Gigantosaurus - I Love Giganto

A ROARSOME lift-the-flap adventure with the dino babies!

- Over 2.2 million Jonny Duddle books sold worldwide!
- The TV tie-in publishing has sold over 180,000 copies through UK TCM and across 24 countries internationally.
- A brand new story that ties in with the *Gigantosaurus* TV series based on Jonny Duddle's original book.
- Episodes are available to watch on Disney+, YouTube and TinyPop. The show ranked as TinyPop's 5th best show in 2022, reaching almost 2 million children aged 4+.
- A joyful and fun lift-the-flap adventure with overarching themes of love and kindness - the perfect Valentine's Day, Mother's Day or Father's Day gift for dino and Gigantosaurus fans young and old.

Gigantosaurus – Dinos to the Moon

Join our favourite dinosaurs as they put on their dino-naut helmets and take off for the MOON!

- A brand new episode tie-in inspired by a season 2 episode of the *Gigantosaurus* TV series, based on Jonny Duddle's best-selling original book. This story focuses on science, dreams of space and lessons on not giving up.
- Over 2.2 million Jonny Duddle books sold worldwide
- An epic space adventure positioned to tie in with NASA's 2025 Moon landing mission, teaching readers the importance (and fun) of science.
- The Gigantosaurus episode tie-in series has sold a combined quantity of over 200,000 copies in the UK and foreign co-editions (as of July 2022)

Gigantosaurus – Dinos to the Moon

... And four little ones who couldn't sleep!
 "Look at the beautiful moon," said Tiny, gazing at the night sky.
 "I heard it's a huge snowball," Bill exclaimed.
 "It's a shame we'll never know," yawned Rocky. "Dinos can't go to the moon."

As the others climbed into bed and drifted off to sleep,
 Mazu stayed awake to think. "I'm sure I could get us there,"
 she said. "We just need something to take us."

The Little Gardener's Handbook

A vibrant introduction to gardening.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

The Little Gardener's Handbook

ALL ABOUT SOIL

Soil is the brown earth that plants grow in and it plays a very important role in supporting life on our planet. The best way to keep your plants happy is to take care of their soil!

Check a seed has sprouted, the soil helps to anchor the plant's roots in the ground. From here, the roots can absorb water, nutrients and minerals from the soil that help the plant to grow.

Soil is teeming with life. Did you know that there are more living things in a handful of soil than there are humans on earth? Look out for all the tiny organisms such as worms, fungi, insects and bacteria.

These organisms have special functions. Worms, for example, are little underground diggers. They move the things of the soil's surface. The little insects, such as the tiny beetles, help to break up what they have eaten, which is a valuable food for the soil.

GET TO KNOW YOUR SOIL

Soil is not just dirt. It's a mix of different things, like sand, silt, clay, moisture and air. As a gardener, it's important to get to know your soil. If a plant is from a warm part of the world and you're growing it in a cool soil, it won't be happy! Similarly, a plant from a damp area won't like to grow in a sandy soil.

1. Bring a shovel from pages 30-32. Collect a soil sample from your garden. Cut it to a depth of 10cm. Remove any twigs, bits, and things that are not soil. Put it in a jar or a plastic bottle. Seal it and label it with the date and location.
2. Next, get 100g of soil and put it in a clear plastic bag. Put the bag in a sunny place for 24 hours. This will help to kill any tiny organisms in the soil.
3. You should now be able to see the different layers of soil. The soil will be made up of different layers and the texture will be different. This is because the soil has different layers and the texture will be different. This is because the soil has different layers and the texture will be different.

GARDEN FOES

Sometimes your garden might be visited by some not so welcome wildlife visitors – something that eats through your plants and other things made of hard work. Rather than using harmful chemical pesticides, there are some natural ways you can discourage any unwanted visitors to your garden.

ENCOURAGE BENEFICIAL ANIMALS

You can encourage beneficial animals by providing them with a home. This can be a birdhouse, a bug hotel, or a small pond. These animals can help to keep your garden healthy by eating pests and other unwanted visitors.

PEST REPELLENTS

To keep insects away from your plants, you can use natural repellents. These can be made from things like garlic, chili, and vinegar. You can also use essential oils like lavender and eucalyptus.

PROTECT PLANTS

Some plants are more resistant to pests than others. If you have a pest problem, try planting some of these plants. They can help to protect your other plants from being eaten.

KEEP AN EYE OUT FOR PESTS

Check your plants regularly for signs of pests. If you see any, act quickly. You can use natural repellents to keep them away. You can also use physical barriers like netting to protect your plants.

PLANTS THAT HELP OTHER PLANTS

Some plants can help other plants to grow. These are called companion plants. They can help to repel pests, attract beneficial insects, and improve the soil. Examples include marigolds, basil, and nasturtiums.

GROW CUPS OF NASTURTIUMS

Did you know that you can eat the petals from certain flowers? Nasturtiums are bright and colourful, and they have a little peppery taste. You can add them to a salad for a burst of extra flavour.

YOU WILL NEED:

- Old cups or tins
- Water
- Nasturtium seeds
- Wool

1. In the bottom of each cup, add a layer of gravel. This is to allow the water to drain away from the roots because the cups do not have any drainage holes.
2. Fill each cup with compost.
3. Place a couple of seeds in the compost and drop in the seeds.
4. Cover with a little extra compost and add some water to the soil. The water should reach about halfway up the cup.
5. After a week or two, the seeds will start to grow. When they are about 5cm tall, they are ready to eat. They are best eaten raw, but you can also cook them.
6. In a few more weeks, they will be ready to eat. You can harvest them whenever you like. If you do on the plants, just pull them off and a new one will grow in their place.

WELCOME TO THE WONDERFUL WORLD OF GARDENING!

Whether you have a big garden or a small windowsill, you can make the world a greener place. Gardening is one of the best hobbies in the world and it's good for you, your neighbourhood and our planet! People have been gardening in one way or another for thousands of years, so you will be continuing a very long and important tradition.

In this book, you'll learn about how plants work, how to grow your own vegetables, how to encourage wildlife to your garden and why protecting plants is important for our lovely planet. Along the way, there will be plenty of activities and experiments for you to try for yourself – mostly using everyday materials you can find at home.

What are you waiting for? Let's begin!

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

Of all the food items that have been invented, ice cream is probably the most popular. It's a treat that's enjoyed by people of all ages and in all climates. The first recorded recipe for ice cream was written in a Chinese text from the 10th century. The recipe was for a simple mixture of snow and fruit. In the 17th century, a French chef named Lazzaro Spallanzani invented a method for making ice cream that was easier to make and more enjoyable to eat. This was the beginning of the modern ice cream we know today.

Easy Ice Cream

15

Bicycle

"Freedom on two wheels"

Did you know that the first bicycle was invented in the 18th century? It was a simple wooden frame with two wheels of different sizes. The first person to ride a bicycle was a Frenchman named Sivard. He called it a 'velocipede'. The bicycle was a great invention because it allowed people to travel faster and farther than ever before. It was also a fun way to exercise. Today, bicycles are used for many different purposes, from commuting to recreation.

Pedious Penny-Farthing

Camera

"Say cheese"

24

Although it's often used to take a photograph, a camera is actually a device that captures light and converts it into a permanent record. The first camera was invented in the 18th century by a man named Nicéphore Niépce. He called it a 'chambre noire'. The camera was a great invention because it allowed people to capture moments in time that would otherwise be forgotten. Today, cameras are used for many different purposes, from taking pictures to recording videos.

Developed to Perfection

High-Speed Train

"No-speed" "no-slows"

25

Before the 19th century, the only way to travel long distances was by horse-drawn carriage or stagecoach. This was a slow and uncomfortable way to travel. The first high-speed train was invented in the 19th century by a man named George Stephenson. He called it a 'locomotive'. The high-speed train was a great invention because it allowed people to travel faster and farther than ever before. Today, high-speed trains are used for many different purposes, from commuting to international travel.

Marvelous Maglevs

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on a hill or in a field. It's a device that captures the energy of the wind and converts it into electricity. The first wind turbine was invented in the 19th century by a man named Christian B. Poncelet. He called it a 'windmill'. The wind turbine was a great invention because it allowed people to generate electricity without using fossil fuels. Today, wind turbines are used for many different purposes, from generating electricity to pumping water.

Green Energy

Helicopter

"A surprising way to fly"

35

When you think of a helicopter, you probably think of a machine that can fly. The first helicopter was invented in the 18th century by a man named Jean-François Moisant. He called it a 'hélicoptère'. The helicopter was a great invention because it allowed people to fly without the need for a runway. Today, helicopters are used for many different purposes, from transporting people to performing rescue missions.

Versatile VTOLs

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles – no carts, cars, bikes, buses, trucks, trains, trams or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3200 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

The very first wheels were used to make pottery. The art of pottery began around 30,000 years ago. Originally, potters would shape clay into pots with their hands, but this took a long time. The Mesopotamians invented a better method in around 3500 BCE. The potter's wheel was a large stone disc balanced on a stick called an 'axle', which could be spun. By putting clay on the wheel and spinning it, the potter could shape the clay quickly into pots. We don't know for sure, but it seems likely that the potter's wheel led to the invention of the vehicle wheel.

Internet

"The world at your fingertips"

18

The invention of the Internet – a network of computers that 'speak' to each other – was a concentrated effort in the United States. The first computers were connected to each other in 1969 during the Cold War (1947–1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: LOGIN, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want – books, food, holidays, cars – with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

World Wide Web

The World Wide Web (WWW) is a gateway to the Internet. It's made up of search engines like Google and Safari, the Internet addresses (also called URLs) we type in, and the websites that appear on our screens. It was invented by a British computer scientist called Tim Berners-Lee in 1989 while working at CERN, a science research laboratory in Switzerland. The WWW made the Internet accessible to everyone, not just scientists and academics.

Raising the Roof

A cool introduction to classical music

- Broadcaster, songwriter, composer and Scala Radio presenter Jack Pepper is an exciting, young voice in classical music.
- A fun and approachable introduction to classical music
- Includes a playlist, so you can listen as you read
- **SAMPLE CONTENTS:** Hildegard of Bingen 1098-1179; Claudio Monteverdi 1567-1643; Barbara Strozzi 1619-c. 1664; JS Bach 1685-1750; Joseph Bologne 1745-1799; Ludwig van Beethoven 1770-1827; Richard Wagner 1813-1883; Giuseppe Verdi 1813-1901; Ethel Smyth 1858-1944; Arnold Schoenberg, 1874-1951; Igor Stravinsky, 1882-1971; Florence Price, 1887 - 1953; George Gershwin, 1898-1937; Leonard Bernstein, 1918-1990

Raising the Roof

SYMPHONY

The symphony has changed over the centuries, but it is essentially an extended piece of music for a large group of players. The word had even been the Greek, meaning 'sounding together'. It is often a composer's lifetime piece because the size and cost of the orchestra is hard to pull off.

A symphony is often in four movements, with no set number of tracks. There are five movements, which are often arranged in the sequence of three slow, one fast, and one slow. The first movement is often in sonata form, which is a type of musical structure that is often used in the first movement of a symphony.

LEARNING TIP
Have a go at writing your own symphony. It can be as simple as writing a melody for a string quartet, or as complex as writing a full symphony. Use the information on this page to help you.

1800s
The first symphony was written by Joseph Haydn in 1763. It was a single movement, and was called 'Symphony No. 1'.

1700s
The first symphony was written by Johann Sebastian Bach in 1703. It was a single movement, and was called 'Symphony No. 1'.

1776
The first symphony was written by Wolfgang Amadeus Mozart in 1776. It was a single movement, and was called 'Symphony No. 1'.

1800s
The first symphony was written by Ludwig van Beethoven in 1800. It was a single movement, and was called 'Symphony No. 1'.

1872
The first symphony was written by Johannes Brahms in 1872. It was a single movement, and was called 'Symphony No. 1'.

1748
The first symphony was written by George Frideric Handel in 1748. It was a single movement, and was called 'Symphony No. 1'.

1800s
The first symphony was written by Franz Schubert in 1800. It was a single movement, and was called 'Symphony No. 1'.

Present
The first symphony was written by Pyotr Ilyich Tchaikovsky in 1866. It was a single movement, and was called 'Symphony No. 1'.

Richard Wagner

1813-1883

To Listen or Not to Listen...
Can we separate opera from Wagner? Can we really think of Wagner as a composer who wrote operas, or as a composer who wrote music for the stage? Wagner was a composer who wrote operas, and he was also a composer who wrote music for the stage. He was a composer who wrote operas, and he was also a composer who wrote music for the stage.

Wagner had a lot to say and did things his way. He pushed music to its limits and revolutionised everything. He had to invent a new language.

LISTEN!
Wagner's music is often described as 'music for the stage'. It is a type of music that is often used in operas, and it is a type of music that is often used in operas.

Wagner's Sound
Wagner's music is often described as 'music for the stage'. It is a type of music that is often used in operas, and it is a type of music that is often used in operas.

George Gershwin

1898-1937

George Gershwin
Gershwin had a lot to say and did things his way. He pushed music to its limits and revolutionised everything. He had to invent a new language.

LISTEN!
Gershwin's music is often described as 'music for the stage'. It is a type of music that is often used in operas, and it is a type of music that is often used in operas.

Gershwin's Sound
Gershwin's music is often described as 'music for the stage'. It is a type of music that is often used in operas, and it is a type of music that is often used in operas.

Piano Addiction
Gershwin's music is often described as 'music for the stage'. It is a type of music that is often used in operas, and it is a type of music that is often used in operas.

Hildegard of Bingen

1098-1179

Here's someone who was, in every sense, a visionary Hildegard of Bingen had visions of God and wrote them down as poems and music.

Music was just one part of a lifetime of interests. Hildegard of Bingen - named after the German town she came from - was (deep breath!) a nun, diplomat, writer, leader, adviser, plant expert, scientist, public speaker... and a composer. But it all came back to faith. Hildegard became a nun aged 15 and later created her own monastery with 18 sisters. As if that wasn't enough, Hildegard then developed her own language and alphabet, possibly to help bring her nuns together. She used her talents - for music and for words - to unite people. It was all ultimately about expression. Hildegard wrote books on natural history, plants and medicine, and was even the first person to write a morality play, a drama where good battles evil (think Star Wars, but in the 1100s). That made her the 'influencer' of the time! She became a pen pal of popes, kings, emperors and cardinals, and was herself a major public leader: she went on at least four public speaking tours of Germany. This was bold stuff, given that women of the time were not allowed to travel as preacher-teachers, she was in many ways an early feminist, championing the rights of women and dealing with men on an equal footing. No wonder why, in the centuries after her death, Hildegard was considered for sainthood by no less than four different popes!

Learning by Ear
The Greeks were the first to use letters of the alphabet to represent different notes. Yet until the Middle Ages, almost all music was passed down the generations by mouth, instead of being written down. There was a lot to learn: in the 600s, monks in churches are estimated to have memorised 80 hours of music, all by ear! By the 900s, it took around 10 years to teach a young chorister all the pieces they'd need to know for future services. And you think school is intense...

LISTEN!
A Feather on the Breath of God sung by Gothic Voices
Hildegard was a Bala-Iban name even in musical circles, until early music became widely performed and recorded from the 1970s onwards. One of the recordings in this album, released in 1985.

She sent me a letter!
And a botany book to me!
I'm scheduling that next tour!

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
The javelin is a spear-like object used in track and field events. The first javelin was made of wood and had a stone head. It was used in ancient Greece and Rome. The modern javelin was invented in 1880 in Sweden. It is now made of metal and has a pointed tip.

LONG JUMP
The long jump is a track and field event where athletes compete by jumping as far as they can. The longest jump ever was made by Mike Powell in 1991, when he jumped 9.94 metres (32 feet 6 inches).

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal at the 1996 Atlanta Olympics with a jump of 7.25 metres (23 feet 9 inches).

DISCUS
One of the most beautiful events in the ancient world is called the Discobolus or 'discus thrower'. The statue is a Greek copy of a bronze statue from the 5th century BC. It shows a man in a red tunic and sandals, holding a discus in his right hand and a spear in his left.

JAN SZUSZT
The javelin was first used by the ancient Greeks. It was used for hunting and for war. The modern javelin was invented in 1880 in Sweden. It is now made of metal and has a pointed tip.

AMERICAN FOOTBALL
American football is a team sport that originated in the United States. It is a contact sport where players use their bodies to move the ball down the field. The game is played on a rectangular field that is 100 yards long and 53 1/3 yards wide.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's end zone. The team that scores the most points wins the game.

MEET THE TEAM
There are 11 players on the field. They are divided into two teams: the offense and the defense. The offense is responsible for moving the ball down the field, while the defense is responsible for stopping them.

MAKING A PLAY
A play is a series of actions that take place on the field. It starts with the center snapping the ball to the quarterback. The quarterback then either passes the ball to a receiver or runs with it himself.

FOR READY
One of the most important parts of the game is the huddle. This is where the players gather together to discuss strategy and to get ready for the next play.

RUGBY
Rugby is a team sport that originated in England. It is a contact sport where players use their bodies to move the ball down the field. The game is played on a rectangular field that is 100 metres long and 70 metres wide.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's end zone. The team that scores the most points wins the game.

MAKING A PLAY
A play is a series of actions that take place on the field. It starts with the scrum half passing the ball to the fly half. The fly half then either passes the ball to a winger or kicks it into the field of play.

EVERY KICK
Every kick in rugby is important. It can be used to move the ball down the field, to score points, or to restart play after a stoppage.

BASEBALL
Baseball is a team sport that originated in the United States. It is a bat-and-ball game where players use a bat to hit a ball thrown by a pitcher. The game is played on a diamond-shaped field that is 90 metres long.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field of play and then running to the next base. The team that scores the most runs wins the game.

EVERY PITCH
Every pitch in baseball is important. It can be used to move the ball down the field, to score runs, or to restart play after a stoppage.

CRICKET
Cricket is a team sport that originated in England. It is a bat-and-ball game where players use a bat to hit a ball thrown by a bowler. The game is played on a rectangular field that is 140 metres long.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field of play and then running to the next base. The team that scores the most runs wins the game.

EVERY BALL
Every ball in cricket is important. It can be used to move the ball down the field, to score runs, or to restart play after a stoppage.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patoa puripatoa was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Maori of New Zealand participated in a competition known as the *Māori Games* - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

A Shelter for Sadness

A poignant and heartwarming picture book exploring the nature of sadness.

- Over 22,000 copies sold worldwide (as of July 2022)
- A poignant and heartwarming text addressing the hugely important and topical issue of sadness and depression
- Dealing with abstract emotions in an approachable and child-friendly way
- Anne Booth is known for the exceptional warmth and authenticity of her writing. She was inspired to write this book by the words of Etty Hillesum, a Holocaust victim.
- With superb illustrations from multi-award winning David Litchfield, who has sensitively visualized the nature of Sadness

A Shelter for Sadness

The shelter I will build
for my Sadness
will have light from the sun
or from the moon and stars.

But the windows will have curtains
that Sadness can draw when it wants to.
And there will be candles or lamps
if Sadness needs them.

Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 6–9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6-9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,
Let's clean your paws and face.
Here's your spoon and here's your bib
And here's your bunny plate!

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

Baby Steps: Move Like Me

Slide the tab, copy the action!

- Illustrated by London-born illustrator, Richard Merritt.
- A simple rhyming text is fun to read aloud and easy for little ones to join in with.
- With 9 sliders to pull and push to make the animals on every page move about.
- This book will help little ones learn to name body parts and follow simple instructions.
- Moving the sliders helps children develop fine motor skills; copying the actions builds gross motor skills.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.
