Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Bessie's Bees

An uplifting story about starting nursery with a courageous neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list, allowing us to grow our range of underrepresented voices and experiences.
- While there has been an increase in positive representations and neurodiverse voices in middle-grade fiction, this is yet to be seen in the trade picture book market. Templar can be one of the first to champion neurodiverse voices and stories in this space.

A hilarious rhyming romp that perfectly encapsulates how being HANGRY really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

Yetis Don't Exist!

A FUR-tastically funny rhyming adventure!

- Bringing rising talent, Kate Thompson, to the Templar list. She has two picture books with Welbeck and two new picture books coming with PRH in September 2024, and 2025.
- Bringing established quirky, commercial illustrator Loretta Schauer to the list with her bright palette and fantastic furry creatures. Loretta has previously worked with publishers like Ladybird, Farshore and Bloomsbury.
- Like *The Best Bear Tracker*, this book has a hilarious visual narrative alongside the text with the yetis and human explorer just missing each other more than once!
- The book's wintry, snowy setting offers the ideal seasonal gift without the story being explicitly Christmassy!
- Cover treatments: matt lam and foil.

Tiffany & Co.: The Story Behind the Style

The King of Diamonds: Charles Lewis Tiffany

Charles Lewis Tiffany, the man who would go on to win the moniker of New York's 'King of Diamonds', did not lead from a long line of jewellers. His start in life was more modest, making his name in high society all the more glittering.

Tiffany was born in 1812 in Canton and Ohio. Tiffany, and grew up in the small town of Killbuck, Connecticut. The major business of the town was the production of cotton goods, and the family owned a manufacturing company. Tiffany was educated at local schools in the area before joining his father in the family cotton business.

By 1837, Tiffany felt restless. No longer satisfied by working at home with his family, he began to envision how he could make his own mark in business. He turned up with a school friend, J. R. Young, and the duo set in motion a plan to open a stationary store in New York City. With a \$1,000 loan from Charles' father, the ambitious 25-year-old made the 150-mile journey north. The store, named Tiffany & Young, opened its doors at 259 Broadway that same year, and on its first day, \$4.98 rang through the till.

Tiffany & Young soon began to expand its remit, stocking glassware, cutlery, porcelain, clocks and jewellery, and began to develop a

PROPOSAL: An illustration of a jewelry display case, likely from the Tiffany & Co. collection.

CONCEPT: A sketch of the Tiffany & Co. store at the Esplanade in Paris in 1865.

In 1853, Young and Ellis decided to retire from the business, but Charles Lewis Tiffany was far from finished. He found new partners to work with, and the business was, at this point, renamed Tiffany & Company. Tiffany would go on to build his empire, grabbing headlines along the way. By the 1860s, the business was well established as an expert in choice for the rich and the famous, both for its jewellery and its top-quality silver. In 1862, President Abraham Lincoln purchased a set of pearl necklaces and earrings from Tiffany & Co. for his wife Mary Todd Lincoln, who wore them to her husband's inauguration ball.

In 1870, Tiffany & Co. moved into a large new store in New York's Union Square, marking the beginning of a major decade for the jeweller one in which Charles Lewis Tiffany would earn the title the King of Diamonds. It was a single purchase that would truly justify Tiffany into the high-jewellery atmosphere – a 237-carat rough fancy yellow diamond. When cut and polished, what emerged was a diamond of staggering enormous proportions for a rare yellow diamond of that quality. It weighed 128.54ct and was named the Tiffany Diamond.

If the purchase of this new world famous stone, which is on permanent display at Tiffany & Co.'s Fifth Avenue store in New York, signalled Tiffany's intention to dominate the diamond market, his groundbreaking invention eight years later sealed the deal. Seeking to

celebrate the beauty of diamonds, Tiffany designed an engagement ring in 1886 that remains a sought-after classic to this day. The Tiffany Setting engagement ring kicked back against the over-fussy designs of the time with a clean, minimalist band and a six-prong setting that lifted the diamond above the ring. The purpose for this innovative setting was to allow light to flow through the stone, and therefore maximise the sparkle. It was a huge hit, and the iconic design has become synonymous with engagement rings.

Just 15 years before his death, Tiffany pulled off a final coup. The aftermath of the French Revolution that had gifted Tiffany an abundance of important gems in 1848 and its early credibility in high-jewellery circles rumbled on. In 1887, the French government was masterminding a plan to sell the crown jewels of its fallen monarchy. Outwardly, it claimed that a democracy such as France had no need for "objects of luxury, devoid of usefulness and moral worth". The rumour mill suggested that it was in fact afraid of a power grab by Bourbons, Orleanists or Bonapartists, who might use ownership of the jewels to claim a right to rule. Tiffany cared little for this political posturing, but he did see an opportunity in it. He travelled to Paris to attend the auction of the French crown jewels at the Louvre. He sat in the audience, ready to make his bids, along with fellow jewellers, including a young Frédéric Boucheron, and Orleanists, members of the French royal family, whose pockets proved too shallow on the day to win back their family heirlooms.

When the final strike of the gavel fell, Charles Lewis Tiffany had in his possession close to a third of the historic crown jewels. He placed them in specially crafted red-leather boxes, embossed in gold with the words *Diamants de la Couronne*, translating from French as Crown Diamonds. Inside, impressed on the silk lining in the lid, was Tiffany & Co. New York and Paris, thus securing Tiffany & Co.'s place in the history books as a purveyor of royal jewels and his own coronation as the King of Diamonds.

Cartier: The Story Behind the Style

The Beginnings of Cartier

The house of Cartier started with one man, Louis-François Cartier, but it would take a family to make it one of the most recognised and respected jewellers in history.

It was, in fact, Louis-François' father, Pierre Cartier, who set the dynasty in motion, although he could never have imagined the consequences of his actions at the time. Pierre had fought in the Napoleonic wars and spent time locked in the prison ships docked off the harbour at Portsmouth in Britain. When the war ended in 1815, Pierre returned to Paris, destitute and aimless. He would go on to find employment as a watchmaker and have five children with his wife Elisabeth, a washerwoman.

The eldest of the children born into this working-class Parisian family was Louis-François, and when he was barely out of school, his father sent him to work as an apprentice in a jewellery workshop owned by Adolphe Picard on Rue Montorgueil in Paris. It was a tough education – days were long and grueling and order was maintained with a whip – but he stayed and in 1847, at the age of 27, Louis-François bought the business from Picard, renaming it Cartier.

OPPOSITE: Cartier founder, Louis-François Cartier.

His makers mark – a symbol hallmarked into every piece of Cartier jewellery to authenticate it – was his initials, L.C., separated with an arc of letters playing cool, perhaps to a nod to the financial gamble he was taking. Luckily, the risk paid off and the Cartier business thrived and expanded. In 1896, Princess Mathilde, a cousin of Emperor Napoleon III, purchased one of its jewels, and the Cartier name was suddenly whispered among Parisian high society, even reaching the international elite. Three years later, Louis-François bought Gillon, a Parisian jeweller better known than his own, and renamed his business Cartier Gillon.

OPPOSITE LEFT: An illustration of Louis-François Cartier c.1848.

OPPOSITE RIGHT: Pierre Cartier playing golf in 1890.

Cartier garnered a reputation for innovation, and the title of jeweller would later live by a motto, 'Never copy, only create.' One of Louis' most successful experiments at the close of the 19th century was to use platinum in place of gold. This precious metal is now widely used by jewellers across the world, but at the time it was purely an industrial metal and thus revolutionary in the jewellery market. The white metal, which, unlike silver, does not tarnish, is highly malleable and allowed Cartier to create delicate, diamond-set jewels inspired by those owned by 18th-century French aristocrats, a stark contrast to the heavier, colourful, Romantic Art Nouveau jewels popular at the time. A signature Cartier Garsfield style emerged, swirling across platinum chains, necklaces and earrings, that won over well-heeled women, including royals, in Europe and the United States.

Louis-François' son Alfred Cartier took over the family business in 1874, but it was the arrival of his own three sons – the highly ambitious Louis, Pierre and Jacques – that would really shake up the jeweller and initiate its ascendancy to the global brand we know today. The brotherly revolution started with Louis, who joined the maison in 1898. A year later he spearheaded the renaming

Pierre Cartier, the second eldest of the brothers, would be an agitator in his own right, championing the global expansion of the brand's retail empire. He started by opening a Cartier boutique on New Burlington Street in London in 1902, where the brand showcased a new style of geometric, abstract jewels with unusual colour combinations that would lay the foundations for the Art Deco jewellery movement.

The first decade of the 20th century was an important time for Cartier. In 1904, the jeweller received its first royal certificate from King Edward VII of Britain, and soon started to supply many other royal courts including those of Russia, Spain and Siam (now Thailand). In the same year, Louis Cartier created what he believed to be the first ever men's wristwatch for aviator Alberto Santos-Dumont.

Pierre, meanwhile, embarked on a journey to Russia; one that would prove profitable in commissions from its high society, but also as a source of inspiration that would shape Cartier's jewellery designs for years to come.

In 1909, Pierre would focus his wanderlust on America, opening a Cartier boutique on New York's Fifth Avenue; the precursor to its famous flagship store further up the street, the purchase of which he would famously broker a decade later in exchange for a string of pearls. Back in London, his younger brother Jacques stepped in to take over its British branch. That same year, Cartier moved uptown to a prestigious Bond Street address, where it remains to this day.

As Cartier's man in Britain, and, as such, jeweller to King George V, Jacques joined members of the aristocracy on a trip to India for the Delhi Durbar in 1911. It was an event

to commemorate the coronation of the King, with two weeks of festivities, during which King George V and Queen Mary would be proclaimed Emperor and Empress of India. This adventure to a new land would also prove to be a seminal trip for the house of Cartier. Jacques' sociable nature and love of travel would win ground-breaking commissions from India's rich, jewel-loving maharajas and inspire a whole new category of jewellery, pioneered by Cartier and much copied by other companies.

Vivienne Isabel Swire was born on April 8 1941 to Gordon and Dora Swire at the Partington Maternity Home, Glossop. The future fashion revolutionary had one sister, Olga Swire, born 1945, and one brother, Gordon Swire, born 1946. She grew up in the parish of Tintwistle, Derbyshire (which was formerly part of Cheshire until 1974), both during and after World War II, enjoying what has been recounted as a fairly idyllic childhood, living at the semi-constructed Millbrook Cottage and playing outside until late.

The young Swire clan were encouraged to be creative and make things more than they were encouraged to read. Vivienne knew from a young age that she was good at making things, notably models at school, and she especially enjoyed sewing classes. Her mother would often make them clothes, and worked as a weaver in a local cotton factory.

The young Vivienne – who remembers having a passion for sport from an early age – attended Hollingworth and Tintwistle Primary Schools from 1946 to 1952, at which point she passed the scholarship exam for Glossop Grammar School. She continued to be good at art during her time at Glossop Grammar, and considered attending art school.

Among Westwood's most formative fashion memories are the make-do-and-mend philosophy that came to define

Britain in austerity, as well as the coronation of Queen Elizabeth II in 1953, when Vivienne was 12 years old. The influence of these two events can be seen throughout every era of her designs, and the make-do-and-mend philosophy is evident in the motto "Buy Less. Choose Well. Make it Last", which the brand still promotes to this day. She expertly blended the elements of customisation, tradition and austerity together to create her own unique brand, which is now contrasted by her husband Andreas Konevskis.

Malcolm McLaren

Westwood met Malcolm McLaren in 1965. An art student and a friend of her younger brother, Gordon, he would go on to become her creative collaborator for almost the next 20 years. Malcolm is an enigma with the punk movement as Vivienne, and their partnership is legendary. He was something of a maverick of marketing stunts and disruption, before such things became commonplace in contemporary fashion. The pair were in a relationship for a time but never seem to have married.

Malcolm was interested in politics and was fascinated by the French Situationists, a creative culture of writers and artists who wished to eradicate capitalism through acts of everyday life. He was a driving force in bringing politics, provocations, society and culture into Westwood's world. She found him to be charismatic and knowledgeable, but also full of contradictions.

In 1967, they had a son, Joseph Ferdinand Cecil, who would go on to follow in his parents' footsteps and enter the world of fashion. He founded the very successful lingerie company, Agent Provocateur.

It was in the early 1970s that McLaren and Westwood began to build their empire. Malcolm, by this point, had left art school and Vivienne was about to quit teaching. The plan had been to sell vintage records together, and there was talk of setting up a stall. But a retail opportunity – via a new

friend – on King's Road was about to arise.

Tommy Roberts, of the legendary Mr Freedom fashion business, took over the lease of 430 King's Road in 1969. He and his business partner, the fashion entrepreneur Trevor Miller, were well-known for their eclectic and daring fashion eye which appealed to the glitzier of the 1960s. It was under Miller's control the shop was renamed Paradise Garage, the spot was already well-known for fashion.

Vivienne and Malcolm, who were regulars on King's Road, ended up leasing the back of 430 King's Road, before taking the whole thing over and rebranding it. It would be known over the coming years as Let It Be Rock, Too Fast To Live, Too Young To Die and Sex and Sublimation, all of which would encompass the raucous, confrontational and non-conformist nature of McLaren and Westwood. Eventually the shop would come to define the varied-but-defined style we know as punk today.

A Revolutionary is Born

There are few British designers, or brands, that have made quite as much of an impact on the fashion landscape as Vivienne Westwood. A fashion designer of both cult and commercial success (which is a rare combination), she was a punk and a pioneer, a rebel and a provocateur, an activist and a change-maker.

Over the course of a career that spanned half a century, Dame Vivienne Westwood would become synonymous with the British punk scene. Punk is what immediately springs to mind for most when her name is mentioned, along with the King's Road, corsets, platforms, tartan, crinolines, pirate boots, sustainability and climate change awareness. The list goes on. Her shows and interviews have become legendary – she is famous for using fashion as a platform to speak out on the issues she cared most about.

There is no doubt that Westwood's affinity for fashion history has helped her designs stand out. They are often historically informed, yet never to the point that they look odd. Where something shouldn't work, it always did, thanks to Vivienne's ability to balance the old with the modern – she was a genius when it came to style mashups. And the original Vivienne Westwood aesthetic rooted in a DIY approach never fully went away. Her designs feel intrinsically British and perfectly eccentric.

Westwood was the original multi-hyphenate and, in many ways, light years ahead of her time. She has inspired generations of designers that came after her, whether established and successful or aspiring and eager. Fashion critics even noted whiffs of her spirit at the London Fashion Week collections of autumn/winter 2023, which took place in February 2023, after her death. It's no wonder that her name is up there with the likes of Yves Saint Laurent, Christian Lacroix and the late great Karl Lagerfeld.

Rolex: The Story Behind the Style

The World's Most Famous Watch Brand

Rolex has become shorthand for luxury. There is no watch you can strap on to your wrist that will be recognised for the status symbol it is quicker than a Rolex. And for many, this is the appeal.

Yet there was a time when the name Rolex – a word completely made up by the brand's founder Hans Wilsdorf – was not famous. It would take hard work, boundary pushing and a lot of self-belief on the part of Wilsdorf, a German orphan, to jettison the name into the upper echelons of horology; starting with convincing the pocket watch-wearing gentleman of the early 20th century that they wanted to wear the time on their wrist at all.

As you will discover, Rolex won its place in history by constantly questioning what was possible and innovating at all costs. It pioneered so many elements of watchmaking and design that are standard today, such as waterproof watches, placing a date window on the dial, and even removing the need to wind our watches.

It also found its way into some of the most exciting moments in history by placing Rolex watches on the wrists of adventurers and explorers. Its watches have travelled to the world's highest peaks and to the depths of the ocean; they have survived extremes of temperature, speed and pressure.

The story of Rolex is so much more than that of its watches. It is one of epic ambition and vision. What started out as a one-man band in London's Hatton Garden would become the epicentre of the Swiss watchmaking industry, and one of the most recognisable and coveted brands in the world.

Street Style: Dr. Martens

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

the upper and repurposed tyre rubbers to create an air-padded sole. The resulting shoe is equal parts built to last and equal parts built to live in. It's no wonder that punk rockers and hip-hop artists alike have graced thousands of stages in a pair of Dr. Martens over the years - it's a shoe made for those who live out loud. The story of how a purpose-driven product came to define one of today's most exciting lifestyle brands is one that spans a growing connection between clothing and culture. When you combine a timeless product with a chameleon-like ability to mean different things to different people, you get a shoe that is undeniably trend-proof.

ABOVE: A classic pair of Dr. Martens 1460 boots, broken in with wear.

NOT FINAL

Who Was Dr. Martens?

Dr. Martens may not be a real person, but Dr. Klaus Maertens certainly was. The brand as we know it today begins with him. A doctor in the German Army, he fended himself in post-war Munich at the age of 25, nursing a broken foot. The year was 1945, World War II had just ended. He did not break his foot during his time in the service however, this injury was one he earned from an unfortunate skiing accident.

As he was recovering from his injury, he found that the standard issue, leather-soled Schindlerboots (boots that had been part of the German Army uniform since 1937) actually hurt his foot more than helped them. Skinning and footwear styles were undergoing a similar shift. It had been a little more than a century since the Industrial Revolution had commercialised the footwear industry, allowing for mass production for a craft that was once exclusively handmade. Concurrently, styles were being made when it came to what was happening in the world of valenced soles.

American chemist Charles Goodyear discovered that heating up rubber and adding sulphur made it even more flexible. The vulcanised process had many industrial applications, but it also made it much easier to make durable, rubber-soled shoes. Yet while canvas pinnacles and burgeoning sneaker companies like Converse explicitly were meant for athletic pursuits, Maertens saw an opportunity in making a shoe that had the classic, down-up appeal of a military boot, combined with the comfort and orthopedic benefits of a rubber sole.

OPPOSITE: Dr. Klaus Maertens, creator of the original Dr. Martens boot.

NOT FINAL

The first prototype of what would become the Dr. Martens 1460 leather boot took design elements from the German Schindlerboots and set it on top of a unique, air-cushioned sole originally made from heat-sealed repurposed tyre rubber. He made his proof of concept using a salvaged cobbler's last and a needle, but it would still take a couple of years before his head-on shoe business got any proverbial legs behind it.

OPPOSITE: Standard issue German army field boots from World War II that were used to inspire Dr. Martens shoes.

The Wild Verses

Safely In Numbers

Why meet trouble halfway
when you can run
to greet it, offer it
the best part of the day?
Watch them surge
towards their problems:
this band of rebels
tackling life head-on
moving, always moving
as one.

The Bull

Today, you want
to stomp outside and face
the day bull-strong.
Stand firm
and uncertainties
cannot make you stop.
Stay proud. Zip up
your audaciousness
right to the top.

The Painter

If I could paint the world
I'd choose endearment, which is yellow:
honey for the tawny nose,
bee-colours for getting things done,
lemons for sharpness, pure gold
for every star that shines in darkness.

Unfurl

Sometimes you want to hide
your crimson, teal and green.
Sometimes you fold.

It's time to catch the light. Be bold.
You open the fan of yourself
and you brim with gold.

Aldabra Giant Tortoise

It was the monster from deep in forests, like the Hare and the Tortoise who gave us the phrase 'slow and steady wins the race'. It couldn't be true for this monster, especially when put into context. Tortoises have been gently plodding around the planet for 200 million years.

When you imagine a tortoise, you probably think of the Aldabra Giant Tortoise, based on a small island in the Seychelles, but recently recognized as a subspecies of the Galapagos tortoise. It was once called the Aldabra tortoise, but now it's the Aldabra Giant Tortoise. It's a large tortoise, with a shell that can reach up to 1.5m in length and weigh up to 250kg. It's a slow-moving creature, but it's also a powerful one. It can move its head and front legs up to 1.5m in length and weigh up to 250kg. It's a slow-moving creature, but it's also a powerful one. It can move its head and front legs up to 1.5m in length and weigh up to 250kg.

American Bison

The formidable American bison, the largest mammal in North America today, rarely illustrates an often told tragic story of human bringing an animal to the brink of extinction. By definition, this also brings enormous damage to an ecosystem.

The bison is a remarkable beast. Sometimes referred to as the bison, it is a large mammal that has been hunted for centuries. It is a slow-moving creature, but it is also a powerful one. It can move its head and front legs up to 1.5m in length and weigh up to 250kg. It's a slow-moving creature, but it's also a powerful one. It can move its head and front legs up to 1.5m in length and weigh up to 250kg.

But not every species has managed to live in harmony with man. During the nineteenth century, European settlers brought more than 12 million bison to the United States. In 1872, the American bison was declared a national monument. It was a slow-moving creature, but it was also a powerful one. It can move its head and front legs up to 1.5m in length and weigh up to 250kg.

Andean Condor

The breathtaking Andean condor has to be one of the most spectacular and impressive birds on Earth.

With a wingspan of over 3 meters and an impressive beak, the Andean condor is a large bird that has been hunted for centuries. It is a slow-moving creature, but it is also a powerful one. Daubentonia madagascariensis

Aye-Aye

The elusive aye-aye is a marvel of nature. Nocturnal, solitary and living almost its entire life within the canopy of the Madagascan rainforests, it has developed some marvellous adaptations to help it locate its food and live life in the dark.

Huge forward-facing orange eyes allow this little lemur to see, while its enormous bat-like ears have evolved to be extraordinarily sensitive, containing a complex set of ridges and grooves which help detect the tiny sounds coming from the creatures it feeds on. This is an adaptation shared with other animals that listen for their food, such as the spotted bat (see page 84).

Yet the aye-aye's most well-known feature – and perhaps its most useful – is its elongated middle finger. To find its prey (mostly grubs and small insects), the aye-aye uses this special digit to rapidly tap along the branch, like a woodpecker, listening with its huge ears for the sound of a grub moving beneath the bark. This technique is called percussive foraging. Once the aye-aye has located a tasty grub, it uses its strong incisors to bite and chew its way through the wood to reveal the tunnel the grub has made. Here, its incredible finger is used again. Long and bony, it is slender enough to fit within the narrow tunnels, and its sharp claw is perfect for hooking out and retrieving the unsuspecting grub. Additionally, this spindly finger comes in handy for scooping out pulp from the tasty fruits it also eats.

Due to the rapid destruction of its habitat in Madagascar, the aye-aye is now critically endangered. Worst still, these mysterious creatures are often considered bad omens by the Malagasy. According to local legend, aye-ayes signify bad luck or death. Unfortunately, this means these animals are often killed on sight.

Successful captive breeding programmes could turn round the fate of this animal, but careful conservation of its natural habitat and a 'rebranding' of the aye-aye among the local community is essential if this unique creature is to survive.

ANCIENT VESSELS

Before the invention of the internal combustion engine in the late 19th century CE, the fastest and most reliable way to both travel and transport cargo was not over land, but by water. For at least 10,000 years humans have used boats on lakes and rivers, and later, after the invention of sail- and sail-powered ships, on the oceans too. This advance opened up a new world of exploration, trade and conflict.

Polynesian voyaging canoes were used here around 3,000 years ago by Southeast Asian explorers during their epic voyages of discovery into the Pacific. That two wooden hulls, lashed together with rope and bamboo, provided a stable platform even in heavy seas, and their sharp hulls sliced easily through the water. This design is as effective it's still used today.

Used by the ancient Greeks from at least 900 BCE, *pentecostans* (meaning "fifty-oared") were a type of galley – a long wooden vessel powered by rowers and, when the wind was favourable, a single large sail. *Pentecostans* were fast and highly manoeuvrable. They could carry large, transport soldiers, fight other vessels or carry out raids on coastal towns and villages.

Troians were swift, manoeuvrable and powerful weapons used extensively by the ancient Persians, Phoenicians, Greeks and Romans during the last century BCE. Rumours set in three levels below the top deck of a Trojan meant 'three rows' in Greek, about whom were others to shoot at enemy vessels, and soldiers to jump ashore when they got close enough. But a Trojan's most powerful weapon was the bronze ram fixed to the prow - capable of spinning tenons and puncturing hulls.

The ancient Phoenicians, who lived in what is now Lebanon, were masters of the sea. They were the first people to navigate the Mediterranean. Phoenician sailors used "galley" or "row-ships." These ships had side hulls to carry plenty of cargo, and were often decorated with carved/turned hulls.

- EXTRAORDINARY VESSELS -
DRAGONSHIPS

During the early Middle Ages, few sights were as terrifying as a dragonship bearing swiftly down onto a beach: the fantastically curved figurehead looming through the sea mist; vast, rhythmically rising and dipping a blood-red sail lit with wind – and an eager crew, fully armed and ready to raid, steal and capture slaves.

most of cars, instead of benches, rows set on wooden stands which also held their personal belongings while passengers and food were stashed under the deck. Although immensely strong, dragage was light enough for the crew to drag their service by hand.

Life onboard dragonships was challenging. Vikings often had to use big horses or heavy seas. Dragonships could not be used, and there was no shelter from the wind, rain or sun. All this handling was exhausting, but it gave the men strength and stamina - useful attributes when it came time to fight. Many historians believe it was a Viking called Leif Erikson who was the first European to cross the Atlantic and set foot on continental North America. This gives just how remarkable the Vikings and their dragonships really were.

MEDIEVAL VESSELS

Although ancient vessels (see pages 8–9) were still used throughout the Medieval period 500–1500 CE, advances in technology allowed naval architects to design bigger, better and more durable ships. These vessels could travel faster and carry out cargo, allowing for more profitable trade between distant nations. European explorers sailed venture into the open ocean to discover new places, opening trade routes and expanding empires – often at the expense of the indigenous people living there.

Used widely in the seas of Northern Europe, ogo were sturdy and reliable cargo vessels, capable of carrying much more than the smaller boat. Powered by a single square sail and steered with a rudder, ogo were more maneuverable than their bulky ships made them appear, and they could negotiate the open sea as well as traverse wide rivers to reach inland ports.

Klax's men a type of longboat used by the Vikings for trade, transport and exploration. Like the drakingship, it was self-propelled, but the hull was taller and wider to allow more cargo to be loaded. Trade items included wool, timber, wine and furs, which were transported to our Northern Europe, Mediterranean, and Norse settlements in Iceland and Greenland.

Galleys were used wherever it proved tiresome and remained popular in the Medieval period, especially with the great Mediterranean powers of the Venetian republic, and the Byzantine and Ottoman Empires. Armed galleys were favoured by pirates, who set out from their bases on the North African coast to attack ships and raid coastal villages.

Swift, versatile, capable of soaring, veering and swooping shallow coastlines, coves and rivers, canals were the perfect place for trading, exploring and fighting. Powered by either square or lateen sails, lateen-rigged boats and armed with cannons, these versatile vessels were widely used, especially by European nations.

- EXTRAORDINARY VESSELS -
MARY ROSE

On the 19th July, 1545 England faced an invasion. Francis I, King of France, had assembled an armada of around 200 vessels – sailing ships and oared galleys – and sent it across the narrow English Channel to offload a French army of 30,000 men on the south coast. England's King Henry VIII's far smaller fleet of around 80 vessels, would need to prevent the armada from landing. As evening fell, and taking advantage of a fresh rising breeze, the English sailed out to meet their enemy. At the head, pennants fluttering and bristling with around 70 guns, sped the mighty 600 ton carrack warship *Mary Rose*, pride of the fleet and King Henry's favourite vessel.

Smoke and flame erupted along the Mary Rose's larboard side as its cannons fired at the approaching French ships; to the thousands of people watching from the cliffs, the noise would have sounded like thunder. Then,

to bring its portside guns into the action: to bear as the others were reloaded, the grand old ship began to turn about...and at that crucial moment a gust of wind hit its sails, causing it to list... Water poured in through the still-open gunports, flooding the lower decks.

Realizing their ship was doomed, the sailors and soldiers scrambled to reach the open weather deck and leap overboard...only to be trapped by the anti-boarding netting strung over it. Seawater foamed around them, rising higher and higher... From his vantage point on Southsea Castle, King Henry himself watched the *Mary Rose* capsize and disappear beneath the waves. Of the around 400 men onboard, only 35 escaped with their lives.

STEAM AND ELECTRIC AUTOMOBILES

Since their invention in the early 1800s, steam locomotives revolutionised the way people and freight were transported. However, some travellers wanted a more convenient vehicle that they didn't have to share and could use whenever they wanted. Some engineers created small, steam-powered road vehicles, while others decided to try electric battery automobiles. Many designs were created, but by the early 20th century it was clear that the internal combustion engine was going to be king of the road.

The first steam-powered road vehicle was designed by English inventor Richard Trevithick. Using a high-pressure boiler for more power, his Puffing Devil set off with six passengers in 1801 at a speed described by one witness as 'faster than I could walk' (about 8km/h). Unfortunately, only a few days after this historic journey, the boiler caught fire and Puffing Devil was destroyed.

Electric cars were very popular in Europe and the USA from the late 1800s to the early 1900s. They were quieter and smoother, didn't produce smoke and were easier to use than steam-powered automobiles. One of the first successful models was the *Flocken Elektrowagen*. Designed in Germany in 1888, its 1hp electric motor drove the back wheels and could reach around 15km/h.

One of the last and most advanced steam automobiles was the Doble steam car. Designed in 1924, the Doble Model E only required 30 seconds to boil the water needed to drive the engine, was easy to control and could reach speeds as high as 120km/h.

EARLY ENGINES

The age of the automobile really began with the invention of the internal combustion engine. When fuels such as petrol, diesel or kerosene are burned (or 'combusted') inside the engine (using an oxidizer such as air), they produce kinetic energy, which makes the vehicle move. Internal combustion engines are more fuel-efficient than steam engines, and proved far easier and more convenient to start-up, operate and maintain.

German inventor Karl Benz developed the first automobile powered by an internal combustion engine in 1885. His revolutionary Motorwagen had a 3hp petrol engine, three-spoked wheels with solid rubber tyres and one forward gear. Its top speed was around 16km/h.

The first mass-produced car was the Oldsmobile Model R Curved Dash; 19,000 were built between 1901 and 1907. It was more affordable than most other cars at the time, had a 5hp engine, 2 forward and 1 reverse gear and came as either a 2-seater 'runabout' or a 4-seater family car.

Created in 1901 by German engineers Paul Daimler and Wilhelm Maybach as a racing car, the Mercedes 35 HP was a huge step forward in automobile design. It had a powerful petrol engine mounted at the front that drove the back wheels, a hand brake and a foot brake, 4 forward gears and 1 reverse gear.

RICH AND POOR

THE HISTORY OF WEALTH

Wealth is the difference in wealth between the richest and the poorest. It has been around since the beginning of time, but it has become more important than ever in the modern world. Wealth is the accumulation of money and other valuable assets. It is the ability to have more than you need. Wealth is the ability to have more than you need. Wealth is the ability to have more than you need.

WEALTH CONCENTRATION

One of the biggest reasons for inequality is the way that wealth tends to get concentrated in the hands of a few. This is because people who have more money can invest it in ways that make them even richer. This is how a small number of people can end up with most of the world's wealth.

CHARLES OF INEQUALITY

There are many reasons for wealth inequality. Some people have more money than others because they have more talent or more connections. Some people have more money than others because they have more luck. Some people have more money than others because they have more power.

WHAT'S WRONG WITH WEALTH INEQUALITY?

There are many problems with wealth inequality. It can lead to social unrest and conflict. It can lead to a lack of opportunity for people who are poor. It can lead to a lack of access to education and healthcare. It can lead to a lack of access to the things that make life better.

GOLDEN YEARS

AN INTERNATIONAL SYSTEM

In the 1920s, the gold standard was formally adopted by many countries. This meant that the value of a country's currency was based on the amount of gold it held. This system was supposed to ensure that currencies were stable and that trade was easy.

THE COST OF WAR

World War I had a huge impact on the gold standard. The cost of the war was so high that many countries had to print more money. This led to inflation and a loss of confidence in the gold standard.

THE GOLD DUCK

In 1933, the US President Franklin D. Roosevelt signed an executive order that required all gold to be turned in to the government. This was done to prevent the hoarding of gold and to ensure that the government had enough gold to back the dollar.

FROM COUNTERFEIT COINS TO FALSE NOTES

ALVES DOS REIS

Alves dos Reis was a Brazilian man who became famous for creating counterfeit money. He was known as the 'Master Counterfeiter' and was responsible for some of the most sophisticated counterfeit operations in the world.

THE FIRST COUNTERFEITS

Counterfeiting has been around since the beginning of time. In the past, people would create fake coins or notes to use as money. This was often done to get rich quick or to defraud others.

FINANCIAL MARKETS

At regular markets people buy and sell things like food and clothing. At financial markets, people trade money-related assets. These include stocks and bonds. Stocks are shares in a company that the company sells to raise capital. Shareholders are paid dividends (regular sums paid out of the company's profits). Bonds are certificates issued by a government or corporation, promising to repay borrowed money at a fixed rate of interest. Financial markets can be physical places, like the New York Stock Exchange, or they can take place online.

THE FIRST BONDS

In the twelfth century, the government of Venice came up with a new way of raising money to fight a war. It offered its citizens certificates, known as prestiti, in exchange for a loan, promising to pay them back by a certain time, plus 5 per cent interest. These were the first government bonds. Before long they became a popular investment, and a market developed for the buying and selling of prestiti.

THE FIRST STOCKS

Founded in 1602, the Dutch East India Company was the first company to sell shares in its business to the public. The money it raised from this funded its voyages to the East Indies, and it paid its shareholders out of the profits from its trade in enslaved people and spices. The shares were traded in the Amsterdam Stock Exchange, also established that year.

THE DAILY NEWS

NEW YORK CITY

THE WALL STREET CRASH

THE ROARING TWENTIES

The 1920s was boom time in the United States. There was a spirit of optimism in the country and it became fashionable to play the stock market. Share prices soon rocketed to a point where they represented a value far greater than the total worth of their companies' assets. This was now a 'mania' - a period when everyone, from wealthy financiers to common investors, lost touch with reality and seemed to believe that prices could keep rising forever.

AFTER EFFECTS

As a result of the crash, businesses were bankrupted, banks closed, millions lost their jobs and the world plunged into a deep and lasting economic depression. In Europe, extreme right-wing parties exploited the misery of mass unemployment, blaming 'foreigners' such as Jews. Germany's Nazi Party rose to power in 1933. The consequences for the world would be devastating.

DISASTER

The crash occurred at the end of October 1929, during three calamitous days of trading at the New York Stock Exchange on Wall Street, when huge numbers of people decided collectively it was time to sell. With so many sellers, there were few buyers, and share prices plummeted. In those three days, billions of dollars were wiped off the value of American companies. And over the following years the market kept on falling. By 1932, stocks had lost nearly 90 per cent of their pre-crash value.

Although some apples are in season all year round, many of them are at their best when the leaves on the trees start to turn brown and the temperature cools. Crunchy, shiny, crisp, juicy apples make a welcome change to the often heavy, warming food of the colder months. But apples baked into pies and puddings are soft and comforting and are a delicious way to greet the autumn season.

To get the best from your apples when cooking, you need to get to grips with their individual flavours and textures. Hard, dense Bramley or Braeburn apples hold on to their juices well, so they are best-suited to chopping and cooking until soft. Perky Cox and Gala apples are sweet and fragrant, so they are great for snacking on, or adding raw to salads or bircher muesli.

DID YOU KNOW?
The world's heaviest apple was recorded in 2007 in Japan, weighing an enormous 1.8kg (4lb 14oz). That's three times heavier than a basketball!

GEMS

Gems are rare minerals that can be sold to earn Star Coins, or used to craft a variety of decorative items from dresselings to snowmen. You can gather gems by mining the rock spots around your valley with a pickaxe. Here's a handy guide to every gem, where you can find it, and what it sells for.

MERLIN

Merlin is an all-powerful wizard who's been around since the Middle Ages - no wonder he's so knowledgeable! He's a great source of information and advice, and he's also a little eccentric which makes him endlessly entertaining. He's the first person you'll meet when you begin your adventure and will be there for you every step of the way.

House

The Dreamlight Library is an incredible feat of medieval architecture boasting several astronomical features. Inside, you'll find more books than you can shake a stick at.
