Ice Cream

"Creamy from dessert"

14

One of the most beloved treats from kids' menus is ice cream. In fact, it's the most popular dessert in the world. The first ice cream was made in Italy in the 14th century. It was a simple mixture of sugar, cream, and fruit. Over time, it became more complex, with the addition of eggs and vanilla. Today, there are countless flavors, from classic vanilla to exotic fruits. Ice cream is a delicious treat that everyone enjoys.

Easy Ice Cream

Ingredients: 1 cup heavy cream, 1/2 cup sugar, 1 egg yolk, 1/2 tsp vanilla extract.

Instructions: 1. Whisk cream and sugar until stiff peaks form. 2. Beat egg yolk and vanilla. 3. Fold egg mixture into cream. 4. Freeze in an ice cream maker or a shallow dish until firm.

Bicycle

"Freedom on two wheels"

15

The bicycle is a simple yet ingenious machine. It was invented in the 19th century and has since become a popular mode of transport. The first bicycles were called "boneshakers" because of the rough ride. Over time, improvements were made, including the addition of a chain drive and pneumatic tires. Today, bicycles come in many varieties, from road bikes to mountain bikes. They are a fun and healthy way to get around.

Petious Penny-Farthing

The penny-farthing was a type of bicycle that was popular in the late 19th century. It had a large front wheel and a much smaller rear wheel. It was called "petious" because it was so difficult to ride. The name "penny-farthing" came from the fact that it cost a penny to rent and a farthing to ride.

Camera

"Snap classics"

24

The camera is a device that captures light and converts it into a permanent image. It was invented in the 19th century and has since become an essential part of many people's lives. The first cameras were large and expensive, but over time, they became smaller and more affordable. Today, there are many types of cameras, from DSLRs to smartphones. They are used for everything from professional photography to casual snapshots.

Developed to Perfection

The camera has come a long way since its invention. In the 19th century, cameras were large and cumbersome. Over time, they became smaller and more portable. Today, cameras are found in almost every pocket and purse. They have also become more sophisticated, with features like autofocus and image stabilization.

High-Speed Train

"It's speed counts!"

25

High-speed trains are a type of train that is designed to travel at very high speeds. They were first developed in Japan in the 1960s. Since then, they have become popular in many other countries, including France, Germany, and China. High-speed trains are faster and more efficient than traditional trains. They are also more comfortable and have a lower environmental impact.

Marvellous Maglevs

Magnetic levitation (maglev) trains are a type of train that uses magnetic forces to levitate and propel the train. They were first developed in Japan in the 1960s. Maglev trains are faster and more efficient than traditional trains. They are also more comfortable and have a lower environmental impact.

Wind Turbine

"Harnessing the power of wind"

34

Wind turbines are a type of turbine that converts the kinetic energy of wind into electrical energy. They were first developed in the 19th century. Today, they are a common sight in many parts of the world. Wind turbines are a clean and renewable source of energy. They are also relatively easy to maintain and have a long lifespan.

Green Energy

Green energy is a type of energy that is produced from renewable sources. It includes wind, solar, and hydro power. Green energy is clean and sustainable. It is also becoming more and more affordable. As a result, it is becoming a popular choice for many people and businesses.

Helicopter

"A whirling way to fly"

35

Helicopters are a type of aircraft that can take off and land vertically. They were first developed in the 19th century. Today, they are used for a wide variety of purposes, from military operations to medical evacuations. Helicopters are a versatile and valuable mode of transport. They are also relatively easy to maintain and have a long lifespan.

Versatile VTOLs

Vertical takeoff and landing (VTOL) aircraft are a type of aircraft that can take off and land vertically. They are used for a wide variety of purposes, from military operations to medical evacuations. VTOL aircraft are a versatile and valuable mode of transport. They are also relatively easy to maintain and have a long lifespan.

Wheel

"The revolutionary design that makes the world go round"

17

The wheel is one of the most important inventions in human history. It was first used in Mesopotamia around 3500 BCE. The wheel made it possible to transport heavy loads more easily. It also made it possible to build larger structures and machines. The wheel is a simple yet ingenious design that has changed the world.

Potter's Wheel

The potter's wheel is a type of wheel that is used to shape clay. It was first developed in Mesopotamia around 3500 BCE. The potter's wheel made it possible to create more uniform and larger pottery. It is still used today by potters around the world.

Internet

"The world at your fingertips"

18

The Internet is a global network of computers that are connected to each other. It was first developed in the 1960s. Today, it is one of the most important inventions in human history. The Internet has changed the way we live, work, and play. It has made it possible to communicate with people all over the world. It has also made it possible to access a vast amount of information.

World Wide Web

The World Wide Web (WWW) is a system of interlinked hypertext documents that can be accessed via the Internet. It was first developed in the 1990s. The WWW has become one of the most popular and important parts of the Internet. It has made it possible to share information and resources more easily.

Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.
