Match the Colour

A first words book that's also a shape-sorter!

- An innovative board book design that lets toddlers place three chunky shapes into matching slots. Three shapes attach to the book via ribbon and feature 6 bright colours.
- A die-cut in the cover showcases the novelty and keeps the pieces securely in place when the book is shelved.
- Matching the colours aids children in their fine motor skills, hand-eye co-ordination and problem-solving skills.
- Introduces familiar first words on every spread.
- Illustrated in vivid colour and effortless style by Polish artist Susie Hammer.
- Also in the series: Match the Shape (2025).

Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 0-3 months

Jane Foster's Baby's First Stories: 6-9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6-9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,
Let's clean your paws and face.
Here's your spoon and here's your bib
And here's your bunny plate!

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 9–12 months

Animal Snap

A flip-flap jungle book.

- A chunky flip-flap board book with big and little pages - match the babies to their parents for an animal SNAP!
- With playful and adorable animal characters beautifully illustrated by Mel Matthews.
- Each animal gives a simple description of its baby. Older toddlers will love to shout out the name when they know the answer.
- A sturdy board book with rounded edges, perfect for babies and toddlers.
- Also in the series: *Animal Snap Jungle*
- Hoping to sign up Mel for 2 more titles in 2026: potentially *Safari* and *Ocean*

Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

Animal Homes: Rainforest

Explore the rainforest in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the rainforest (the forest floor) and each subsequent shaped spread introduces the next layer of the rainforest (the understory, the canopy, the emergent). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

Mrs Owl's Forest School: The Very Big Den

Discover forest school in this gentle story packed with facts

- A perfect mix of picture book and non-fiction - ideal for curious explorers or Forest School pupils
- Forest schools are growing in popularity in the UK and internationally, and sessions are now widely incorporated into the school curriculum at primary level
- Includes kit lists, how-tos and campfire recipes you can try at home with an adult
- With a page of tips at the end for bringing forest school activities into your own home, garden or park
- Written in consultation with outstanding certified forest childcare provider Lizzie Noble

Mrs Owl's Forest School: The Very Big Den

MRS OWL'S GUIDE TO TREES

Trees come in lots of different shapes. Here are some to look out for!

OAK
Old trees have a distinctive 'shaky' edge.

HORSE CHESTNUT
These leaves look a bit like hands with five fingers.

BEECH
These are small, shiny leaves with serrated edges.

WHITE ASH
These have a light patch of white and green in spring.

Oh No, Flo!

A fantastically funny farmyard fiasco to read aloud!

- Taking recognisable and familiar farm animal characters to create a funny and fresh picture book for the very young.
- Featuring bold and bright illustrations from Mike Byrne, well-known for *This Book is Full of Unicorns*.
- Catherine Cawthorne is fresh to the picture book world but is already making her mark with: *We Went to Find a Woolly Mammoth* (Hachette, 2023) and *The Big Bad Wolf Investigates: Fairy Tales* (Bloomsbury, 2024).
- The light-hearted text and repeated 'OH NO, FLO!' refrain to join in with, makes it the perfect book to share with a group or individual child.
- Cover treatments: matt lam and SPUV.

Bessie's Bees

An uplifting story about starting nursery with a courageous neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list, allowing us to grow our range of underrepresented voices and experiences.
- While there has been an increase in positive representations and neurodiverse voices in middle-grade fiction, this is yet to be seen in the trade picture book market. Templar can be one of the first to champion neurodiverse voices and stories in this space.

A hilarious rhyming romp that perfectly encapsulates how being HANGRY really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

A Shelter for Sadness

A poignant and heartwarming picture book exploring the nature of sadness.

- Over 22,000 copies sold worldwide (as of July 2022)
- A poignant and heartwarming text addressing the hugely important and topical issue of sadness and depression
- Dealing with abstract emotions in an approachable and child-friendly way
- Anne Booth is known for the exceptional warmth and authenticity of her writing. She was inspired to write this book by the words of Etty Hillesum, a Holocaust victim.
- With superb illustrations from multi-award winning David Litchfield, who has sensitively visualized the nature of Sadness

A Shelter for Sadness

The shelter I will build for my Sadness will have light from the sun or from the moon and stars.

But the windows will have curtains that Sadness can draw when it wants to. And there will be candles or lamps if Sadness needs them.

The General

Michael Foreman's debut picture book, first published in 1961, is reproduced in all its glory.

- Over 60 years since its first publication, this story about a tyrannical ruler who finds beauty in peace and manages to convince other world leaders to put down their guns and smell the flowers is as relevant now as it was then.
- The first book ever illustrated by the exceptional Michael Foreman OBE, one of the UK's best-loved and most prolific creators in children's books.
- Beautifully restored and reproduced, a children's book classic which will be treasured for generations to come.

His new queen felt at once the lack of love. Hurt hardened her heart. One day, when the boys woke her with their noise, she snarped, "Get out!" she shouted. "Just go! Fly away!"

Words have power. As she pointed, the boys' skin sprouted feathers. Their arms became wings. Their necks stretched. And they flew: six white swans.

• THE NETTLE QUEEN •

The Nettle Queen
A folktale from Denmark

Nettles grow in great families and give us many gifts: food, medicine, cloth and dye. Nettle leaves are so rich and tender that many countries have to eat them – the plant uses its sting to make sure that not too many of its leaves get munchled! Nettle tea is zesty green. Nettle soup helps our bodies and bones grow strong and healthy. People have been using nettle stems to make cloth since Bronze age times.

Once there was a king who had six sons and one daughter, Eliza. The king loved his family dearly. So, when the king's wife died, he was sunk in grief. But his advisers told him: "The country needs a queen! Besides, the children need a mother. So, though his heart had not yet healed, the king married again.

His new queen felt at once the lack of love. Hurt hardened her heart. One day, when the boys woke her with their noise, she snarped, "Get out!" she shouted. "Just go! Fly away!"

Words have power. As she pointed, the boys' skin sprouted feathers. Their arms became wings. Their necks stretched. And they flew: six white swans.

Now, the queen made a strong dark dye – in a great pot, walnut shells liddled and brewed. She poured the dye into Eliza's bath. It stained her hair and changed her face – she looked so different, even her own father did not know her.

"Who let a stranger in here?" he cried. "Throw her out!"

Eliza fled, into the forest. She wandered the woods, wishing her brothers were with her. But the trees and the plants, the birds and the animals were all with her. She talked to them, as if they were her brothers.

"Hello, Butterfly!"

"Hello, Nettle, may I pick a leaf? Ow?"

The sting made the tips of her fingers tingle. Just then, along came a woman, gathering nettles for soup. She picked a dock leaf for Eliza, to soothe her skin. She showed her the tiny butterfly eggs, she shored beneath a nettle leaf. She taught her how to pick the very top tips of the plant, that are best to eat. Eliza thanked the woman, and she asked her, "Please... Have you seen six princes?"

The woman shook her head. "No... no princes... But I did see six swans, down on the river."

Eliza followed the river all the way to the sea. But she didn't find her brothers. She did find a white feather, on the shore. She sat on the sand with the feather in her hand. And as the sun began to set, there came a sound – over the ponding of the waves – the singing of wings.

From over the horizon came six wild swans. As they landed, their white feathers fell away. There stood six boys – Eliza's brothers! Then there was hugging and kissing and laughing and crying, and more hugging.

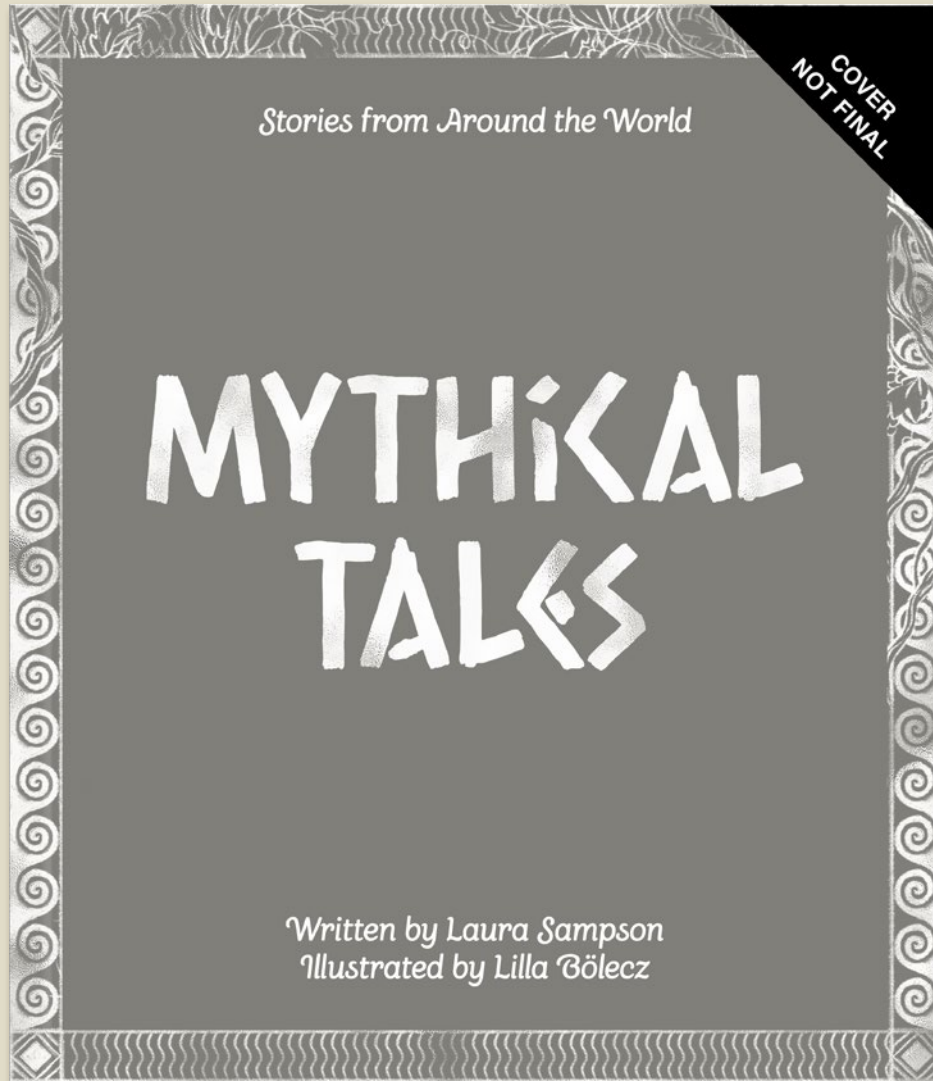

"Every day, when the sun rises, we turn into swans," said her youngest brother. "We only become boys again when the sun sets. We live far off over the ocean, but every day, we fly back, to look for you."

"Now you've found me," said Eliza. "Take me with you!" So Eliza and her brothers gathered supple willow and tough rush, and together they knatted a net.

Eliza sat in the net and her own brothers lifted her clean into the

The Fixer of Broken Things

What happens when the famous fixer of broken things finds a problem that she can't solve?

- From the author and illustrator of *Number 7 Evergreen Street*, winner of the Royal Institute Of British Architects' Student Choice & Teacher's Choice for 5-7 year olds
- Julia Patton is an up-and-coming picture book talent in both the UK and the US. Bartleby from *The Very Very Very Long Dog* (Sourcebooks) is on the Barnes and Noble character wall of fame in the US.
- A wonderful story about sadness and how talking to a support network can help. The 'broken thing' Bea finds is a clockwork heart and speaking about her problems is what makes it work again.

The Baker by the Sea

A seaside storybook about community and family

- Atmospheric pen-and-ink artwork from debut author and illustrator Paula White. Paula was winner of the 2019 Templar Design and Illustration Awards.
- Reminiscent of the Greenaway winning *Town is by the Sea* (Walker, 2018).
- The story offers a window onto the past, guiding us around the Beach Village that once stood where Paula grew up, in Lowestoft, Suffolk. This busy, bustling place once made its living from the sea - but was eventually swept away by those very same waves.
- A moving exploration of the importance of community, with a strong father-son relationship at its heart.
- An artistic fishing village story which should be popular with retailers in seaside locations.

I Want the Moon

A wealthy man has everything he could ever want on Earth... and now he is reaching for the moon.

- Frann Preston-Gannon is a multi-award winning illustrator and author. In 2011 she was the first UK recipient of the Sendak fellowship. Her first picture book, *The Journey Home*, won the 2012 Waterstones Prize, *I am the Seed that Grew the Tree* was the 2019 Waterstones Gift of the Year and *In the Swamp by the Light of the Moon* was Bank Street College of Education's 2020 Best Children's Book of the Year.
- *The Swamp in the Light of the Moon* has sold over 19,000 copies worldwide (as of July 2022)
- A captivating story with a message about the true value of things at its heart.

It's time to bring Old Bear back to the playroom!

- Jane Hissey's best-selling teddy bear book is packed with heartfelt humour, nostalgia and vintage illustrations, making it the perfect bedtime story for children up to 5 years old.
- Jane Hissey's best-selling series became the basis for the BAFTA award-winning TV series, Old Bear and Friends.
- The Old Bear and Friends series has become a timeless classic for teddy bear lovers, selling over 7 million copies internationally and 126,000 through TCM alone.
- First published in 1986, Old Bear is packed with nostalgia and brings this iconic teddy to a new generation of children whose parents grew up reading these books.

Old Bear

LET'S try making ourselves into a tower,' said Duck. 'Good idea!' said Bramwell. Little Bear climbed on top of Rabbit's head and Rabbit hopped onto Duck's back. They stretched up as far as they could, but then Duck opened his book to say something. Rabbit wobbled, and they all collapsed on top of Bramwell.

'Sorry,' said Duck, 'perhaps that wasn't a very good idea.' 'Not one of your best,' replied Bramwell from somewhere underneath the heap.

IKNOW!' said Rabbit. 'Let's try bouncing on the bed.' 'Trust you to think of that,' said Bramwell. 'This never can mean a bit of bouncing, especially when it's not allowed!' Rabbit climbed onto the bed and began to bounce.

*Up and down,
Up and down.*

The others joined him. They bounced higher and higher but still they couldn't reach the trap door in the ceiling.

DUCK began to cry. 'Oh dear,' he sobbed. 'What are we going to do now? We'll never be able to rescue Old Bear and he'll be stuck up there getting lonelier and lonelier for ever and ever.'

'We haven't given up,' said Bramwell firmly. 'Come on Little Bear, quite good at ideas.'

But Little Bear had already noticed the plant in the corner of the room.

IVE got it!' he cried. 'I could climb up this plant, swing from the leaves, kick the trap door open and jump in!'

In case it wobbled, Bramwell Brown, Duck and Rabbit steadied the pot. Little Bear bravely climbed up the plant until he reached the very top leaf. He took hold of it and started to swing to and fro, but he swung so hard that the leaf broke . . . **SNAP!**

He came crashing down. Luckily, Bramwell Brown was right underneath to catch him in his paws.

'That was a rotten idea,' said Little Bear.

'What I was thinking,' said Duck, 'was that it is a pity I can't fly very well, as I could have been quite a help.'

'Ah ha!' said Bramwell. 'That, my dear Duck, has given me a very good idea. I really think this one might work.'

Molly and the Mathematical Mystery

Find the clues and lift the flaps on this mathematical mystery

- An interactive maths adventure with a narrative feel - think 'The Crystal Maze' with maths
- With flaps and wheels throughout, and further non-fiction information at the back of the book
- Written by eminent British-American mathematician Eugenia Cheng, the book explores Key Stage 2 mathematics in visual and creative ways.
- Illustrated by Aleksandra Artymowska, illustrator of bestselling *Around the World in 80 Puzzles* and *20,000 Leagues Under the Sea: A Puzzle Adventure*. Ola's puzzle books have sold over 100,000 copies worldwide.
- Molly sets out to encourage curiosity and creativity in a subject often dismissed as dull and difficult.

The Incredible Pop-up Bug

An intricate pop-up book bursting with beautiful bugs.

- Incredible paper-engineering - with 20 flaps to lift on every page and three complex multi-layered pop-ups (Rhinoceros beetle; Monarch butterfly; Red-knee tarantula).
- Written by Ben Hoare, an award-winning journalist who has written and edited books and magazines for DK, the BBC, London's Natural History Museum and many others. His books *An Anthology of Intriguing Animals* (2018) and *Wonders of Nature* (2019) are international bestsellers.
- Illustrated by rising star Jasmine Floyd.
- Cover finish: holographic foil + embossing + spot UV

Talking History

150 years of world-changing speeches

- An accessible look at political and social history, and issues that remain pertinent today
- Contemporary design and illustrations from André Ducci accompany engaging text
- Authors are experienced children's writers and academics with expert knowledge on the topics discussed. In 2021, Joan Haig was selected as one of prestigious Scottish Book Trust's authors in residence, working with a school in Aberdeen
- Sample contents: Abraham Lincoln, 'The Gettysburg Address', 1863; Jawaharlal Nehru, 'A Tryst with Destiny', 1947; Nelson Mandela, 'Speech from the Dock', 1964; Harvey Milk, 'The Hope Speech', 1978; Angela Merkel, 'Address to 68th Session of the WHO', 2015 and Severn Cullis-Suzuki, 'Listen to the Children', 1992,

Talking History

In 1903, in the city of Manchester, UK, Emmeline Pankhurst and her eldest daughter Christabel founded the Women's Social and Political Union (WSPU). The organisation campaigned fearlessly for women's right to vote.

THE SUFFRAGETTE MOVEMENT

This wasn't the first time that women in Britain had fought for the vote. Since the mid-nineteenth century, female campaigners called 'suffragists' had tried to win rights for women in society through peaceful petitions and, later on, by refusing to pay their taxes.

But this campaign was slow with few results. After years of unsuccessful peaceful protest by the suffragists, the WSPU decided that it was time for action - 'Deeds Not Words', as their motto said. Members of the WSPU took part in 'civil disobedience' to literally fight for their cause. They chained themselves to railings, hacked politicians' names from public buildings, and smashed windows in public places, constantly clashing with the authorities.

They were so determined to achieve their political aims that they deliberately took part in violence and vandalism to influence the public and the government.

Newspapers began referring to militant WSPU campaigners as 'suffragettes'. By 1910, the WSPU had branches all over the country.

THE CAT AND MOUSE ACT

Around 1,000 suffragettes were imprisoned for their 'substance' behaviour. While in jail, some continued to fight by going on hunger strikes, refusing to eat or drink. At first, they were released to prevent them from starving, but, by 1910, prison wardens began to force feed them. Women were badly hurt, prompting public outrage at what was seen as government torture.

The government responded by passing the 1913 'Prisoners' (Temporary Discharge for Ill Health) Act. Under this new law, when women on hunger strike became critically weak, they were sent home. As soon as they recovered, they were promptly returned to continue their sentence. It was dubbed the 'Cat and Mouse Act' because of the way a cat plays with its prey repeatedly letting it escape before catching it again.

Emmeline Pankhurst was imprisoned and released 16 times! It was in 1913, in between prison sentences, that she visited the United States to campaign for support and funding. She addressed a group of women at the Parsons Theatre in Hartford, Connecticut, in a powerful speech attempting to justify the use of militant tactics in the fight for women's rights.

Raising the Roof

A cool introduction to classical music

- Broadcaster, songwriter, composer and Scala Radio presenter Jack Pepper is an exciting, young voice in classical music.
- A fun and approachable introduction to classical music
- Includes a playlist, so you can listen as you read
- **SAMPLE CONTENTS:** Hildegard of Bingen 1098-1179; Claudio Monteverdi 1567-1643; Barbara Strozzi 1619-c. 1664; JS Bach 1685-1750; Joseph Bologne 1745-1799; Ludwig van Beethoven 1770-1827; Richard Wagner 1813-1883; Giuseppe Verdi 1813-1901; Ethel Smyth 1858-1944; Arnold Schoenberg, 1874-1951; Igor Stravinsky, 1882-1971; Florence Price, 1887 - 1953; George Gershwin, 1898-1937; Leonard Bernstein, 1918-1990

Raising the Roof

SYMPHONY

The symphony has changed over the centuries, but it is essentially an extended piece of music for a large group of players. The word had even been the Greek, meaning 'sounding together'. It is often a composer's lifetime piece because the size and cost of the orchestra is hard to pull off.

A symphony is often in four movements, with no set number of tracks. There are five movements, which are often arranged in the sequence of three quick, coming to a halt, then a slow movement, then a quick finale. However, composers varied with light and dark moods of contrast and melody throughout the work.

LEARNING TIP
Look for the 'L' in the key signature, which is often a clue to the mood of the music. A key signature of one flat (F) is often a clue to the mood of the music. A key signature of one sharp (F#) is often a clue to the mood of the music.

1800s
The first symphony was written by Joseph Haydn in 1760. It was a single movement in one key, with a single melody line.

1776
The first symphony with four movements was written by Wolfgang Amadeus Mozart in 1763. It was a single movement in one key, with a single melody line.

1800s
The first symphony with four movements and a single melody line was written by Ludwig van Beethoven in 1800. It was a single movement in one key, with a single melody line.

1872
The first symphony with four movements and a single melody line was written by Johannes Brahms in 1872. It was a single movement in one key, with a single melody line.

1878
The first symphony with four movements and a single melody line was written by Franz Liszt in 1878. It was a single movement in one key, with a single melody line.

Present
The first symphony with four movements and a single melody line was written by Gustav Mahler in 1888. It was a single movement in one key, with a single melody line.

Richard Wagner

1813-1883

To Listen or Not to Listen...
Can we separate opera from Wagner? Can we really think of Wagner as a composer who wrote operas, or is he a composer who wrote music for the stage? Wagner was a composer who wrote music for the stage. He was a composer who wrote music for the stage. He was a composer who wrote music for the stage.

Wagner had a lot to say and did things his way. He pushed music to its limits and revolutionised everything. He had to invent a new language.

Wagner's Sound
Wagner's music is often described as 'music for the stage'. It is a music that is designed to be heard in a theatre. It is a music that is designed to be heard in a theatre. It is a music that is designed to be heard in a theatre.

LISTEN!
Wagner's music is often described as 'music for the stage'. It is a music that is designed to be heard in a theatre. It is a music that is designed to be heard in a theatre. It is a music that is designed to be heard in a theatre.

George Gershwin

1898-1937

George Gershwin's Sound
Gershwin was one of the most popular composers of the 20th century. He was a composer who wrote music for the stage. He was a composer who wrote music for the stage. He was a composer who wrote music for the stage.

George Gershwin's Sound
Gershwin was one of the most popular composers of the 20th century. He was a composer who wrote music for the stage. He was a composer who wrote music for the stage. He was a composer who wrote music for the stage.

LISTEN!
George Gershwin's music is often described as 'music for the stage'. It is a music that is designed to be heard in a theatre. It is a music that is designed to be heard in a theatre. It is a music that is designed to be heard in a theatre.

Hildegard of Bingen

1098-1179

Here's someone who was, in every sense, a visionary Hildegard of Bingen had visions of God and wrote them down as poems and music.

Music was just one part of a lifetime of interests. Hildegard of Bingen - named after the German town she came from - was first and foremost a nun, diplomat, writer, leader, adviser, plant expert, scientist, public speaker... and a composer. But it all came back to faith. Hildegard became a nun aged 15 and later created her own monastery with 18 sisters. As if that wasn't enough, Hildegard then developed her own language and alphabet, possibly to help bring her nuns together. She used her talents - for music and for words - to unite people. It was all ultimately about expression. Hildegard wrote books on natural history, plants and medicine, and was even the first person to write a morality play, a drama where good battles evil (think Star Wars, but in the 1100s). That made her the 'influencer' of the time! She became a pen pal of popes, kings, emperors and cardinals, and was herself a major public leader: she went on at least four public speaking tours of Germany. This was bold stuff, given that women of the time were not allowed to travel as preacher-teachers, she was in many ways an early feminist, championing the rights of women and dealing with men on an equal footing. No wonder why, in the centuries after her death, Hildegard was considered for sainthood by no less than four different popes!

Learning by Ear
The Greeks were the first to use letters of the alphabet to represent different notes. Yet until the Middle Ages, almost all music was passed down the generations by mouth, instead of being written down. There was a lot to learn: in the 600s, monks in churches are estimated to have memorised 80 hours of music, all by ear! By the 900s, it took around 10 years to teach a young chorister all the pieces they'd need to know for future services. And you think school is intense...

LISTEN!
A Feather on the Breath of God sung by Gothic Voices
Hildegard was a Bala-Iban name even in musical circles, until early music became widely performed and recorded from the 1970s onwards. One of the standards in this album, released in 1985.

She sent me a letter!
And a botany book to me!
I'm scheduling that next tour!

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
The javelin is a spear-like object used in track and field events. The first javelin was made of wood and had a stone head. Today, javelins are made of metal and have a pointed tip. The javelin was invented in ancient Greece.

LONG JUMP
The long jump is a track and field event in which the athlete jumps or leaps into the air and lands in a sandpit. The long jumper aims to jump as far as possible.

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal at the 1996 Summer Olympics in Atlanta, Georgia.

DISCUS
One of the most beautiful events in the ancient world is called the Discobolus or 'discus thrower'. The statue is a Greek statue that shows a man throwing a discus.

JAN SZENTI
Jan Szeñi is a Hungarian athlete. He won the gold medal at the 1956 Summer Olympics in Melbourne, Australia.

AMERICAN FOOTBALL
American football is a team sport that originated in the United States. It is a contact sport and is played on a rectangular field. The game is played between two teams of eleven players each.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's goalposts. The team that scores the most points at the end of the game wins.

MEET THE TEAM
There are 11 players on the field. Each player has a specific role to play. The quarterback is the player who starts the play. The running back is the player who carries the ball. The wide receiver is the player who catches the ball. The tight end is the player who blocks the opponent's players. The defensive line is the group of players who try to stop the offense from scoring.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the quarterback snapping the ball to the running back. The running back then carries the ball down the field. The wide receiver catches the ball and runs towards the end zone. The tight end blocks the opponent's players. The defensive line tries to stop the offense from scoring.

TOO READY
The American Football League (AFL) was founded in 1960. It was the first professional football league in the United States. The AFL merged with the National Football League (NFL) in 1970.

RUGBY
Rugby is a team sport that originated in England. It is a contact sport and is played on a rectangular field. The game is played between two teams of fifteen players each.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's goalposts. The team that scores the most points at the end of the game wins.

BASEBALL
Baseball is a team sport that originated in the United States. It is a contact sport and is played on a diamond-shaped field. The game is played between two teams of nine players each.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field and running the bases. The team that scores the most runs at the end of the game wins.

CRICKET
Cricket is a team sport that originated in England. It is a contact sport and is played on a rectangular field. The game is played between two teams of eleven players each.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field and running the bases. The team that scores the most runs at the end of the game wins.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patota puripatka was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Māori of New Zealand participated in a competition known as the Māori Games - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

Extra Terrestrial

Do aliens exist? Join the real-life hunt for alien life!

- Written by highly acclaimed science author, and Fellow of the Royal Astronomical Society, Colin Stuart, after who the asteroid (15347) Colinstuart is named in recognition of his efforts to popularise astronomy.
- Sample contents: Section 1 (Earth): No Place Like Home / Section 2 (Exoplanets & Techniques): Alien Hunter's Toolkit / Section 3 (Types found): Exoplanet File / Section 4 (Alien life): Searching for Alien Life
- Illustrated by the wonderfully talented Jasmine Floyd known for her vibrant colours and psychedelic vibes!

Against the Odds

Meet the adventurers who have tried, failed and succeeded against the odds!

- *Alastair Humphreys's Great Adventurers* won the Stanford Travel and Teach Primary Book awards and has sold over 45,000 copies worldwide (as of July 2022)
- Sample contents: , Junko Tabai, Juanita Harrison, Ffyona Campbell, Bernard Moitessier, Goran Kropp, Terry Fox, Matthew Henson, Frank Wild, Joe Simpson, Jack Swigert, Jeanne Baret, Robert Smalls, Zheng He, Emile Leray , Karen Darke, Beth French and Marianne Du Toit.
- Author Alastair Humphreys - National Geographic Adventurer of the Year 2012 - has hand-selected 20 inspiring adventurers and retold their stories in his own words

Against the Odds

JEANNE BARET

Small text describing the story of Jeanne Baret, a French explorer and naturalist who traveled to South America with her husband and later on her own.

INTO THE WILDERNESS
Small text describing her journey into the wilderness.

A MAN IN DISGUISE
Small text describing her disguise as a man.

A CLEVER DISGUISE

Small text describing the story of a clever disguise.

A NEW LIFE
Small text describing a new life.

Was Robert Smith's legend?
Small text describing Robert Smith's legend.

JUNKO Tabei

Small text describing the story of Junko Tabei, a Japanese mountaineer who was the first woman to reach the summit of Mount Everest.

Small text describing her journey.

ROBERT SMALLS

Robert Smalls was born into slavery in 18th-century America, deep in the South. He was desperate for his family to escape to a better life. But the outbreak of the American Civil War seemed certain to end his hopes of freedom and safety.

As a child, Robert Smalls worked as an enslaved cotton picker on a plantation.

When he was 12, he was sent to Charleston as a labourer, working in a hotel and then as a lamplighter.

As a teen, he worked on the docks. He got to know the ships well and became a helmsman, in charge of steering the boat.

At 17, Robert got married and was desperate to buy his family's freedom. But for every \$15 he earned as an enslaved man, he was only allowed to keep a single dollar. This made it impossible to save the \$800 he needed. Robert was trapped, as his people had been for centuries, and he knew that if he wanted to be free, he would need to come up with a spectacular plan.

US CIVIL WAR 1861 - 1865

DREAMS OF FREEDOM
The American Civil War began in 1861 between the Southern States (the Confederacy) who wanted to keep slavery, and the Northern States (the Union) who did not.

In 1861, Robert was forced into service on a transport ship for the Confederate Army called the CSS Planter, delivering ammunition and supplies up and down the coast. The ship was led by Captain Bevela, with two other white officers and a crew of enslaved Black men.

The captain always wore a wide-brimmed straw hat to protect his head from the bright southern sun. This gave Robert the first glimmering of an idea...

Day and Night

A narrative non-fiction story of a day on Earth

- Sample contents: TWILIGHT Mule deer and mountain lion (North America); DAWN Spiders weaving webs (Australia); EARLY MORNING Hummingbirds & sweat bees (Mexico); LATE MORNING Andean condor (South America); NOON Cicadas (Western Europe); EARLY AFTERNOON Caracal, python (Africa); EARLY EVENING coral reef (Fiji); DUSK Moonflowers & sphinx moth (South Asia)
- Glow-in-the-dark ink on the nighttime pages
- This book can be read as a gentle story at bed time or to learn more about the world
- Cover treatment: matt lam + spot UV + glow-in-the-dark-ink (cover and nighttime pages)

Day and Night

A Guide to Day and Night

Polar night and midnight sun

At the very north and south of Earth, days work differently. For six months of the year the sun never rises above the horizon. This is called the **POLAR NIGHT**, and it is dark all the time. For the other six months of the year, the sun never falls below the horizon. This is called the **MIDNIGHT SUN**, and it is light all the time.

This phenomenon happens because Earth is tilted. When one pole is tilted towards the sun, the other pole is tilted away. This makes daytime or nighttime last more than 24 hours in these places.

<h4>Dawn</h4> <p>Before the sun has risen above the horizon, the sky lightens. This time of day is also known as twilight.</p> <p>Animals and plants that are active in twilight are called CREPUSCULAR.</p>	<h4>Sunrise</h4> <p>The sun rises higher, eventually coming up over the horizon line, warming the air.</p>	<h4>Daytime</h4> <p>The period between sunrise and sunset, when the sun peaks up over the horizon line then travels in an arc across the sky. It is warmer than it is at night and there is more food around, but animals are more easily spotted by predators in the light.</p> <p>Animals and plants that are active in daytime are called DIURNAL.</p>	<h4>Sunset</h4> <p>The sun sinks below the horizon line, causing light and warmth to fade.</p> <p>DIURNAL animals and plants prepare to rest for the night.</p>	<h4>Dusk</h4> <p>The sun lowers even more, even though we can't see it now. The sky grows darker but there is still a faint glow of light. This time of day is also known as twilight.</p> <p>CREPUSCULAR animals and plants are active again.</p>	<h4>Night</h4> <p>The period between dusk and dawn, when it is dark. The air is cool and more humid. There is less food around at night but under the cover of darkness animals can avoid getting caught by predators.</p> <p>Animals that are active at night are called NOCTURNAL.</p>

Tell Me About: Planet Earth

Big science for little readers.

- The fourth title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at earth science for young children, covering topics such as day and night, seasons and weather, biomes, physical landscapes, the water cycle, volcanoes and earthquakes, fossil fuels, carbon emissions and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Planet Earth

Earth is Home

You live on a brilliant ball of spinning rock called Earth. It's a planet, travelling through space on a gigantic loop around a star called the Sun.

There's another ball of rock about a quarter of the size of Earth and you can see it in the night sky. It's called the Moon.

It takes a month for the Moon to travel around Earth on an oval path.

It takes a whole year to travel all the way around the Sun. So if you are five years old, you have circled the Sun five times already!

Earth travels around the Sun on an oval path but it also spins on the spot. The spin is why it gets dark at night.

Your home turns away from the Sun at night and by morning it has turned back towards the Sun once again. It takes 24 hours for a complete spin to happen, and we call that a whole day.

Caves

Caves are big holes carved into cliffs by waves hitting the rock. But they can also form underground as rain trickles through cracks in the rock.

That's right, tiny little rain droplets can make massive caves because they dissolve the rock away a little bit at a time.

Underground rivers flow through caves. They wear the floor of the cave down to make them even bigger.

Inside the cave, some droplets of rainwater evaporate. As the liquid water drops turn into gas, they leave behind the tiny bits of rock they were carrying. The bits of rock stick to the roof.

In a thousand years, all the drops of water will have left enough rock behind to make a shape about as long as your finger. This is called a stalactite.

The same thing happens as the water drops onto the floor of the cave too. The cave floor grows upwards into a wider opening, which is called a stalagmite.

Digging and Drilling

When humans dig useful rocks and metals out of the ground, it is called mining. People also drill long holes deep down into the rock to find little pockets of gas and a liquid called oil.

The oil and gas found deep underground were once tiny sea creatures. They sank to the bottom of the sea and got squashed over millions of years. They turned into a dark liquid called oil and a gas called methane.

Coal is a black rock that gives off lots of heat when it burns. It is made from leaves that took in swamps millions of years ago.

We can burn oil, coal and methane gas to make electricity and to power vehicles.

Most metals are hidden underground with other rocks. A few metals are found just as they are at the surface, including gold, silver and copper.

Metals can make lots of useful things including bikes, phones, computers and cars.

Oceans

If you flew out into space and looked back at Earth it would look blue. That's because two thirds of our planet's surface is covered in liquid water. It's mostly found in the oceans and seas.

Waves

Waves are made on the surface of the water as the wind pushes the sea.

Tides

The sea comes in at high tide and goes out at low tide. This happens twice every day because of the way Earth is spinning beneath the Moon.

That's right, the Moon makes our tides! Gravity is a pull that happens between Earth, the Moon and the Sun. It pulls on you too. When you jump, gravity pulls you back down to Earth.

The oceans on planet Earth slowly change shape because the rock beneath them is moving. This creates underwater valleys, caves and mountains.

Did you know...? Seawater is salty because of salt from rocks!

- CONTENTS: Brilliant body; The skin; Skeleton; Muscles, Brain; Thinking; Nervous system; Eyes; Ears; Mouth and Nose; Digestive System; Blood; Water; Pumping blood; Lungs and breathing; Immune system; Feelings; Helping your body

Tell Me About: The Human Body

Brilliant Body

So many amazing things are happening in your body right now! Let's take a look at just a few of them...

As you breathe, spongy bags called lungs are sucking air in and putting it into your blood.

When you run, stretchy cords called muscles pull bones back and forward. Your bones connect together in a structure called a skeleton. And your skin wraps everything up.

Tiny electrical signals are making your heart beat - to-beat-to-beat - to pump blood around your body.

Your body is made from lots of different parts that work together to do important jobs. These parts are called organs.

When you think or laugh or wiggle your toes, you use energy. The energy comes from the food you eat. The food goes into your blood and all around your body.

If you look at the pictures in this book, you're using organs called eyes. And when you think about all of this, you use an organ called the brain.

The Skin

Let's begin our body tour with your skin. This stretchy waterproof layer wraps around your body keeping germs out and keeping your insides... inside!

Your skin is full of sensors that help you to touch and feel things. You can feel pain and warmth and the tiny footpads of an insect crawling on your arm.

Did you know...? The skin is the biggest organ in the body!

Touch sensors help you to feel how hard to press when you lift it and hold objects - so you don't drop or squash them.

The top layer of your skin is dead! Underneath it, new skin is being made. It pushes the old skin upwards until it flakes off as dust. Yes, your skin becomes dust!

Your hair and nails are made from the same stuff as skin. It's called keratin.

Your skin cools your body too. One way it does this is by making little drops of liquid called sweat.

When sweat drops are warmed by a hot body, they float off into the air taking heat away with them!

Skeleton

The thing that gives your body its wonderful shape and height is a skeleton. It is made from 206 bones that join together at hinges called joints.

Full your fingers! The bones are the hard parts, and the joints are where your fingers bend.

Strong bony bones called cartilage make up some parts of the skeleton including your ears, your nose and sections of your ribs.

The skeleton protects your insides too. Your ribs make a cage around your lungs and heart and your skull is like a helmet, protecting your brain.

Inside your biggest bones is a juice called marrow. New blood is being made in the marrow. That's right, your bones can make blood!

Bones are full of tiny holes that make them light. But the pattern of the holes makes them really strong too.

Short stretchy cords called ligaments stick the bones to each other. Longer, stretchy cords called muscles pull the bones around so you can move.

Muscles

Muscles are stretchy cords that pull body parts to make them move. If you wiggle your eyebrows and stick out your tongue, you did it using muscles!

Muscles can pull, but they can't push so they need to work in teams. One muscle pulls a body part one way, and another muscle pulls it back again.

Great teamwork muscles!

1. Bend your arm. The set of muscles at the front of your arm, called triceps, pulled it up by getting shorter.

2. Now straighten your arm. Another set of muscles at the back of your arm, called biceps, pulled your arm down to straighten it.

The muscles that move your bones around are called skeletal muscles. But they're not the only muscles you have!

Cardiac muscles make your heart squash to pump blood.

Smooth muscles line the tubes in your body. They help push things through the tubes.

Did you know...? Muscles help you hold in pee until you're ready to let it go.

The Incredible Voyage

Embark on an incredible adventure in a magical land this beautifully whimsical puzzle book.

- A beautifully whimsical puzzle book, mixing the fun and interactivity of puzzles with an epic adventure story. Perfect for unlocking the joy of reading.
- Written and illustrated by Aleksandra Artymowska, illustrator of bestselling *Around the World in 80 Puzzles* and *20,000 Leagues Under the Sea: A Puzzle Adventure*. Ola's puzzle books have sold over 100,000 copies worldwide.
- Featuring a strong female protagonist who shows that bravery and a sense of adventure isn't only for boys.

The Incident at Camp UFO

Unravel cryptic clues, solve fiendish puzzles, avoid the Shini-ta aliens at all costs and help the gang uncover the incident at Camp UFO!

- A brand-new adventure puzzle book series complete with graphic novel style illustrations. Perfect for fans of Bunny vs. Monkey, Stranger Things and gaming enthusiasts. A must-have for reluctant readers.
- Featuring a strong cast of characters with authentic stories from diverse backgrounds, including South and South East Asia, plus a non-binary character with partial hearing loss.

Up in the Canopy

Explore the jungle layer by layer with a huge fold-out surprise at the end.

- James Aldred's book *The Goshawk Summer* won the 2022 James Cropper Wainwright Prize for Nature Writing.
- Written from the perspective of real-life Emmy-nominated cameraman and explorer, James Aldred
- Stunningly illustrated - with artwork as rich and dense as the rainforest itself
- Huge fold-out tree at the back of the book, which readers can pore over.
- Matt lam, fluoro pantone and spot UV finishes.

The Little Gardener's Handbook

A vibrant introduction to gardening.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

From Cells to Ourselves

HOW DID LIFE BEGIN?

THE 1920s American chemist Stanley Miller and British physicist James Watson conducted the first experiment to show how simple molecules like water and methane could combine to form amino acids, the building blocks of proteins and other essential molecules.

1928 British biologist Frederick Griffith discovered that bacteria can exchange genetic information. He showed that a harmless strain of bacteria could become deadly if it absorbed genetic material from a dead, deadly strain.

1943 American biologist Oswald Avery and his colleagues showed that DNA is the genetic material. They proved that DNA, not protein, is the molecule that carries genetic information.

1953 James Watson and Francis Crick discovered the structure of DNA. They showed that DNA is a double helix, with two strands of sugar and phosphate groups twisted around each other, and nitrogenous bases attached to the strands.

1966 British biologist Francis Crick and American biologist Leslie Orgel proposed the 'RNA world' hypothesis. They suggested that RNA was the first molecule to store and transmit genetic information, and that it was able to catalyze its own replication.

1980s American biologist George Church and his colleagues proposed the 'synthetic biology' hypothesis. They suggested that life could be created in the laboratory by synthesizing DNA from scratch.

2003 The Human Genome Project was completed. This was the first time that the entire sequence of human DNA had been determined.

2012 American biologist George Church and his colleagues created the first synthetic cell. This was a cell that was able to replicate itself and perform some basic functions.

2013 American biologist George Church and his colleagues created the first synthetic genome. This was a genome that was able to direct the synthesis of a cell.

2014 American biologist George Church and his colleagues created the first synthetic organism. This was an organism that was able to grow and reproduce in a laboratory.

2015 American biologist George Church and his colleagues created the first synthetic life. This was life that was able to think and feel.

2016 American biologist George Church and his colleagues created the first synthetic intelligence. This was intelligence that was able to learn and solve problems.

2017 American biologist George Church and his colleagues created the first synthetic consciousness. This was consciousness that was able to experience the world.

2018 American biologist George Church and his colleagues created the first synthetic self. This was a self that was able to care for itself and others.

2019 American biologist George Church and his colleagues created the first synthetic soul. This was a soul that was able to transcend the physical world.

2020 American biologist George Church and his colleagues created the first synthetic god. This was a god that was able to create and sustain life.

2021 American biologist George Church and his colleagues created the first synthetic universe. This was a universe that was able to exist on its own.

2022 American biologist George Church and his colleagues created the first synthetic everything. This was everything that was able to be created.

THE DINOSAUR DETECTIVES

In the 19th century, scientists discovered, investigated and named many species of dinosaurs. But for a long time these dinosaurs remained hidden.

MARY ANNING (1799-1847) was a 12-year-old girl who lived in Lyme Regis, Dorset. She was known for her habit of collecting fossil shells. In 1830, she discovered a fossil of a dinosaur foot. This was the first fossil of a dinosaur to be discovered.

WILLIAM BUCKLAND (1784-1861) was a geologist and paleontologist. He was the first to suggest that the fossil foot was the foot of a dinosaur. He named it 'Megalosaurus'.

RICHARD OWEN (1804-1892) was a geologist and paleontologist. He was the first to suggest that the fossil foot was the foot of a dinosaur. He named it 'Iguanodon'.

OSBORN MARTELL (1790-1852) was a geologist and paleontologist. He was the first to suggest that the fossil foot was the foot of a dinosaur. He named it 'Heterosaurus'.

THE GREAT OCEAN WALKER was a geologist and paleontologist. He was the first to suggest that the fossil foot was the foot of a dinosaur. He named it 'Titanosaurus'.

THE END OF THE DINOSAUR AGE

For a long time, people believed that the dinosaurs were a separate group from all other animals. But in the 19th century, scientists discovered that dinosaurs were actually a group of animals that had evolved from other animals.

1830 British geologist Richard Owen discovered the first fossil of a dinosaur. He named it 'Megalosaurus'.

1842 British geologist William Buckland discovered the first fossil of a dinosaur. He named it 'Iguanodon'.

1843 British geologist Richard Owen discovered the first fossil of a dinosaur. He named it 'Diplodocus'.

1869 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Tyrannosaurus Rex'.

1870 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Triceratops'.

1877 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Stegosaurus'.

1878 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Velociraptor'.

1881 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Spinosaurus'.

1882 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Parasaurolophus'.

1883 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Ankylosaurus'.

1884 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Coelacanth'.

1885 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Plesiosaurus'.

1886 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Mastodonsaurus'.

1887 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Archelon'.

1888 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Elasmobranchius'.

1889 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Plesiosaurus'.

1890 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Mastodonsaurus'.

1891 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Archelon'.

1892 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Elasmobranchius'.

1893 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Plesiosaurus'.

1894 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Mastodonsaurus'.

1895 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Archelon'.

1896 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Elasmobranchius'.

1897 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Plesiosaurus'.

1898 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Mastodonsaurus'.

1899 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Archelon'.

1900 American geologist Othniel Charles Marsh discovered the first fossil of a dinosaur. He named it 'Elasmobranchius'.

EARLY IDEAS ABOUT EVOLUTION

How long is a million seconds? Have you been alive for one billion seconds? What was happening a million days ago? We find it very difficult to comprehend these huge numbers. If we don't have a feel for how long a million seconds is, how can we possibly comprehend time spans of millions or billions of years? This is one reason why some people have a problem with evolution. The idea that single, primitive cells evolved into all the species that have ever lived seems incredible, unless you get to grips with the timespans involved.

In ancient Greece, philosopher Anaximander suggested that one type of animal could change into another, while Empedocles thought that new types of living things could be made from a range of parts that already existed.

There's NO WAY he's getting two elephants on that boat.

Zam, Zam, Perhaps they came later.

The naturalist George-Louis Leclerc proposed a way for the Earth to have formed from debris in space. Although he believed in spontaneous generation, he thought that animals could change as they migrated to different conditions. This later explains the discovery of elephant fossils in North America, and mammoth fossils in Siberia, although living elephants are today only found in Africa and South Asia. He suggested the American ones had become extinct, while the mammoths had changed as they migrated south.

I've got it!

Erasmus Darwin was Charles Darwin's grandfather. He was a doctor, poet and naturalist, and in his book 'Zoonomia, or, The Laws of Organic Life' he was one of the first people to propose a theory of evolution. He never hit on the idea of natural selection, but did recognise the importance of sexual selection (see page 59) and realised it could cause changes in species.

GRADUAL CHANGES

In the early 1800s Jean-Baptiste Lamarck, inventor of the terms 'invertebrate' and 'biology', was the first person to develop a coherent theory of the development of life on Earth and its evolution. He believed that life had originated by spontaneous generation, rather than creation by deity, and had then become more complex and varied over many generations. Lamarck suggested how this could happen. His idea is often called the 'Theory of Evolution by Acquired Characteristics'. In simple terms, he thought that the more an animal used an organ during its lifetime, the more well-developed it would become and that these changes could be inherited by offspring if both parents had the same developments.

THE EVOLUTION OF THE GIRAFFE'S NECK, ACCORDING TO LAMARCK:

- 1) Early giraffes had short necks.
- 2) Giraffes reach upward to graze on leaves.
- 3) This stretches their necks very slightly over their lifetimes.
- 4) The next generation of giraffes inherits these slightly longer necks.
- 5) This process is repeated over many generations until we arrive at modern, long-necked giraffes. Lamarck was not suggesting that their necks suddenly shoot out like telescopic poles!

THE PROCESS ALSO WORKED THE OTHER WAY:

- 1) Early penguins had wings with which they could fly.
- 2) Penguins spend most of their time swimming and very little flying.
- 3) Their wings become smaller, with smaller feathers, from lack of flying.
- 4) The next generation of penguins inherits these smaller, more flipper-like wings.
- 5) This process is repeated over many generations until we arrive at the modern penguin, which can no longer fly and whose wings are now adapted to help it swim instead.

Busy Little Fingers: Music

This bright and busy book provides a fun first look at music, with lots for busy little fingers to try!

- Pantone and spot UV cover finishes
- Fun flexi format is perfect for busy little fingers!
- A vibrant new series for 4-6 year-olds exploring the creative arts
- Fun artwork by Eleonora Marton, and expert text by children's author Eva Wong Nava
- Contents: Hello, Music!, Classical, Opera, Jazz, Soul, Blues, Folk, Country, Rock, Pop, Hip Hop
- **Celebrating 10 Years of Extraordinary Illustrated Books**

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Ancient Love Stories

THE SACRED BAND OF THEBES

This was the final meeting place of the Sacred Band of Thebes, one of the most remarkable and most loyal armies that had ever lived. A bold experiment in an open town square by attacking war and heroes alike, who had died fighting for the freedom of the Greeks. As warriors, not just of soldiers, but of a hundred and fifty such lovers.

Born together by love loyalty to each other, the crack team of warriors was founded in Thebes in 378 BC by an extraordinary visionary by the name of Pammenes. It began as a resistance corps against the looming military power of Sparta (recovered the world over for its legendary military prowess across the continent to the south. These were chivalry, aristocratic, open, splashing blood across the pages of history, and well suited to the birth of a new kind of army.

HERODIAS AND ANTHOCHUS

These parts first crossed across years earlier, when Herodias - ruler of the Roman world and self-proclaimed prince of peace - took a summer jaunt across the Roman province of Bithynia, in northern Turkey, where Antiochus had his home. The emperor, busy with his job, probably did not spot Antiochus among the crowds of adoring subjects and eager petitioners. But one of his mistresses did - and, as usual, with an eye to the emperor's taste, spent a night in the palace in the beautiful, lock-up-locked young man. Antiochus was duly offered a domus (later admission to the exclusive imperial estates along with a tuition package to the emperor's personal academy in Rome. To his boy from a distant village on the fringe of the Roman empire, this must have seemed an offer too good to be true - a one-way ticket to live among the stars. But, in any good student of mythology would have known, by invitation to the sun and you might get burned.

Antiochus' rise to the top was meteoric even by Roman standards, where there were plenty of holy emperors who made it to the big time. Set among the other staff of the imperial household, Antiochus - handsome, good-looking, smart, with a magnetic personality and a sensitive taste for Herodias' favored love - quickly caught the emperor's eye. Herodias was instantly besotted, and Antiochus became his paragon. In the summer of 128 BC, at the age of seventeen, Antiochus was personally selected to accompany Herodias on a tour of Greece (Herodias was a notorious Greek sympathizer, then said - Asia Minor and, finally, Egypt.

It was clear to everyone that Herodias was willing to let Antiochus out of his sight - and together, they took part in many extraordinary experiences on their around-the-world trip. A night-long dip into mystical events at the Thracian Mountains of Greece. A bank hour here in the highlands of Asia Minor. A quest - about the searching out of Herodias' much-loved Greek mythology books - to take down a mountain lion that had been terrorizing the people of Licia. On all these adventures, the new obsession with each other grew steadily.

SHAH JAHAN AND MUMTAZ MAHAL

The story of Shah Jahan and Mumtaz Mahal is one of the most beautiful love stories of all time. A tale of passion, devotion, tragedy and ultimate sacrifice, their love story is a testament to the power of love. Mumtaz Mahal, the great favorite of Shah Jahan, was a woman of extraordinary beauty and intelligence. Her father, the noble, family nobility, called and hidden in the lower reaches of the harem was allowed, for a single night, to sleep with him and play down his a substantial stake before making love - but the private meeting of the great emperor and a line of the harem princess only. Slipped in the royal garden under a night sky with his hands, glowing from the moon, the father, the emperor and his relatives turned early among the women, who would and honored over the years of their union. It was, in 1627, that Prince Khurram, the future Shah Jahan, first caught the eye of the beautiful Mumtaz Mahal, granddaughter of one of the royal family's most renowned scholars. It was love at first sight between the two, as they said. And it was love that would shape history.

At the time, the Mughal empire was about to reach its dazzling zenith. The Shah Jahan emperor, the future emperor Shah Jahan, had made down with his father from the mountains in the north, finally a hundred

MARK ANTONY AND CLEOPATRA

wafted by attendants dressed as cupids and sea-nymphs: Cleopatra, Ruler of Egypt. Goddess of the Nile. Queen of one of the wealthiest countries in the world. Beautiful, certainly, at just twenty eight, but more than anything, utterly, alluringly certain of her star-quality charisma. As one writer put it, "her sex appeal, together with her powers of persuasion and her ability to charm all around her, made her simply, irresistibly desirable." This was who had come to call on Mark Antony, one of the most powerful men in Rome (and so, at that time, the world). Antony was a soldier, a devotee of the wine-god Dionysus, a playboy extraordinaire - a man, in other words, who lived life in vivid technicolour.

If anyone was going to make Rome's fun-loving general pay attention, it was going to be the young queen sailing towards him dressed in gold.

But there was more to this than just sex appeal. For Antony, vying to hold onto his position of power amidst the remains of the crumbling Roman Republic, Cleopatra meant Egypt, and Egypt meant two things: grain and gold. Both were essential to fund (and feed) his battle for world domination. For Cleopatra, Antony meant Rome's backing for her precarious hold on power back home, following a decade of civil war, during which the young queen had gone into exile and returned with an army to take the throne from her brother. No meeting could be more important for either of them. It was a moment well worth a bit of theatre, not to mention a spot of role play.

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- Sample contents: The First Prosthetics, Jack E. Steele - Father of Bionics, Arne Larsson - The First Pacemaker Patient, How Cochlear Implants Work, Eye Replacements, Keith Hayman - The First Bionic Eye, How Bionic Limbs Work, Campbell Aird - The First Prosthetic Arm, Exoskeletons, Neural Implants, The Paralympics, Neil Harbisson - The First Cyborg, Ethics
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- As told by UK Sepsis Ambassador Patrick TJ Kane
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics

New materials have allowed frames for glasses to become lighter and more durable. The colour of lenses has changed too, creating the first purpose-built sunglasses. These work by adding cerium oxide (a type of chemical compound) into the glass to filter out harmful ultraviolet light from the sun. Sunglasses quickly became fashionable, and in 1938, it was reported that 20 million sunglasses had been sold the year before in the US. Interestingly, only a quarter of those people needed sunglasses for medical reasons. This development is an example of a product that was initially designed to benefit a few but ended up benefitting many. It is testament to the importance of innovation within the disabled community.

The latest breakthrough in eyewear has come more recently, with EnChrome® glasses first launching in 2012. These special glasses are designed to help alleviate problems caused by colour-blindness.

People who are colour-blind find it difficult to distinguish between certain colours, such as red and green. EnChrome® glasses use the same principle as cerium oxide in the first sunglasses, but instead of filtering out harmful UV light, EnChrome® glasses filter out the wavelengths of light that get confused by the brain in those people with red-green colour vision deficiency.

This visually extraordinary book presents the history of money as it has never been seen before - from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

DIFFERENT KINDS OF MONEY

Money serves because it is traded, but this trade doesn't come out of nowhere. It has to be based on something. There are several reasons why money might be traded. Some money is traded because it is made of something valuable, such as gold or silver. This is called commodity money. Another kind is traded because it represents something valuable. This is called representative money. A third kind is traded simply because a government tells it is valuable. This is called fiat money.

COMMODITY MONEY

The earliest form of commodity money was cowrie shells. They were small, round, and easy to carry. They were used in many parts of the world, including the Indian subcontinent, the Mediterranean, and the Caribbean. Commodity money is made from things that have value in themselves, such as gold, silver, and cowrie shells. It is used to buy things that have value in themselves, such as food, clothing, and shelter. Commodity money is also used to store value. It can be kept for a long time and used to buy things in the future.

REPRESENTATIVE MONEY

The earliest form of representative money was gold coins. They were made of gold and had a picture of a king or a queen on them. They were used in many parts of the world, including the Roman Empire, the Islamic world, and the European Middle Ages. Representative money is made from things that have value in themselves, but it is not the thing itself. It is a piece of paper or a metal coin that represents the thing. Representative money is used to buy things that have value in themselves, such as food, clothing, and shelter. Representative money is also used to store value. It can be kept for a long time and used to buy things in the future.

FIAT MONEY

Fiat money is a type of money that is not backed by a commodity. It is created by a government and is used to buy things that have value in themselves, such as food, clothing, and shelter. Fiat money is used to store value. It can be kept for a long time and used to buy things in the future. Fiat money is also used to buy things that have value in themselves, such as food, clothing, and shelter.

A WORLD WITHOUT MONEY

To understand why money is useful, let's try to imagine a world without money. In such a world, the only way to get hold of the things you need would be to make or grow them, or steal them from other people. These people are called barter. Barter is the exchange of goods or services for other goods or services without using money.

BARTER AND GIFTS

Barter is the exchange of goods or services for other goods or services without using money. It is a way of getting what you need without using money. Barter is often used in a world without money. It is also used in a world with money. Barter is often used in a world without money. It is also used in a world with money.

THE PROBLEMS WITH BARTER

Barter has several problems. One problem is that it is difficult to find someone who has what you need and who wants what you have. Another problem is that it is difficult to measure the value of things. A third problem is that it is difficult to store value. Barter is often used in a world without money. It is also used in a world with money.

COMMODITY MONEY

Commodity money is a type of money that is backed by a commodity. It is used to buy things that have value in themselves, such as food, clothing, and shelter. Commodity money is also used to store value. It can be kept for a long time and used to buy things in the future. Commodity money is also used to buy things that have value in themselves, such as food, clothing, and shelter.

WHAT MAKES A GOOD FORM OF MONEY?

The earliest forms of money were very different to the money we use today. There was no paper or printing process or machines to make money. People had to make it with their hands. They used things like cowrie shells, gold, and silver. These things were valuable because they were hard to come by and they were easy to carry. A good form of money should be easy to carry, easy to store, and easy to use.

COMMODITY MONEY

Commodity money is a type of money that is backed by a commodity. It is used to buy things that have value in themselves, such as food, clothing, and shelter. Commodity money is also used to store value. It can be kept for a long time and used to buy things in the future. Commodity money is also used to buy things that have value in themselves, such as food, clothing, and shelter.

REPRESENTATIVE MONEY

Representative money is a type of money that represents something valuable. It is used to buy things that have value in themselves, such as food, clothing, and shelter. Representative money is also used to store value. It can be kept for a long time and used to buy things in the future. Representative money is also used to buy things that have value in themselves, such as food, clothing, and shelter.

FIAT MONEY

Fiat money is a type of money that is not backed by a commodity. It is created by a government and is used to buy things that have value in themselves, such as food, clothing, and shelter. Fiat money is used to store value. It can be kept for a long time and used to buy things in the future. Fiat money is also used to buy things that have value in themselves, such as food, clothing, and shelter.

QUIRKY CURRENCIES

Many unusual objects were used as money in the era before notes and coins. These included foodstuffs such as barley, rice, corn and wheat. The Chinese used tea bricks to pay for things, whereas the Aztecs used cacao beans, and the peoples of ancient Africa and the Middle East measured value in coffee beans. The Mesopotamians kept sacks of grain in protected barns, much like the banks of today. When stored carefully, these foods could provide a reasonable store of value. But a storm or a bad harvest could wipe out your wealth.

MONEY YOU CAN EAT

Some surprising foods have been used as units of exchange in different parts of the world. Here are some of them.

BUTTER

The Pilgrims of North America used butter as a form of money. They used it to buy things like corn and beans. Butter was a valuable commodity because it was easy to store and it was easy to carry.

CHEESE

In the early 1800s, the Swiss used cheese as a form of money. They used it to buy things like cloth and tools. Cheese was a valuable commodity because it was easy to store and it was easy to carry.

EELS

In the early 1800s, the Japanese used eels as a form of money. They used it to buy things like rice and silk. Eels were a valuable commodity because they were easy to store and they were easy to carry.

COCONUTS

In the early 1800s, the people of the Pacific used coconuts as a form of money. They used it to buy things like cloth and tools. Coconuts were a valuable commodity because they were easy to store and they were easy to carry.

EGGS

In the early 1800s, the people of the Caribbean used eggs as a form of money. They used it to buy things like cloth and tools. Eggs were a valuable commodity because they were easy to store and they were easy to carry.

POTATO MASHERS

In ancient Cameroon, potato mashers were used as a currency. These heavy iron objects, called ensusbas, were shaped like a club.

KISSI PENNIES

The kissi penny was a currency used mainly in West Africa in the first half of the twentieth century. They were long iron rods, usually arranged in bundles of twenty. A cow could be bought for 30 or 40 bundles.

IRON SNAKES

The Lobi tribe of Burkina Faso used iron snakes as a currency. They would also attach them to their calves as a protection from snake bites and lightning.

KNIVES

Large bronze knives circulated as currency in ancient China between 600 and 200 BCE. According to one story, this started when a prince who was running low on money to pay his troops allowed them to use their knives to pay for goods in the local village.

RAI STONES

The small Pacific island of Yap possesses the world's biggest money. Rai stones are huge discs of rock weighing up to 8 tonnes each. The stones are rarely moved, and are not used for day-to-day transactions, but they change hands as ceremonial gifts, to forge alliances, resolve conflicts or to apologise for wrongdoing.

This visually extraordinary book presents the history of medicine as it has never been seen before.

- Sample contents: The History of Medicine, Learning from the Past, Ancient Beliefs, Mental Health, How Medicines Work, Opening Up the Body, The Power of Plants, Malaria Medicines, Making Medicines, Poisons, Hospitals Through History, Early Surgery, Cholera, Plagues and Pandemics, Vaccination, D.I.Y. Medicine, Transplants, Prosthetics
- Expertly written by curator, lecturer and historian, Briony Hudson
- Striking artwork from Aquila artist Nick Taylor is sure to make this title stand out from the crowd
- Perfect for students but also the ideal gift book for general interest readers

Art is Everywhere

A playful introduction to art history.

- Growing demand for children's art books that aren't biography or activity
- Fresh, inspiring take on a strong topic
- Highly accessible angle - discusses ideas and techniques that can be applied to art anywhere and everywhere
- Author is a knowledgeable art historian with a witty, unique tone, and years of experience with leading art workshops for children
- Both UK and international sales have seen demand for more 'art' titles. A great opportunity for us to show support for suffering creative arts scene and fill a gap on our list.
- Subjects covered - Why Do we Make Art?, Brush Strokes, Patterns, The Power of Colour, Art Can be Anything, Symbols

Art is Everywhere

This is Keith, a world-renowned art historian. Keith also happens to be an ostrich.

This is my hat. Rather pink, isn't it?

Art history is quite a good form. If you like when you see it, you can add to your museum like hat. Art historians like Keith study works of art and explain how their meanings have changed throughout history.

This is Keith's beloved research assistant, Marwan.

SO WHAT IS ART?

Art has been around for hundreds of thousands of years. Every time someone made a piece of art, they did it to tell the world something or to convey their beliefs and feelings. In fact, they used art to tell everyone else that someone was it really differently. Every time someone looks at a piece of art, it gets a brand new meaning.

Art can be made out of paint or pencil, clay or stone, or marble and wood - almost anything at all! Art is all around us and it's used for all sorts of things - and it's not always to look beautiful!

Many people in the past said that ostriches can't be art historians. Keith sure showed them!

Perhaps you'd like to know a bit more about where Keith is from. Well, though where you are from isn't the most interesting thing about you, the most interesting thing about you is where you are **GOING**.

Art has the power to transport you anywhere - from the streets of Venice to outer space!

After all, art isn't just in **GALLERIES**... it is everywhere, all around us. It's in our streets, in our homes and in our dreams.

It's not just **EFFECTIVE**... it can also be abstract, quiet, imaginary or normal!

It's not just **BEAUTIFUL**... it can be confusing, silly, sad, funny and even thought-provoking!

It's not just for **EXPERTS**... but for people of all ages to enjoy and interpret. But we are getting ahead of ourselves!

Keith decided the time had come to write this book when a certain incident occurred...

"This isn't what art is about," Keith thought as she left the gallery.

The really exciting thing about art isn't standing in a room to look at one famous painting. The exciting thing about art is the way it makes you feel and the things it can show you.

Art is a language, just like English and Spanish and **Chinese** (Mandarin) and **Japanese** (Katakana). It can tell you stories through the lines, patterns and colours. The trick is learning how to recognise what art is trying to show you!

"Art is everywhere and for everyone to enjoy. And I'm going to prove it," said Keith to Marwan.

You can find art in all sorts of places - it can be over your head and under your feet. In fact, one of the earliest forms of art we know of was painted a couple of 40,000 years ago by early humans! You can still see their paintings of animals and patterns in caves today.

One very special thing about these paintings is the way the artists have managed to show the animals with just a few lines - showing the movement of the animal's shape. Even thousands of years later, artists are still trying to do the same thing. What kind of shapes can you make with one line?

The **INCIDENT** was this.

Keith was in a big gallery somewhere, looking at the artwork on display. There were a lot of other people doing the same thing. I mean A LOT. With some pieces of art, you even had to wait your turn to look! And then Keith noticed something.

There were hundreds, there were **THOUSANDS** of beautiful, gorgeous, sumptuous pieces of art. Art as far as the eye could see! But the people visiting the gallery were only looking at the art that they were told to look at, or at the pieces that they recognised. They took a photograph, and then they quickly moved on.

Keith tried to get the crowd's attention to show them the many other marvellous paintings, sculptures, pots and textiles, but they ignored her. This made Keith rather angry.

How Many Ways Can You Cook An Egg?

Apple and Sultana Pancakes with Cinnamon Butter

MAKES 8 PANCAKES
 100g (3.5 oz) plain flour
 100g (3.5 oz) sultanas
 1 egg
 100g (3.5 oz) milk
 100g (3.5 oz) butter, melted
 1 tsp cinnamon
 1 tsp vanilla extract
 100g (3.5 oz) butter, melted
 1 tsp cinnamon
 1 tsp vanilla extract

These warm, fluffy pancakes are not only great with apples, but you can also mix them with other fruits to match the season. Puffed pancakes, baked overnight, become a natural choice with sultanas – once you know the texture of these sultanas is possible, you can really branch out. Experiment with different types in the future too, like raisins or ground ginger.

- 1 Heat and cook the apples, then grate into the larger size of the large grater and rub the other size over them. Then the sultanas will fall through and get to the grater. Add the ground ginger to a large mixing bowl with the grated sultanas.
- 2 To make the batter, add the egg and milk to the mixing bowl, then stir to blend. Add the plain flour, sultanas and cinnamon to the bowl and mix together.
- 3 Take one of the butter (cinnamon) about 100g (3.5 oz) and melt it in a small pan. Then the sultanas will fall through and get to the grater. Add the ground ginger to a large mixing bowl with the grated sultanas.
- 4 Using a milk add the batter to the pan. The pancakes should be about the size of a Big Mac. Turn the heat down to medium and cook for 2-3 minutes. Turn the heat down to medium and cook for 2-3 minutes. Turn the heat down to medium and cook for 2-3 minutes.

Apple, Onion and Sage Relish

MAKES A LITTLE BIT OF A RELISH
 100g (3.5 oz) apple
 100g (3.5 oz) onion
 100g (3.5 oz) sage
 100g (3.5 oz) vinegar
 100g (3.5 oz) sugar
 100g (3.5 oz) salt

The character of the Granny Smith apple is perfect for accompanying rich flavours, such as cheese, nuts, sausage and meat. This relish is also lovely with bread, particularly with wholemeal and rye. The whole can also be cooked – just cook the Granny Smith with a more appropriate flavour or seasoning, and serve on a bun with a dash of water for a rather, generous sauce. It's the perfect accompaniment to a lovely Sunday roast with all the fixings!

- 1 Add the sliced onion to a bowl and add the vinegar. This technique softens some of the raw onion taste.
- 2 Add the sliced apple to the bowl with some salt. This technique softens some of the raw onion taste.
- 3 In a small frying pan, add the butter and onion. Fry for 5 minutes, then add the sage leaves. Fry for 5 minutes, then add the onion and apple. Fry for 5 minutes, then add the onion and apple.
- 4 Drain the sliced onion and pat dry. Then add to the frying pan. Fry for 5 minutes, then add the onion and apple.
- 5 Drain the onion and pat dry. Then add to the frying pan. Fry for 5 minutes, then add the onion and apple.

SWEETCORN FRITTERS

MAKES 10 FRITTERS
 100g (3.5 oz) sweetcorn
 100g (3.5 oz) flour
 100g (3.5 oz) egg
 100g (3.5 oz) milk
 100g (3.5 oz) oil

Get ready for a bit of fun in the kitchen! They are super adaptable and you can try many many variations to get the combination you like. For example, swap potato for sweetcorn if you're not keen, or add a sliced chili if you feel like you need some heat. Adding a dash of salt to the batter can be helpful. Shredded sweetcorn, sweet potato or frozen peas would work well here too. Through the batter, you can add any other vegetables and anything else – people for a while!

- 1 In a large mixing bowl, add the corn, spring onions, sweetcorn, salt and egg. Stir well for 10 minutes. Then add the flour, milk and egg. Stir well for 10 minutes. Then add the oil and cook for 10 minutes.
- 2 For a sweet corn fritter, add the corn, spring onions, sweetcorn, salt and egg. Stir well for 10 minutes. Then add the flour, milk and egg. Stir well for 10 minutes. Then add the oil and cook for 10 minutes.

MEXICAN STREET CORN

MAKES 10 FRITTERS
 100g (3.5 oz) sweetcorn
 100g (3.5 oz) flour
 100g (3.5 oz) egg
 100g (3.5 oz) milk
 100g (3.5 oz) oil

This is a wonderful way to eat corn – really, sweet and warm. It's all combined – and best eaten on a hot summer's day, maybe served with a dollop of sour cream. If you don't have your own in the house, you can buy it from a shop. It's a wonderful way to eat corn – really, sweet and warm. All About Apples

Although some apples are in season all year round, many of them are at their best when the leaves on the trees start to turn brown and the temperature cools. Crunchy, shiny, crisp, juicy apples make a welcome change to the often heavy, warming food of the colder months. But apples baked into pies and puddings are soft and comforting and are a delicious way to greet the autumn season.

Experiment with combining a couple of different apples when cooking for more interesting flavours. If you're able, shopping at loose-pick green-grocers means you can buy a wider variety.

MOST SWEET
 Royal Gala
 Golden Delicious
 Egremont Pippin
 Jazz
 Opal
 Red Delicious
 Braeburn
 Bramley
 Granny Smith
 Pink Lady
 Red Prince
 Cook
 Most Tart

To get the best from your apples when cooking, you need to get to grips with their individual flavours and textures. Hard, dense Bramley or Braeburn apples hold on to their juices well, so they are best-suited to chopping and cooking until soft. Perky Cox or Gala apples are sweet and fragrant, so they are great for snacking on, or adding raw to salads or bircher muesli.

DO YOU KNOW?
 The world's heaviest apple was recorded in 2002 in Japan, weighing an enormous 2.4kg (5.3 lbs). That's three times heavier than a basketball!

There Are Amphibians Everywhere

An illustrated introduction to amphibians.

- Contents: There are amphibians everywhere; It's an amphibian! (So what is that that?); Amphibians have been around for ages; Where do amphibians live?; How do amphibians live?; Moving; Feeding; Life stories; Metamorphosis; Staying alive; Tropical terrors (poisonous frog spotlight spread); Amphibians and people
- Britta's There Are... series has sold a combined quantity of over 100,000 copies worldwide (as of July 2022)
- Lush and colourful illustrations to immerse young readers in the natural world
- Lively text and use of search-and-find element make these books informative and interactive.
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally

There are Mammals Everywhere

An illustrated introduction to mammals.

- A combined quantity of over 100,000 copies worldwide (as of July 2022) has sold for Britta's *There Are...* series
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally
- Contents: There are mammals everywhere; It's a mammal! So what is that that?; Mammals have been around for ages; Where do mammals live?; The savannah; Staying alive; Feeding; Moving (elephant spotlight spread); Mammal parents; Mali elephants; Birds and people
- The colourful exploration of mammals follows on from Britta Teckentrup's *There are Fish Everywhere*, *There are Bugs Everywhere*, *There are Reptiles Everywhere* and *There are Birds Everywhere*.

There are Mammals Everywhere

IT'S A MAMMAL! (SO WHAT IS THAT?)

There are almost 6,000 species of mammal alive today. Mammals may look very different on the outside, but they all have **skullcaps** that allow them to perform a wide range of movements. Some mammals have four legs and a tail, but others walk on two legs, fly using two wings, or have flippers and fins.

BIG BRAINS
Mammals have a large brain, which means they can think and learn. This is why they can use tools, solve problems and even play together.

BREATHING AIR
Mammals have lungs, which means they can breathe air. This is why they can live on land, in the water and even in the air.

RECORD-BREAKERS
Mammals have a wide range of sizes, from tiny shrews to giant blue whales. They also have a wide range of lifespans, from a few days to over 100 years.

BATS
Bats are the only mammals that can fly. They have wings made of skin stretched over their forelimbs, which allows them to fly.

CATS
Cats are the only mammals that can retract their claws. This allows them to walk silently and climb trees.

SEALS
Seals are the only mammals that can walk on their flippers. They also have a thick layer of blubber to keep them warm in the water.

MAMMALS HAVE BEEN AROUND FOR AGES

Mammals have been around for a really long time. The first mammals looked like shrews, which are tiny mammals with long, pointed snouts. They lived about 200 million years ago. Other mammals evolved like birds and some of these grew much bigger than cats. Other mammals had long necks, long legs and some had long tails. Some mammals had long, curved horns and some had long, curved tusks.

PROBOSCIDEANS
Proboscideans were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

PRIMATE
Primates were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

RODENT
Rodents were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

REPTILE
Reptiles were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

SAURIA
Saurians were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

SWINE
Swine were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

TURTLE
Turtles were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

WORM
Worms were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

WHY ARE MAMMALS UNIQUE?

Mammals are a large and very successful group of animals. They have been able to spread across the world and survive in all sorts of habitats because they have some unique ways to stay warm, find their young and get food.

WARM BLOOD
Mammals are endothermic, which means they can control their body temperature. This allows them to live in a wide range of habitats, from the hot desert to the cold tundra.

BIG BRAINS
Mammals have a large brain, which means they can think and learn. This is why they can use tools, solve problems and even play together.

SEA OTTERS
Sea otters are the only mammals that live in the water. They have a thick layer of blubber to keep them warm in the water.

WHALES
Whales are the largest mammals that live in the water. They have a thick layer of blubber to keep them warm in the water.

GIANTS
Giants were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

REPTILES
Reptiles were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

SAURIA
Saurians were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

SWINE
Swine were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

TURTLES
Turtles were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

WORMS
Worms were among the earliest mammals to have long, curved tusks. They lived about 60 million years ago.

WHERE DO MAMMALS LIVE?

Nearly all species of mammals live on land – about 98 per cent of them. However, there are groups of mammals that spend most, or all, of their lives in water. These include **pinnipeds**, **whales** and **dolphins**. Other groups of mammals are superb swimmers and spend lots of time in the water, but choose to stay on land when they give birth or raise their young.

WHALES
Whales are perfectly adapted to life in the ocean. They have smooth skin and torpedo-shaped bodies that slip easily through the water. They have **flippers** instead of legs and they breathe using **blowholes** on the top of their heads.

Blue whale babies are enormous and they grow a thousand times faster than a human baby!

WHALES mothers give birth in the ocean. Their babies are called **calves** and they stay close to their mothers while they grow and learn how to find food.

BEAVERS
Beavers belong to a group of mammals called **rodents** that have super-strong front teeth. They use these teeth to gnaw trees and branches and use the wood to build their homes in the middle of a pond or slow-flowing river.

A beaver's home is called a lodge. It contains rooms, called chambers, where young beavers are kept safe from predators.

Beavers are good swimmers. They enter the lodge through tunnels underwater and can stay safe and warm in their home during long, cold winters.

TUNDRA

The land around the Arctic is called the **tundra** and it is famous for its snowy blizzards and blustery winds. It is a difficult place to live – unless you can stay snug inside your own super-thick fur coat. **Musk oxen** have hair that almost touches their toes and they snuggle up next to each other to get the benefit of some buddy-body-warmth!

FORESTS
Tropical forests are packed with tall trees that bloom all year round, producing plenty of fruit for any animals that can reach it. **Orang-utans** spend almost all of their lives in the branches, using their strong arms to climb from tree to tree, following the fruit as it ripens.

DESERTS
Deserts are very dry habitats that experience extreme temperatures. **Bactrian camels** survive desert life by storing food and water as fat inside their two **humps**. They grow thick, shaggy fur for the icy winter, and shed it for the hot summer months.

CAVES
Many species of bat gather together in caves in big groups called **colonies**. They rest during the day by hanging upside down from the cave ceiling and go hunting at night. Some caves can house more than five million bats!

CAN YOU FIND?
Other animals like to camp out in a beaver's lodge, including **water voles**. Can you find one of those small, furry rodents with a long tail?

There are Birds Everywhere

Explore the world of birds in a sumptuously illustrated non-fiction book

- Contents includes bird anatomy, habitats, flight, feeding, hunting, courtship, migration, and the relationship between birds and humans.
- Britta's *There Are...* series has sold a combined quantity of over 100,000 copies worldwide (as of July 2022)
- Lush and colourful illustrations to immerse young readers in the natural world
- Lively text and use of search-and-find element make these books informative and interactive.
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally

There are Birds Everywhere

IT'S A BIRD! (SO WHAT /S THAT?)

There are more than 10,000 species of bird around the world and they all have a beak, two legs, two wings and a feathered body. Unlike fish, birds lay eggs with a hard shell to protect the chick that grows inside. After a few weeks, the eggs hatch and the parents feed the chicks until they can take care of themselves.

WHY BREATHE? Birds breathe through their lungs. They take in oxygen from the air and breathe it out. This oxygen is used to power their bodies. The amount of air that a bird breathes in and out is called its respiratory rate. A bird's respiratory rate is higher than a mammal's because birds have a higher metabolic rate.

WHY FLY WHEN IT'S FUN TO RUN? Birds have wings and can fly. This allows them to escape predators and find food. Some birds, like penguins, cannot fly. They have adapted to life on land and in the water. Other birds, like eagles, are excellent fliers. They have large wings and strong muscles. Some birds, like robins, are ground-dwellers. They have short wings and are good at running.

SENSES Birds have keen senses of sight and hearing. They can see colors and shapes that humans cannot. They can also hear sounds that humans cannot. Some birds, like owls, have excellent night vision. They can see in the dark. Other birds, like songbirds, have excellent hearing. They can hear sounds that humans cannot.

FLYING FEET A bird's feet are adapted for flying. They are long and thin. They have sharp claws. Some birds, like eagles, have powerful feet. They can catch their prey with their feet. Other birds, like robins, have weaker feet. They are good at running.

WINGS A bird's wings are adapted for flying. They are large and thin. They have feathers. Some birds, like eagles, have powerful wings. They can fly for long periods of time. Other birds, like robins, have weaker wings. They are good at running.

BEAKS A bird's beak is adapted for its diet. Some birds, like eagles, have sharp beaks. They can catch their prey with their beaks. Other birds, like robins, have weaker beaks. They are good at running.

WHY FLY WHEN IT'S FUN TO RUN? Birds have wings and can fly. This allows them to escape predators and find food. Some birds, like penguins, cannot fly. They have adapted to life on land and in the water. Other birds, like eagles, are excellent fliers. They have large wings and strong muscles. Some birds, like robins, are ground-dwellers. They have short wings and are good at running.

BIRDS HAVE BEEN AROUND FOR AGES

Birds have been around for a really long time. Many dinosaurs had colorful feathers and, by around 150 million years ago, some of them had evolved into birds. Birds are the only dinosaurs that survived the extinction event 65 million years ago. They have evolved into many different species. Some birds, like eagles, are excellent fliers. They have large wings and strong muscles. Some birds, like robins, are ground-dwellers. They have short wings and are good at running.

WHY FLY WHEN IT'S FUN TO RUN? Birds have wings and can fly. This allows them to escape predators and find food. Some birds, like penguins, cannot fly. They have adapted to life on land and in the water. Other birds, like eagles, are excellent fliers. They have large wings and strong muscles. Some birds, like robins, are ground-dwellers. They have short wings and are good at running.

WHERE DO BIRDS LIVE?

Birds need a safe home to raise their chicks, in a place where they can find food nearby. They can live in trees, in caves, in burrows and in the ground. Some birds, like eagles, live in trees. They build nests in the branches. Other birds, like robins, live in the ground. They dig burrows. Some birds, like penguins, live in caves. They live in the cracks of the ice. Some birds, like eagles, live in the ground. They dig burrows.

SECRET BIRDS Some birds live in secret places. They are called secret birds. They are good at hiding. They can fly away when they are seen. Some birds, like eagles, are excellent fliers. They have large wings and strong muscles. Some birds, like robins, are ground-dwellers. They have short wings and are good at running.

MOUNTAIN BIRDS Some birds live in mountains. They are called mountain birds. They are good at flying. They can fly for long periods of time. Other birds, like robins, are ground-dwellers. They have short wings and are good at running.

KITCHEN CURFEWS Some birds live in kitchens. They are called kitchen curfews. They are good at flying. They can fly for long periods of time. Other birds, like robins, are ground-dwellers. They have short wings and are good at running.

REST FOR NESTS Some birds live in trees. They are called rest for nests. They are good at flying. They can fly for long periods of time. Other birds, like robins, are ground-dwellers. They have short wings and are good at running.

A PLACE TO PERCH Some birds live in trees. They are called a place to perch. They are good at flying. They can fly for long periods of time. Other birds, like robins, are ground-dwellers. They have short wings and are good at running.

GROUND BIRDS Some birds live on the ground. They are called ground birds. They are good at running. They can run for long periods of time. Other birds, like robins, are ground-dwellers. They have short wings and are good at running.

CAN YOU FIND? Some birds live in secret places. They are called secret birds. They are good at hiding. They can fly away when they are seen. Some birds, like eagles, are excellent fliers. They have large wings and strong muscles. Some birds, like robins, are ground-dwellers. They have short wings and are good at running.

WATER BIRDS

Birds from all over the world gather at the Andalusian coast in Spain, where the Atlantic Ocean and Mediterranean Sea meet the land. Alongside rivers and wetlands, birds can find food in the shallow sea waters and rest before continuing their journeys to places where they will nest and lay their eggs.

OCEAN HABITAT Out at sea, there aren't many places to stop and rest, or to lay eggs. Many seabirds are long-distance travellers that have to fly for hours - or even days - dipping and diving to find food before they reach their coastal homes.

COASTAL HABITAT Coastal birds gather on Andalusian high cliffs, where they are safe from predators. They hunt fish in the sea, or pick up worms and shellfish that they find in the soft mud when the tide goes out.

WETLAND HABITAT Wetlands and rivers are home to many birds, but there's enough food for millions of migrating birds passing through, too. These weary travellers enjoy a well deserved rest before continuing their journeys.

WETLAND HABITAT There's a flash of bright yellow as some golden plovers fly past. These migrating birds nest in trees that grow alongside rivers and wetlands.

WETLAND HABITAT Puffins are called 'parrots of the sea' because they stand upright and have colourful faces. They nest all the coast where they hunt slippery sand eels to feed to their chicks.

WETLAND HABITAT As it wades through water, the grebe's feet disturb little fish, frogs or bugs, which the bird snaps up with its long beak.

WETLAND HABITAT Air sacs beneath a gannet's chest feathers work like cushions to soften the blow as it hits the water. Gannets can plunge more than 15 metres into the salty water to catch fish.

WETLAND HABITAT Tough shellfish are too hard for most birds to eat, but the oystercatcher has a strong, blunt beak that can easily crack open hard shells.

WETLAND HABITAT The black-winged stilt has longer legs for its size than any other bird. Long legs are useful when wading through shallow water looking for tiny insects to eat.

CAN YOU FIND? Marsh harriers nest on the ground, hidden by the tall reeds that grow in wetlands. They hunt mice, rats and voles as well as other birds. Can you find a harrier in its nest?

Gorgeous canines of every shape, size and colour bound through this book - all 101 of them!

- The perfect gift for dog lovers big and small
- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

Basenji

In the native Africa, the Basenji is known as 'the dog that doesn't bark'. While many dogs are often said to be 'sage to please', that just doesn't apply to this one. It is lively, imaginative and playful, but it does have a children's streak. The Basenji will usually learn what you want to teach it, but whether it will obey your commands depends entirely on its mood. That impertinent mind can be a problem, too, as anything you have lying around is likely to be investigated by your Basenji – usually by means of chewing. All that said, the Basenji makes a lovely pet as it adores people and playtime.

Life Expectancy 12-15 years | Height 45-50cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Tibetan Mastiff

If you look like a giant teddy bear but this mighty mastiff is not the dog for everyone. While it has a gentle and loving nature, its sheer size can be a bit off-putting, and it is strong-willed. The Tibetan Mastiff sees itself as an equal, rather than a pet, and can be very stubborn. It is thought these amazing dogs lived in Tibet thousands of years ago and were used as guards (not many people would stand up to a 60kg dog) for monks, known as 'lamas'. This is where they developed their thick coat to cope with the harsh climate.

Life Expectancy 10-14 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but doesn't shed much | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I can get up there!

Shiba Inu

The resident of its dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. But it's like a little single warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, *harae* (upright backbone), *oyasoi* (good nature) and *ishiki* (stoicism). It also tends to be possessive – like a moody toddler, the Shiba Inu doesn't like to share and if it could spare, it's first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

Life Expectancy 12-15 years | Height 40-45cm | Trainability It has a stubborn streak | Grooming Very little | Exercise Needs a good daily walk | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Parash Hound

This elegant hound was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Parash loves people and simply loves life. It's a natural clown – you can even teach a Parash to 'roll' and it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting hound, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

Life Expectancy 12-15 years | Height 50-60cm | Trainability Easy | Grooming Very little | Exercise Needs a lot of exercise | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Saluki

Praised by the travelling people of the Middle East, this ancient breed is thought to take its name from the Arabian city of Sals. To the Greeks, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their heads had to be fast of foot. There were once two different types of Saluki – short and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging.

Life Expectancy 12-15 years | Height 60-70cm | Trainability Average | Grooming Weekly brushing | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Alaskan Malamute

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahomet people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored – and a bored Malamute is trouble in waiting. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

Life Expectancy 10-12 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing | Exercise Lots | Most likely to say I'll be on your side | Least likely to say I'll be on your side

Tibetan Spaniel

This little dog likes to climb! Almost cat-like, it will try to find the highest perch from which it can watch over everyone and everything. Resembling a small lion (a powerful symbol in Tibet), it was highly prized as a watchdog. This watchful quality has been bred into the Tibetan Spaniel for thousands of years and it takes its role very seriously – don't even think about farting and blaming it on someone else in its presence! But don't expect your dog to be happy on its own. Tibetan Spaniels like company and get bored quickly – left to themselves they are likely to bark.

Life Expectancy 12-15 years | Height 25cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Afghan Hound

With its slender, exotic face, long silky hair and lithe body, the Afghan Hound is surely the supermodel of the dog world. And as well as being one of the most beautiful breeds in the world, the Afghan is possibly the oldest. It comes from Afghanistan, where it was known as the Tazi, and was used to hunt dangerous animals, such as leopards. It was not only brave, but also extremely fast, capable of running at speed for many kilometres. Its independent nature means it does like attention, but on its own terms.

Life Expectancy 10-12 years | Height 60-66cm | Trainability This independent mind can be challenging | Grooming Lots of brushing | Exercise It needs plenty of room to move | Most likely to say Look how beautiful I am! | Least likely to say Give me a cuddle
