Cell Towers

When you use the internet on your phone while out and about, it connects to a nearby cell tower using a high-speed 5G connection. These cell towers are used by mobile network operators (like EE or O2), who send your data through their own networks before it goes to the internet.

Home Wi-Fi

All of your devices at home are most likely connected to the internet using a technology called wireless fidelity, better known as Wi-Fi. Instead of wires or cables, data from your devices is transmitted to a home router using radio waves. The router gives you access to the internet, and it's a smaller, less powerful version than the ones in data centres.

Satellites

In less populated and more rural areas of the world, satellites are used to connect people to the internet. They orbit high above Earth, beaming signals to and from ground stations. These satellites also provide internet access to people travelling in aeroplanes.

Internet Service Provider

To connect to the internet at home or work, people join a company called an internet service provider (ISP) for access. They provide network equipment (like a wireless router) and manage the connection to make sure users have reliable speeds, making getting online a breeze.

Internet Exchange Points

An internet exchange point (IXP) is a location where different ISPs connect their networks to each other. By sharing traffic, data can take the shortest route across multiple networks. Companies that use the internet sometimes keep copies of popular data at an IXP so that it doesn't have to travel as far to reach people, for example, film and TV streaming sites.

HOW DATA IS SENT ACROSS THE INTERNET

Have you ever thought about the internet your family, school, teacher robot – really your whole life – uses to get on? You'll need several components to make it work. Here's how it works, from the moment you click on a link to the moment you see the page.

- Step 1** You click on a link on a website. This sends a request to the server that hosts the website.
- Step 2** The server sends the data back to your device. This data travels through a series of routers and switches that direct it to your device.
- Step 3** The data is received by your device and displayed on the screen.
- Step 4** If you click on another link, the process starts again. The server sends the data back to your device, which displays it on the screen.

INTERNET UPDATE
The internet is constantly growing and changing. New technologies are being developed all the time, and new services are being added. This means the internet is always evolving and becoming more powerful.

INTERNET UPDATE
What is smart? Smart is when something can think for itself. The internet is smart because it can find the best way to get data from one place to another. It can also learn from its mistakes and get better at what it does.

CYBER CRIME ON THE INTERNET

Now with the internet most of us spend time using for learning, but there is a darker side – cyber crime. This is the use of computers and the internet to commit crimes. It can be anything from stealing money to spreading hate. Here are some of the most common types of cyber crime and how to protect yourself.

Malware most wanted

- Spam**: Unsolicited emails that can be annoying or contain malicious links.
- Phishing**: Fake websites that look like real ones to steal your personal information.
- Ransomware**: Software that locks your files and demands payment to get them back.

Who protects us from cyber crime?

- FINANCIAL AGENCIES**: Monitor transactions for suspicious activity.
- DIGITAL FORENSICS SPECIALISTS**: Investigate cyber crimes and recover data.
- CYBER POLICE**: Enforce laws related to cyber crime.

Protecting the human

Be careful of what you click on. Don't give out personal information to strangers. Use strong passwords and keep your software updated.

ON ASSIGNMENT

Check for updates on the latest cyber crime threats. Stay informed about new security measures and how to use them.

Raising the Roof

A cool introduction to classical music

- Broadcaster, songwriter, composer and Scala Radio presenter Jack Pepper is an exciting, young voice in classical music.
- A fun and approachable introduction to classical music
- Includes a playlist, so you can listen as you read
- **SAMPLE CONTENTS:** Hildegard of Bingen 1098-1179; Claudio Monteverdi 1567-1643; Barbara Strozzi 1619-c. 1664; JS Bach 1685-1750; Joseph Bologne 1745-1799; Ludwig van Beethoven 1770-1827; Richard Wagner 1813-1883; Giuseppe Verdi 1813-1901; Ethel Smyth 1858-1944; Arnold Schoenberg, 1874-1951; Igor Stravinsky, 1882-1971; Florence Price, 1887 - 1953; George Gershwin, 1898-1937; Leonard Bernstein, 1918-1990

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
The javelin is a spear-like object used in track and field events. The first javelin was made of wood and had a stone head. Today, javelins are made of metal and have a pointed tip.

LONG JUMP
The long jump is a track and field event where athletes compete to jump the furthest distance. The long jumper runs down a runway and jumps into a sandpit.

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal at the 2004 Athens Olympics with a jump of 15.66 metres.

DISCUS
One of the most beautiful sights in the ancient world is called the Discobolus or 'discus thrower'. The statue is a Greek bronze statue of a young man throwing a discus.

JAN SZENTI
Jan Szeñti is a Hungarian discus thrower. He won the gold medal at the 1968 Mexico City Olympics with a throw of 52.17 metres.

AMERICAN FOOTBALL
American football is a team sport that originated in the United States. It is a contact sport where players use their bodies to move the ball down the field.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's goalposts. Points are scored by kicking the ball through the goalposts or by running with the ball into the end zone.

THEY USE TEAM
There are 11 players on the field. Each player has a specific role to play. The team works together to move the ball down the field and score points.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the quarterback throwing the ball to a receiver. The receiver then runs with the ball towards the end zone.

FOR READY
The quarterback is the most important player on the team. They are responsible for starting the play and deciding which player to throw the ball to.

RUGBY
Rugby is a team sport that originated in England. It is a contact sport where players use their bodies to move the ball down the field.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's goalposts. Points are scored by kicking the ball through the goalposts or by running with the ball into the end zone.

THEY USE TEAM
There are 15 players on the field. Each player has a specific role to play. The team works together to move the ball down the field and score points.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the scrum half passing the ball to the fly half. The fly half then runs with the ball towards the end zone.

FOR READY
The scrum half is the most important player on the team. They are responsible for starting the play and passing the ball to the fly half.

BASEBALL
Baseball is a team sport that originated in the United States. It is a contact sport where players use their bodies to move the ball down the field.

AIM OF THE GAME
The aim of the game is to score points by hitting the ball into the opponent's field. Points are scored by hitting the ball into the field and running to the next base.

THEY USE TEAM
There are 9 players on the field. Each player has a specific role to play. The team works together to move the ball down the field and score points.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the pitcher throwing the ball to the batter. The batter then swings the bat and hits the ball.

FOR READY
The pitcher is the most important player on the team. They are responsible for starting the play and throwing the ball to the batter.

CRICKET
Cricket is a team sport that originated in England. It is a contact sport where players use their bodies to move the ball down the field.

AIM OF THE GAME
The aim of the game is to score points by hitting the ball into the opponent's field. Points are scored by hitting the ball into the field and running to the next base.

THEY USE TEAM
There are 11 players on the field. Each player has a specific role to play. The team works together to move the ball down the field and score points.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the batsman hitting the ball. The batsman then runs to the next base.

FOR READY
The batsman is the most important player on the team. They are responsible for starting the play and hitting the ball.

Boccia
Boccia is a team sport that originated in Italy. It is a contact sport where players use their bodies to move the ball down the field.

AIM OF THE GAME
The aim of the game is to score points by hitting the ball into the opponent's field. Points are scored by hitting the ball into the field and running to the next base.

THEY USE TEAM
There are 3 players on the field. Each player has a specific role to play. The team works together to move the ball down the field and score points.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the player throwing the ball. The player then runs to the next base.

FOR READY
The player is the most important player on the team. They are responsible for starting the play and throwing the ball.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patota puripatka
Patota puripatka was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

Mongolian cave paintings from 7,000 years ago show people wrestling in front of spectators.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Māori of New Zealand participated in a competition known as the Māori Games - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

Along Came a... Rainbow!

A laugh-out-loud science story all about the weather!

- A fun, fact, and fart-packed picture book approach to early science for readers 4+.
- Graphic-novel-style layouts present facts in memorable and hilarious fashion.
- Paula Bowles's artwork is an explosion of colour, bringing to life a zany cast of anatomical characters, from stinky poos, to friendly farts, to super-speedy sneezes. Paula was shortlisted for the Indie Book Awards 2023 and The Alligators Mouth Award 2023.
- With warm, funny text by rising-star Saskia Gwinn (author of *Scientists are Saving the World* and *I am Not the Easter Bunny*).

Time for Bed, Animals

A gentle non-fiction book full of sleepy animals

- Gentle non-fiction picture book, perfect for readers aged 3-7.
- Written in accessible language, packed with amazing facts and questions to consider, with text by award-winning author and travel-writer Ben Lerwill.
- With lush illustrations full of adorable animals by Spanish illustrator Maribel Lechuga. Maribel has illustrated books for the Usborne Beginners and Look Inside series and Oxford Reading Tree among others.
- A page of information at the back of the book includes sleep-tips for families.
- CONTENTS: Dogs, chimpanzees, dolphins, sea otters, cats, ants, kangaroos, bats, birds, fish (Great Barrier Reef), giraffes, tortoises

Time for Bed, Animals

Time for a Bath, Animals

A gentle non-fiction book full of squeaky clean animals and splash-tastic facts.

- Gentle non-fiction picture book, perfect for readers aged 3-7
- Written in accessible language, packed with amazing facts and questions to consider, with text by award-winning author and travel-writer Ben Lerwill.
- Beautiful illustrations of adorable animals and their habitats by Spanish illustrator Maribel Lechuga.
- A page of information at the back of the book includes fun bathtime tips for families.
- The perfect companion to *Time for Bed, Animals*, also by Ben Lerwill and Maribel Lechuga.

Time for a Bath, Animals

Busy Little Fingers: Art

Can you make a face with vegetables? How do you paint a dream? This bright and busy book provides a fun first look at art concepts, and is jam-packed with things for busy little fingers to try!

- Contents: Hello, Art World!; Mannerism; Impressionism; Cubism; Fauvism; Symbolism; Surrealism; Abstract Expressionism; Pop Art; Op Art; Contemporary Art; Make Your Mark!
- A vibrant new series for 4-6 year olds exploring the creative arts
- Fun artwork by Big Picture Press debut artist, Eleonora Marton

Busy Little Fingers: Music

This bright and busy book provides a fun first look at music, with lots for busy little fingers to try!

- Pantone and spot UV cover finishes
- Fun flexi format is perfect for busy little fingers!
- A vibrant new series for 4-6 year-olds exploring the creative arts
- Fun artwork by Eleonora Marton, and expert text by children's author Eva Wong Nava
- Contents: Hello, Music!, Classical, Opera, Jazz, Soul, Blues, Folk, Country, Rock, Pop, Hip Hop
- **Celebrating 10 Years of Extraordinary Illustrated Books**

Tell Me About: Space

Big science for little readers.

- The third title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at space for young children, featuring topics such as: planets and moons, the solar system, stars and galaxy, constellations, what's in the night sky, gravity, the big bang, going into space and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Space

Pub Date	14/03/2024

Tell Me About: Planet Earth

Big science for little readers.

- The fourth title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at earth science for young children, covering topics such as day and night, seasons and weather, biomes, physical landscapes, the water cycle, volcanoes and earthquakes, fossil fuels, carbon emissions and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Planet Earth

Earth is Home

You live on a brilliant ball of spinning rock called Earth. It's a planet, travelling through space on a gigantic loop around a star called the Sun.

There's another ball of rock about a quarter of the size of Earth and you can see it in the night sky. It's called the Moon.

It takes a month for the Moon to travel around Earth on an oval path.

It takes a whole year to travel all the way around the Sun. So if you are five years old, you have circled the Sun five times already!

Earth travels around the Sun on an oval path but it also spins on the spot. The spin is why it gets dark at night.

Your home turns away from the Sun at night and by morning it has turned back towards the Sun once again. It takes 24 hours for a complete spin to happen, and we call that a whole day.

Caves

Caves are big holes carved into cliffs by waves hitting the rock. But they can also form underground as rain trickles through cracks in the rock.

That's right, tiny little rain droplets can make massive caves because they dissolve the rock away a little bit at a time.

Underground rivers flow through caves. They wear the floor of the cave down to make them even bigger.

Inside the cave, some droplets of rainwater evaporate. As the liquid water drops turn into gas, they leave behind the tiny bits of rock they were carrying. The bits of rock stick to the roof.

In a thousand years, all the drops of water will have left enough rock behind to make a shape about as long as your finger. This is called a stalactite.

The same thing happens as the water drops onto the floor of the cave too. The cave floor grows upwards into a wider opening, which is called a stalagmite.

Digging and Drilling

When humans dig useful rocks and metals out of the ground, it is called mining. People also drill long holes deep down into the rock to find little pockets of gas and a liquid called oil.

The oil and gas found deep underground were once tiny sea creatures. They sank to the bottom of the sea and got squashed over millions of years. They turned into a dark liquid called oil and a gas called methane.

Cool is a black rock that gives off lots of heat when it burns. It is made from leaves that took in swamps millions of years ago.

We can burn oil, coal and methane gas to make electricity and to power vehicles.

Most metals are hidden underground with other rocks. A few metals are found just as they are at the surface, including gold, silver and copper.

Metals can make lots of useful things including bikes, phones, computers and cars.

Oceans

If you flew out into space and looked back at Earth it would look blue. That's because two thirds of our planet's surface is covered in liquid water. It's mostly found in the oceans and seas.

Waves

Waves are made on the surface of the water as the wind pushes the sea.

Tides

The sea comes in at high tide and goes out at low tide. This happens twice every day because of the way Earth is spinning beneath the Moon.

That's right, the Moon makes our tides! Gravity is a pull that happens between Earth, the Moon and the Sun. It pulls on you too. When you jump, gravity pulls you back down to Earth.

Low tide

High tide

The oceans on planet Earth slowly change shape because the rock beneath them is moving. This creates underwater valleys, caves and mountains.

Mountain

Valley

Did you know...? Seawater is salty because of salt from rocks!

Tell Me About: The Human Body

Brilliant Body

So many amazing things are happening in your body right now! Let's take a look at just a few of them...

As you breathe, spongy bags called lungs are sucking air in and putting it into your blood.

When you run, stretchy cords called muscles pull bones back and forward. Your bones connect together in a structure called a skeleton. And your skin wraps everything up.

When you think or laugh or wiggle your toes, you use energy. The energy comes from the food you eat. The food goes into your blood and all around your body.

Tiny electrical signals are making your heart beat - to-beat-to-beat - to pump blood around your body.

Your body is made from lots of different parts that work together to do important jobs. These parts are called organs.

If you look at the pictures in this book, you're using organs called eyes. And when you think about all of this, you use an organ called the brain.

The Skin

Let's begin our body tour with your skin. This stretchy waterproof layer wraps around your body keeping germs out and keeping your insides... inside!

Your skin is full of sensors that help you to touch and feel things. You can feel pain and warmth and the tiny footpads of an insect crawling on your arm.

Did you know...? The skin is the biggest organ in the body!

Touch sensors help you to feel how hard to press when you lift it and hold objects - so you don't drop or squash them.

The top layer of your skin is dead! Underneath it, new skin is being made. It pushes the old skin upwards until it flakes off as dust. Yes, your skin becomes dust!

Your hair and nails are made from the same stuff as skin. It's called keratin.

Your skin cools your body too. One way it does this is by making little drops of liquid called sweat.

When sweat drops are warmed by a hot body, they float off into the air taking heat away with them!

Skeleton

The thing that gives your body its wonderful shape and height is a skeleton. It is made from 206 bones that join together at hinges called joints.

Full your fingers! The bones are the hard parts, and the joints are where your fingers bend.

Strong bony bones called cartilage make up some parts of the skeleton including your ears, your nose and sections of your ribs.

The skeleton protects your insides too. Your ribs make a cage around your lungs and heart and your skull is like a helmet, protecting your brain.

Inside your biggest bones is a juice called marrow. New blood is being made in the marrow. That's right, your bones can make blood!

Bones are full of tiny holes that make them light. But the pattern of the holes makes them really strong too.

Short stretchy cords called ligaments stick the bones to each other. Longer, stretchy cords called muscles pull the bones around so you can move.

Muscles

Muscles are stretchy cords that pull body parts to make them move. If you wiggle your eyebrows and stick out your tongue, you did it using muscles!

Muscles can pull, but they can't push so they need to work in teams. One muscle pulls a body part one way, and another muscle pulls it back again.

Great teamwork muscles!

1. Bend your arm. The set of muscles at the front of your arm, called triceps, pulled it up by getting shorter.

2. Now straighten your arm. Another set of muscles at the back of your arm, called biceps, pulled your arm down to straighten it.

The muscles that move your bones around are called skeletal muscles. But they're not the only muscles you have!

Skeletal muscles help you to move parts of your body.

Cardiac muscles make your heart squash to pump blood.

Smooth muscles line the tubes in your body. They help push things through the tubes.

Did you know...? Muscles help you hold in pee until you're ready to let it go.

Tell Me About: Plants

Big science for little readers

- The first in a brand-new series of non-fiction books for readers 4+.
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung.
- Partnering with Kew Gardens for the UK edition. Kew are also acting as consultants.
- Cover finishes: matt lam and spot UV
- CONTENTS: Plants are wonderful; Parts of a Plant; Flowers; Fruit; Getting Planted; Growing from a Seed; Drinking Water; Making Food from Sunlight; Leaves; Plant Families; Flowering Plants; Grasses; Trees and Seasons; Types of Tree; Plant Defences; Plant Attack!; Record Holders; Thank You Plants!; Glossary

How the Weather Works

From rainfall to sunshine, snow storms to hurricanes and everything in between - learn all about how the weather works!

- A fresh, updated look for the acclaimed series featuring *How the World Works* and *How the Weather Works*, which has sold over 213,000 copies worldwide (as of October 2022).
- An accessible, gorgeously illustrated first science book, answering children's most pressing questions about how the weather works
- Entertaining and educational, an updated edition of this book which follows on from *How The World Works*, winner of the Royal Society Young People's Book Prize

Little Explorers: Food

Take a bite into the tasty world of food, with more than 30 flaps to lift and explore!

- A new edition to the popular non-fiction series, *Little Explorers*, which has sold over 1.25 million copies worldwide, this time exploring delicious food!
- More than 30 sturdy flaps to lift, revealing interesting and fun facts to help children engage with each topic.
- Introduces new concepts and vocabulary in a simple and approachable way -through bright, child-friendly artwork and accessible, bite sized text.
- Can be used as a tool to complement KS1 curriculum learning

Little Explorers: Food

FABULOUS FOOD!

Food can be grown in your kitchen, but what if it could? What if you could get it all in the average that helps you move, think and play before you eat just of food you need to get it almost instant food to go.

VEGETABLES
Vegetables help your body work as it should. There are 12 basic vitamins and they all have different jobs.

VEGETARIANS
Vegetarians eat only plant-based foods. The body needs vitamins and minerals from other sources, which is why they eat carbohydrates like bread, pasta and potatoes.

MEAT
If you eat animal energy and help the body absorb important vitamins, especially iron and zinc, it's best to eat red meat.

Nutrients
Nutrients are important things found in food that help make them grow and survive. Nutrients can be vitamins, minerals, carbohydrates, proteins, fats and water.

VEGETABLES
Vegetables are full of vitamins and minerals. There is an important message: Eat a rainbow! Eat a variety of different colors of fruits and vegetables.

MEAT
Protein is the building blocks that help your body grow. They come from animal products like meat and dairy.

Intestines
The digestive system starts in the mouth and goes through the stomach and small intestine to the large intestine.

THE DIGESTION QUESTION

How does the food you eat turn into energy inside your body? What about what you drink? The process is called digestion. Together, the parts of your body that help break down our food are called the digestive system.

LET'S CELEBRATE!

Although food is important for our survival, it has become so much more than that. It's something that we enjoy. Food has even become a big part of many celebrations around the world!

Dahl
Dahl is a mixture of lentils and vegetables. It's a healthy and delicious dish that is eaten throughout the day in the Indian subcontinent.

Lunar New Year
The beginning of a new lunar year is celebrated with food that is used to bring luck, health and happiness.

Passover
The Jewish festival of Passover is celebrated in early spring. During the eight days of the festival, people do not eat anything made with leavened bread. Instead, they eat unleavened bread.

Thanksgiving
In the United States, Thanksgiving is a time to give thanks for the good things in our lives.

Idol at Aïda
Using the best ingredients, chefs create dishes that are both delicious and beautiful. Many of the dishes are named after famous people or events.

Happy birthday!
People celebrate their birthdays in different ways around the world. In many countries, there are birthday cakes with candles. In other countries, people have birthday parties with games and gifts.

Idol at Aïda
Using the best ingredients, chefs create dishes that are both delicious and beautiful. Many of the dishes are named after famous people or events.

NOT FOR ME!

Some people's bodies can become sensitive to certain foods. These bodies react to try to get the food out of their system.

Which foods cause an allergic reaction?
Different people can react to different things. Some common foods that can cause allergies are:

- Wheat
- Eggs
- Milk
- Peanuts
- Shellfish
- Soy

FOOD PROBLEMS
The production of food can have an impact on our planet. With more and more people in the world, there is a lot of food being produced. This can have a negative impact on the environment.

The plastic problem
Plastic packaging is everywhere. It's not good for the environment. It takes a long time to break down and can pollute the land and water.

Let's go!
Animals are one of the best helpers in the world. They help us in many ways. Some animals are used for food, some for transport, and some for entertainment. They can also help us in many other ways.

FINDING FOOD

Usually, food appears in front of you at the dinner table. But how did it make its way there? Where does food come from? Many foods go on a journey from farms to factory to finished feast. Some food comes from much closer to home too!

fantastic farms
A farm is a place where animals might be used to produce food, and crops are grown there too. Some farms grow all sorts of fruits and vegetables. Some grow wheat. Others raise cows for milk and hens for eggs.

Combine harvester
These machines cut and collect crops. They also separate the parts that can't be eaten from the parts that can.

Orchard
An orchard is an area of land where lots of trees are planted to grow fruit.

Tractor
The tractor is the most important machine on the farm. Different attachments can be added for different jobs.

factory stop
Food grown on farms might go to a factory to be packaged up. It then travels to a supermarket, for people like you to buy and enjoy.

In the garden
Some food is grown in your very own garden! People can grow delicious vegetables, such as carrots and cucumbers, and fruits, such as cherries and plums, at home. Local farms might grow food you like too.

Buying food locally helps the environment. It cuts down on the kilometres the food needs to travel to get to its destination.

Busy bees
Bees are one of the planet's greatest helpers. Here's why...

Little Explorers: Weather

Discover our world's wondrous weather, with more than 30 flaps to lift and explore!

- A new edition to the popular non-fiction series, *Little Explorers*, which has sold over 1.25 million copies worldwide, this time exploring our wild weather!
- More than 30 sturdy flaps to lift, revealing interesting and fun facts to help children engage with each topic.
- Introduces new concepts and vocabulary in a simple and approachable way - through bright, child-friendly artwork and accessible, bite sized text.
- Can be used as a tool to complement KS1 curriculum learning.

Little Explorers: Weather

THE SUN AND THE SEASONS

As weather patterns change through the year we get different seasons. This happens because Earth's axis is tilted. During the year, part of it faces the sun more or less directly, causing the different seasons.

On a tilt
Earth's axis is tilted at an angle of 23.5 degrees. This means that it leans in a certain way around the sun. This tilt causes the different seasons that we have. The tilt is always the same, but the amount of sunlight that reaches the earth changes throughout the year.

Always moving
Earth is always moving around the sun. It takes one year to go all the way around. During that time, part of it faces the sun more or less directly, causing the different seasons.

North pole
Northern hemisphere
Tilted away from the sun
Northern hemisphere
Tilted towards the sun

South pole
Northern hemisphere
Tilted towards the sun
Southern hemisphere
Tilted away from the sun

Year around
When an area of the planet is tilted towards the sun, it receives more sunlight and is warmer. When it is tilted away from the sun, it receives less sunlight and is cooler. This causes the different seasons.

Hot and dry
Summer weather is hot and dry. This is because the sun is high in the sky and the days are long. The ground and water are warm, and the air is dry.

Sun never sets
In the most northern part of the world, the sun never sets. This is because the sun is always above the horizon. This is called the midnight sun.

Top and bottom
The equator gets the most direct sunlight. This is because the sun's rays are hitting the earth straight on. The poles get the least direct sunlight. This is because the sun's rays are hitting the earth at an angle.

THE WATER CYCLE

Did you know that the water you drink and the rain that falls on your head are made of the same stuff? The water on our planet is recycled over and over again in a never-ending cycle.

What's inside a cloud?

☉ Evaporation
The sun's heat causes the water on the surface of the sea or in lakes, rivers and puddles to turn into water vapor. This is called evaporation.

☁ Condensation
In the air, the water vapor cools down and joins together to form tiny droplets. These droplets combine to form clouds.

☔ Precipitation
When the water in the cloud becomes so heavy that the air can't hold it, it falls to the ground again as rain, snow or hail. This is called precipitation.

☀ Runoff
The water that falls on the ground runs down to the sea or into lakes and rivers. This is called runoff.

☀ Infiltration
Some of the water that falls on the ground soaks into the ground and turns into groundwater. This is called infiltration.

☀ Transpiration
Plants also release water vapor into the air. This is called transpiration.

☀ Sublimation
In some places, snow can turn directly into water vapor without melting first. This is called sublimation.

☀ Ice storms
If it is very, very cold, rain can turn into ice when it falls. This is called an ice storm.

☀ Rainbow
When the sun comes out after a rain shower, you might see a rainbow.

WHOOOSH! WIND

A gentle breeze or a strong gale - some think you can't feel the wind at all, while others think it's a powerful force that can knock you over. How does it come though?

Under pressure
The weight of the air above us creates pressure. The air is always moving around, and this causes the wind.

Air on the move
When the air moves from one place to another, it creates wind. The faster the air moves, the stronger the wind.

Wind power
The wind can be used to generate electricity. Wind turbines are used to do this. The wind turns the blades of the turbine, which then turns a generator to produce electricity.

Wind power
The wind can also be used to generate energy. Wind turbines are used to do this. The wind turns the blades of the turbine, which then turns a generator to produce energy.

Calm to chafe
The Beaufort scale measures how strong a wind is ranging from 0 to 12. It is named after Sir Francis Beaufort.

Beaufort scale	1	2	3	4	5	6	7	8	9	10	11	12
0	1	2	3	4	5	6	7	8	9	10	11	12
Calm	Light air	Light breeze	Breeze	Moderate breeze	Fresh breeze	Strong breeze	Near gale	Strong gale	Gale	Storm	Violent storm	Hurricane

IN THE CLOUDS

On a sunny, rainy or grey day, you might see clouds in the sky. There are 10 common types of cloud, and they all mean different things for what weather we may have.

Cirrus
Thin, wispy clouds that are high in the sky.

Cirrocumulus
Thin, white clouds that are high in the sky.

Fog
Fog is a cloud that lays low on the ground and makes it hard to see.

AltoCumulus
Puffy, white clouds that are in the middle of the sky.

Stratocumulus
Puffy, white clouds that are in the middle of the sky.

Altostratus
Grey, featureless clouds that are in the middle of the sky.

Cumulus
Puffy, white clouds that are in the middle of the sky.

Stratus
Grey, featureless clouds that are in the middle of the sky.

Nimbostratus
Dark, grey clouds that bring steady rain or snow.

Cumulonimbus
Dark, grey clouds that bring heavy rain, lightning, and hail.

Is it a UFO?
A hot air balloon is a large, spherical balloon that is filled with a gas that is lighter than the air. It is used for recreation and for scientific research.

Stay safe
Lightning from clouds can be dangerous because it is electric. It hits the ground and strikes the tallest object it finds. Never use an umbrella during a thunderstorm, and don't go in a swimming pool or near trees either. Stay safe indoors until the storm passes.

Against the Odds

Meet the adventurers who have tried, failed and succeeded against the odds!

- *Alastair Humphreys's Great Adventurers* won the Stanford Travel and Teach Primary Book awards and has sold over 45,000 copies worldwide (as of July 2022)
- Sample contents: , Junko Tabei, Juanita Harrison, Ffyona Campbell, Bernard Moitessier, Goran Kropp, Terry Fox, Matthew Henson, Frank Wild, Joe Simpson, Jack Swigert, Jeanne Baret, Robert Smalls, Zheng He, Emile Leray , Karen Darke, Beth French and Marianne Du Toit.
- Author Alastair Humphreys - National Geographic Adventurer of the Year 2012 - has hand-selected 20 inspiring adventurers and retold their stories in his own words

Against the Odds

JEANNE BARET

Small text describing the story of Jeanne Baret, a French explorer and the first woman to cross the Andes mountains.

INTO THE WILDERNESS
Small text describing her journey through the Andes mountains.

A MAN IN DISGUISE
Small text describing her disguise as a man to cross the mountains.

- a red hat
- a long coat
- a sword
- a bag of supplies
- a map
- a compass
- a telescope
- a telescope
- a telescope
- a telescope

A CLEVER DISGUISE

Small text describing the story of a man in disguise.

A NEW LIFE
Small text describing the man's new life.

Was Robert Smith's legend?
Small text describing the legend of Robert Smith.

JUNKO Tabei

Small text describing the story of Junko Tabei, a Japanese mountaineer.

Small text describing her journey to the summit of Mount Everest.

ROBERT SMALLS

Robert Smalls was born into slavery in 18th-century America, deep in the South. He was desperate for his family to escape to a better life. But the outbreak of the American Civil War seemed certain to end his hopes of freedom and safety.

As a child, Robert Smalls worked as an enslaved cotton picker on a plantation.

When he was 12, he was sent to Charleston as a labourer, working in a hotel and then as a lamplighter.

As a teen, he worked on the docks. He got to know the ships well and became a helmsman, in charge of steering the boat.

At 17, Robert got married and was desperate to buy his family's freedom. But for every \$15 he earned as an enslaved man, he was only allowed to keep a single dollar. This made it impossible to save the \$800 he needed. Robert was trapped, as his people had been for centuries, and he knew that if he wanted to be free, he would need to come up with a spectacular plan.

US CIVIL WAR 1861 - 1865

DREAMS OF FREEDOM
The American Civil War began in 1861, between the Southern States (the Confederacy) who wanted to keep slavery, and the Northern States (the Union) who did not.

In 1861, Robert was forced into service on a transport ship for the Confederate Army called the CSS Planter, delivering ammunition and supplies up and down the coast. The ship was led by Captain Bevela, with two other white officers and a crew of enslaved Black men.

The captain always wore a wide-brimmed straw hat to protect his head from the bright southern sun. This gave Robert the first glimmering of an idea...

Our Time on Earth

This book about animal life cycles is a celebration of creatures big and small.

- **WINNER** of the Association for Science Education Award 2022
- Sample contents: Mayfly; Honey Bee; Monarch Butterfly; Opossum; Etruscan Shrew; Giant Pacific Octopus; Axolotl; Trapdoor Spider; Grizzly Bear; Brandt's Bat; Orangutan; Laysan Albatross; African Elephant; Saltwater Crocodiles; American Lobster; Galapagos Giant Tortoise; Bowhead Whale; Greenland Shark; Immortal Jellyfish
- Consulted by wildlife cameraman and producer Fredi Devas, who has worked on David Attenborough's One Planet: Seven Worlds BBC series.
- Discover creatures who are born within a day of their mothers, or others who stay infantile for almost one hundred years.

Microbe Wars

A fascinating account of the world of microbes, what they are and how humans have tried to defeat them.

- Sample contents: The Black Death; Diseases that Changed the World; Covid 19; Pandemic!; Germ Warfare; Edward Jenner and Vaccination; Your Immune System; How Immunisation Works; How Penicillin Won WWII; Antibiotic Resistance; Our Microbe Friends
- The perfect title to explain Microbes to ages 8-12. In a time when a new disease has changed our world, understanding microbiology is vitally important.
- Written with great energy and humour by former science teacher Gill Arbuthnott.

What a Wonderful World

Explore our planet, meet the Earth Shakers

- Selected for Books for Topics.
- 35 stories from Earth Shakers all around the world, most interviewed by Leisa herself
- Foreword by Lee Durrell MBE, of Durrell Wildlife Conservation Trust
- Written by exciting new children's author, Leisa Stewart-Sharpe, who wrote the BBC's children's book companion to *Blue Planet II*
- Practical tips and handy resources for how to make positive changes, big and small
- Joyously illustrated by fresh talent Lydia Hill
- 8 chapters: Mountains, Rainforests, Temperate Forests, Grasslands, Freshwater, Deserts, Oceans and Ice Worlds

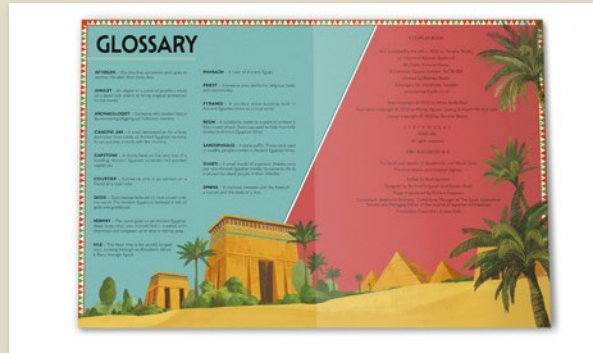

The Incredible Pop-up Mummy

A pop-up guide to Ancient Egyptian mummies

- Incredible paper-engineering - with flaps to lift on every page and three complex multi-layered pop-ups (The Great Pyramid; Tutankhamun's Death Mask; Tutankhamun's Tomb)
- A beautiful non-fiction novelty title to mark the centenary of Howard Carter's opening the tomb of Tutankhamun.
- Made in consultation with expert Egyptologist Stephanie Boonstra, Collections Manager at The Egypt Exploration Society and Managing Editor of the Journal of Egyptian Archaeology.
- Illustrated by award-winning Vietnamese illustration duo Quang and Lien
- Cover finish: gold foil + spot UV

Prehistoric Beasts

Discover Pop-up Prehistoric Animals

- *Prehistoric Pets* (2020) was shortlisted for ASE Book of the Year 2021.
- Features 7 wild animals and their fascinating animal ancestors
- CONTENTS: Dragonfly / *Meganeura* 305-299 mya (before dinosaurs!); Great White Shark / *Megolodon* 16-3.6 mya ago; African elephant / Woolly Mammoth 400,000-4,000 ya; American Alligator / *Deinosuchus* 82-75 mya; Emperor penguin / *Icadytes* 36 mya; Sloth / *Megatherium* 100,000-10,000 ya; Blue whale / *Pakicetus* 50-45 mya
- Dean is a palaeontologist, as well as a science communicator, author of *Dinosaurs of the British Isles* and expert presenter on ITV's *Dinosaur Britain*. He has discovered 6 new species, including a Velociraptor-like dinosaur.
- Fold-out pages reveal pop-up prehistoric animals that 'jump' out of the page

Under the Starlit Sky

A journey from the roots to the canopy of a majestic old oak tree, right in the heart of Europe's most ancient forest.

- The follow up title to the beautiful *Up in the Canopy*
- As told by real life explorer and tree climber, James Aldred (winner of the 2022 Wainwright Prize for Non-Fiction)
- Illustrated by award-winning duo *Good Wives and Warriors*.
- Huge fold-out tree at the back of the book, which readers can pore over.
- Matt lam, fluro pantone and spot UV finishes.

Up (Pixar Modern Classics)

MODERN CLASSICS

Russell confessed that he had never put up a tent before. In fact, he'd never even camped outside before.

"Why didn't you ask your dad how to build a tent?" Carl asked. Russell said that he didn't think his dad wanted to talk about that sort of stuff. Russell realised that he didn't see his father much because he was away for most of the year when he tried to call. Phyllis told him he bothered him too much.

"You call your own mother by her first name?" Carl asked. Russell replied that Phyllis wasn't his mother. "OK," Carl said, looking into the fire.

"But he promised he'd come to my Explorer ceremony to give me my 'Assisting the Elderly' badge," Russell said. "So he can show me about tents then, right?"

Illustration by Amy Poole, in the same way that Carl's sails and tent before. Disney Pixar/Miramax/Disney

PIXAR UP

Before Russell went to sleep, he told Carl that Dig wanted to take Kevin prisoner. Russell said they needed to protect Kevin. Russell asked Carl to promise they wouldn't leave Kevin behind.

"Cross your heart?" Russell asked.

"Cross your heart," Carl agreed.

When Carl woke he saw the balloons were starting to sag.

"We'd better get moving," Carl said, but Kevin was nowhere to be seen. Russell told Dig to feed him. Dig sniffed the ground and pointed to where he thought he'd gone, but then Russell saw that Kevin was on the roof, making a pile of Carl's food. Carl told him to get down. Kevin squeaked and Dig told them she was calling to her babies.

"Kevin is a girl?" Russell said. Kevin called out again.

Dig said Kevin had been gathering food for her babies and needed to get back to them.

"Wait. Kevin's just leaving?" Russell asked as Kevin nudged him goodbye.

Russell needs to learn how to fly. Russell's badge is the badge of an Explorer. Disney Pixar/Miramax/Disney

MODERN CLASSICS

Kevin was badly injured. Once on the other side of the ravine, Russell revealed her with his first aid kit, but blood seeped through the bandage.

"Can't we help her get home?" Russell asked.

"Carl's not here," Carl said, but they had to hurry.

"We'd better get moving," Carl said, but Kevin was nowhere to be seen. Russell told Dig to feed him. Dig sniffed the ground and pointed to where he thought he'd gone, but then Russell saw that Kevin was on the roof, making a pile of Carl's food. Carl told him to get down. Kevin squeaked and Dig told them she was calling to her babies.

"Kevin is a girl?" Russell said. Kevin called out again.

Dig said Kevin had been gathering food for her babies and needed to get back to them.

PIXAR UP

Kevin lay on the porch as Carl and Russell towed the house. Russell called up to check that the was okay, but Kevin was too weak to answer.

Russell told Carl that the wilderness was wilder than he expected it to be from his manual.

"My dad made it sound so easy," Russell said. His father was a great camper and used to come to all his Explorer meetings. Afterwards they would get ice cream and sit on the lawn savoring differently coloured sun.

"That might sound boring," Russell said. "But I think the boring stuff is the stuff I remember the most," Carl knew just what he meant.

In the distance, the baby birds called for their mother, and Kevin lifted her head to answer.

"There's a!" Russell cried, seeing the entrance to the labyrinth that Murtz had described.

Carl secured the house to a tree as Russell helped Kevin get down from the porch. Ignored by being so close to home, Kevin ran towards the labyrinth.

Kevin is a girl. Disney Pixar/Miramax/Disney

- 48 -

MODERN CLASSICS

Murtz was trying to locate Carl and the bird when the house floated by. Russell's face squinted as he was dragged across the glass of the cockpit.

"Grey leader, take down the house," Murtz shouted into the radio.

Three biplanes, piloted by dogs, zoomed out of the airship headed for the house.

"Target sighted," Beta said, and fired poison darts at Russell.

...

Carl led Kevin and Dig through the airship as Murtz hid behind a door to his museum with a sword. When they entered, Murtz raised his sword to strike, but Dig bit him hard on the leg. Murtz kicked Dig out of the door.

Dig managed to get back inside, but saw that the hallway was filled with traps. Dig ran.

Carl saw Murtz's sword with his cane. Murtz swung and buried his sword in the body of a skeleton. As Murtz tried to wrench it free, Carl hit him over the head, but the cane bounced and hit him too. Both men groaned.

"Any last words, Friedrich?" Murtz sneered, his sword at Carl's throat. "Come on, spit it out."

Carl spat his false teeth hard into the explorer's face. Murtz fell to the ground. Carl picked up his teeth and ran. Murtz swung wildly with his sword and fell he was taking the bird back with him, dead or alive.

In the cockpit, cornered by Murtz's hounds, Dig backed onto a lever. The airship lurched, sending Murtz and Carl tumbling off their feet. Carl fell against a window and saw that Russell was in danger.

The winged man was unable to keep the dog's check as they brought enough force to the bird to catch up to him. Disney Pixar/Miramax/Disney

- 58 -

MODERN CLASSICS

People stared as Carl's house floated above the city. Inside, Carl looked at his map and compass, and then released a pair of fabric sails out of the windows. As he steered, the weathervane on the roof of his house pointed south – to Paradise Falls.

"We're on our way, Ellie," Carl said. He kissed the picture of Ellie hanging on the wall and then gave the strings holding the balloons to the grate a twang. Carl settled in his chair for a nap, when he heard a knock at the door. He opened the door to find Russell, the Wilderness Explorer, clinging to the side of his house.

PIXAR UP

"What are you doing out here, kid?" Carl yelled.

Russell told Carl that he had followed the snipe, which looked a lot like a mouse, under Carl's porch. Suddenly a gust of wind blew a flag off Russell's jacket.

"Please let me in," Russell pleaded as he watched it fall.

Carl said no and slammed the door, leaving Russell alone and scared. But as grumpy as Carl was, he was not cruel. After a moment's thought, he opened the door and Russell rushed inside. When Russell calmed down, he dropped his backpack and began to explore Carl and Ellie's house.

Carl's house is a silent actor and needed to be emotionally moving as well as to physically move. DOMINIQUE LOUIS / PASTEL

- Features a foreword by Lucasfilm Art Director Troy Alders

A New Hope (Star Wars Cinematic Classics)

CINEMATIC CLASSICS

C-3PO wandered away, complaining bitterly. He passed the giant skeleton of a knight dragon that lay bleached on the sand. Then he spotted something on the distance.

"A transport," he said excitedly, waving his metal arms in the air. "I've saved! Clear here, they may 'Please help!"

Meanwhile, R2-D2 had reached the dark hills. The little astromech whirled softly as he trundled through a stormy rain. Luke did not know that he was being watched. Behind the rocks, hooded creatures known as Jawas whispered to one another. Their yellow eyes glowed as the droid passed by.

Then one of the Jawas sprang up in front of Artoo and fired an ion blaster. The blue energy bolt struck the droid, knocking him off his feet.

Concept art of C-3PO and R2-D2 on the planet of Tatooine after landing on the escape pod. **Ralph McQuarrie**

EPISODE IV: A NEW HOPE

The Jawa gestured eagerly. "Ubini!" he cried, and the others crowded round, lifting Artoo. They carried him through the rain to their gigantic sandcrawler, where they fitted the little droid with a restraining bolt to prevent him from escaping. Then a large air-pipe stalked down from the sandcrawler and sucked Artoo inside.

Artoo was dumped into a large chamber filled with strange droids. They came in all shapes and sizes, from boxy power droids also known as gaud droids, to machines built for moisture farming, mining and security. Then a pair of glowing eyes spotted Artoo.

Concept art of Jawas droids surrounding R2-D2 and returning to their sandcrawler. **Ben Burtt**

CINEMATIC CLASSICS

"Destroyed," he told the others. "By the Empire."

Luke couldn't believe that such a thing was possible, but there was no time to discuss it. A ship had appeared on their scopes: a small Imperial TIE fighter. It blasted the Falcon, then it strafed away.

"It's heading for that small moon," Luke pointed.

"That's no moon," Obi-Wan told him. "It's a space station. I Han Solo tried to turn the Falcon around, but it was too late. They were caught in an invisible tractor beam, pulling them deadily closer to the Death Star."

"Send a scanning crew aboard," Vader ordered. I want every part of this

On the battle station, Grand Moff Tarkin received a report that a ship had been captured. "They must be trying to return the stolen plans to the Princess. She may yet be of some use to us," Darth Vader said, and went to investigate.

But when his men searched the ship, they found no sign of anyone on board. "According to the log, the crew abandoned ship right after take-off," the commander reported. "It must be a decoy. Several of the escape pods have been positioned."

"Send a scanning crew aboard," Vader ordered. I want every part of this

Concept art for the Death Star showing the docking bay where the Falcon has landed. **Ben Burtt**

CINEMATIC CLASSICS

Obi-Wan Kenobi slipped through the corridors of the Death Star, drawing closer to the Millennium Falcon. But before he could reach it, he came face to face with an old acquaintance. Darth Vader stood blocking his path, a red lightsaber humming in his hand.

"I've been waiting for you, Obi-Wan," the Dark Lord boomed. "We meet again at last. The circle is now complete. When I left you, I was but the learner. Now I am the master."

Concept art for Obi-Wan Kenobi. **Ben Burtt**

EPISODE IV: A NEW HOPE

"Only a master of evil, Darth," Obi-Wan replied.

Vader strode forward, raising his blade. Obi-Wan took a step back and ignited his saber. Vader swung and the two swords clashed together, filling the hallway with light and noise. "Your powers are weak, old man," he said.

Obi-Wan moved nimbly, countering blow after blow. "You can't win, Darth," he said in former apprentice. "If you strike me down, I will become more powerful than you can possibly imagine."

"You should not have come back," Vader replied, lunging at Obi-Wan, but the old Jedi was too quick.

Spotting the duel from across the hangar, the stormtroopers guarding the Millennium Falcon pushed away, turning to the aid of their master.

Concept art for Obi-Wan Kenobi. **Ben Burtt**

Luke, Leia, Han and Chewbacca had made it back to the hangar, where Artoo and Threepio joined them. With the guards distracted, Luke saw his mentor locked in combat with the monstrous Darth Vader.

CINEMATIC CLASSICS

In the Death Star's control room, an aide approached Grand Moff Tarkin, offering to ready his ship in case the Rebels were successful. "Evacuate?" Tarkin asked disbelievingly. "In our moment of triumph? I think you overestimate their chances." He was sure that this ragtag army posed no threat to his battle station.

Meanwhile, Red Leader had guided another group of fighters into the trench. Vader was right behind them, taking out first one, then two of Red Leader's wingmen. But the Dark Lord was too late. Red Leader was in

Concept art for the Death Star trench run. **Ralph McQuarrie**

EPISODE IV: A NEW HOPE

range. He fired, and his torpedoes streaked towards the target.

The shot was no good. The torpedoes missed, exploding on the surface of the Death Star. And as Red Leader turned to flee, Darth Vader's TIE fighter swooped in. Red Leader's X-wing slammed into the battle station and burst into flame.

Luke saw the ship explode and knew that time was running out. Flanked by Biggs and Wedge, he flew at full speed into the trench. But Darth Vader's fighter was right behind them and closing fast.

The Dark Lord fired, scoring a hit on Wedge's engine. "I'm hit!" Wedge cried, peeling off. Vader ignored him, keeping his focus on Luke and Biggs. They swooped from side to side, trying desperately to evade the Dark Lord's fire.

It was no good. Biggs's ship was hit, and Luke watched as his best friend's ship exploded into shards of flame. There was no time to grieve. He knew that he was the Rebels' last hope for victory.

Luke switched on his targeting computer and prepared to fire his torpedoes. As he struggled to lock on to the target, Ben Kenobi's ghostly voice spoke to him once more. "Use the Force, Luke," the old Jedi told him. "Let go. Luke, trust me."

Luke deactivated his computer. He was determined to trust his instincts.
