TAKE A BREATH!

Try this breathing exercise to help you relax:

STEP 1

Make sure you are sitting comfortably in a quiet and safe place. When you feel ready, close your eyes. Notice your breathing. Think about how it feels breathing in and breathing out. Try to breathe in through your nose and out through your mouth.

STEP 2

Place your hand on your tummy and focus on the feeling of your stomach rising and falling with each breath. When you breathe in, quietly say 'in' to yourself, and when you breathe out, quietly say 'out' to yourself.

STEP 3

Concentrate on nothing but your breathing and try to let go of any other thoughts you may have.

When you've had lots of practice at the breathing exercise, see if you can think about a happy memory at the same time. This way, your happy memory will take up all the space in your brain, and there won't be any room for the worries.

BUY NOTHING DAY

How much do you consume and throw away in a single day? The answer probably varies on different days of the week and at different times of the year. In wealthy parts of the world, too much waste and pollution is a problem. This is a day and act everyone in your household to agree to make it a day nothing day.

Set down with your family and make a list of all the things you buy in a normal week. I could include everything from your food to magazines, clothes and gifts.

For one day, make a promise to make do with what you have. Do not buy anything. How do you feel? How does the day go?

At the end of the day, make a list of the money you saved. How much time did you save from not shopping?

Now consider the future. You would not buy less and waste less in your everyday life?

WHY DO YOU THINK PEOPLE BUY SO MUCH STUFF?

DO YOU THINK THEY NEED EVERYTHING THAT THEY BUY? WHY?

THINK POSITIVE

When it comes to creating a greener, cleaner world there is a lot to do. But lots of good things are also happening every single day, right across the globe. Fill in a sticky note every time you find out about something positive. This is a day and act everyone in your household to agree to make it a day nothing day.

PROJECT PROJECT

Many animal species being today are endangered and some have already become extinct. Human beings and their actions are the biggest threat to that animals. How today.

THE TYPE OF ANIMAL I WANT TO PROTECT IS:

DRAW A PICTURE OF IT HERE:

DRAW AN ARROW TO SHOW WHERE THIS ANIMAL LIVES:

As we spread out across more and more of the planet, we destroy natural habitats, making it very difficult for some species to survive.

Do you get to find out about animal conservation? Pick an endangered species that you care about. Then find out if it either exists or at the library.

Now write about it on these project pages.

Features why this animal is endangered.

Three things that I can do to help.

This animal is amazing because:

I CAN SEE A RAINBOW

MAKE A BEAUTIFUL RAINBOW OUT OF OLD MAGAZINES

1

Turn up the pages of a glossy magazine or comic book into small scraps of paper.

2

Sort the scraps into colored piles.

3

Find some glue, then stick the most massive pieces onto the rainbow arch.

4

Using them to cover your schoolbooks. Creating zany, multi-colored hair. Pasting them onto cards to make gift tags. Clipping out headlines, letters and creating cool design posters.

Perspective

If you look at any object from different viewpoints, you will see that the parts that are closest to you look larger, and the parts furthest away from you look smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

Two-point perspective drawing: Two-point perspective shows two vanishing points on the horizon line. The object is drawn so that its lines converge towards these points. This creates a strong sense of depth and three-dimensionality.

One-point perspective drawing: One-point perspective shows one vanishing point on the horizon line. The object is drawn so that its lines converge towards this single point. This creates a sense of depth and focus.

Rats

Animals like rats make great cartoon characters. You can give them personalities and expressions, just as you can with your cartoon people.

Start by drawing the body in simple shapes. Add a long tail. Sketch the head and ears. Add a small nose and whiskers. Draw the legs and feet. Add a small tail. Sketch the head and ears. Add a small nose and whiskers. Draw the legs and feet. Add a small tail.

Bulldog

The bulldog is a classic cartoon character. Its face is perfect for a grumpy expression, which instantly gives it a character all of its own.

Start by drawing the head and neck. Add a small nose and whiskers. Draw the legs and feet. Add a small tail. Sketch the head and ears. Add a small nose and whiskers. Draw the legs and feet. Add a small tail.

Figure work

Adding clothes to a figure can help to define the character. This figure is dressed as a Victorian maid.

Start by sketching these simple shapes for the figure. Draw an oval for the head. Add ovals for the body and hips. Draw straight lines to connect the ovals and show the positions of the limbs. Indicate the joints with dots. Draw tube shapes for the arms, using your construction lines as a guide. Draw two shapes for the feet. Make the legs into tube shapes. Add a small circle for the position of the big toe. This will help you draw the shoes.

Drawing hands

Follow these steps to help you draw the shape of a hand. As you get better you will be able to draw different hand gestures.

Two parallel lines show the soles of the shoes. Try drawing these hand gestures.

Finish the head by adding the hair and eyelashes. Shade above the eyes and inside the ear.

Sketch in the hair and add the cap. Draw the shape of the clothes going around the body. Sketch in the dress using curved lines. Add details such as cuffs, buttons and a collar. The hem of the dress covers part of the feet. Add lines to the apron and at the bottom of the dress to show folds in the material. Add shading to areas like this where light wouldn't reach.

How To Draw Fantasy Art

Drawing materials

Try using different types of drawing papers and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tip to ballpoint, will make interesting marks - or try drawing with pen and ink on wet paper.

Pastels are over softer than charcoal, and come in a wide range of colours. Add an adult to your parent's drawing with charcoal to prevent smudging.

Wax crayons are useful for creating strong patterns of a drawing done with wax crayons.

Character proportions

This page shows some of the more popular fantasy figures and their proportions compared to a normal human figure. On average, the length of a human head should fit eight times into its body length. When you draw a fantasy figure anything goes - so let your imagination go wild.

Man beasts

Combining a human figure with an animal's head can create a great hybrid monster. You can get inspiration by drawing from life models. Photos from sports movies and figure reference manuals are a good source too. Why not try putting a snake or raccoon's head on a human body - see what you can create!

Amazon warrior

This powerful female figure is a classic action fantasy character. She must look strong and powerful but retain her femininity and beauty.

Sketch cylinder shapes for each arm which join at the elbow.

Legs: add the curved lines of the upper and lower leg, indicating the knee joint.

Add the foot shape and direction.

Draw in ovals for the head, neck, body and hips.

Drawing hands
Practise sketching your own hands in different positions. This will help you draw expressive hands on your characters.

Draw a long curved line to start the position of the body.

Draw in the boots shapes.

Complete the details on the boots.

Add the sword using straight lines.

Sketch in the position of the ears, nose and mouth.

Sketch in the shape of the hair mass.

Indicate the position and shape of the breasts.

Add the costume's draped cloth using simple lines.

Finish the detail on the sword. Small broken lines give the impression of shining metal.

Add shape, tone and details to the hair.

Draw in bracelets and armbands.

Add tone to the legs.

Draw in the top of the costume.

Add shade to areas where the light would not reach.

Boredom Buster: A Puzzle Activity Book of Spectacular Science

ON THE LEVEL

If you pour water into a series of tubes that are connected together, the water finds the same level in all the tubes.

But some of these tubes have been drawn wrongly! Can you find which tubes contain water at the wrong level?

HINT: It will help if you colour all the tubes connected to jar A red, and all the tubes connected to jar B blue.

TRICKS WITH LIGHT

Optical illusions are tricks that fool the eye. They make you see something that's not really there.

Hold the book up in front of you and tilt it to the left or right. What happens to the curved lines in the drawing below?

Can you see a triangle here? There isn't one in the drawing!

Stare very hard at the picture below, then slowly move it towards and away from you. What happens?

Are the sides of the square straight or curved? Check with a ruler.

Are the horizontal lines level or slanted?

PUT THE FISH IN THE BOWL

1. Trace the fish and bowl onto card. Colour them in, then cut out the two circles.

2. Tape the two pictures to a pencil, so both pictures face out.

3. Spin the pencil between your hands. Can you see the fish in the bowl?

DID YOU KNOW? Optical illusions aren't just for fun – they help scientists to understand how the eyes and brain work together.

GERMINATION

Most plants grow from seeds. If you plant a seed in a moist, sunny place it will start to germinate (sprout).

The tough seed coat splits open (1). First, a little root grows downwards (2), so the plant can take in water. Then, a little green shoot begins to grow upwards towards the sky (3). The new plant spreads its leaves in the light (4).

BEANPROUT MAZE
Help the new shoot find its way through the soil towards the light.

RISING AIR

When air is heated it rises. This is what makes a hot-air balloon rise. Air spirals upwards in currents called thermals where the sun heats the air near the ground.

This experiment uses the warm air from a radiator.

Colour the snakes, then cut them out to make a spiral. Gently pull the head and tail apart. Use scissors to make a hole in the nose, and attach a string. Hang the snakes over a radiator and watch them spin around!
