RICH AND POOR

THE HISTORY OF INEQUALITY

Inequality – the difference in wealth between the richest and the poorest – has been a feature of human societies since the dawn of time. In the early days, when everyone lived in small groups, the difference was not great. But as societies grew larger and more complex, the gap between the rich and the poor widened. In the 19th century, when the Industrial Revolution was in full swing, the gap became even wider. The rich became richer, and the poor became poorer. This was the beginning of the modern era of inequality.

WEALTH CONCENTRATION

One of the biggest reasons for inequality is the way that wealth tends to get concentrated in the hands of a few people. This is because the rich can invest their money in ways that the poor cannot. They can buy stocks, bonds, and real estate, which can all grow in value over time. The poor, on the other hand, often have to work for their money, and they may not have the chance to invest in anything that will grow in value. This means that the rich can build up a large amount of wealth, while the poor remain poor.

THE COST OF INEQUALITY

There are many reasons for wealth inequality. Some people have more money than others because they have more talent or more connections. Some people have more money because they have inherited it from their parents. Some people have more money because they have worked hard and saved their money. But there are also many reasons why some people have less money than others. Some people are born into poverty. Some people are disabled. Some people are of a different race or ethnicity. All of these things can make it harder for people to get ahead in life.

WHAT'S WRONG WITH WEALTH INEQUALITY?

There are many problems with wealth inequality. One problem is that it can lead to social unrest. When there is a large gap between the rich and the poor, people may feel that the system is unfair. This can lead to protests and even revolutions. Another problem is that wealth inequality can lead to a lack of opportunity for the poor. When the rich have all the money, they can get the best education and the best jobs. The poor, on the other hand, may not have the chance to get a good education or a good job. This means that the poor may never be able to catch up to the rich.

GOLDEN YEARS

AN INTERNATIONAL SYSTEM

In the 1920s, the gold standard was formally adopted by many countries. This meant that the value of a country's currency was based on the amount of gold it held. This system was supposed to keep currencies stable and prevent inflation. But it had some problems. One problem was that it was hard to get gold. Another problem was that it was hard to adjust the value of a currency if the economy was changing. In the end, the gold standard was abandoned in favor of a system where the value of a currency was based on the government's promise to pay it.

THE COST OF WAR

World War I had a big impact on the gold standard. The war cost a lot of money, and governments had to print a lot of new money to pay for it. This led to inflation, which meant that the value of money was going down. In the 1920s, many countries tried to get back on the gold standard, but they had a hard time. The war had changed the economy too much for that.

THE GOLD DUCK

In 1933, President Franklin D. Roosevelt signed a law that gave him the power to control the gold supply in the United States. This was a big deal because it meant that the government could now control the money supply. This was a key part of the New Deal, which was a series of programs and policies designed to help the economy recover from the Great Depression.

FROM COUNTERFEIT COINS TO FALSE NOTES

THE FIRST COUNTERFEITS

Counterfeiting has been around since the beginning of time. In the past, people would make fake coins or fake notes to use as money. This was a way to get rich without working hard. But it was also a crime. In the 19th century, counterfeiting was a big problem. People would make fake gold coins or fake banknotes. The government had to catch them and punish them. Today, counterfeiting is still a problem, but it's much harder to do. The government has better ways to make money, and it has better ways to catch counterfeiters.

ALVES DOS REIS: MASTER COUNTERFEITER

Alves dos Reis was a famous counterfeiter from Brazil. He was known for making fake banknotes that were almost perfect. He was caught in 1936 and sentenced to prison. He was later released, but he continued to make fake banknotes. He was caught again in 1941 and sentenced to prison. FINANCIAL MARKETS

At regular markets people buy and sell things like food and clothing. At financial markets, people trade money-related assets. These include stocks and bonds. Stocks are shares in a company that the company sells to raise capital. Shareholders are paid dividends (regular sums paid out of the company's profits). Bonds are certificates issued by a government or corporation, promising to repay borrowed money at a fixed rate of interest. Financial markets can be physical places, like the New York Stock Exchange, or they can take place online.

THE FIRST BONDS

In the twelfth century, the government of Venice came up with a new way of raising money to fight a war. It offered its citizens certificates, known as prestiti, in exchange for a loan, promising to pay them back by a certain time, plus 5 per cent interest. These were the first government bonds. Before long they became a popular investment, and a market developed for the buying and selling of prestiti.

THE FIRST STOCKS

Founded in 1602, the Dutch East India Company was the first company to sell shares in its business to the public. The money it raised from this funded its voyages to the East Indies, and it paid its shareholders out of the profits from its trade in enslaved people and spices. The shares were traded in the Amsterdam Stock Exchange, also established that year.

THE DAILY NEWS

OCTOBER 1929 NEW YORK CITY

THE WALL STREET CRASH

FINANCIAL MARKETS CAN BE VOLATILE. A RUMOR OR A MINOR PIECE OF ECONOMIC NEWS CAN CAUSE BIG SWINGS IN PRICES. THE DESIRE TO MAKE MONEY OR AVOID LOSING IT IS A POWERFUL ONE, AND A HERD INSTINCT CAN SOMETIMES TAKE OVER WITH PEOPLE STAMPEDING TO BUY OR SELL. THE MOST SPECTACULAR EXAMPLE OF THIS WAS THE WALL STREET CRASH OF 1929.

THE ROARING TWENTIES

The 1920s was boom time in the United States. There was a spirit of optimism in the country and it became fashionable to play the stock market. Share prices soon rocketed to a point where they represented a value far greater than the total worth of their companies' assets. This was now a 'mania' – a period when everyone, from wealthy financiers to common investors, lost touch with reality and seemed to believe that prices could keep rising forever.

AFTER EFFECTS

As a result of the crash, businesses were bankrupted, banks closed, millions lost their jobs and the world plunged into a deep and lasting economic depression. In Europe, extreme right-wing parties exploited the misery of mass unemployment, blaming 'foreigners' such as Jews. Germany's Nazi Party rose to power in 1933. The consequences for the world would be devastating.

DISASTER

The crash occurred at the end of October 1929, during three calamitous days of trading at the New York Stock Exchange on Wall Street, when huge numbers of people decided collectively it was time to sell. With so many sellers, there were few buyers, and share prices plummeted. In those three days, billions of dollars were wiped off the value of American companies. And over the following years the market kept on falling. By 1932, stocks had lost nearly 90 per cent of their pre-crash value.

Aldabra Giant Tortoise

It was the monster from deep in forests, like the Hare and the Tortoise who gave us the phrase 'slow and steady wins the race'. It couldn't be true for this monster, especially when put into context. Tortoises have been gently plodding around the planet for 200 million years.

When you imagine a tortoise, you probably think of the Aldabra Giant Tortoise, based on a small island in the Seychelles, but recently recognized as a new species. It is a large tortoise, and its shell is made of scutes, which are the bony plates that form the tortoise's shell. The tortoise's head and front legs are visible in the illustration, showing its thick, wrinkled skin and its small, dark eyes.

The giant tortoise is one of the largest land animals in the world. It can live for over 100 years, and its shell can grow to be as large as 1.5 meters in length. The tortoise's head and front legs are visible in the illustration, showing its thick, wrinkled skin and its small, dark eyes. The tortoise's head and front legs are visible in the illustration, showing its thick, wrinkled skin and its small, dark eyes.

American Bison

The formidable American bison, the largest mammal in North America today, rarely illustrates an often told tragic story of human bringing an animal to the brink of extinction. By definition, this also brings enormous damage to an ecosystem.

The bison is a large animal, and its body is covered in thick, shaggy fur. It has a large head and a long neck. The bison's head and neck are visible in the illustration, showing its thick, shaggy fur and its large, curved horns.

Andean Condor

The breathtaking Andean condor has to be one of the most spectacular and impressive birds on Earth.

With a wingspan of over 3 meters and a maximum height of 2.5 meters, the Andean condor is the largest bird in the world. It has a long, hooked beak and a large, dark body. The condor's head and neck are visible in the illustration, showing its long, hooked beak and its large, dark body.

Daubentonia madagascariensis

Aye-Aye

The elusive aye-aye is a marvel of nature. Nocturnal, solitary and living almost its entire life within the canopy of the Madagascan rainforests, it has developed some marvellous adaptations to help it locate its food and live life in the dark.

Huge forward-facing orange eyes allow this little lemur to see, while its enormous bat-like ears have evolved to be extraordinarily sensitive, containing a complex set of ridges and grooves which help detect the tiny sounds coming from the creatures it feeds on. This is an adaptation shared with other animals that listen for their food, such as the spotted bat (see page 84).

Yet the aye-aye's most well-known feature – and perhaps its most useful – is its elongated middle finger. To find its prey (mostly grubs and small insects), the aye-aye uses this special digit to rapidly tap along the branch, like a woodpecker, listening with its huge ears for the sound of a grub moving beneath the bark. This technique is called percussive foraging. Once the aye-aye has located a tasty grub, it uses its strong incisors to bite and chew its way through the wood to reveal the tunnel the grub has made. Here, its incredible finger is used again. Long and bony, it is slender enough to fit within the narrow tunnels, and its sharp claw is perfect for hooking out and retrieving the unsuspecting grub. Additionally, this spindly finger comes in handy for scooping out pulp from the tasty fruits it also eats.

Due to the rapid destruction of its habitat in Madagascar, the aye-aye is now critically endangered. Worst still, these mysterious creatures are often considered bad omens by the Malagasy. According to local legend, aye-ayes signify bad luck or death. Unfortunately, this means these animals are often killed on sight.

Successful captive breeding programmes could turn round the fate of this animal, but careful conservation of its natural habitat and a 'rebranding' of the aye-aye among the local community is essential if this unique creature is to survive.

You Wouldn't Want To Be In The Trenches In World War One!

Joining up

Even though you're under 18, you join the queue at the local recruiting centre and get to enlist with the army. When it's your turn to be interviewed, the recruiting sergeant asks for your age. You tell him and he says you're all right. You can't go in until you're 18 and can't fight until you're 19. Come back tomorrow and see if you're the right age. To get past the next day and give your age as 19. Then you'll be the great right hand and answer to get for long and counting. The sergeant winks and hands over your first day's wages. You realise that the army is no disgrace for soldiers, it's prepared to hand in over rules.

Happy hint
A handy tip for you
If you're a young man
and want to join the army
you should be 18 years old
and have a good character
and be a good soldier.

YOU

Size isn't everything, you know.

Your country needs you.

The cold and the wet

Astorian turns to winter with no sign of an end to the rain. There is constant rain. Yards become rivers and frequently collapse. The rains have caused the farmers to overflow into the trenches, spreading disease. Some soldiers were killed by sleeping outside the trenches.

When on sentry duty soldiers were forced to stand in freezing-waterlogged trenches for hours on end without relief by receiving gas and water on their faces. Their feet have gone numb and the skin is turning blue. The bare trench! No! Lucky for you it's treated better - it's gone gurgaceous. Otherwise it might have had to be composted.

Is that your bridge?

Disasters:

It is a bitter lesson for the rest of general history that the army should not be caught in a position where it is not capable of being rescued.

Feasible:

It is not a very good idea to be in a position where you are not capable of being rescued.

Handy hint

When you are in a position where you are not capable of being rescued, it is a good idea to be in a position where you are not capable of being rescued.

[illegible]

No-man's-land

You are selected as part of a patrol to venture into no-man's-land to discover information about the enemy. You must take control of a shell-hole in front of the enemy trench so you can spy on them. Your patrol goes out at night, crawling forward on your stomachs, faces blackened with burnt cork, trying to avoid getting caught in barbed wire. The Germans send up a flare and fire on your patrol. You dive for cover into the shell-hole and then must spend hours lying there silently in the mud, pretending to be dead.

20

Night raids
Men are often sent into no-man's-land at night on spying missions or to capture enemy soldiers for interrogation.

Light flares
To trap British night patrols, the Germans use light-shell rockets. The flare blazes brightly for up to a minute, giving defending troops a chance to fire at the patrol.

Handy hint
If sent on a night raid, take silent weapons such as knives, clubs, knuckledusters and hatchets.

Barbed wire
It is placed in front of trenches to foil enemy infantry attacks. Night parties are sent out to repair these defences or cut the enemy's wire.
