Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 6–9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6-9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,
Let's clean your paws and face.
Here's your spoon and here's your bib
And here's your bunny plate!

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Match the Shape

A first words book that's also a shape-sorter!

- An innovative board book design that lets toddlers place three chunky shapes into matching slots. Three shapes attach to the book via ribbon: circle, square, triangle.
- A die-cut in the cover showcases the novelty and keeps the pieces securely in place when the book is shelved.
- Matching the shapes aids children in their fine motor skills, hand-eye coordination and problem-solving skills.
- Introduces familiar first words on every spread.
- Illustrated in vivid colour and effortless style by Polish artist Susie Hammer.
- Also in the series: Match the Colour (2025).

Baby Steps: It's Bedtime, Bear

Lift the flaps, find the toys!

- Illustrated by London-born illustrator, Richard Merritt.
- Big, easy-to-lift card flaps help children develop fine motor skills: with 5 big flaps to lift.
- A gentle story to build early language skills - perfect for children just starting to say their first words.
- Encourages little ones with their bedtime routine.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Baby Steps: Move Like Me

Slide the tab, copy the action!

- Illustrated by London-born illustrator, Richard Merritt.
- A simple rhyming text is fun to read aloud and easy for little ones to join in with.
- With 9 sliders to pull and push to make the animals on every page move about.
- This book will help little ones learn to name body parts and follow simple instructions.
- Moving the sliders helps children develop fine motor skills; copying the actions builds gross motor skills.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Little Explorers: Food

Take a bite into the tasty world of food, with more than 30 flaps to lift and explore!

- More than 30 sturdy flaps to lift reveal interesting and fun facts, helping kids engage with the topic.
- A popular non-fiction series that relates non-fiction facts in a fun and entertaining manner, the *Little Explorers* series has sold over 1.25 million copies worldwide.
- Introduces new concepts and vocabulary in a simple and accessible way.
- With bright and child-friendly artwork that complements the conversational text.

Little Explorers: Food

FOOD AND YOU

If you ate the same food every day, it could get pretty boring. You could be good for you, but it's important to make a mix of different types of food to stay healthy.

Healthy and Vegetables
 Try to drink lots of water every day.

Starch
 Starchy foods give you energy. They are found in bread, pasta, rice, potatoes, and cereals.

Protein
 Protein helps you grow and stay healthy. It's found in meat, fish, eggs, and beans.

Sugars
 Sugar gives you energy, but too much can be bad for your teeth and health. It's found in sweets, cakes, and soft drinks.

DIFFERENT DIETS

People across the world eat different kinds of food as part of their normal diet. This is called their diet. There are lots of different diets, and here are just a few of them.

Vegetarian
 Vegetarians eat food that does not come from animals. They eat things like vegetables, fruits, and grains.

Flexitarian
 Flexitarians eat a mix of plant-based and animal-based foods.

Raw
 Raw food diets focus on eating uncooked, unprocessed plant-based foods.

Raw
 Raw food diets focus on eating uncooked, unprocessed plant-based foods.

Raw
 Raw food diets focus on eating uncooked, unprocessed plant-based foods.

FOOD THROUGH TIME

In human's early days, humans ate what they could find in the wild. Over time, they learned to farm and to use tools to help them. The food they ate changed over time.

1500 BC
 The Chinese started using fire to cook their food. This helped them eat meat and vegetables that were easier to digest.

1000 BC
 The ancient Egyptians used bread and beer as a source of food. They also used honey and dates.

500 BC
 The ancient Greeks used olive oil and wine in their cooking. They also ate a lot of fish and grains.

1000 AD
 The Vikings used a lot of fish and meat in their diet. They also ate a lot of bread and butter.

1500 AD
 The Spanish started using potatoes in their cooking. This helped them eat a lot of energy from their food.

1800 AD
 The British started using a lot of meat in their diet. This helped them eat a lot of protein.

1900 AD
 The Americans started using a lot of sugar in their diet. This helped them eat a lot of energy.

2000 AD
 The world started using a lot of different types of food. This helped them eat a lot of different nutrients.

2020 AD
 The world is still using a lot of different types of food. This helps them eat a lot of different nutrients.

FINDING FOOD

Where does food come from? It's not always obvious. Some food comes from the ground, some from the sky, and some from the sea.

Harvesting
 Harvesting is the process of gathering crops from the ground. It's done by hand or with machines.

Tractor
 Tractors are used to help farmers plant and harvest crops. They are very powerful machines.

Truck
 Trucks are used to transport food from the farm to the shop or restaurant. They have special compartments for different types of food.

Truck
 Trucks are used to transport food from the farm to the shop or restaurant. They have special compartments for different types of food.

Truck
 Trucks are used to transport food from the farm to the shop or restaurant. They have special compartments for different types of food.

FABULOUS FOOD!

Food can be yummy in your tummy, but what is it really? Food is your body's fuel. It is the energy that helps you move, think, and play. When you run out of fuel, you need to fill up! We all need food to live.

Nutrients

Nutrients are important things found in food. Your body needs them to grow and survive. Nutrients can be vitamins, minerals, carbohydrates, proteins, fats, and water.

VITAMINS

Vitamins help your body work as it should. There are 13 known vitamins and they all have different jobs.

Vitamin C
 Vitamin C is in fruits such as oranges. It helps keep you healthy.

MINERALS

Minerals are a bit like vitamins. They help the body work well.

Iron
 Iron is an important mineral found in meat and spinach.

CARBOHYDRATES

This is where a lot of your energy comes from. The body breaks down carbohydrates into a substance called glucose, which acts as fuel. Carbohydrates are found in foods such as whole grains and potatoes.

PROTEINS

Proteins are like building blocks that help your body grow. They can be found in eggs and beans.

FATS

Fats can provide energy and help the body absorb important vitamins. Healthy fats can be found in foods such as nuts and fish.

THE DIGESTION QUESTION

How does the food you eat turn into energy inside your body? And where does it go? This process is called digestion. Together, the parts of your body that help break down and use food are called the digestive system.

Mouth
 This is where it all starts. You take a bite and crush up food with your strong teeth. Munch, crunch, munch!

Desophagus
 Food travels down, down down the tube.

Stomach
 The stomach stores food, mixing it with acid and enzymes.

Intestines
 The sticky liquid moves through the intestines. Nutrients are absorbed into the bloodstream and taken to other parts of the body.

Little Explorers: Science

A fun, novelty introduction to science.

- Over 30 flaps included
- A new title in the successful and long-running *Little Explorers* series which has sold over 1.25 million copies worldwide (as of July 2022)
- An easy first introduction to the fundamental areas of science, perfect for a child starting school
- Contents includes: biology, chemistry, Earth science, physics, space, periodic table, energy and forces, inventions

Little Explorers: Science

A HIDDEN WORLD!
Some scientists study tiny things that can't be seen without the help of special machines. Some things are so small that they can't be seen at all though scientists can see and feel them.

What is the world made of?
Everything in the universe, from the air we breathe to the stars in the sky, are made of matter. Some people use the word 'matter' to describe all of the things which make up the universe. Matter is made of atoms. Some atoms are called 'elements' and some are called 'compounds'.

What is an atom made of?
Protons, Neutrons, Electrons

Chemical reactions
A chemical reaction is a reaction where one or more substances are changed into one or more new substances. Chemical reactions happen all the time. For example, when you burn a candle, the wax is changed into carbon dioxide and water. Chemical reactions also happen when you mix different substances together.

Look in here
Look in here to see what's inside. Look in here to see what's inside.

The building blocks of life
All living things are made of tiny building blocks called cells. Cells are the smallest units of life. Some living things, such as bacteria, are made of just one cell. But most living things are made of many cells. Scientists use a microscope to look at cells. Some cells are very small, but some are very large.

States of matter
Matter can be in three states: solid, liquid, and gas. They are called the three states of matter. Matter can change from one state to another. For example, water can be a solid (ice), a liquid (water), or a gas (steam).

Robots explained!
Robots are machines that can do things on their own. They are made of metal and plastic. Some robots are used in factories to make things. Some robots are used in hospitals to help doctors. Some robots are used in space to explore other planets.

WHAT IS CHEMISTRY?
All the matter in the universe is made of substances called elements. Chemistry studies elements and how they are joined together to make new substances.

The periodic table
The periodic table shows all the elements. They are arranged in a special order. Each group of elements has its own name. The periodic table is a very important tool for scientists.

Group of elements
26 Fe Iron

BURSTING WITH LIFE!
Our planet is bursting with life. From tiny insects to towering trees, and from microscopic bacteria to amazing animals, there are billions of different kinds of life. Scientists study life to understand how it works and how it changes over time.

CLASSIFYING ANIMALS
Invertebrates
Animals that don't have a backbone. Examples include insects, jellyfish, and earthworms.

Vertebrates
Animals that have a backbone. Examples include fish, birds, and mammals.

Animal behavior
All animals have different ways of behaving. Some animals are active during the day, while others are active at night. Some animals live in groups, while others live alone.

WHAT IS SCIENCE?
Science helps us to learn about the world and find answers to our questions about it. There are lots of types of science. Each one looks at a different part of the world around us.

All kinds of science!
Each scientific area has its own special name. Here are just a few of them.

What is a scientist?
Scientists are people who study science. They come up with new ideas, then test them with experiments to discover new information. Some scientists work in laboratories, but others work outdoors. A few scientists even work in space!

What's the big idea?
An idea that a scientist wants to test is called a hypothesis. Scientists don't make guesses. They use things they already know or can see, called observations, to help them come up with their hypotheses.

What is data?
Data is the word scientists use for the information they gather when they do an experiment. The data might be measurements, or things that they have noticed.

What is this scientist doing?
Observation

What is this scientist doing?
Step by step
Scientists work very carefully to avoid making mistakes. They often carry out an experiment several times, following the same steps.

BIOLOGY
Biology studies things that are alive.

CHEMISTRY
Chemistry studies chemicals and what they do.

EARTH SCIENCE
Earth science studies the planet we live on, including its land, oceans, climate and atmosphere.

PHYSICS
Physics studies energy, forces and what things are made of.

Little Explorers: Maths

A fun, novelty intro to maths.

- Over 30 flaps included
- A new title in the successful and long-running *Little Explorers* series which has sold over 1.25 million copies worldwide (as of July 2022)
- An easy first introduction to the fundamental areas of maths, perfect for a child starting school
- Supports the KS1 core curriculum with topics including: numerals, addition, subtraction, multiplication, division, fractions, measurements, shapes and probability

Little Explorers: Maths

ALL KINDS OF NUMBERS!
Numbers are amazing but only have 10 number symbols. But they can be used to write any size of number. That's so cool and so useful!

Big numbers
Look at these numbers. Can you point to the biggest one?
10 100 1,000

Odd and even numbers
Even numbers are whole numbers that can be divided evenly into pairs. Odd numbers are whole numbers that cannot be divided evenly into pairs. There's a trick to tell if a number is odd or even. Can you spot the odd numbers in the street? How many pairs can you make?

What is infinity?
You can always add one to a number and keep going forever. The idea is called infinity.

Positive and negative numbers
Look at the four numbers for the building. The numbers that are higher than zero are positive numbers. The numbers that are lower than zero are called negative numbers. Negative numbers have a minus sign (-) in front of them.

From numbers
Some numbers such as 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 11 are called digits. They are the building blocks for all numbers.

WHAT CAN NUMBERS DO?
When you start looking and notice that numbers are everywhere, you can see how numbers can help people in their busy work.

Recipe maths
Recipes are very useful. They tell you what to buy and how to cook. They also tell you how long to cook for. The numbers in recipes are very important. They help you to know how much to use and how long to wait.

Square numbers and square roots
If you square a number by multiplying it by itself, you get a square number. For example, $3 \times 3 = 9$. The square root of a number is the opposite of squaring a number. The opposite of 9 is 3.

How can the bus find out if he has enough money to buy a ticket?

How can the boy find out if he has enough money to buy a ticket?

How can the boy find out how many people are in his class?

How can the boy find out how many people are in his class?

How can the boy find out how many people are in his class?

PIRATE GOLD!
The treasure map Captain Jack has helped you to find the gold. Now it's time to find the gold. The gold is hidden in the treasure chest. You need to solve the math problems to find the gold.

START!
The ship will leave at 10:00. The gold is hidden in the treasure chest. You need to solve the math problems to find the gold.

How many numbers are there in the number 1234567890?

How many numbers are there in the number 1234567890?

How many numbers are there in the number 1234567890?

How many numbers are there in the number 1234567890?

How many numbers are there in the number 1234567890?

How many numbers are there in the number 1234567890?

A WHOLE WORLD OF MATHS!
We use maths every day in lots of different ways. Often, we don't even realise that we are using it. How many different kinds of maths can you spot in this scene?

Maths helps us to be on time.

We can tell the time using the clock.

Today it is a sunny 25 °C.

Numbers can tell us how hot (or cold) it is.

Maths helps to keep us safe.

Which queue is the best one to pick?

Maths can help with stacking these boxes, so they don't topple over!

Maths helps us to buy the right amount of things.

Whenever we use money, we use maths.

Signs with numbers on give information to help us make choices.

50% off!

2 for 1!

1 kilogram of apples, please!

Bessie's Bees

An uplifting story about starting nursery with a courageous neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list, allowing us to grow our range of underrepresented voices and experiences.
- While there has been an increase in positive representations and neurodiverse voices in middle-grade fiction, this is yet to be seen in the trade picture book market. Templar can be one of the first to champion neurodiverse voices and stories in this space.

Oh No, Flo!

A fantastically funny farmyard fiasco to read aloud!

- Taking recognisable and familiar farm animal characters to create a funny and fresh picture book for the very young.
- Featuring bold and bright illustrations from Mike Byrne, well-known for *This Book is Full of Unicorns*.
- Catherine Cawthorne is fresh to the picture book world but is already making her mark with: *We Went to Find a Woolly Mammoth* (Hachette, 2023) and *The Big Bad Wolf Investigates: Fairy Tales* (Bloomsbury, 2024).
- The light-hearted text and repeated 'OH NO, FLO!' refrain to join in with, makes it the perfect book to share with a group or individual child.
- Cover treatments: matt lam and SPUV.

A hilarious rhyming romp that perfectly encapsulates how being HANGRY really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

Time for Bed, Animals

A gentle non-fiction book full of sleepy animals

- Gentle non-fiction picture book, perfect for readers aged 3-7.
- Written in accessible language, packed with amazing facts and questions to consider, with text by award-winning author and travel-writer Ben Lerwill.
- With lush illustrations full of adorable animals by Spanish illustrator Maribel Lechuga. Maribel has illustrated books for the Usborne Beginners and Look Inside series and Oxford Reading Tree among others.
- A page of information at the back of the book includes sleep-tips for families.
- CONTENTS: Dogs, chimpanzees, dolphins, sea otters, cats, ants, kangaroos, bats, birds, fish (Great Barrier Reef), giraffes, tortoises

Yetis Don't Exist!

A FUR-tastically funny rhyming adventure!

- Bringing rising talent, Kate Thompson, to the Templar list. She has two picture books with Welbeck and two new picture books coming with PRH in September 2024, and 2025.
- Bringing established quirky, commercial illustrator Loretta Schauer to the list with her bright palette and fantastic furry creatures. Loretta has previously worked with publishers like Ladybird, Farshore and Bloomsbury.
- Like *The Best Bear Tracker*, this book has a hilarious visual narrative alongside the text with the yetis and human explorer just missing each other more than once!
- The book's wintry, snowy setting offers the ideal seasonal gift without the story being explicitly Christmassy!
- Cover treatments: matt lam and foil.

The Circular Square

An uplifting rhyming story about becoming a well-rounded person.

- A quirky, philosophical rhyming picture book from the Waterstones Children's Book Prize shortlisted author, Simon Philip, offering him a new direction after the success of his *I Really Want to...* series.
- Bringing bold, graphic illustrator Neil Clark to the Templar list - a growing talent who is best known for his *CRASH, BANG, WALLOP* series with Ladybird.
- Includes back matter that encourages children to list the positives in their lives as well as lists of positives from the author and illustrator themselves.
- A meta picture book where artwork and characters engage with the layout, composition and size of the book - Square becomes the book in its square format!

My Name is a Gift

A heartfelt and touching celebration of the names we're given.

- Zeshan Akhter's debut picture book is filled with love and carries an important message - the perfect gift for any child.
- This lyrical ode to our names is brought to life by Åsa Gilland's expressive and detailed illustrations.
- Zeshan's second picture book with Templar, *Noah's New Home*, is due to publish in 2025.
- Includes a spread where the reader is asked about their name and has a chance to fill it in, making it the perfect activity for classroom and library settings.
- This story has roots in Muslim family traditions where dads gift their child a name, while also offering a universal message to all readers.
- Cover treatments: matt lam and foil.

Banana Hunt

A joyous read-aloud and laugh-out-loud rhyming romp!

- Bringing bestselling, brilliantly funny and rhyming-genius author, Suzy Senior, to the Templar list.
- This bubbly text is brought to life by Josh Cleland's vibrant illustrations that are packed with added humour and lots of fun critters to spot!
- A light-hearted rhyming text that reads fantastically out loud, with both a group or individual child.
- Includes a hidden pink banana to spot on every spread so the reader can be part of their own banana hunt!
- Cover treatments: matt lam, SPUV and emboss.

The Fixer of Broken Things

What happens when the famous fixer of broken things finds a problem that she can't solve?

- From the author and illustrator of *Number 7 Evergreen Street*, winner of the Royal Institute Of British Architects' Student Choice & Teacher's Choice for 5-7 year olds
- Julia Patton is an up-and-coming picture book talent in both the UK and the US. Bartleby from *The Very Very Very Long Dog* (Sourcebooks) is on the Barnes and Noble character wall of fame in the US.
- A wonderful story about sadness and how talking to a support network can help. The 'broken thing' Bea finds is a clockwork heart and speaking about her problems is what makes it work again.

A Shelter for Sadness

A poignant and heartwarming picture book exploring the nature of sadness.

- Over 22,000 copies sold worldwide (as of July 2022)
- A poignant and heartwarming text addressing the hugely important and topical issue of sadness and depression
- Dealing with abstract emotions in an approachable and child-friendly way
- Anne Booth is known for the exceptional warmth and authenticity of her writing. She was inspired to write this book by the words of Etty Hillesum, a Holocaust victim.
- With superb illustrations from multi-award winning David Litchfield, who has sensitively visualized the nature of Sadness

A Shelter for Sadness

The shelter I will build
for my Sadness
will have light from the sun
or from the moon and stars.

But the windows will have curtains
that Sadness can draw when it wants to.
And there will be candles or lamps
if Sadness needs them.

The Flickering Fires

A journey through life's elemental forces by Greenaway award-winner Grahame Baker-Smith.

- Narrative non-fiction that explores the extraordinary impact of fire in our world.
- The final book in *The Elements* series, which has sold over 180,000 copies worldwide (as of November 2023).
- Award-winning books include the Greenaway shortlisted *Leon and the Place Between*, *FArTHER* which won the Kate Greenaway medal in 2011, and the first title in this series; *The Rhythm of the Rain* which won the English 4-11 Picture Book Award.

The Flickering Fires

When mixed with clouds of interstellar gas
and dust they form the building blocks of new stars.
Like our Sun. And new planets. Like Earth.

A world with a fiery heart.
Assembled in a vast cosmic forge of rock and heat.
Alive with star dust.

- Written by Dawn Casey - author of Templar's *My Nana's Garden*.
- Over 76,000 copies sold worldwide (as of October 2022).

Winter Tales

THE WHITE BEAR KING

For the first time, the bear emerged. With a howling howl, the prince and daughter ran for cover as he leapt. In those days, light after dark, the bear's track was visible in the snow. "Where are you now, child?" he asked.

The prince hid on the tree. The bear had the prince's daughter's handkerchief but the bear had forgotten to take it. "What's there now, son?"

"I had been in your room, but I had to leave because the girl had been told not to come. The prince was furious. He was angry. He said the white bear had not taken her. "No, I am sorry, my child."

"No, you are not," he howled.

"This happened to me once upon a time, the prince and daughter said. They did not sleep and called to the moon. This clouded the hills, and all was white as the moon. They slept, and the prince and daughter were in the snow, but the prince and daughter were not. They did not sleep and called to the moon. This clouded the hills, and all was white as the moon. They slept, and the prince and daughter were in the snow, but the prince and daughter were not.

TANUKI'S GOLD

A folk tale from Japan

The 'tanuki' is a member of the dog family that lives wild in the forests of Japan. Like its cousin the fox, the tanuki is small and agile, with a pointed snout and short legs, but its silky fur is striped, like a badger or a racoon. The tanuki is famed in legends of old Japan as a magical creature – one favourite tale tells of a shape-shifting tanuki who could change into a kettle, and perform amazing acrobatics, bringing great good luck. This tale celebrates the way that when winter weather keeps us indoors, we feel especially grateful for the company of dear friends.

'Mukashi, mukashi' – very, very long ago, an old priest lived alone. He spent his days in prayer and meditation. He never needed to bother with earthly things for the local people brought him clothes and food, and patched his roof in the winter.

One winter's evening, the priest was deep in prayer. He knelt before the statue of the Buddha. He struck his bell and listened to the sound resound until it stilled to silence.

"Nyawell! What was that? From outside came a pitiful sound. The priest opened the door, and there, shivering in the cold, was a tanuki.

TANUKI'S GOLD

"Your boldness" implored the creature. "Please, may I come in and warm myself by your fire? It's bitterly cold."

The priest's eyes opened wide in surprise. He knew that tanuki hibernate in winter. "Why aren't you in your burrow?" he asked.

"In winters past, the freezing frost and mountain snow were nothing to me. But now I grow old; I feel the cold in my bones. Please, let me in."

"Of course, of course!" said the kind-hearted priest, full of compassion.

The tanuki lay thawing by the fire, eyes closed in exhaustion, wet fur steaming gently. The priest continued his prayers.

The tanuki slept by the sunken hearth all night, and in the morning, he puffed away. The next night, the tanuki returned. And the next, and the next. He brought with him fallen sticks and dead leaves for the fire, and the old priest grew fond of the sight of him, sleeping by the hearth. The white fluff of his tummy rose and fell with the gentle rhythm of his snores.

The priest noticed that when he gazed upon the tanuki, asleep in such deep peace, he felt peace in his own body, too. His breathing slowed. His gear softened. He stroked the creature's silky fur. Sometimes, the priest sat and sipped a bowl of green tea, and the tanuki curled beside him. Its warm weight was comfortable – it made him feel content.

When winter was over, and white snow gave way to pink blossom, the tanuki came to the hut no more. But when winter came around again, the tanuki always returned, and the old priest greeted his old friend with a glad heart.

Enchanted Tales

The Magic Fish

A tale from China

The Brothers Grimm version of "Cinderella" is the one many of us are familiar with, but there are hundreds – maybe even thousands – of different versions of this tale from around the globe. This version from China was the first to be written down, over 1,000 years ago.

Once upon a time, in a little shed outside a little house in the cave mountains of Southern China, there lived an orphan called Ye-Tsien. She was bright-eyed, clever, kind and good at making things. Ye-Tsien's stepmother loved her own daughter best, so Ye-Tsien had to do all the heaviest, most dangerous work, like collecting firewood from the deep forest or water from the high mountain pools. One day, Ye-Tsien was collecting water when up from the bottom of a deep mountain pool there was a shimmering and a glittering. It travelled up and up until something broke the surface – a tiny, shining golden fish! The fish looked up at Ye-Tsien, Ye-Tsien looked back – and from that moment, the fish

The Magic Fish

and Ye-Tsien became friends. She took it home, placed it in a basin and fed it every day with scraps from her own plate. The fish grew and grew until, one day, it had grown so big she had to take it back to the pool. Still, Ye-Tsien visited the golden fish every day, and each time the fish would poke its shining golden head out of the water and greet her.

A few weeks later, the Stepmother was hungry and had an idea. Secretly, she fished Ye-Tsien to the pool. She saw how the huge, sparkling, delicious-looking fish always came out for Ye-Tsien but stayed deep under the water when anyone else came by. *How can I outwit this clever fish?* she thought.

The next day, back at home, the Stepmother gave Ye-Tsien new clothes to put on and sent her on a long errand down the mountain. Then she disguised herself in Ye-Tsien's old clothes, went to the pool and called the fish. When it bubbled up from the bottom of the pool, the Stepmother was ready with a knife. She took the golden fish home, chopped it up, cooked it and served it up to eat with her favourite daughter.

'Delicious!' they both said, wiping their mouths. They ate every morsel and threw its bones away on the rubbish heap.

The following day, Ye-Tsien hurried to the mountain pool and called – but no fish came. Big tears fell from her eyes and splashed into the empty pool. But as she cried, the air thickened, shimmering and glittering, and a figure appeared. It spoke in a voice that reminded her of safety:

*Today you cry, today you weep,
But look upon the rubbish heap.
Your fish friend's magic bones are there.
They'll grant you wishes, never fear.*

His new queen felt at once the lack of love. Hurt hardened her heart. One day, when the boys woke her with their noise, she snarped, "Get out!" she shouted. "Just go! Fly away!"

Words have power. As she pointed, the boys' skin sprouted feathers. Their arms became wings. Their necks stretched. And they flew: six white swans.

• THE NETTLE QUEEN •

The Nettle Queen
A folktale from Denmark

Nettles grow in great families and give us many gifts: food, medicine, cloth and dye. Nettle leaves are so rich and tender that many countries have to eat them – the plant uses its sting to make sure that not too many of its leaves get munchled! Nettle tea is zesty green. Nettle soup helps our bodies and bones grow strong and healthy. People have been using nettle stems to make cloth since Bronze age times.

Once there was a king who had six sons and one daughter, Eliza. The king loved his family dearly. So, when the king's wife died, he was sunk in grief. But his advisers told him: "The country needs a queen! Besides, the children need a mother. So, though his heart had not yet healed, the king married again.

His new queen felt at once the lack of love. Hurt hardened her heart. One day, when the boys woke her with their noise, she snarped, "Get out!" she shouted. "Just go! Fly away!"

Words have power. As she pointed, the boys' skin sprouted feathers. Their arms became wings. Their necks stretched. And they flew: six white swans.

Now, the queen made a strong dark dye – in a great pot, walnut shells hobbled and brewed. She poured the dye into Eliza's bath. It stained her hair and changed her face – she looked so different, even her own father did not know her.

"Who let a stranger in here?" he cried. "Throw her out!"

Eliza fled, into the forest. She wandered the woods, wishing her brothers were with her. But the trees and the plants, the birds and the animals were all with her. She talked to them, as if they were her brothers.

"Hello, Butterfly!"

"Hello, Nettle, may I pick a leaf? Ow?"

The sting made the tips of her fingers tingle. Just then, along came a woman, gathering nettles for soup. She picked a dock leaf for Eliza, to soothe her skin. She showed her the tiny butterfly eggs, she sheltered beneath a nettle leaf. She taught her how to pick the very top tips of the plant, that are best to eat. Eliza thanked the woman, and she asked her, "Please... Have you seen six princes?"

The woman shook her head. "No... no princes... But I did see six swans, down on the river."

Eliza followed the river all the way to the sea. But she didn't find her brothers. She did find a white feather, on the shore. She sat on the sand with the feather in her hand. And as the sun began to set, there came a sound – over the ponding of the waves – the singing of wings.

From over the horizon came six wild swans. As they landed, their white feathers fell away. There stood six boys – Eliza's brothers! Then there was hugging and kissing and laughing and crying, and more hugging.

"Every day, when the sun rises, we turn into swans," said her youngest brother. "We only become boys again when the sun sets. We live far off over the ocean, but every day, we fly back, to look for you."

"Now you've found me," said Eliza. "Take me with you!" So Eliza and her brothers gathered supple willow and tough rush, and together they knatted a net.

Eliza sat in the net and her own brothers lifted her clean into the

- Cover finishes: arlin and foil

Mythical Tales

DIONYSUS AND THE PIRATES

Once, there was a party with three things on the ship you call
 one single and most of them were things called wine. They had a grape
 vine nearby without heading.

"These grapes are so sweet and so good to eat!" said the captain.
 "Yes, but I'm afraid they're not as good as the ones we had in our
 garden." said the pirates.

"I'll get you some more grapes from my vineyard," said the captain.
 "I'll get you some more grapes from my vineyard," said the captain.
 "I'll get you some more grapes from my vineyard," said the captain.

PERUN'S STOLEN CATTLE
A tale from Croatia

There was a farmer who had a cow and a pig. One day he was
 in the field and he saw a cow and a pig. He was very surprised to see
 them there. He went to see what was going on. He saw the cow and
 the pig. He was very surprised to see them there. He went to see
 what was going on. He saw the cow and the pig. He was very
 surprised to see them there. He went to see what was going on.

DIONYSUS AND THE PIRATES

A tale from Ancient Greece

Greek myth is bursting with colourful gods and goddesses and their dramatic dealings with each other – conquest, trickery, family feuds and love more. But some of the most amazing and fascinating stories are about what happens between gods and people. Dionysus – son of the mighty god Zeus but also half-human himself – is known as the god of wine, pleasure and inspiration. This story is about one of his extremely creative ways of punishing humans who annoy him...

DIONYSUS AND THE PIRATES

Long ago, a fast ship sped East, her sunlight catching its shadow on the sparkling sea. The wind filled its sails and rows of wooden oars cut through the water, worked by strong sailors. On the ship's deck, twenty pirates smiled. The ship's hold was full of gold, jewels, fine delicacies, and something even better: a rich passenger who was going to make their fortunes!

That morning, a young man with diamond-bright eyes, rich purple robes and long dark hair, had wined and coliced from a cliff-top.

"Sailors! Take me to the island of Naxos. I'll pay you well!"

The pirates agreed, and the young man had boarded the ship. But the pirates didn't just take goods, they were kidnappers too. The ship sailed straight past Naxos, and the captain cried, "You're our captive now! Your family will pay a ransom, or we'll sell you as a slave!"

The young man did not answer. He did not look worried either. He just stood there, eyes glittering, mouth curled up in a secret smile.

- This book can be read as a gentle story at bed time or to learn more about the world
- Cover treatment: matt lam + spot UV + glow-in-the-dark-ink (cover and nighttime pages)

Day and Night

A Guide to Day and Night

Polar night and midnight sun

At the very north and south of Earth, days work differently. For six months of the year the sun never rises above the horizon. This is called the **POLAR NIGHT**, and it is dark all the time. For the other six months of the year, the sun never falls below the horizon. This is called the **MIDNIGHT SUN**, and it is light all the time.

This phenomenon happens because Earth is tilted. When one pole is tilted towards the sun, the other pole is tilted away. This makes daytime or nighttime last more than 24 hours in these places.

<h4>Dawn</h4> <p>Before the sun has risen above the horizon, the sky lightens. This time of day is also known as twilight.</p>	<h4>Sunrise</h4> <p>The sun rises higher, eventually coming up over the horizon line, warming the air.</p>	<h4>Daytime</h4> <p>The period between sunrise and sunset, when the sun peaks up over the horizon line then travels in an arc across the sky. It is warmer than it is at night and there is more food around, but animals are more easily spotted by predators in the light.</p>	<h4>Sunset</h4> <p>The sun sinks below the horizon line, causing light and warmth to fade.</p>	<h4>Dusk</h4> <p>The sun lowers even more, even though we can't see it now. The sky grows darker but there is still a faint glow of light. This time of day is also known as twilight.</p>	<h4>Night</h4> <p>The period between dusk and dawn, when it is dark. The air is cool and more humid. There is less food around at night but under the cover of darkness animals can avoid getting caught by predators.</p>
<p>Animals and plants that are active in twilight are called CREPUSCULAR.</p>		<p>Animals and plants that are active in daytime are called DIURNAL.</p>	<p>DIURNAL animals and plants prepare to rest for the night.</p>	<p>CREPUSCULAR animals and plants are active again.</p>	<p>Animals that are active at night are called NOCTURNAL.</p>

Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

The Incredible Voyage

Embark on an incredible adventure in a magical land this beautifully whimsical puzzle book.

- A beautifully whimsical puzzle book, mixing the fun and interactivity of puzzles with an epic adventure story. Perfect for unlocking the joy of reading.
- Written and illustrated by Aleksandra Artymowska, illustrator of bestselling *Around the World in 80 Puzzles* and *20,000 Leagues Under the Sea: A Puzzle Adventure*. Ola's puzzle books have sold over 100,000 copies worldwide.
- Featuring a strong female protagonist who shows that bravery and a sense of adventure isn't only for boys.

Escape Castle Dracula

A stunningly illustrated gothic puzzle adventure!

- Expanding our high-end activity offering - a core part of the Big Picture Press list
- Perfect for introducing readers to classic horror stories
- A fresh approach to an evergreen, universal subject
- Adam Allori's immersive artwork will appeal to readers of all ages
- Strong backlist and series potential - our follow up title could focus on classic adventure stories

Doodle with Duddle: How to Draw Dinosaurs

Embark on a dinosaur-doodling adventure with expert illustrator and *Gigantosaurus* creator, Jonny Duddle!

- Step-by-step instructions from expert illustrator Jonny Duddle, showing how to draw a range of real-life dinosaurs and characters from his original books - perfect for Giganto super-fans and dino-loving kids alike
- Over 2 million Jonny Duddle books sold worldwide, including over 150,000 copies of the original *Gigantosaurus* book.
- A new strand using the original *Gigantosaurus* material, expanding the brand's reach beyond the TV show
- Published to celebrate 10 years of *Gigantosaurus*.

The Little Gardener's Handbook

A vibrant introduction to gardening.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

Be Resilient!

THING-SPRING-O-METER

HOW MUCH BOUNCE IS IN YOUR THING-SPRING?

Show how resilient you already are on the THING-SPRING-O-METER.

Decide how far your THING-SPRING can stretch when you need to do something big, new or a bit scary or difficult!

Colour the THING-SPRING-O-METER to show how high they'd reach right now. The book will show you how to get them to stretch the rest of the way.

THING-SPRING STRETCHER

It's time to stretch and stretch your THING-SPRING. Are you ready to collect some THING-SPRING points?

Whenever you complete an activity, colour and collect the THING-SPRING points on the page. Then add them to the THING-SPRING STRETCHER by colouring in the number of points you've earned - see how far you can go and become a RESILIENCE SUPERSTAR!

For every THING-SPRING point you earn, colour in one section. If an activity's worth three THING-SPRING points, colour three sections, or if it's worth five THING-SPRING points, colour five sections, and so on. If you repeat an activity, you can collect the points again!

YOUR HERO TEAM!

Your resilience can't grow super strong and stretchy all by itself. You'll need two heroes around you to build the healthiest THING-SPRING!

The first is your inner HERO TEAM. Your HERO TEAM have their own superpowers and are all important parts of YOU.

Design a colourful costume for each member of your HERO TEAM. Think about their special qualities and try to build them into your design.

You'll be using a lot more of your HERO TEAM and getting to know all about them and their jobs in the following pages. The activities will show you while your HERO TEAM together, so they'll be ready to spring into action to support you whenever your bounce feels a bit flat!

If you are a superhero! or a hero! then draw your HERO TEAM of friends that worry you and soon have them more easily as you go through this book.

THE ACTIVITY EARN YOU FIVE THING-SPRING POINTS

HOPE Believe that good things are possible

ENERGY Put effort into making good things happen

RESILIENCE Believe they can overcome anything

OPTIMISM Believe in their own power to succeed

PICK YOUR OWN SUPPORT SQUAD

Complete this set of SQUAD CARDS to remind you who you can support you as you grow your resilience. Draw their portraits and add their important information onto the cards.

✓ You've got your HERO TEAM organised, so it's go ahead and pick your SUPPORT SQUAD!

✓ Everyone needs a SUPPORT SQUAD to grow healthy THING-SPRING!

TIP Pick your SUPPORT SQUAD members from your home, family, school, clubs, community and organisations you belong to. Include people and pets and at least one of your favourite toys. Pick team members who are helpful or listening, encouraging, being funny, reassuring, challenging, cheering or comforting you.

Sometimes your resilience gets stretched so far as it can go for now, and that's when you need to ask an adult for help. It can take a little time for you to feel the spring in your step again but it's all there and will bounce back with support.

Remember, you don't have to BE RESILIENT by yourself and it's NOT all your responsibility like your SUPPORT SQUAD!

Now you can bounce around all over this book. How far - you've got that!

Remember to ask your SUPPORT SQUAD for help to train the whole HERO TEAM together, wherever you need to.

Practice means who they are to you, such as friends, teacher and so on.

WHEN THE GOING GETS TOUGH

What happens to you when you do something that feels big, new, scary or difficult? Perhaps you feel excited, anxious, stressed, nervous, scared, frustrated or angry?

These are called **EMOTIONS**

You might not always know the name of the emotion you're feeling, but it's important to learn to recognise the sensations you feel in your body and where you feel them.

This is called **INTEROCEPTION** in-ter-o-sep-shun

When you can identify your body's sensations, you can **BE RESILIENT!** The more you try to recognise your feelings, the easier it becomes to manage and confront them.

Think of a fun THING you'd like to do that's difficult to face or you're worried about. Write it in this box.

Try out for a team or performance

Ask someone to be my friend

Read to the class

Sing a solo

Take a penalty

Take part in a group activity

Draw yourself using the outline. Now, really imagine yourself confronting that THING. Circle any of the feelings you notice and draw an arrow to where you feel them.

Hard to swallow or lump in throat

Hot or cold face

Feeling separate from everyone else

Ringing in your ears

Tight chest

Fast breathing

Feeling dizzy, faint or light-headed

Numb or tingly hands

Hot or cold waves

Racing or fluttery heart

Sweaty palms

Feeling sick

Trembling or shaking

Needing the toilet

Butterflies in your tummy

Pain in your muscles

Numb or tingly feet

Upset tummy

Next time you have a challenge to face, come back to this page and go through the activity again to see what body sensations you notice. This will stretch your THING-SPRINGS and change how your brain copes with challenges - you'll soon be fearless! You can also come back any time you need to explain to someone what's happening for you.

THIS ACTIVITY EARN YOU THREE THING-SPRING POINTS

Hello Happy! Mindful Kids

Children can colour and doodle their way to happiness, calm and confidence.

- *Mindful Kids* is an activity book series designed and written for children about emotions and feelings.
- Includes an introduction to the book, and notes for grown-ups by consultant Dr Sharie Coombes, Child & Family Psychotherapist.
- Use creativity to combat negative feelings, work out worries and put anger back in its place with the writing and doodling activities.
- Combined, the *Mindful Kids* series has sold 1 millions copies worldwide (as of July 2022)

Hello Happy! Mindful Kids

I'M FEELING KINDA...

How are you feeling? Whether you're happy, sad or full of joy, it's okay. All emotions are okay - which is a good thing as we have loads of them!

Circle a one and draw the expression to fit the emotion or add the emotion to fit the expression.

I'M FEELING Happy
 I'M FEELING Sad
 I'M FEELING
 I'M FEELING
 I'M FEELING
 I'M FEELING

embarrassed
shocked
frustrated
angry shy
scared
lonely tired
anxious

BRAIN BREAK!

To calm your emotions and feelings you need to spend your time. To do this you need to give your brain a break by switching off from the every day things which have caused difficulty on your head.

The first thing to do is to get rid of the noise around you and learn to be alone. It may feel uncomfortable at first, but here's what you need to do:

- Turn off the TV
- Turn off any video games
- Turn off any radio or stereo
- Put smart technology, phones, tablets etc away
- Close windows to the outside world so you can't hear car engines and sirens
- Take yourself away from people talking

Once you've done this...

Sit still in a comfortable position, close your eyes and concentrate on breathing in and out, in and out.

Now, in this quiet calm state ask yourself how you are feeling.

See yourself the chance to recognise any underlying feelings of anger, sadness, worry or anxiety and give yourself permission to feel that feeling.

For example say, "I am feeling SAD. I feel SAD because I had a bad day at school. I will not always feel SAD, but right now I feel SAD and that's OK."

Repeat the sentence 5 times.

FEELING FEELINGS

Sometimes your feelings don't want to stay inside. Sometimes they want to JUMP AND EMERGE OUT!

Write where and how you feel when you're sad on this dummy.

Write where and how you feel when you're angry on this dummy.

MY BEATING HEART

Take some time to get to know your heart rate. Take your pulse by holding the two fingers nearest your thumb to your neck or to the underside of your wrist.

Like all emotions, anger releases chemicals in your brain, which then cause changes in your body that you can feel. One of these changes is an increased heart rate.

TRY TAKING YOUR PULSE WHEN YOU HAVE...

- JUST WOKEN UP
- RUN ON THE SPOT FOR 3 MINUTES
- HAD A ROW WITH SOMEONE
- EATEN A BIG MEAL
- JUST BEGUN A PIECE OF HOMEWORK
- READ A CHAPTER OF A BOOK
- BEEN FOR A WALK

Write down the beats per minute for each of these.

REMEMBER! Anger can be positive. Many people have made good changes in the world because they felt so angry about something they used the anger to spur them on to positive action. What makes you angry in the world? How could you make a difference?

DID YOU KNOW? Your heart rate will also increase when you are stressed or afraid.

THE ANGER ICEBERG

Anger never exists on its own - there are always underlying emotions causing it. Add more emotions to the underwater part of the iceberg to show the other emotions which might lead to you feeling angry.

ANGER

frustrated

lonely

worried

SCARED

ALONE

YOGA POSE

Try these poses before bedtime or when you want to feel calm.

TREE POSE
Place your feet on your ankles or above your knee and balance. Then change to your other leg.

SAI "I AM BALANCED"

BUTTERFLY POSE
Sit on the ground, press your feet together, and roll your shoulders back.

SAI "I AM SAFE"

LADYBIRD POSE
Bend your knees, roll your shoulders back, and press your hands together.

SAI "I AM HAPPY"

CHILD'S POSE

Bend your legs, fill your body on to your thighs and either rest your arms by your sides or extend them in front of you, whichever feels more comfortable.

SAI "I AM AT REST"

CAT POSE

Breathe in and look up, lifting your back drop down. Breathe out and tuck in your chin, lifting your back in a high arch.

SAI "I AM AT EASE"

SLEEP POSE

Lie on your back and take slow breaths. Close your eyes if you want. Try to empty yourself of thoughts. If your mind wanders away, notice where it goes, then bring your attention back to your breathing.

SAI "I AM AT HOME"

YOUR SAFE PLACE

Draw or stick a picture of somewhere you feel completely safe and happy.

Your safe place could be somewhere you've seen or been to, heard about, read about or dreamt about. A special, safe place where everything feels peaceful, joyful and wonderful.

COLOUR THIS IN

I AM
LOVED

TAKE A BREATH!

Try this breathing exercise to help you relax:

STEP 1

Make sure you are sitting comfortably in a quiet and safe place. When you feel ready, close your eyes. Notice your breathing. Think about how it feels breathing in and breathing out. Try to breathe in through your nose and out through your mouth.

STEP 2

Place your hand on your tummy and focus on the feeling of your stomach rising and falling with each breath. When you breathe in, quietly say 'in' to yourself, and when you breathe out, quietly say 'and out' to yourself.

STEP 3

Concentrate on nothing but your breathing and try to let go of any other thoughts you may have.

When you've had lots of practice at the breathing exercise, see if you can think about a happy memory at the same time. This way, your happy memory will take up all the space in your brain, and there won't be any room for the worries.

Tell Me About: Planet Earth

Big science for little readers.

- The fourth title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at earth science for young children, covering topics such as day and night, seasons and weather, biomes, physical landscapes, the water cycle, volcanoes and earthquakes, fossil fuels, carbon emissions and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Planet Earth

Earth is Home

You live on a brilliant ball of spinning rock called Earth. It's a planet, travelling through space on a gigantic loop around a star called the Sun.

There's another ball of rock about a quarter of the size of Earth and you can see it in the night sky. It's called the Moon.

It takes a month for the Moon to travel around Earth on an oval path.

It takes a whole year to travel all the way around the Sun. So if you are five years old, you have circled the Sun five times already!

Earth travels around the Sun on an oval path but it also spins on the spot. The spin is why it gets dark at night.

Your home turns away from the Sun at night and by morning it has turned back towards the Sun once again. It takes 24 hours for a complete spin to happen, and we call that a whole day.

Caves

Caves are big holes carved into cliffs by waves hitting the rock. But they can also form underground as rain trickles through cracks in the rock.

That's right, tiny little rain droplets can make massive caves because they dissolve the rock away a little bit at a time.

Underground rivers flow through caves. They wear the floor of the cave down to make them even bigger.

Inside the cave, some droplets of rainwater evaporate. As the liquid water drops turn into gas, they leave behind the tiny bits of rock they were carrying. The bits of rock stick to the roof.

In a thousand years, all the drops of water will have left enough rock behind to make a shape about as long as your finger. This is called a stalactite.

The same thing happens as the water drops onto the floor of the cave too. The cave floor grows upwards into a wider opening, which is called a stalagmite.

Digging and Drilling

When humans dig useful rocks and metals out of the ground, it is called mining. People also drill long holes deep down into the rock to find little pockets of gas and a liquid called oil.

The oil and gas found deep underground were once tiny sea creatures. They sank to the bottom of the sea and got squashed over millions of years. They turned into a dark liquid called oil and a gas called methane.

Coal is a black rock that gives off lots of heat when it burns. It is made from leaves that took in swamps millions of years ago.

We can burn oil, coal and methane gas to make electricity and to power vehicles.

Most metals are hidden underground with other rocks. A few metals are found just as they are at the surface, including gold, silver and copper.

Metals can make lots of useful things including bikes, phones, computers and cars.

Oceans

If you flew out into space and looked back at Earth it would look blue. That's because two thirds of our planet's surface is covered in liquid water. It's mostly found in the oceans and seas.

Waves

Waves are made on the surface of the water as the wind pushes the sea.

Tides

The sea comes in at high tide and goes out at low tide. This happens twice every day because of the way Earth is spinning beneath the Moon.

That's right, the Moon makes our tides! Gravity is a pull that happens between Earth, the Moon and the Sun. It pulls on you too. When you jump, gravity pulls you back down to Earth.

Low tide

High tide

The oceans on planet Earth slowly change shape because the rock beneath them is moving. This creates underwater valleys, caves and mountains.

Mountain

Valley

Did you know...? Seawater is salty because of salt from rocks!

Tell Me About: The Human Body

Big science for little readers

- The first in a brand-new series of non-fiction books for readers 4+.
- Written in friendly and engaging language by science educator and CBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung
- Cover finishes: matt lam and spot UV
- CONTENTS: Brilliant body; The skin; Skeleton; Muscles, Brain; Thinking; Nervous system; Eyes; Ears; Mouth and Nose; Digestive System; Blood; Water; Pumping blood; Lungs and breathing; Immune system; Feelings; Helping your body

Tell Me About: The Human Body

Brilliant Body

So many amazing things are happening in your body right now! Let's take a look at just a few of them...

As you breathe, spongy bags called lungs are sucking air in and putting it into your blood.

When you run, stretchy cords called muscles pull bones back and forward. Your bones connect together in a structure called a skeleton. And your skin wraps everything up.

Tiny electrical signals are making your heart beat - to-beat-to-beat - to pump blood around your body.

Your body is made from lots of different parts that work together to do important jobs. These parts are called organs.

When you think or laugh or wiggle your toes, you use energy. The energy comes from the food you eat. The food goes into your blood and all around your body.

If you look at the pictures in this book, you're using organs called eyes. And when you think about all of this, you use an organ called the brain.

The Skin

Let's begin our body tour with your skin. This stretchy waterproof layer wraps around your body keeping germs out and keeping your insides... inside!

Your skin is full of sensors that help you to touch and feel things. You can feel pain and warmth and the tiny footpads of an insect crawling on your arm.

Did you know...? The skin is the biggest organ in the body!

Touch sensors help you to feel how hard to press when you lift it and hold objects - so you don't drop or squash them.

The top layer of your skin is dead! Underneath it, new skin is being made. It pushes the old skin upwards until it flakes off as dust. Yes, your skin becomes dust!

Your hair and nails are made from the same stuff as skin. It's called keratin.

Your skin cools your body too. One way it does this is by making little drops of liquid called sweat.

When sweat drops are warmed by a hot body, they float off into the air taking heat away with them!

Skeleton

The thing that gives your body its wonderful shape and height is a skeleton. It is made from 206 bones that join together at hinges called joints.

Full your fingers! The bones are the hard parts, and the joints are where your fingers bend.

Strong bony bones called cartilage make up some parts of the skeleton including your ears, your nose and sections of your ribs.

The skeleton protects your insides too. Your ribs make a cage around your lungs and heart and your skull is like a helmet, protecting your brain.

Inside your biggest bones is a juice called marrow. New blood is being made in the marrow. That's right, your bones can make blood!

Bones are full of tiny holes that make them light. But the pattern of the holes makes them really strong too.

Short stretchy cords called ligaments stick the bones to each other. Longer, stretchy cords called muscles pull the bones around so you can move.

Muscles

Muscles are stretchy cords that pull body parts to make them move. If you wiggle your eyebrows and stick out your tongue, you did it using muscles!

Muscles can pull, but they can't push so they need to work in teams. One muscle pulls a body part one way, and another muscle pulls it back again.

Great teamwork muscles!

1. Bend your arm. The set of muscles at the front of your arm, called triceps, pulled it up by getting shorter.

2. Now straighten your arm. Another set of muscles at the back of your arm, called biceps, pulled your arm down to straighten it.

The muscles that move your bones around are called skeletal muscles. But they're not the only muscles you have!

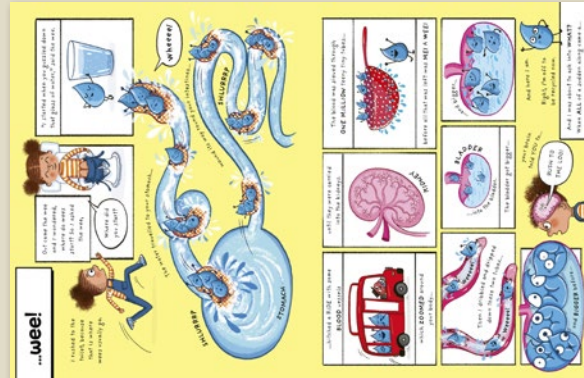

Cardiac muscles make your heart squash to pump blood.

Smooth muscles line the tubes in your body. They help push things through the tubes.

Did you know...? Muscles help you hold in pee until you're ready to let it go.

The World's First Rollercoaster

Amazing inventions stories in comic-book form by Blue Peter Award-winner Mike Barfield.

- An irresistible way into science and technology with a dash of history from the brilliant Mike Barfield, author of *A Day in the Life of a Poo, a Gnu and You*, winner of the 2021 Blue Peter Award for a Book With Facts. Mike's books have sold in over 40 territories.
- Featuring the greatest inventions in architecture, travel, the home, food, fashion, toys, sports, technology and more, this book is packed with facts for curious minds. Includes tips on sending in a patent and profiles of young inventors alongside greats such as Diebedo Kere, Bertha Benz, Percy Spencer, Momofuku Ando, Kano Jigoro and Jawed Karim.

Discover the rich history, vibrant culture and unique identity of each nation through its flag!

- A vibrant exploration of our world's marvellous flags! Take a fact-filled and fun journey across the contents to discover all that lies in our national flags.
- Content is split into 5 chapters based on the continents: Europe, Asia, the Americas, Africa and Oceania. Each section features a chapter opener, 4-5 spreads looking at specific flags in detail, and a theme spread which looks at the world more broadly.
- Feature spreads look at an individual flag's history, symbolism and meaning, and also include 2 or more other flags which share a similarity in some way, whether that be a symbol, geographical location or a shared history.

Dinosaur Desert

A dino-mite adventure story to inspire the next generation of scientists and explorers!

- Publishing on the 100th anniversary of Zofia Jaworowska's birth, the book has been created in collaboration with her family using extensive archive material.
- Beautifully illustrated by Polish artist Ola Plocinska, the book includes a mix of graphic novel spreads, kit lists and wonderful scenes of the Gobi Desert as well as detailed information on how to find fossils to inspire budding palaeontologists.

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

Of all the food items that have been invented, ice cream is probably the most popular. It's a treat that's enjoyed by people of all ages and in all climates. The first recorded recipe for ice cream was written in a Chinese text from the 10th century. It was made with snow and fruit. In the 17th century, a French chef named Francesco Procopio created the first 'ice cream parlor' in Paris. He used a machine to churn the cream, which made it smoother and easier to eat. Today, ice cream is made in many different ways, from soft-serve cones to gourmet gelato.

Easy Ice Cream

15

Bicycle

"Freedom on two wheels"

Did you know that the first bicycle was invented in the 18th century? It was called a 'velocipede' and was made of wood. It was a simple machine with two wheels of the same size. The first person to ride a bicycle was a Frenchman named Sivard. He rode it in 1817. The bicycle was a great invention because it allowed people to travel faster and farther than ever before. It was also a fun way to exercise. Today, bicycles are used for many different purposes, from commuting to recreation.

Pedious Penny-Farthing

Camera

"Magicians"

24

Although it's often thought of as a simple machine, the camera is a complex piece of technology. It was invented in the 17th century by a scientist named Hans Lippershey. He was a Dutch optician who was trying to make a better telescope. He discovered that light rays could be focused through a lens to create a small, inverted image. This was the first camera. Today, cameras are used for many different purposes, from taking photos to recording videos.

Developed to Perfection

High-Speed Train

"No-speed" "No-stops"

25

Before the 19th century, the only way to travel long distances was by horse-drawn carriage or steam train. The steam train was a great invention because it was much faster than the carriage. However, it was also very noisy and polluting. In the 19th century, a Frenchman named Marc Segnier invented the first high-speed train. It was called the 'Train à Grande Vitesse' and was designed to travel at high speeds without stopping. Today, high-speed trains are used all over the world.

Marvelous Maglevs

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on a hill or in a field. It's a machine that converts the energy of the wind into electricity. The first wind turbine was invented in the 19th century by a Danish scientist named Poul la Cour. He was trying to find a way to generate electricity in a remote area. Today, wind turbines are used all over the world to generate clean energy.

Green Energy

Helicopter

"A surprising way to fly"

35

When you think of a helicopter, you probably think of a machine that can fly. It was invented in the 19th century by a Frenchman named Louis Bréguet. He was a pioneer in aviation and was trying to find a way to make a machine that could take off and land vertically. Today, helicopters are used for many different purposes, from rescue operations to military operations.

Versatile VTOLs

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles – no carts, cars, bikes, buses, trucks, trains, trams or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3200 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

The very first wheels were used to make pottery. The art of pottery began around 30,000 years ago. Originally, potters would shape clay into pots with their hands, but this took a long time. The Mesopotamians invented a better method in around 3500 BCE. The potter's wheel was a large stone disc balanced on a stick called an 'axle', which could be spun. By putting clay on the wheel and spinning it, the potter could shape the clay quickly into pots. We don't know for sure, but it seems likely that the potter's wheel led to the invention of the vehicle wheel.

Internet

"The world at your fingertips"

18

The invention of the Internet – a network of computers that 'speak' to each other – was a concentrated effort in the United States. The first computers were connected to each other in 1969 during the Cold War (1947–1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: LOGIN, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want – books, food, holidays, cars – with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

World Wide Web

The World Wide Web (WWW) is a gateway to the Internet. It's made up of search engines like Google and Safari, the Internet addresses (also called URLs) we type in, and the websites that appear on our screens. It was invented by a British computer scientist called Tim Berners-Lee in 1989 while working at CERN, a science research laboratory in Switzerland. The WWW made the Internet accessible to everyone, not just scientists and academics.

Earthlings

Na 100 dorosłych Ziemiaków 87 potrafi czytać i pisać, 87 poszło do szkoły podstawowej, 66 uczyło się w szkole średniej, 40 zdobyło jakiś rodzaj wykształcenia wyższego, a siedmiu ukończyło studia uniwersyteckie.

Dawniej umiejętność czytania i pisania była u Ziemiaków niezwykle rzadka. Pisać i czytać potrafili tylko przedstawiciele władzy, duchowieństwo i nauki. W Europie nieliczni piśmiennicy posługiwali się wyłącznie łacyną. Książek, przepisywanych rękopiśmiennie, było mało. Były one bardzo drogie i dla

większości niedostępne. Dopiero wynalazek druku około 1450 roku, które spowodowało masową dostępność książek i gazet w językach narodowych, wpłynęło na rozpowszechnienie się umiejętności czytania. Zmienił się też sposób lektury: zamiast na głos zaczęto czytać cicho, prywatnie.

Przed 3000 laty w Egipcie i Mesopotamii zaczęto pisać. W 1800 roku w Europie było 100 000 000 osób, 25% - mniej niż 1000 osób, a 64 - tylko jedna albo dwie osoby. W 2050 lat temu Ziemiaków było 3000, w 2050 roku będzie ich już 10 000 000 000.

FAKTY NA KONIEC

There are eight billion Earthlings living on Earth.

There are more and more earthlings. 200 years ago, one billion people walked the planet. In 2056 there will already be ten billion.

More than half of Earthlings today live in cities, but for most of history, Earthlings lived mainly in villages. As recently as 200 years ago, 95 out of 100 Earthlings lived outside of the cities.

Nine out of ten earthlings in cities breathe polluted air.

Three out of ten residents of cities live in slums.

In the year 0, the Earth's population was 200 million, in 1000 - half a billion, in 1927 - two billion, and in 1960 - 3 billion. 55% of Earthlings live in cities. By 2050, cities will be home to 70% of Earthlings.

The Science of Sound

The Science of Sound

B P P

COVER TO BE REVEALED

**A visual exploration
of the science behind
sound and music.**

- An visually extraordinary take on the subject of sound
- Perfect for primary schools (on KS2 curriculum), but also the ideal gift book for general interest readers
- Engaging text by Trevor Cox - a professor of acoustics and engineering at Salford University.

Against the Odds

Meet the adventurers who have tried, failed and succeeded against the odds!

- *Alastair Humphreys's Great Adventurers* won the Stanford Travel and Teach Primary Book awards and has sold over 45,000 copies worldwide (as of July 2022)
- Sample contents: , Junko Tabei, Juanita Harrison, Ffyona Campbell, Bernard Moitessier, Goran Kropp, Terry Fox, Matthew Henson, Frank Wild, Joe Simpson, Jack Swigert, Jeanne Baret, Robert Smalls, Zheng He, Emile Leray , Karen Darke, Beth French and Marianne Du Toit.
- Author Alastair Humphreys - National Geographic Adventurer of the Year 2012 - has hand-selected 20 inspiring adventurers and retold their stories in his own words

Against the Odds

JEANNE BARET

Small text describing the story of Jeanne Baret, a French explorer and the first woman to cross the Andes mountains.

INTO THE WILDERNESS

A MAN IN DISGUISE

Small text describing her journey and the challenges she faced.

A CLEVER DISGUISE

Small text describing the story of a man in disguise.

A NEW LIFE

Small text describing the story of a new life.

Was Robert Smalls happy?

Small text describing his feelings.

JUNKO Tabei

Small text describing the story of Junko Tabei, a Japanese mountaineer.

Small text describing her achievements.

ROBERT SMALLS

Robert Smalls was born into slavery in 18th-century America, deep in the South. He was desperate for his family to escape to a better life. But the outbreak of the American Civil War seemed certain to end his hopes of freedom and safety.

As a child, Robert Smalls worked as an enslaved cotton picker on a plantation.

When he was 12, he was sent to Charleston as a labourer, working in a hotel and then as a lamplighter.

As a teen, he worked on the docks. He got to know the ships well and became a helmsman, in charge of steering the boat.

At 17, Robert got married and was desperate to buy his family's freedom. But for every \$15 he earned as an enslaved man, he was only allowed to keep a single dollar. This made it impossible to save the \$800 he needed. Robert was trapped, as his people had been for centuries, and he knew that if he wanted to be free, he would need to come up with a spectacular plan.

US CIVIL WAR 1861 - 1865

DREAMS OF FREEDOM

The American Civil War began in 1861 between the Southern States (the Confederacy) who wanted to keep slavery, and the Northern States (the Union) who did not.

In 1861, Robert was forced into service on a transport ship for the Confederate Army called the CSS Planter, delivering ammunition and supplies up and down the coast. The ship was led by Captain Bevela, with two other white officers and a crew of enslaved Black men.

The captain always wore a wide-brimmed straw hat to protect his head from the bright southern sun. This gave Robert the first glimmering of an idea...

Talking History

150 years of world-changing speeches

- An accessible look at political and social history, and issues that remain pertinent today
- Contemporary design and illustrations from André Ducci accompany engaging text
- Authors are experienced children's writers and academics with expert knowledge on the topics discussed. In 2021, Joan Haig was selected as one of prestigious Scottish Book Trust's authors in residence, working with a school in Aberdeen
- Sample contents: Abraham Lincoln, 'The Gettysburg Address', 1863; Jawaharlal Nehru, 'A Tryst with Destiny', 1947; Nelson Mandela, 'Speech from the Dock', 1964; Harvey Milk, 'The Hope Speech', 1978; Angela Merkel, 'Address to 68th Session of the WHO', 2015 and Severn Cullis-Suzuki, 'Listen to the Children', 1992,

Talking History

In 1903, in the city of Manchester, UK, Emmeline Pankhurst and her eldest daughter Christabel founded the Women's Social and Political Union (WSPU). The organisation campaigned fearlessly for women's right to vote.

THE SUFFRAGETTE MOVEMENT

This wasn't the first time that women in Britain had fought for the vote. Since the mid-nineteenth century, female campaigners called 'suffragists' had tried to win rights for women in society through peaceful petitions and, later on, by refusing to pay their taxes.

But this campaign was slow with few results. After years of unsuccessful peaceful protest by the suffragists, the WSPU decided that it was time for action - 'Deeds Not Words', as their motto said. Members of the WSPU took part in 'civil disobedience' to literally fight for their cause. They chained themselves to railings, hacked politicians' plants, bonked in empty buildings, and smashed windows in public places, constantly clashing with the authorities. They were so determined to achieve their political aims that they deliberately took part in violence and vandalism to influence the public and the government. Newspapers began referring to militant WSPU campaigners as 'suffragettes'. By 1910, the WSPU had branches all over the country.

THE CAT AND MOUSE ACT

Around 1,000 suffragettes were imprisoned for their 'substance' behaviour. While in jail, some continued to fight by going on hunger strikes, refusing to eat or drink. At first, they were released to prevent them from starving, but, by 1910, prison wardens began to force feed them. Women were badly hurt, prompting public outrage at what was seen as government torture. The government responded by passing the 1913 'Prisoners' (Temporary Discharge for Ill Health) Act. Under this new law, when women on hunger strike became critically weak, they were sent home. As soon as they recovered, they were promptly returned to continue their sentence. It was dubbed the 'Cat and Mouse Act' because of the way a cat plays with its prey repeatedly letting it escape before catching it again.

Emmeline Pankhurst was imprisoned and released 16 times! It was in 1913, in between prison sentences, that she visited the United States to campaign for support and funding. She addressed a group of women at the Parsons Theatre in Hartford, Connecticut, in a powerful speech attempting to justify the use of militant tactics in the fight for women's rights.

Together We Can

40 inspirational stories about teamwork

- Sample contents: **Science** Dark Matter (US), Marie and Pierre Curie (France) **Medicine** Penicillin (UK), Louis and Marie Pasteur (France), **Technology** Apple Inc. (US), **Conservation and Rescue** The Black Mamba Anti-Poaching Unit (South Africa), **Politics and Activism** The Magna Carta (UK), The United Nations (global) **Sport** The Olympic Games (global), The All Blacks (New Zealand), **Culture** LEGO (Denmark), BTS (Korea)
- A fully-illustrated anthology of 40 true stories about what human beings can accomplish when they work collaboratively.
- Includes stories from the fields of science, medicine, technology, conservation, politics and activism, sport and culture.

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
The javelin is a spear-like object used in track and field events. The first javelin was made of wood and had a stone head. It was used in ancient Greece and Rome. The modern javelin was invented in 1896 by Carlsson in Sweden. It is now made of aluminium and has a metal head.

LONG JUMP
The long jump is one of the 10 Olympic events. It was introduced by the ancient Greeks. The long jumper runs a short distance and then jumps as far as possible into a sandpit. The longest jump ever was made by Mike Powell in 1991. It was 9.94 metres.

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal at the 1996 Atlanta Olympics. She is the only woman to have won the gold medal in the long jump.

DISCUS
One of the oldest sports known to man is the discus. It is a flat, circular object that is thrown. The discus was used in ancient Greece and Rome. It is now made of metal. The longest throw ever was made by Valeriy Borzov in 1976. It was 66.46 metres.

JAN SZENT
Jan Szent is a Hungarian discus thrower. He won the gold medal at the 1952 Helsinki Olympics. He is the only Hungarian to have won an Olympic gold medal in the discus.

AMERICAN FOOTBALL
American football is a team sport that originated in the United States. It is a contact sport where players use their bodies to move the ball. It is the most popular sport in the United States.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's goalposts. The player who kicks the ball is called the kicker. The player who catches the ball is called the receiver. The player who blocks the kick is called the blocker.

MEET THE TEAM
There are 11 players on the field. They are the quarterback, running back, wide receiver, tight end, offensive line, defensive line, defensive back, and special teams.

MAKING A PLAY
A play is a set of actions that the players perform on the field. The play is called by the quarterback. The play can be a run or a pass. The play is over when the ball is out of bounds or when the time runs out.

FOR READY
One of the best ways to learn the game is to watch a game. The best way to watch a game is to watch a game on television. The best way to watch a game on television is to watch a game on a pay-per-view channel.

RUGBY
Rugby is a team sport that originated in England. It is a contact sport where players use their bodies to move the ball. It is the most popular sport in England.

AIM OF THE GAME
The aim of the game is to score points by kicking the ball into the opponent's goalposts. The player who kicks the ball is called the kicker. The player who catches the ball is called the receiver. The player who blocks the kick is called the blocker.

BASEBALL
Baseball is a team sport that originated in the United States. It is a contact sport where players use their bodies to move the ball. It is the most popular sport in the United States.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field. The player who hits the ball is called the batter. The player who catches the ball is called the catcher. The player who throws the ball is called the pitcher.

CRICKET
Cricket is a team sport that originated in England. It is a contact sport where players use their bodies to move the ball. It is the most popular sport in England.

AIM OF THE GAME
The aim of the game is to score runs by hitting the ball into the field. The player who hits the ball is called the batter. The player who catches the ball is called the catcher. The player who throws the ball is called the bowler.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patota puripatka
Patota puripatka was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans
In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz
The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago
Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

Mongolian cave paintings from 5,000 years ago show people wrestling in front of spectators.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Māori of New Zealand participated in a competition known as the Māori Games - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

Raising the Roof

A cool introduction to classical music

- Broadcaster, songwriter, composer and Scala Radio presenter Jack Pepper is an exciting, young voice in classical music.
- A fun and approachable introduction to classical music
- Includes a playlist, so you can listen as you read
- **SAMPLE CONTENTS:** Hildegard of Bingen 1098-1179; Claudio Monteverdi 1567-1643; Barbara Strozzi 1619-c. 1664; JS Bach 1685-1750; Joseph Bologne 1745-1799; Ludwig van Beethoven 1770-1827; Richard Wagner 1813-1883; Giuseppe Verdi 1813-1901; Ethel Smyth 1858-1944; Arnold Schoenberg, 1874-1951; Igor Stravinsky, 1882-1971; Florence Price, 1887 - 1953; George Gershwin, 1898-1937; Leonard Bernstein, 1918-1990

Myths, Monsters and Mayhem in Ancient Greece

A vivid and contemporary retelling of the Greek myths - now available in paperback.

- Contents: Pandora's Box; Theseus and the Minotaur; Perseus and Medusa; Orpheus and Eurydice; The Trojan Horse; What are the Greek Myths?; Meet the Greek Gods; How the Myths Explained the World; Mythical Creatures and Deadly Beasts; A Journey through the Greek Underworld
- These myths will be broken up with a series of 'theme' spreads, which will take a broader look at certain aspects of Greek mythology (mythical beasts and monsters, the gods, heroes etc.)

Myths, Mummies and Magic in Ancient Egypt

A vivid and contemporary retelling of the ancient Egyptian myths.

- Contents: Myths - The Creation Myth; Isis and Osiris; The Contendings of Horus and Seth; The Book of Toth; Prince Thutmose and the Sphinx; The Famine Stela; Cleopatra. Theme spreads - What are the Egyptian Myths?; Meet the Egyptian Gods; How the Myths Explained the World; Meet the Pharaohs; Mythical Creatures and Deadly Beasts; Mummification; Hieroglyphics; A Mythic Map of Ancient Egypt.
- Following on from the success of *Myths, Monsters and Mayhem in Ancient Greece* (which has sold over 35,000 copies worldwide as of July 2022)- this is the next title in a growing series for Big Picture Press

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Art is Everywhere

A playful introduction to art history.

- Growing demand for children's art books that aren't biography or activity
- Fresh, inspiring take on a strong topic
- Highly accessible angle - discusses ideas and techniques that can be applied to art anywhere and everywhere
- Author is a knowledgeable art historian with a witty, unique tone, and years of experience with leading art workshops for children
- Both UK and international sales have seen demand for more 'art' titles. A great opportunity for us to show support for suffering creative arts scene and fill a gap on our list.
- Subjects covered - Why Do we Make Art?, Brush Strokes, Patterns, The Power of Colour, Art Can be Anything, Symbols

An exploration of rivers with fold-out pages

- A stunning look at geography, exploring the physical features of rivers, the unique wildlife they support and how they have shaped human history.
- Featuring 6 mighty rivers from around the world, one from each continent
- CONTENTS: A World of Rivers; Where do rivers get their water?; Source; Heading Downhill; Waterfalls; Underground Rivers; Gorges; Rapids; Dams; The Danube; Around the Bend; River Life; River Highway; The Ganges; Making Lakes; The Amazon; River City; The Murray; Extraordinary Rivers; Floating Islands of the Sudd; The Nile; Deltas; Estuaries; The Mississippi; Mangroves; Salmon Run
- Includes fold-out pages throughout
- Cover treatment: matt lam + spot UV + 5th colour

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- Sample contents: The First Prosthetics, Jack E. Steele - Father of Bionics, Arne Larsson - The First Pacemaker Patient, How Cochlear Implants Work, Eye Replacements, Keith Hayman - The First Bionic Eye, How Bionic Limbs Work, Campbell Aird - The First Prosthetic Arm, Exoskeletons, Neural Implants, The Paralympics, Neil Harbisson - The First Cyborg, Ethics
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- As told by UK Sepsis Ambassador Patrick TJ Kane
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics

Our Time on Earth

This book about animal life cycles is a celebration of creatures big and small.

- **WINNER of the Association for Science Education Award 2022**
- Sample contents: Mayfly; Honey Bee; Monarch Butterfly; Opossum; Etruscan Shrew; Giant Pacific Octopus; Axolotl; Trapdoor Spider; Grizzly Bear; Brandt's Bat; Orangutan; Laysan Albatross; African Elephant; Saltwater Crocodiles; American Lobster; Galapagos Giant Tortoise; Bowhead Whale; Greenland Shark; Immortal Jellyfish
- Consulted by wildlife cameraman and producer Fredi Devas, who has worked on David Attenborough's One Planet: Seven Worlds BBC series.
- Discover creatures who are born within a day of their mothers, or others who stay infantile for almost one hundred years.

Up in the Canopy

Explore the jungle layer by layer with a huge fold-out surprise at the end.

- James Aldred's book *The Goshawk Summer* won the 2022 James Cropper Wainwright Prize for Nature Writing.
- Written from the perspective of real-life Emmy-nominated cameraman and explorer, James Aldred
- Stunningly illustrated - with artwork as rich and dense as the rainforest itself
- Huge fold-out tree at the back of the book, which readers can pore over.
- Matt lam, fluoro pantone and spot UV finishes.

Under the Starlit Sky

This beautifully illustrated book takes readers on a journey from the roots to the canopy of a majestic old oak tree, right in the heart of Europe's most ancient forest ... with a huge fold-out surprise on the final spread.

- The follow up title to the beautiful *Up in the Canopy*
- As told by real life explorer and tree climber, James Aldred (winner of the 2022 Wainwright Prize for Non-Fiction)
- Illustrated by award-winning duo *Good Wives and Warriors*.

This visually extraordinary book presents the history of money as it has never been seen before - from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

DIFFERENT KINDS OF MONEY

Money serves because it is traded, but this trade doesn't come out of nowhere. It has to be based on something. There are several reasons why money might be traded. Some money is traded because it is made of something valuable, such as gold or silver. This is called commodity money. Another kind is traded because it represents something valuable. This is called representative money. A third kind is traded simply because a government tells it is valuable. This is called fiat money.

COMMODITY MONEY

The earliest form of commodity money was cowrie shells. They were small, round, and easy to carry. They were used in many parts of the world, including the Indian Ocean and the Mediterranean. Commodity money is made from things that have value on their own. It can be used to buy things, and it can be traded for other things. Commodity money is often used in places where there is no government or where the government is weak.

REPRESENTATIVE MONEY

The earliest form of representative money was gold coins. They were made of gold and had a picture of a king or a queen on them. They were used in many parts of the world, including Europe and the Middle East. Representative money is made from things that have value on their own, but it is not the thing itself. It is a piece of paper or a metal coin that represents the thing. Representative money is often used in places where there is a government and the government is strong.

FIAT MONEY

Fiat money is a type of money that is not made of anything and does not represent anything. It is made by a government and is used in many parts of the world, including Europe and the Middle East. Fiat money is made of paper or metal and is used to buy things. It is often used in places where there is a government and the government is strong.

LEGAL TENDER

Legal tender is a type of money that is accepted by a government. It is used in many parts of the world, including Europe and the Middle East. Legal tender is made of paper or metal and is used to buy things. It is often used in places where there is a government and the government is strong.

CASE

Cash is money in physical form - banknotes and coins. This is the most common form of money. Cash is used to buy things and to pay for things. Cash is often used in places where there is a government and the government is strong.

CURRENT

A currency is the system of money generally used in a particular country or community. The value of money is determined by the amount of money in circulation. The value of money is often determined by the amount of money in circulation. The value of money is often determined by the amount of money in circulation.

A WORLD WITHOUT MONEY

To understand why money is useful, let's try to imagine a world without money to look at. To avoid the only way to get hold of the things you need would be to make or grow them, or steal them from other people. These people are unlikely to simply give you the things, so you will have to offer them something in return. This system is known as barter - the exchanging of goods or services for other goods or services without using money.

BARTER AND BITS

Barter is the exchange of goods and services without using money. It is a system where people trade their own goods and services for the goods and services they need. Barter is often used in places where there is no money or where the money is not used.

THE PROBLEMS WITH BARTER

Barter has several problems. One problem is that it is difficult to find someone who has what you need and who wants what you have. Another problem is that it is difficult to measure the value of things. A third problem is that it is difficult to store things. Barter is often used in places where there is no money or where the money is not used.

CONSEQUENCE OF WANT

Barter is often used in places where there is no money or where the money is not used. It is a system where people trade their own goods and services for the goods and services they need. Barter is often used in places where there is no money or where the money is not used.

WHAT MAKES A GOOD FORM OF MONEY?

The earliest forms of money were very different to the money we use today. There was no paper or printing process or machines to make money. People had to make it with their hands. They used the natural world, all of the raw forms of money were made from things that were found in nature. The earliest forms of money were made from things that were found in nature. The earliest forms of money were made from things that were found in nature.

LEAFY MONEY

Leafy money was made from the leaves of trees. It was used in many parts of the world, including Europe and the Middle East. Leafy money was made from things that were found in nature. The earliest forms of money were made from things that were found in nature.

GRAIN PRODUCTS

Grain products were used as money in many parts of the world, including Europe and the Middle East. Grain products were made from things that were found in nature. The earliest forms of money were made from things that were found in nature.

LEATHER MONEY

Leather money was made from the hides of animals. It was used in many parts of the world, including Europe and the Middle East. Leather money was made from things that were found in nature. The earliest forms of money were made from things that were found in nature.

WASP WAX

Wasp wax was used as money in many parts of the world, including Europe and the Middle East. Wasp wax was made from things that were found in nature. The earliest forms of money were made from things that were found in nature.

COUSIN SHELLS

Cousin shells were used as money in many parts of the world, including Europe and the Middle East. Cousin shells were made from things that were found in nature. The earliest forms of money were made from things that were found in nature.

QUIRKY CURRENCIES

Many unusual objects were used as money in the era before notes and coins. These included foodstuffs such as barley, rice, corn and wheat. The Chinese used tea bricks to pay for things, whereas the Aztecs used cacao beans, and the peoples of ancient Africa and the Middle East measured value in coffee beans. The Mesopotamians kept sacks of grain in protected barns, much like the banks of today. When stored carefully, these foods could provide a reasonable store of value. But a storm or a bad harvest could wipe out your wealth.

MONEY YOU CAN EAT

Some surprising foods have been used as units of exchange in different parts of the world. Here are some of them.

BUTTER

The Pilgrims of the island of Nauru used butter as a unit of exchange. They used butter to buy things and to pay for things. Butter was used as a unit of exchange in many parts of the world, including Europe and the Middle East.

CHEESE

In the early 1800s, cheese was used as a unit of exchange in many parts of the world, including Europe and the Middle East. Cheese was used as a unit of exchange in many parts of the world, including Europe and the Middle East.

EELS

Dried and smoked eels were used as a unit of exchange in many parts of the world, including Europe and the Middle East. Eels were used as a unit of exchange in many parts of the world, including Europe and the Middle East.

COCONUTS

For the Kusa Yaku, who live on islands off the coast of Papua, money is made from coconuts. They use coconuts to buy things and to pay for things. Coconuts were used as a unit of exchange in many parts of the world, including Europe and the Middle East.

EGGS

When Venetians were suffering from hyperinflation in the 1500s, they used eggs as a unit of exchange. They used eggs to buy things and to pay for things. Eggs were used as a unit of exchange in many parts of the world, including Europe and the Middle East.

POTATO MASHERS

In ancient Cameroon, potato mashers were used as a currency. These heavy iron objects, called ensusbas, were shaped like a club.

KISSI PENNIES

The kissi penny was a currency used mainly in West Africa in the first half of the twentieth century. They were long iron rods, usually arranged in bundles of twenty. A cow could be bought for 30 or 40 bundles.

IRON SNAKES

The Lobi tribe of Burkina Faso used iron snakes as a currency. They would also attach them to their calves as a protection from snake bites and lightning.

KNIVES

Large bronze knives circulated as currency in ancient China between 600 and 200 BCE. According to one story, this started when a prince who was running low on money to pay his troops allowed them to use their knives to pay for goods in the local village.

RAI STONES

The small Pacific island of Yap possesses the world's biggest money. Rai stones are huge discs of rock weighing up to 8 tonnes each. The stones are rarely moved, and are not used for day-to-day transactions, but they change hands as ceremonial gifts, to forge alliances, resolve conflicts or to apologise for wrongdoing.

From Shore to Ocean Floor

From sandy beaches to mysterious, inky depths, this beautiful book is the story of ocean exploration.

- Sequel to *Balloon to the Moon*, winner of the 12-16 category in the British Book Design and Production Awards
- A wonderful combination of mythology, science and history that takes readers on a narrative journey through one of the world's most fascinating stories of exploration
- Gill Arbuthnott is a former secondary school science teacher.
- Made in consultation with the Maritime Museum.

From Cells to Ourselves

From the Big Bang to the abundance of life that surrounds us today, this beautiful book is the story of evolution, from the very first cells to ourselves.

- The third title in the *Balloon to the Moon* series, which won the 12-16 category in the British Book Design and Production Awards 2019
- A wonderful combination of mythology, science and history that takes readers on a journey through one of the most fascinating subjects in natural history
- Gill Arbuthnott is a former secondary school science teacher.
- Cover treatments: 100% foil, uncoated varnish

From Cells to Ourselves

HOW DID LIFE BEGIN?

THE 1920s American chemist Stanley Miller and British physicist Harold Urey conducted an experiment to see if life could be created from simple chemicals. They used a mixture of water, methane, ammonia, and hydrogen gas, and subjected it to electrical sparks. The result was a mixture of amino acids, the building blocks of proteins.

THE 1950s British scientist James Watson and American physicist Francis Crick discovered the structure of DNA, the genetic code that carries the instructions for life.

THE 1960s American biologist Lynn Margulis proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that were taken into a larger cell and became organelles.

THE 1970s American biologist Pauling proposed the theory of panspermia, which suggests that life on Earth was brought by meteorites from other planets.

THE 1980s American biologist James Watson and American physicist Francis Crick discovered the structure of DNA, the genetic code that carries the instructions for life.

THE 1990s American biologist Lynn Margulis proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that were taken into a larger cell and became organelles.

THE 2000s American biologist Pauling proposed the theory of panspermia, which suggests that life on Earth was brought by meteorites from other planets.

THE 2010s American biologist James Watson and American physicist Francis Crick discovered the structure of DNA, the genetic code that carries the instructions for life.

THE 2020s American biologist Lynn Margulis proposed the theory of endosymbiosis, which suggests that mitochondria and chloroplasts were once free-living organisms that were taken into a larger cell and became organelles.

THE DINOSAUR DETECTIVES

In the 19th century, scientists discovered, investigated and named many species of dinosaurs. But for a long time, these dinosaurs remained hidden.

MARY ANNING (1799-1847) was a fossil collector in Lyme Regis, Dorset. She discovered the first Ichthyosaurus fossil in 1830. She also discovered the first Plesiosaurus fossil in 1830. She was the first woman to be named a fossil collector.

WILLIAM BUCKLAND (1784-1861) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He was the first man to be named a paleontologist.

RICHARD OWEN (1804-1892) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He was the first man to be named a paleontologist.

OSBORN MARTELL (1790-1852) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He was the first man to be named a paleontologist.

THE GREAT OCEAN WALKER was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He was the first man to be named a paleontologist.

THE END OF THE DINOSAUR AGE

For a long time, people believed that the dinosaurs were a separate group from the other animals that lived on Earth. But in the 19th century, scientists discovered that dinosaurs were actually a type of animal that had gone extinct.

THE 1820s British geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1840s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1850s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1860s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1870s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1880s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1890s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1900s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1910s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1920s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1930s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1940s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1950s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1960s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1970s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1980s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 1990s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 2000s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 2010s American geologist Richard Owen discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

THE 2020s American geologist William B. Storer discovered the first dinosaur fossil. He was the first man to be named a paleontologist.

EARLY IDEAS ABOUT EVOLUTION

How long is a million seconds? Have you been alive for one billion seconds? What was happening a million days ago? We find it very difficult to comprehend these huge numbers. If we don't have a feel for how long a million seconds is, how can we possibly comprehend time spans of millions or billions of years? This is one reason why some people have a problem with evolution. The idea that single, primitive cells evolved into all the species that have ever lived seems incredible, unless you get to grips with the timespans involved.

In ancient Greece, philosopher Anaximander suggested that one type of animal could change into another, while Empedocles thought that new types of living things could be made from a range of parts that already existed.

Theologians Gregory of Nazianzus and Augustine both thought that although God had created all the original animals and plants, new types had developed from them. Their ideas were in response to the practical problems that would have arisen from trying to get two of everything into the Ark.

The naturalist George-Louis Leclerc proposed a way for the Earth to have formed from debris in space. Although he believed in spontaneous generation, he thought that animals could change as they migrated to different conditions. This later explains the discovery of elephant fossils in North America, and mammoth fossils in Siberia, although living elephants are today only found in Africa and South Asia. He suggested the American ones had become extinct, while the mammoths had changed as they migrated south.

Erasmus Darwin was Charles Darwin's grandfather. He was a doctor, poet and naturalist, and in his book Zoonomia, or 'The Laws of Organic Life' he was one of the first people to propose a theory of evolution. He never hit on the idea of natural selection, but did recognise the importance of sexual selection (see page 59) and realised it could cause changes in species.

GRADUAL CHANGES

In the early 1800s Jean-Baptiste Lamarck, inventor of the terms 'invertebrate' and 'biology', was the first person to develop a coherent theory of the development of life on Earth and its evolution. He believed that life had originated by spontaneous generation, rather than creation by deity, and had then become more complex and varied over many generations. Lamarck suggested how this could happen. His idea is often called the 'Theory of Evolution by Acquired Characteristics'. In simple terms, he thought that the more an animal used an organ during its lifetime, the more well-developed it would become and that these changes could be inherited by offspring if both parents had the same developments.

THE EVOLUTION OF THE GIRAFFE'S NECK, ACCORDING TO LAMARCK:

- 1) Early giraffes had short necks.
- 2) Giraffes reach upward to graze on leaves.
- 3) They stretch their necks very slightly over their lifetimes.
- 4) The next generation of giraffes inherits these slightly longer necks.
- 5) This process is repeated over many generations until we arrive at modern, long-necked giraffes. Lamarck was not suggesting that their necks suddenly shoot out like telescopic poles!

THE PROCESS ALSO WORKED THE OTHER WAY:

- 1) Early penguins had wings with which they could fly.
- 2) Penguins spend most of their time swimming and very little flying.
- 3) Their wings become smaller, with smaller feathers, from lack of flying.
- 4) The next generation of penguins inherits these smaller, more flipper-like wings.
- 5) This process is repeated over many generations until we arrive at the modern penguin, which can no longer fly and whose wings are now adapted to help it swim instead.

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

SYMBOLISM

Paper Cranes
In Japan, it is believed that someone who folds 1,000 origami cranes will be granted a wish. In 1945, two-year-old Sadako Sasaki was in the vicinity of the atomic bomb dropped on Hiroshima. She suffered long-term effects from that exposure, including developing leukaemia. Before she died at the age of 12, Sadako folded more than 1,000 cranes, and the paper crane went on to become a symbol of peace.

The Peace Sign
The peace sign was created by the British artist Gerald Holtom in 1958 as the logo for a campaign for nuclear disarmament in the UK. It has since become an iconic symbol of calls for peace.

Umbrellas
During protests for democracy in Hong Kong in 2014, activists used umbrellas as shields against tear gas and other aggressions by the police. The umbrellas came to symbolize the protests and gave the movement its name (read more on pages 52-53).

The Clenched Fist
The image of an upraised clenched fist is a powerful symbol of protest and resistance. Some of its first uses were by labour unions in the early 1900s, before it grew in popularity and became a symbol of many causes, including Black Power, the anti-apartheid movement and the feminist movement.

The Rainbow
The rainbow is the most iconic symbol of the LGBTQ+ movement. It represents diversity, acceptance and the spectrum of human sexualities and genders.

A stunningly illustrated tribute for train lovers of all ages, celebrating the ingenuity of trains past, present and future.

- Sample contents: The First Railways; Steam Locomotions; The Ffestiniog Railway; The Orient Express; Freight Trains; The Baikonur Cosmodrome; Mail by Rail; The California Zephyr; Mountain Railways; The Darjeeling Himalayan Railway; Trams; Sky Lines; Railways At War; The Princess Christian; High-speed Rail; The Shinkansen
- Beautiful artwork by multi award-winning artist Ryo Takemasa
- Stunning journey through the history of locomotives, suitable for all ages
- Expertly written by railway historian, Alastair Steele

Locomotion

THE FIRST RAILWAYS

Today, railways are commonplace in many parts of the world. They enable around one billion people to travel around the world, and transport goods and millions of passengers every single day. It is amazing to think that they have only been around for less than 200 years.

Railways appeared long before the first steam engines were invented. These 'railways' appeared in Europe during the 17th century and were designed to move heavy loads. They were built on wooden tracks, and the wheels of the carts were made of iron. The tracks were made of wooden planks, and the wheels were made of iron. The carts were pulled by horses or oxen.

The first steam engines were used in Britain during the 17th century to pump water to mine shafts. In 1769, James Watt invented the parallel motion linkage, and in 1784, James Watt invented the parallel motion linkage. In 1802, the American inventor Thomas Edison built the first steam-powered locomotive.

Over the next few decades, engineers sought to make the steam engine more efficient. In 1804, Richard Trevithick built the first steam-powered locomotive to carry passengers. In 1825, George Stephenson built the first steam-powered locomotive to carry passengers. In 1825, George Stephenson built the first steam-powered locomotive to carry passengers.

Puffing Blimp was the first steam-powered locomotive to carry passengers. It was built by George Stephenson in 1825. It was the first steam-powered locomotive to carry passengers.

THE GAUGE

One of the earliest and most significant developments in railway engineering was the invention of the gauge. The gauge is the distance between the rails, and it is important because it determines the size of the wheels and the spacing of the rails. By using the same gauge, different railways can be connected, and the trains can run on different railways. The gauge is important because it determines the size of the wheels and the spacing of the rails.

The standard gauge was first used in Britain by the first railway, the Stockton and Darlington Railway, in 1825. It was the first railway to use the standard gauge. The standard gauge was first used in Britain by the first railway, the Stockton and Darlington Railway, in 1825. It was the first railway to use the standard gauge.

STEAM LOCOMOTIVES

Once the possibility of mass-produced engines had been realized, a whole host of locomotives were tried and tested around the world. Some proved to be better, others to be unreliable and some were dangerous, but the arrival of one revolutionary design changed the course of history. Another, designed by engineer Robert Stephenson (George Stephenson's son - see page 51) was to provide the principles of design for the rest of the century of steam locomotives that followed.

Here, the first steam engine, the Newcomen engine, is shown. It was used to pump water out of mines. It was the first steam engine to be used in a factory.

The first steam locomotive, the Trevithick engine, was built in 1804. It was the first steam locomotive to be used in a factory.

The first steam locomotive, the Trevithick engine, was built in 1804. It was the first steam locomotive to be used in a factory.

- RAILWAYS OF THE WORLD - THE FESTINIING RAILWAY

The Festiniog Railway is a small but significant engineering feat. It was built in 1825, and it was the first railway to be built in a mountainous area. It was the first railway to be built in a mountainous area.

The Festiniog Railway is a small but significant engineering feat. It was built in 1825, and it was the first railway to be built in a mountainous area. It was the first railway to be built in a mountainous area.

ELECTRIC LOCOMOTIVES

The first electric train was tested as far back as 1837. Unlike steam trains, electric locomotives do not carry fuel on-board. Instead, they are powered by electricity which can be supplied from overhead lines, a third rail or in storage such as batteries. Because electric trains can be powered by renewable energy sources, they are considered less polluting than steam or diesel trains.

The first electric passenger train was presented by Werner von Siemens at an exhibition in Berlin in 1879. Consisting of a small locomotive and three cars, it reached a speed of just 13km/h.

The ETR 200 is a record-breaking electric passenger train. It is widely considered one of the first ever high-speed trains and was put into service in 1936. In 1938, it broke the speed record for trains by reaching just over 201km/h.

The ICE (Intercity Express) is one of Germany's most successful electric trains. The third generation ICE 3 can reach speeds of 300km/h. Since 2018, it has run on entirely renewable energy sources.

DIESEL LOCOMOTIVES

In a diesel locomotive, the power comes from an engine that burns diesel oil. While a steam locomotive needed two people to crew it and hours to attain the right steam pressure, a diesel locomotive could simply be switched on and driven away, making them much easier and much cheaper to run. Rudolf Diesel patented his first diesel engine in 1898, but it wasn't until around 1912 that they were first used in a locomotive.

The famous DRG Class SVT 877 *Hamburg Flyer*, often referred to as the 'Flying Hamburger', was first put into service in 1933. Its smooth, rounded shape was influenced by Zeppelin airships allowing for minimal air resistance.

The De10s, built in 1956, was considered the most powerful diesel locomotive in the world at that time.

The Intercity 125 is one of the most successful diesel trains of all time. So named because it was designed to cruise at 125 mph (about 201km/h) when in service, it also holds the all-time speed record for diesel trains of 238km/h, which it reached in 1987.

Tales of the Damned

An anthology of terrifying tales from around the world.

- Stories will be broken up with a series of 'theme' spreads, which will add a non-fiction element to the book. These spreads cover everything from the rise of the horror genre to famous monsters and vampire mass hysteria.
- There's a gap in the market for striking, beautifully illustrated horror anthology.
- Contents: The Mask of Red Death by Edgar Allen Poe; Edgar Allen Poe and the Birth of Horror Literature (NF); Dracula; Vampire Mass Hysteria (NF); The Monkey's Paw; Zombies and the Undead (NF); Red Riding Hood; The Original Dark Fairy Stories (NF); Frankenstein; Mary Shelley and the impact of Frankenstein (NF); Whistle and I'll Come To You; Ghosts and the Victorians (NF); Baba Yaga; Witches (NF); Bluebeard; Blood and Gore (NF)

Tales from Beyond the Stars

An anthology of classic science fiction stories.

- Stories will be broken up with a series of 'theme' spreads, which will add a non-fiction element to the book. These spreads cover everything from the rise of the science fiction genre to how it has inspired real life inventions.
- There's a gap in the market for a striking, beautifully illustrated science fiction anthology.
- Evergreen publishing with strong backlist potential and global appeal.
- An opportunity to expand the Big Picture Press list into the adult gift market.
- Resurgence of interest in titles that offer readers 'escapism' on TikTok, including fantasy and science fiction

Tales from Beyond the Stars

starting towards Kensington Gardens, wondering at this strange, red-walled wall. It was as if that mighty desert of houses had found a voice for its fear and solitude.

Drawn by the sound, I crossed the river at Waterloo Bridge, littered with corpses, and wandered on through the silent streets until I came out at last upon Regent's Park. And as I emerged from the top of Baker Street, I saw far away over the trees in the clearness at the sunset the hood of the Martian giant from which this howling proceeded. I was not terrified. I came upon him as if it were a matter of course. The tripod did not move. The Martian appeared to be standing and yelling, for no reason that I could discover.

Regents canal was choked with the red weed, and it had spread across the grasses and was growing amongst the trees, a spongy mass of dark-red vegetation. As I stood watching, the sound of "Ulla, ulla, ulla, ulla," ceased. Cut off. The silence came like a thunderclap.

A terror seized me. The dusky houses about me stood faint and tall and dim; the trees in the park were growing black. Night, the mother of fear and mystery, was coming down.

I fled. In front of me the road became pitch black as though it were covered in tar, and I saw a contorted shape lying across the pathway. I could not bring myself to go on. I turned down St. John's Wood Road and ran headlong from this unendurable stillness towards Kilburn. I hid from the night and the silence, until long after midnight, in a cabmen's shelter in Harrow Road.

Before the dawn my courage returned, and while the stars were still in the sky I turned once more towards Regent's Park. I had to know what had happened to the tripod.

As I drew nearer and the light grew, I saw that a multitude of black birds was circling and clustering about the hood. At that my heart gave a bound, and I began running along the road.

This extraordinarily illustrated book documents the strange new world of Terra Ultima for the very first time...

- Incredible lifelike artwork, unlike anything you've seen before!
- A phenomenal exploration of a new fantasy world
- Winner of the 2022 Golden Paintbrush award - one of the Netherlands biggest children's literary prizes.
- This beautiful paperback edition includes 100% gold foil, 4C printing and flaps
- **Celebrating 10 years of extraordinary illustrated books**

Rolex: The Story Behind the Style

Visual history of the iconic watch brand.

- Written by Rachael Taylor, a journalist specialising in jewellery who has written for *The Financial Times*, Conde Nast publications and *Retail Jeweller*.
- Illustrated with full colour photographs showcasing the brand's history.
- Cover finishes: mat lam and foil
- Comp title *The Little Book of Chanel* has sold in excess of 61k copies TCM.

Rolex: The Story Behind the Style

PROVIDER: Hans Wilsdorf, the founder of Rolex.
 RIGHT: Representatives of watch firms in Geneva in 1908.

more wearable product would one day make the larger pocket watch obsolete. He set about trying to change the image of wristwatches.

A fundamental step was finding a manufacturer called Angler in the Swiss town of Bienne that was making precision movements that could fit inside a wristwatch. Wilsdorf placed a large order, and soon Wilsdorf & Davis became one of the leading British wristwatch firms.

In a bid to establish his business as a brand rather than simply a dealer, Wilsdorf wanted to create a new name for the company: a catchy one that would look good on a dial and be easy to pronounce in many languages. He had experimented with many combinations of letters in search of this made-up name but failed to find anything that worked. Then, while riding through London's Cheapside on the upper

deck of a horse-drawn in 1908, it came to him. Or as he would later just "A gentleman whispered 'Rolex' in my ear."

Under this new name, Wilsdorf continued his quest to create reliable wristwatches with quality movements. In 1910, Rolex had a breakthrough when one of its products, powered by an Angler movement, became the first wristwatch in the world to receive the Swiss Certificate of Chronometric Precision – a mark of homological excellence. Four years later, another milestone would be achieved when the Kew Observatory in London awarded a Rolex wristwatch with a Class A precision certificate. This had previously only been given to marine chronometers used for navigation, and it further solidified the reputation of Rolex as a purveyor of precise timekeeping instruments.

In 1916, World War I broke out, and the following year the British government introduced a 33.3% customs duty as part of the war effort. By this time, Rolex's London office, which had a staff of 60 people, was exporting its watches all over the world and the tax change would make that difficult. As such, Wilsdorf made the decision to move the company to Bienne in Switzerland. It already had an office in La Chaux-de-Fonds, which it opened in 1917 for marketing purposes, but this move would remove it from the British watch industry altogether.

And, so, the legacy of Rolex's Swiss-made watches began, with the Swiss company Rolex S.A. registered in Geneva in 1920.

OPPOSITE TOP: A watchmaker operating in Rolex's movement factory in Geneva in 1942. TOP RIGHT: Rolex watches in a display case in the Rolex boutique.
 OPPOSITE BOTTOM: A pocket watch displayed in the Rolex boutique in Geneva in 1998. RIGHT: Rolex watches in a display case in the Rolex boutique.

The Origins of the Oyster

With Rolex settled into its new home in Switzerland, the company continued to develop its watch offering with a focus on precision and durability, as well as building its brand. Though certainly catchy, the name Rolex had not become an overnight success. Tired of waiting for it to catch on, Hans Wilsdorf launched a major marketing campaign in 1925, pledging to invest at least £12,000 a year – nearly £1 million in today's money. He also increased the number of watches Rolex was producing with its own branding on the dial, as it has been producing both branded and unbranded watches up until that time.

A major leap forward for Rolex's brand was the launch of the Oyster in 1926. This new style of watch promised to be waterproof and dustproof thanks to a hermetically sealed case, proving its durability. It also made it an obvious choice for sporting activities, which would prove to be a rich source of marketing for Rolex in the years ahead.

The Oyster case had a patented system of screwing down the bezel, crown and winding crown against the middle case to seal the movement inside securely. The winding crown, which is made from 10 individual parts, was key to its action as it goes between the bezel and the middle case and its functional external elements.

The Oyster case would become the backbone of Rolex. Nearly every watch in its contemporary range features an Oyster case, and the name of all the models reference it. A Submariner is technically named an Oyster Perpetual Submariner and a GMT-Master II is an Oyster Perpetual GMT-Master II, and so on. The only exception is the 1908 dress watch, which does not have an oyster case.

Rolex's iconic fluted bezel is a showstopper in the early Oyster cases. Although these fluted bezels are decorative now, the ridges originally served a purpose to allow a special tool to screw the bezel securely to the mid case.

OPPOSITE: A 1959 Rolex Oyster Perpetual on a brown alligator strap. ABOVE: A close-up of a Rolex Oyster Perpetual case and bezel base.

The World's Most Famous Watch Brand

Rolex has become shorthand for luxury. There is no watch you can strap on to your wrist that will be recognised for the status symbol it is quicker than a Rolex. And for many, this is the appeal.

Yet there was a time when the name Rolex – a word completely made up by the brand's founder Hans Wilsdorf – was not famous. It would take hard work, boundary pushing and a lot of self-belief on the part of Wilsdorf, a German orphan, to jettison the name into the upper echelons of horology; starting with convincing the pocket watch-wearing gentleman of the early 20th century that they wanted to wear the time on their wrist at all.

As you will discover, Rolex won its place in history by constantly questioning what was possible and innovating at all costs. It pioneered so many elements of watchmaking and design that are standard today, such as waterproof watches, placing a date window on the dial, and even removing the need to wind our watches.

It also found its way into some of the most exciting moments in history by placing Rolex watches on the wrists of adventurers and explorers. Its watches have travelled to the world's highest peaks and to the depths of the ocean; they have survived extremes of temperature, speed and pressure.

The story of Rolex is so much more than that of its watches. It is one of epic ambition and vision. What started out as a one-man band in London's Hatton Garden would become the epicentre of the Swiss watchmaking industry, and one of the most recognisable and coveted brands in the world.

Vivienne Westwood: The Story Behind the Style

Visual history of the iconic designer.

- Written by Jessica Bumpus, fashion editor, formerly with *British Vogue*.
- Illustrated with full colour photographs showcasing the brand's history.
- Cover finishes: mat lam and foil
- Comp title The Little Book of Chanel has sold in excess of 61k copies TCM.

Vivienne Westwood: The Story Behind the Style

Derbyshire Days

Vivienne Isabel Swire was born on April 8 1941 in Gordon and Dora Swire at the Paragon Maternity Home, Glossop. The future fashion revolutionist had one sister, Olga Swire, born 1945, and one brother, Gordon Swire, born 1946. She grew up in the parish of Tintwistle, Derbyshire (which was formerly part of Cheshire until 1974), both during and after World War II, enjoying what has been recounted as a fairly idyllic childhood, living at the more secluded Millbrook Cottage and playing outside until late.

The young Swire clan were encouraged to be creative and make things more than they were encouraged to read. Vivienne knew from a young age that she was good at making things, notably models at school, and she especially enjoyed sewing classes. Her mother would often make their clothes, and worked as a weaver in a local cotton factory.

The young Vivienne – who remembers having a passion for art from an early age – attended Hollingworth and Tintwistle Primary Schools from 1946 to 1952, at which point she passed the scholarship exam for Glossop Grammar School. She continued to be good at art during her time at Glossop Grammar, and considered attending art school.

Among Westwood's most formative fashion memories are the make-do-and-mend philosophy that came to define

Britain in austerity, as well as the coronation of Queen Elizabeth II in 1953, when Vivienne was 12 years old. The influence of these two events can be seen throughout every era of her designs, and the make-do-and-mend philosophy is evident in the motto "Buy Less, Choose Well, Make it Last", which the brand still promotes to this day. She expertly blended the elements of customisation, tradition and antiretrograde together to create her own unique brand, which is now contrasted by her husband Andreas Konevich.

LEFT: Vivienne Westwood wearing a t-shirt sporting the brand's slogan.

Malcolm McLaren

Westwood met Malcolm McLaren in 1965. An art student and a friend of her younger brother, Gordon, he would go on to become her creative collaborator for almost the next 20 years. Malcolm is an entrepreneur with the punk movement as Vivienne, and their partnership is legendary. He was something of a maverick of marketing rascally and distinction, before such things became commonplace in contemporary fashion. The pair were in a relationship for a time but never seem to have married.

Malcolm was interested in politics and was fascinated by the French Situationists, a creative enclave of writers and artists who wished to eradicate capitalism through acts of everyday life. He was a driving force in bringing politics, provocations, society and culture into Westwood's world. She found him to be charismatic and knowledgeable, but also full of contradictions.

In 1967, they had a son, Joseph Ferdinand Cecil, who would go on to follow in his parents' footsteps and enter the world of fashion. He founded the very successful lingerie company, Agent Provocateur.

It was in the early 1970s that McLaren and Westwood began to build their empire. Malcolm, in this period, had left art school and Vivienne was about to quit teaching. The plan had been to sell vintage records together, and there was talk of setting up a stall. But a retail opportunity – via a new

friend – on King's Road was about to arise.

Tommy Roberts, of the legendary Mr Freedom fashion business, took over the lease of 438 King's Road in 1969. He and his business partner, the fashion entrepreneur Tevra Miller, were well-known for their eclectic and discerning fashion eye which appealed to the glitterati of the 1960s. It was under Miller's control the shop was renamed Paradise Garage; the spot was already well-known for fashion.

Vivienne and Malcolm, who were regular on King's Road, ended up leasing the back of 438 King's Road, before taking the whole thing over and rebranding it. It would be known over the coming years as Let It Beak, The Fun To Live, The Young To Die and Sex and Sublimation, all of which would encompass the raucous, confrontational and non-conformist nature of McLaren and Westwood. Eventually the shop would come to define the varied-but-defined styles we know as punk today.

LEFT: Malcolm McLaren, teenage son of Vivienne Westwood and Joseph Ferdinand Cecil.

A Revolutionary is Born

There are few British designers, or brands, that have made quite as much of an impact on the fashion landscape as Vivienne Westwood. A fashion designer of both cult and commercial success (which is a rare combination), she was a punk and a pioneer, a rebel and a provocateur, an activist and a change-maker.

Over the course of a career that spanned half a century, Dame Vivienne Westwood would become synonymous with the British punk scene. Punk is what immediately springs to mind for most when her name is mentioned, along with the King's Road, corsets, platforms, tarran, crinolines, pirate boots, sustainability and climate change awareness. The list goes on. Her shows and interviews have become legendary – she is famous for using fashion as a platform to speak out on the issues she cared most about.

There is no doubt that Westwood's affinity for fashion history has helped her designs stand out. They are often historically informed, yet never to the point that they look odd. Where something shouldn't work, it always did, thanks to Vivienne's ability to balance the old with the modern – she was a genius when it came to style mashups. And the original Vivienne Westwood aesthetic rooted in a DIY approach never fully went away. Her designs feel intrinsically British and perfectly eccentric.

Westwood was the original multi-hyphenate and, in many ways, light years ahead of her time. She has inspired generations of designers that came after her, whether established and successful or aspiring and eager. Fashion critics even noted whiffs of her spirit at the London Fashion Week collections of autumn/winter 2023, which took place in February 2023, after her death. It's no wonder that her name is up there with the likes of Yves Saint Laurent, Christian Lacroix and the late great Karl Lagerfeld.

Cartier: The Story Behind the Style

The Beginnings of Cartier

The house of Cartier started with one man, Louis-François Cartier, but it would take a family to make it one of the most recognised and respected jewellers in history.

It was, in fact, Louis-François' father, Pierre Cartier, who set the dynasty in motion, although he could never have imagined the consequences of his actions at the time. Pierre had fought in the Napoleonic wars and spent time locked in the prison ships docked off the harbour at Portsmouth in Britain. When the war ended in 1815, Pierre returned to Paris, destitute and aimless. He would go on to find employment as a watchmaker and have five children with his wife Elisabeth, a watchwoman.

The eldest of the children born into this working-class Parisian family was Louis-François, and when he was barely out of school, his father sent him to work as an apprentice in a jewellery workshop owned by Adolphe Picard on Rue Montorgueil in Paris. It was a tough education – days were long and grueling and order was maintained with a whip – but he stayed and in 1847, at the age of 27, Louis-François bought the business from Picard, renaming it Cartier.

OPPOSITE: Cartier founder, Louis-François Cartier

His makers mark – a symbol hallmark that every piece of Cartier jewellery no matter how small – was his initials, L. C., separated with an arc of leaves playing golf, perhaps as a nod to the financial gamble he was taking. Luckily, the risk paid off and the Cartier business thrived and expanded. In 1866, Princess Mathilde, a cousin of Emperor Napoleon III, purchased one of his jewels, and the Cartier name was suddenly whispered among Parisian high-society, even reaching the international elite. Three years later, Louis-François bought Gillon, a Parisian jeweller better known than his own, and renamed his business Cartier Gillon.

Louis-François' son Alfred Cartier took over the family business in 1874, but it was the arrival of his own three sons – the highly ambitious Louis, Pierre and Jacques – that would really shake up the jeweller and initiate its ascendance to the global brand we know today. The brotherly revolution started with Louis, who joined the maison in 1898. A year later he spearheaded the remaining

OPPOSITE: Start of the Cartier business in Paris in 1847.

OPPOSITE LEFT: An illustration of Louis-François Cartier c.1848.

OPPOSITE RIGHT: Pierre Cartier playing golf in Paris.

of the business, stripping over Gillon to once again be known simply as Cartier. At the same time, the business opened a boutique at 13 rue de la Paix, just a stone's throw from Place Vendôme, the heartland of luxury jewellery in Paris. This venture was funded by an enormous dowry levied through a strategic arranged marriage to Andriette-Caroline Worth, granddaughter of world-famous couturier Charles Frederick Worth.

Cartier garnered a reputation for innovation, and the title of jewellers would later live by a motto, 'Never copy, only create.' One of Louis' most successful experiments in the close of the 19th century was to use platinum in place of gold. This precious metal is now widely used by jewellers across the world, but at the time it was purely an industrial metal and thus revolutionary in the jewellery market. The white metal, which, unlike silver, does not tarnish, is highly malleable and allowed Cartier to create delicate, diamond-set jewels inspired by those created by 18th-century French aristocrats, a stark contrast to the heavier, colourful, Romantic and Nouveau jewels popular at the time. A signature Cartier Guffand style emerged, swirling across platinum stems, necklaces and earrings, that won over well-heeled women, including royals, in Europe and the United States.

Pierre Cartier, the second eldest of the brothers, would be an agitator in his own right, championing the global expansion of the brand's retail empire. He started by opening a Cartier boutique on New Burlington Street in London in 1902, where the brand showcased a new style of geometric, abstract jewels with unusual colour combinations that would lay the foundations for the Art Deco jewellery movement.

The first decade of the 20th century was an important time for Cartier. In 1904, the jeweller received its first royal certificate from King Edward VII of Britain, and soon started to supply many other royal courts including those of Russia, Spain and Siam (now Thailand). In the same year, Louis Cartier created what he believed to be the first ever men's wristwatch for aviator Alberto Santos-Dumont.

Pierre, meanwhile, embarked on a journey to Russia; one that would prove profitable in commissions from its high society, but also as a source of inspiration that would shape Cartier's jewellery designs for years to come.

In 1909, Pierre would focus his wanderlust on America, opening a Cartier boutique on New York's Fifth Avenue; the precursor to its famous flagship store further up the street, the purchase of which he would famously broker a decade later in exchange for a string of pearls. Back in London, his younger brother Jacques stepped in to take over its British branch. That same year, Cartier moved uptown to a prestigious Bond Street address, where it remains to this day.

As Cartier's man in Britain, and, as such, jeweller to King George V, Jacques joined members of the aristocracy on a trip to India for the Delhi Durbar in 1911. It was an event

14

to commemorate the coronation of the King, with two weeks of festivities, during which King George V and Queen Mary would be proclaimed Emperor and Empress of India. This adventure to a new land would also prove to be a seminal trip for the house of Cartier. Jacques' sociable nature and love of travel would win ground-breaking commissions from India's rich, jewel-loving maharajas and inspire a whole new category of jewellery, pioneered by Cartier and much copied by other companies.

Tiffany & Co.: The Story Behind the Style

The King of Diamonds: Charles Lewis Tiffany

Charles Lewis Tiffany, the man who would go on to win the moniker of New York's 'King of Diamonds', did not hail from a long line of jewellers. His start in life was more modest, making his name in high society all the more glittering.

Tiffany was born in 1812 in Canton and Ohio. Tiffany and grew up in the small town of Killbuck, Connecticut. The major business of the town was the production of cotton goods, and the family owned a manufacturing company. Tiffany was educated at local schools in the area before joining his father in the family cotton business.

By 1837, Tiffany felt restless. No longer satisfied by working at home with his family, he began to envision how he could make his own mark in business. He turned up with a school friend, J. R. Young, and the duo set in motion a plan to open a stationary store in New York City. With a \$1,000 loan from Charles' father, the ambitious 25-year-old made the 150-mile journey north. The store, named Tiffany & Young, opened its doors at 259 Broadway that same year, and on its first day, \$4,981 rang through the till.

Tiffany & Young soon began to expand its remit, stocking glassware, silver, porcelain, clocks and jewelry, and began to develop a

OPPOSITE: Tiffany & Co. founder Charles Lewis Tiffany photographed by James Thomson Beach in 1902.

reputation as a purveyor of fine goods of taste. In 1841, the business expanded with the addition of a third partner, J. L. Ellis, and was renamed Tiffany, Young & Ellis. The trio expanded the store, doubling its size by moving the adjacent site, and continued to increase the quality of the goods they sold, with Young making buying trips to Europe to pick out English and Italian jewelry.

It was, in fact, political events in Europe that would be the making of this American luxury success story. In 1848, the status quo crumbled as republican revolutionaries sought to topple European monarchies and strip aristocrats of their power and wealth. It was a societal upheaval known as the Springtime of Nations. More than 50 countries were inspired by this, but none more so than France, where the monarchy was overthrown and replaced with a republic. Such widespread panic and disruption had an impact on the price of diamonds, and Tiffany, Young & Ellis occupied, by now, the firm

was manufacturing its own jewelry, and the opportunity to pick up diamonds at low prices per them as an advantage. The working of the antiques also bestowed some important gems – the likes of which had never been seen in America before – and Tiffany secured a number of important heirlooms, including the collection of Hungary's Prince Esterházy.

In 1853, Young and Ellis decided to retire from the business, but Charles Lewis Tiffany was far from finished. He found new partners to work with, and the business was, at this point, renamed Tiffany & Company. Tiffany would go on to build his empire, grabbing headlines along the way. By the 1860s, the business was well established as an exponent of choice for the rich and the famous, both for its jewelry and its top-quality silver. In 1862, President Abraham Lincoln purchased a set of pearl necklaces and earrings from Tiffany & Co. for his wife Mary Todd Lincoln, who wore them to her husband's inauguration ball.

In 1870, Tiffany & Co. moved into a large new store in New York's Union Square, marking the beginning of a major decade for the jeweller one in which Charles Lewis Tiffany would earn the title of King of Diamonds. It was a single purchase that would truly justify Tiffany into the high-jewellery atmosphere – a 237.42ct rough fancy yellow diamond. When cut and polished, what emerged was a diamond of staggering enormous proportions for a rare yellow diamond of that quality: it weighed 128.54ct and was named the Tiffany Diamond.

If the purchase of this rare world-famous stone, which is on permanent display at Tiffany & Co.'s Fifth Avenue store in New York, signalled Tiffany's intention to dominate the diamond market, his groundbreaking creation eight years later sealed the deal. Seeking to

celebrate the beauty of diamonds, Tiffany designed an engagement ring in 1886 that remains a sought-after classic to this day. The Tiffany Setting engagement ring kicked back against the over-fussy designs of the time with a clean, minimalist band and a six-prong setting that lifted the diamond above the ring. The purpose for this innovative setting was to allow light to flow through the stone, and therefore maximise the sparkle. It was a huge hit, and the iconic design has become synonymous with engagement rings.

Just 15 years before his death, Tiffany pulled off a final coup. The aftermath of the French Revolution that had gifted Tiffany an abundance of important gems in 1848 and its early credibility in high-jewellery circles rumbled on. In 1887, the French government was masterminding a plan to sell the crown jewels of its fallen monarchy. Outwardly, it claimed that a democracy such as France had no need for "objects of luxury, devoid of usefulness and moral worth". The rumour mill suggested that it was in fact afraid of a power grab by Bourbons, Orleanists or Bonapartists, who might use ownership of the jewels to claim a right to rule. Tiffany cared little for this political posturing, but he did see an opportunity in it. He travelled to Paris to attend the auction of the French crown jewels at the Louvre. He sat in the audience, ready to make his bids, along with fellow jewellers, including a young Frédéric Boucheron, and Orleanists, members of the French royal family, whose pockets proved too shallow on the day to win back their family heirlooms.

When the final strike of the gavel fell, Charles Lewis Tiffany had in his possession close to a third of the historic crown jewels. He placed them in specially crafted red-leather boxes, embossed in gold with the words *Diamants de la Couronne*, translating from French as Crown Diamonds. Inside, impressed on the silk lining in the lid, was Tiffany & Co. New York and Paris, thus securing Tiffany & Co.'s place in the history books as a purveyor of royal jewels and his own coronation as the King of Diamonds.

Street Style: Dr. Martens

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

ABOVE: A classic pair of Dr. Martens 1460 boots, broken in with wear.

NOT FINAL

Who Was Dr. Martens?

Dr. Martens may not be a real person, but Dr. Klaus Maertens certainly was. The brand as we know it today began with him. A doctor in the German Army, he found himself in post-war Munich at the age of 25, nursing a broken foot. The year was 1945, World War II had just ended, he did not break his foot during his time in the service however, this injury was one he earned from an unfortunate riding accident.

As he was recovering from his injury, he found that the standard issue, leather-soled Schürzenbock lowboots that had been part of the German Army uniform since 1937 actually hurt his feet more than helped them. Unconquering and footless styles were undergoing a similar shift. It had been a little more than a century since the Industrial Revolution had commercialised the footwear industry, allowing for mass production for a craft that was once exclusively handmade. Consequently, styles were being made when it came to what was happening in the world of vulcanised soles.

American chemist Charles Goodyear discovered that heating up rubber and adding sulphur made it even more flexible. The vulcanised process had many industrial applications, but it also made it much easier to make durable, rubber-soled shoes. Yet while canvas plimolls and burgeoning sneaker companies like Converse explicitly were meant for athletic pursuits, Maertens saw an opportunity in making a shoe that had the classic, down-to-earth appeal of a military boot, combined with the comfort and orthopedic benefits of a rubber sole.

OPPOSITE: Dr. Klaus Maertens, creator of the original Dr. Martens boot.

NOT FINAL

The first prototype of what would become the Dr. Martens 1460 leather boot took design elements from the German Schürzenbock and set it on top of a vulcanised, air-cushioned sole originally made from heat-treated, reprocessed tyre rubber. He made his proof-of-concept using a salvaged cobbler's last and a needle, but it would still take a couple of years before his brand-new shoe business got any proverbial legs behind it.

OPPOSITE: Standard issue German army field boots from World War II that were uncomfortable to wear for Dr. Martens.

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

the upper and repurposed tyre rubbers to create an air-padded sole. The resulting shoe is equal parts built to last and equal parts built to live in. It's no wonder that punk rockers and hip-hop artists alike have graced thousands of stages in a pair of Dr. Martens over the years - it's a shoe made for those who live out loud. The story of how a purpose-driven product came to define one of today's most exciting lifestyle brands is one that spans a growing connection between clothing and culture. When you combine a timeless product with a chameleon-like ability to mean different things to different people, you get a shoe that is undeniably trend-proof.

Gorgeous canines of every shape, size and colour bound through this book - all 101 of them!

- The perfect gift for dog lovers big and small
- Beautiful cover treatments including foil and ribbon
- Humorous and engaging text written by dog expert Nicola Jane Swinney

Basenji

In the native Africa, the Basenji is known as 'the dog that doesn't bark'. While many dogs are often said to be 'sage to please', that just doesn't apply to this one. It is lively, imaginative and playful, but it does have a children's streak. The Basenji will usually learn what you want to teach it, but whether it will obey your commands depends entirely on its mood. That impertinent mind can be a problem, too, as anything you have lying around is likely to be investigated by your Basenji – usually by means of chewing. All that said, the Basenji makes a lovely pet as it adores people and playtime.

Life Expectancy 12-15 years | Height 45-50cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Tibetan Mastiff

If you look like a giant teddy bear but this mighty mastiff is not the dog for everyone. While it has a gentle and loving nature, its sheer size can be a bit off-putting, and it is strong-willed. The Tibetan Mastiff sees itself as an equal, rather than a pet, and can be very stubborn. It is thought these amazing dogs lived in Tibet thousands of years ago and were used as guards (not many people would stand up to a 60kg dog) for monks, known as 'lamas'. This is where they developed their thick coat to cope with the harsh climate.

Life Expectancy 10-14 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but doesn't shed much | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I can get up there!

Shiba Inu

The resident of its dog breeds native to Japan, the Shiba Inu greets the world with quiet dignity. But it's like a little single warrior, moving quickly and nimbly. The Japanese have three words to describe this breed, *harae* (upright backbone), *oyasoi* (good nature) and *akashi* (alertness). It also tends to be possessive – like a nooky toddler, the Shiba Inu doesn't like to share and if it could spare, it's first word would be 'mine'. It's also a natural hunter, so if you let it off the lead while out on a walk, it will probably disappear in the direction of the nearest squirrel.

Life Expectancy 12-15 years | Height 35-40cm | Trainability It has a stubborn streak | Grooming Very little | Exercise Needs to play | Most likely to say I can get up there | Least likely to say I'll be on your side

Parash Hound

This elegant hound was developed to hunt gazelle with pharaohs in ancient Egypt, more than 4,000 years ago. Despite its noble past, the Parash loves people and simply loves life. It's a natural clown – you can even teach a Parash to 'roll' and it's possibly the only breed that can blink – when it's happy or excited, its nose and ears will turn a deeper shade of pink. But as a hunting hound, it has a strong prey drive and is likely to chase anything it sees, so keep it on the lead at all times.

Life Expectancy 12-15 years | Height 50-60cm | Trainability Easy | Grooming Very little | Exercise Needs to play | Most likely to say I can get up there | Least likely to say I'll be on your side

Saluki

Praised by the travelling people of the Middle East, this ancient breed is thought to take its name from the Arabian city of Salsab. To the Greeks, it was a noble dog indeed and they kept precise records of breeding and hunting prowess. They hunted hare, fox and gazelle from horseback, so their heads had to be fast of foot. There were once two different types of Saluki – short and mountain – but the two have merged into the modern breed. It has, however, retained its beauty and some of its speed, so be prepared to do a lot of jogging...

Life Expectancy 12-15 years | Height 60-70cm | Trainability Average | Grooming Weekly brushing | Exercise Vigorous walks | Most likely to say I can get up there | Least likely to say I'll be on your side

Alaskan Malamute

This impressive breed is one of the oldest in the world and has changed very little, still resembling its wolf ancestors. It was used by the Mahomet people to pull sleds and hunt seals. It is a strong and imposing animal, but it isn't much use as a watchdog – Malamutes regard everyone they meet as friends. They rarely bark, but make a charming 'woo-woo' noise. They're intelligent too, which means they can easily get bored... and a bored Malamute is trouble in waiting. They love to dig holes in the garden, or sniff across the kitchen counters for something tasty, so keep them busy!

Life Expectancy 10-12 years | Height 60-70cm | Trainability Good for children | Grooming Needs brushing but sheds a lot | Exercise Vigorous walks | Most likely to say I'll be on your side | Least likely to say I can get up there

Tibetan Spaniel

This little dog likes to climb! Almost cat-like, it will try to find the highest perch from which it can watch over everyone and everything. Resembling a small lion (a powerful symbol in Tibet), it was highly prized as a watchdog. This watchful quality has been bred into the Tibetan Spaniel for thousands of years and it takes its role very seriously – don't even think about farting and blaming it on someone else in its presence! But don't expect your dog to be happy on its own. Tibetan Spaniels like company and get bored quickly – left to themselves they are likely to bark.

Life Expectancy 12-15 years | Height 25cm | Trainability Learns quickly if it wants to | Grooming Weekly brushing | Exercise An occasional walk | Most likely to say I can get up there | Least likely to say No, I'm fine, you go off and leave me all alone...

Afghan Hound

With its slender, exotic face, long silky hair and lithe body, the Afghan Hound is surely the supermodel of the dog world. And as well as being one of the most beautiful breeds in the world, the Afghan is possibly the oldest. It comes from Afghanistan, where it was known as the Tazi, and was used to hunt dangerous animals, such as leopards. It was not only brave, but also extremely fast, capable of running at speed for many kilometres. Its independent nature means it does like attention, but on its own terms.

Life Expectancy 10-12 years | Height 60-66cm | Trainability This independent mind can be challenging | Grooming Lots of brushing | Exercise It needs plenty of room to move | Most likely to say Look how beautiful I am! | Least likely to say Give me a cuddle

Disney Dreamlight Valley - The Official Guide

Official companion to the bestselling game.

- A mere ten days after its release in 2022, Disney Dreamlight Valley had attracted over one million players. As of January 2023, fans had played 76 million hours of Dreamlight Valley.
- Dreamlight Valley was awarded Best Early Access Game by PC Gamer in 2022.
- Dreamlight Valley can be played on Nintendo Switch, PlayStation 4, PlayStation 5, Windows, Xbox One, Xbox Series X/S and macOS. You can also play the Arcade Edition via Apple Arcade.
- Gameloft has released a 2024 Content Roadmap for Disney Dreamlight Valley, outlining exciting updates and additions to the game over the next twelve months. The game will continue to evolve, attracting new players as well as ensuring long-time players' attention is retained.

Disney Dreamlight Valley - The Official Guide

GEMS
Gems are rare minerals that can be sold to earn Star Coins, or used to craft a variety of decorative items from stoves to snow globes. You can gather gems by mining the rock spots around your valley with a pickaxe. Here's a handy guide for every gem, where you can find it, and what it sells for.

	
Amethyst	Shiny Amethyst
Location: Forgotten Lands, Forest Heights Sells for: 500 Star Coins	Location: Forgotten Lands, Forest Heights Sells for: 2000 Star Coins

			
Diamond	Shiny Diamond	Emerald	Shiny Emerald
Location: Forgotten Lands Sells for: 600 Star Coins	Location: Forgotten Lands Sells for: 2400 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 325 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 600 Star Coins

			
Aquamarine	Shiny Aquamarine	Citrine	Shiny Citrine
Location: Double Beach, Forest of Valor Sells for: 250 Star Coins	Location: Double Beach, Forest of Valor Sells for: 600 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 300 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 600 Star Coins

		
Garnet	Shiny Garnet	Opal
Location: Pleasant Meadow, Plaza Sells for: 600 Star Coins	Location: Pleasant Meadow, Plaza Sells for: 640 Star Coins	Location: Rarely at any rock mine Sells for: 300 Star Coins

TIP
Remember to take a mining companion with you when hunting for gems - you'll get additional drops!

			
Peridot	Shiny Peridot	Ruby	Shiny Ruby
Location: Double Beach, Pleasant Meadow Sells for: 200 Star Coins	Location: Double Beach, Pleasant Meadow Sells for: 800 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 300 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 600 Star Coins

			
Sapphire	Shiny Sapphire	Topaz	Shiny Topaz
Location: Sunlit Plateau, Plaza Sells for: 300 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 600 Star Coins	Location: Plaza Sells for: 240 Star Coins	Location: Plaza Sells for: 360 Star Coins

		
Tourmaline	Shiny Tourmaline	Violet Crystal
Location: Forest Heights, Sunlit Plateau, Plaza Sells for: 400 Star Coins	Location: Forest Heights, Sunlit Plateau, Plaza Sells for: 600 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 12 Star Coins

TIP
Make sure to mine all rock spots, not just the ones where you can see gems sticking out - a lack of visible gems doesn't mean there are no gems under!

MERLIN

Merlin is an all-powerful wizard who's been around since the Middle Ages - no wonder he's so knowledgeable! He's a great source of information and advice, and he's also a little eccentric which makes him endlessly entertaining. He's the first person you'll meet when you begin your adventure and will be there for you every step of the way.

House
The Dreamlight Library is an incredible feat of medieval architecture boasting several astronomical features. Inside, you'll find more books than you can shake a stick at.

Disney Museum

Celebrate 100 years of Disney magic with this beautifully illustrated coffee table book!

- Sample contents: Walt's Early Years, Mickey and Friends, Spellbinding Classics, The Art of Animation, Long Live the King, TV Toons and More, Drawn by Hand, The Frozen Phenomenon, Disney Channel Smash Hits, Live-Action Adventures, Bringing Animation to Life, Reimagining the Classics, Disney Publishing, Disney Stores, Disneyland Park
- Features original imagery from the Disney Archives and Animation Research Library documenting the company's history
- Covers everything from the Golden Age of animation and original shorts to live action films and Disney+

LONG LIVE THE KING

THE GOLDEN AGE

In the last King (1994), a young girl asks about a lion she sees, who goes on a journey of discovery about the story of the World's Most Beloved Character, the King of the Jungle. The story of the King of the Jungle is a story of a young girl who goes on a journey of discovery about the story of the World's Most Beloved Character, the King of the Jungle. The story of the King of the Jungle is a story of a young girl who goes on a journey of discovery about the story of the World's Most Beloved Character, the King of the Jungle.

KEY TO PLATE

1. **Production design** - The production design of the film is a blend of traditional and modern animation. The vibrant colors and detailed backgrounds create a lush, African savanna atmosphere.
2. **Character design** - The character design of the film is a blend of traditional and modern animation. The vibrant colors and detailed backgrounds create a lush, African savanna atmosphere.
3. **Storyboard** - The storyboard of the film is a blend of traditional and modern animation. The vibrant colors and detailed backgrounds create a lush, African savanna atmosphere.

THE FROZEN PHENOMENON

MODERN DISNEY

In 2013, Disney Animation introduced the world to Anna and Elsa - the sisters of Arendelle. In this film, the two sisters are separated by a magical winter storm that turns ice and snow into a powerful force of nature. The film is a blend of traditional and modern animation. The vibrant colors and detailed backgrounds create a lush, African savanna atmosphere.

KEY TO PLATE

BELOVED CHARACTERS

THE GOLDEN AGE

Literary classics provided strong source material for a number of Disney films. Alice in Wonderland (1951) is Disney's version of classic Lewis Carroll children's novel; Alice's Adventures in Wonderland and Through the Looking Glass, and What Alice Found There. The books had fascinated Walt Disney since childhood. In the 1920s, they had loosely inspired his part animated, part live-action Alice Comedies and since then he had bought the film rights to the novel. Disney concept artist and colour stylist Mary Blair created exuberant, fantastical production artwork that inspired the look of the film. Music and songs hold the film's sequences together and propel the story along - the film features more songs than any other Disney film at the time. One of the film's most extravagant scenes, the Mad Hatter's tea party, was initially filmed in live-action to provide an aid to animators. Vaudevillean actor Ed Wynn played the Mad Hatter and Wynn's extemporized voice track was so inspired it was used for the final film.

In 1913, Walt had seen a touring production of J.M. Barrie's stage play Peter Pan and, inspired by its combination of fantasy and swashbuckling adventure, acquired the film rights in 1939. As with Alice in Wonderland, Mary Blair created the signature production art for the film. Live-action footage was shot for the animators' reference, with the voice actors performing their roles. Meanwhile, the magic of Disney animation made the characters fly - Peter Pan even engages dastardly Captain Hook in mid-air sword fights. Tinker Bell, often represented merely as a spotlight in stage versions, became a fully realized character using actor Margaret Kerry and others, in her live-action model. Released in 1953, after nearly two decades of work and thousands of drawings, Peter Pan was an immediate success and has remained a beloved Disney classic.

Literary works have remained a source of inspiration. The Sword in the Stone (1963), a whimsical adaptation of T.H. White's novel about the Arthurian legends, was the first Disney animated feature film to include songs by the Sherman Brothers, who would later work on Mary Poppins (1964), The Jungle Book (1967) and many others. The Rescuers (1977), a tale of an international rescue organisation run by mice, was based on a book series by English author Margery Sharp. Cruella DeVil nearly became the main villain in the film, but in the end the animation team created the fiery tempered, diamond-obsessed pawn shop owner Madame Medusa. Some classic tales are updated in inventive new ways: Treasure Planet (2002) is a version of Robert Louis Stevenson's 1883 novel Treasure Island set in outer space!

KEY TO PLATE

1. **Tea Party production art** - As a concept artist and art director, Mary Blair's delightfully imaginative and vibrant production art for the Mad Hatter's tea party directly influenced the final look of the film.
2. **Peter Pan and friends** - Traditionally a female stage or film actor played the character of Peter Pan. Disney's film broke with that tradition with Peter Pan depicted unequivocally as a boy voiced by a male actor (the young Blake Edwards). Production art in gouache and graphite by Mary Blair.
3. **Character design** - Early character designs by Ken Anderson for "The Rescuers" and "The Rescuers: The film was a box office hit and became the first Disney animated feature film to win a sequel, The Rescuers Down Under, released in 1990.

Disney Fascinating Facts

Over 1,000 real-world facts to entertain all ages!

- Cover: gloss lam.
- Features facts about plants, the oceans, animals, the environment, the night sky, insects, literature, art, theatre, music, fashion, general history, Greek myths and legends, Mayan and Aztec history, Arthurian legend, space, robotics, chemistry, biology, physics, inventions, things that go, toys and games, sport, adventure and exploration, the continents and much more.

Disney Fascinating Facts

NATURE: PLANTS

There are around 75,000 different species of trees on Earth, and amazingly over 100 per cent of them can only be found in a single country! If you want to see the most unique trees in one place, head to Colombia and behold the tree that has the thickest trunk in the world.

Summer means giant sunflowers cropping up all over the place. But did you know that the 'bees' of a sunflower is a parasitoid, or parasitic wasp, and it's actually made up of many small flowers?

The Wolffia family of plants, also known as duckweed or watermeal, grow on the top of water and include the smallest flowering plants. Wolffia can be grown from seed, but can also grow itself on a rocky road. The fastest recorded flower took just under 30 hours to produce.

The baobab tree, sometimes known as the tree of life, is found largely in the continent of Africa and Australia. They can be massive in height and circumference, with some species reaching up to 22 metres tall and others 25 metres around!

NATURE: PLANTS

The tallest tree in the world is a coastal redwood in California, known as Hyperion. Coastal redwoods can grow super tall, but Hyperion is the biggest of them all, measuring in at just over 79.5 metres! Experts think it's somewhere between 600 and 800 years old!

Some fungi communicate via a system of underground threads called mycelium, which can connect them across several kilometres. If one of them dies by being eaten, it will send a signal through the mycelium to warn others and allow them to decompose a nutrient-rich meal.

Everybody knows the smell of freshly cut grass, however, it's actually a distress call that the grass is giving off. When cut, the grass releases phenolamines that some scientists believe is a call to help signal the attack!

The jatropha tree, also known as the Brazilian goose tree, doesn't have fruit dangling from branches like apples and lemons. Instead, the fruit grows directly from the trunk of the tree, so it looks like it's growing in janky holes!

You can tell the age of most trees when they're chopped down by counting the number of rings the trunk has, but it can also show how well the tree has grown each year. The ring will be thicker if you had an abundance of resources, or thinner when there haven't been as many.

We all know that trees need sunlight and water to survive, but aren't there much water do they need? Some oak trees can drink up to 800 litres of water a day, but that's nothing compared to the giant sequoia, which will drink up to four times that!

SCIENCE

It doesn't matter whether scientists are looking inside your body or to the far reaches of the universe, incredible discoveries are being made every day in the world of science. Now it's your turn to explore amazing facts from the laws of robotics and dwarf planets to the atoms that make up the Earth and everything in the cosmos!

SCIENCE: SPACE

Our solar system has eight planets and one space in 2006. Since then, thousands of comets have been discovered, but only a few have been named. Astronomers have captured our planets and travelled to Earth's moon and nearby stars, spacewalk may take explorers to Mars and beyond.

The first satellite, Sputnik 1, was launched into space in 1957. Since then, thousands of comets have been discovered, but only a few have been named. Astronomers have captured our planets and travelled to Earth's moon and nearby stars, spacewalk may take explorers to Mars and beyond.

A company called Mars One planned to build a human colony on the planet Mars by the year 2032 and over 400,000 people signed up to be the first to leave Earth for good. But Mars One was shut down in early 2019, so these adventures will have to wait for their Martian voyage.

Humans have barely scratched the surface of outer space. To the future, probes and human-accompanied expeditions will continue to explore. Technologies based on Earth, such as telescopes and space agencies that sense wavelengths invisible to the human eye, will also help scientists learn about our universe.

Enochian, one of Saturn's moons, is dotted with ice geysers! These geysers spray water vapour from deep beneath the moon's surface. The upper floors naturally when it leaves the ground. The frozen crystals that are Enochian's atmosphere, when they form an icy ring, the 'Ice Ring'. Fission would be proof!

Space is completely silent! Sound travels in vibrations in the air, but space is a bit of a vacuum - it has no air or atmosphere! Astronauts have to use radio waves to communicate so that they can talk in space.

SCIENCE: SPACE

Some of our solar system's planets are pretty hot indeed. Whereas Earth only has one moon, Saturn has 82 natural satellites, that's not even its biggest moon. That's bigger than Mercury!

Venus rotates on its axis so slowly that one day there is equivalent to 283 days on Earth. However, it only takes Venus 225 Earth days to orbit the sun, meaning the Venusian day is longer than a Venusian year!

Earth isn't the only planet that has volcanoes! In fact, if you travel just one planet along to Mars, you'll find a volcano called Olympus Mons, which is over 600 kilometres wide and 21 kilometres tall. It's almost three times the height of Mount Everest and scientists think it could still be active!

Researchers at Yale University think they've discovered a new type of planet. It's called 55 Cancri e, a rocky planet that's smaller than Earth but has a day that's only 11 hours long. It's probably formed of diamond! Unfortunately, it's 40 light years away, so we can't visit it (yet) - but some previous gems!

The hottest planet in our solar system isn't the one that's closest to the sun! The temperature on Venus can reach 460 degrees Celsius (332 Fahrenheit), helped by its super-thick atmosphere, which retains heat. Mercury has no temperature-regulating atmosphere, so its heat fluctuates more.

In the observable universe - that's all of it - there are more stars than grains of sand on Earth. It's estimated that a million Earths could fit into the space that the sun occupies!

It's worth noting that every galaxy contains millions of stars and there are still parts of the universe we can't see yet!

NATURE

Whether you're looking at the creepy-crawly beneath your feet, or the starry sky above you, you're surrounded by the amazing natural world. Read on to discover incredible trivia about everything from mosquitoes and polar bears to talking mushrooms and bright stars millions of miles away!

NATURE: PLANTS

As well as being delicious, strawberries are one of the only fruits that grow their seeds on the outside - sometimes up to 200 of them! In fact, they're technically not seeds, but something called an achene, which is an individual fruit that holds a seed!

The biggest flower in the world is the *Rafflesia arnoldii*. It can grow to over 1 metre wide. It doesn't have its own root system, so latches onto other plants to grow. Don't sniff this flower though - its smell has been likened to rotting meat!

Pitcher plants have jug-shaped leaves and produce a nectar that entices insects and other small creatures inside. The leaves of the pitcher plant close once an animal falls in, and chemicals called enzymes digest the creature so the plant can use the nutrients!

No plant grows faster than bamboo. A Chinese bamboo variety called moso can grow almost a metre in a single day! It doesn't waste its energy growing any wider, so it can concentrate on shooting straight up.

Some animals only eat plants, but sometimes the plants bite back! The Venus fly trap has hinged leaves that look like a toothy mouth. If an insect touches the hairs inside the leaves, they snap shut so the insect can't escape. It can take the Venus fly trap up to five days to digest the trapped insect!

Disney Brain Games: Maths

100 Disney-themed maths puzzles to exercise young minds!

- The first *Disney Brain Games* book has sold over 58,000 copies (as of August 2023)
- 100 fun and challenging maths-based puzzles
- Features a wide range of beloved Disney and Pixar characters, from Anna and Elsa to Woody and Buzz Lightyear.
- Varied and challenging puzzles with different levels of difficulty to keep bright minds entertained
- Supports KS2 Maths curriculum
- Disney+ has 157.8 million paid subscribers globally, and 7.14 million paid subscribers in the UK.

Disney Brain Games: Maths

Puzzle 28
EIGHT QUEENS

Mr Gao has a chess puzzle for you to solve! In chess, the queen can move any number of spaces in a straight line – horizontally, vertically or diagonally. **Place eight queens on the chess board so that no queens is in the same line as any other queen. How many different ways can you find?**

Puzzle 29
ARCHERY PRACTICE

Merida's practising her archery skills. To prove what a great archer she is, Merida must hit one number in the outer ring, one number in the inner ring and one number in the centre that add up to each of the three numbers below.

Can you figure out which three numbers she must hit to make each of the target scores?

Puzzle 39
MICKEY'S MAGICAL MIX UP!

The Sorcerer's Apprentice has accidentally jumbled all of his master's Plus and Minus potions over!

Can you put the pluses and minuses back in the right places so that these sums work forwards, backwards, up and down?

Puzzle 40
...AND THE KITCHEN SINK

Every time Arthur tries to clean one of Merlin's dirty dishes, the number of dirty dishes doubles. He started with one dirty dish. Arthur has tried to clean 10 dirty dishes. **How many dirty dishes are there now?**

Puzzle 49
SOLVE THE RIDDLE OF THE CAVE!

To enter the Cave of Wonders, Aladdin must find the missing numbers in this puzzle.

Each square needs to be filled with a number between 1 and 9, but you can use numbers more than once. The functions surrounded by stars are carried out first.

So:

$$\begin{matrix} 2 & \star & 3 & + & 6 & = & 12 \\ 2 & \times & 3 & \star & 6 & = & 18 \end{matrix}$$

Puzzle 23
SHY COCONUTS

Some Kakamora have hidden themselves among Moana's coconut harvest. You can tell which coconuts are Kakamora in disguise, because the numbers they have stuck to them have made the questions they're hiding in incorrect.

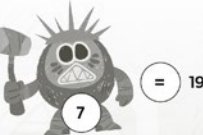

Make the sums correct by removing 1 digit from each question.

$$32 + 70 = 73$$

$$42 + 35 = 37$$

$$41 - 60 = 35$$

$$15 - 13 = 12$$

$$63 \div 7 = 19$$

Disney Brain Games

100 exciting Disney puzzles to exercise young minds!

- Over 37,000 copies sold (as of August 2022)
- 100 puzzles across themes of word, logic, maths/number, memory and more
- Join your favourite Disney characters such as Moana, Anna and Elsa, Dory, Miguel, Belle, Aladdin, Mike and Sulley and many more as you complete the challenges.
- Features characters from across Disney and Pixar, including heroes, villains and Princesses!
- With varied and challenging puzzles with different levels of difficulty, there's enough puzzles to keep bright minds entertained.

Disney Brain Games

Puzzle 1
THE MISSING NOTE

Hector and Miguel share a passion for music, so they spend a lot of time singing and playing music together. They are rehearsing a song, but have encountered a problem – the song is missing the last note.

Find the path that connects the two singers, and discover which note is missing!

Cross off the notes in this list as you go:
C D E F G A B

The missing note is: _____

Puzzle 2
HERCULES AND THE HYDRA

Hercules is battling the terrible monster Hydra in the cave where it dwells. At the start of the battle, Hydra has only one head, but each time Hercules cuts a head off, three grow in its place. He has already cut off twelve heads.

How many heads does Hydra have now?

Heads in total: _____

Use the space if you need to work it out on paper.

Puzzle 3
I'M LATE, I'M LATE!

It's always "late" for the White Rabbit, and he's always checking his giant watch! Right now, it's 5:00 pm. The White Rabbit's next appointment is in 100 hours' time, but he is already worried about being late!

1. How many days is it until his appointment? _____

2. What time will it be at? _____

Use the space if you need to work it out on paper.

Puzzle 4
MEMORY SEQUENCE

During a test, Anger got into a fight with Fear, and that messed up Riley's memories. Luckily, Joy has a solution!

Start from memory 0 and plot the right path. Remember: each memory is equal to the sum of the two previous ones!

Use the space if you need to work it out on paper.

START

0

5 3 1 2

3 2 7 3

5 3 8 5

13 21 13

FINISH

Puzzle 5
THE GREAT RUG RACE

Woody has come up with a great idea to have fun with his toy friends: a rug race! But just after they cross the finish line, the toys hear Bonnie and they freeze.

Can you work out the order they finished in?

Bear in mind that:

Woody finished two places before Buzz	Hamm finished right after Woody	Buzz finished two places before Rex	Rex finished last
---------------------------------------	---------------------------------	-------------------------------------	-------------------

Use this space if you need to work it out on paper.

Marvel Brain Games

100 exciting Marvel puzzles to exercise young minds!

- 100 puzzles across themes of word, logic, maths/number, memory and more.
- Join your favourite Marvel characters such as Ant-Man, Shuri, Captain America and many more as you complete the challenges.
- Features characters from across Marvel comics including heroes, villains and agents!
- With varied and challenging puzzles with different levels of difficulty, there's enough puzzles to keep bright minds entertained.
- Marvel has 4 of the 10 biggest movies of all time (*Avengers*, *Avengers Endgame*, *Avengers Infinity War*, *Spider-Man No Way Home*).

Marvel Brain Games

**PUZZLE 1
SPEED TEST**

Using the clues below, can you work out – in 30 seconds or less – the identities of these four comic characters?

- Red – Twin brother – Telekinetic
- Artificial Intelligence – Robot – Hank Pym
- Radiation – Web – Peter Parker
- Spy – S.H.I.E.L.D. – Black

**PUZZLE 2
ANT-MAZE**

To escape from prison, Scott Lang needs to activate his suit and reduce himself to the size of an ant. He still needs to find the way out of the maze though... can you help him plot a path to freedom?

**PUZZLE 3
WHO AM I?**

One of Black Panther's enourage has gone missing. Can you work out who it is from the letter clues below? We've filled in a few letters to get you started.

Can you work out who it is from the letter clues below?

The right letter in the right place looks like this: **O** The right letter in the wrong place looks like this: **R**

And if the letter is not in the word it looks like this: **A**

Grid of letters:

G	R	A	S	P
P	I	V	O	T
C	H	A	S	M

S	H	A	R	P

**PUZZLE 4
IN THE SHADOWS**

Only one of these shadows is an exact match for Captain America. But which one is it?

**PUZZLE 5
LAB WORK**

Bruce Banner is hard at work on a formula in the lab. Can you help him calculate the final formula by filling in all the blanks? The number in each circle must be the sum of the two numbers below.

Example:

```

    33
   / \
  17 16
 /   \
8     9   7
/ \   / \
5  3 6  1
    
```

Grid numbers:

```

    87
   / \
  ....
 /   \
19   ....   22
/ \   / \
....  ....  ....  ....
/ \   / \
2   6   ....   7   ....
    
```

**PUZZLE 6
BUILD A HERO!**

Can you pair the word parts below to create the names of five super heroes?

Word parts:

- VAL
- MAG
- SH
- CON
- GR
- NETO
- KYRIE
- FAL
- URI
- OOT

- Disney Plus has 87.6 million paid subscribers globally, with an additional 50.1 million paid subscribers for Disney Plus Hotstar. In the UK, Disney Plus has 7.5 million subscribers, which is up 21% from 2021.
- Features a foreword by Marvel comics writer Ryan North.

Marvel: The Science of Super Heroes

SPIDER-MAN: ALLIES

Spider-Man has teamed up with countless other heroes in the comic fighting career, but there are some that he counts as friends.

DAVEDEVIL
A character created by Stan Lee, Dave Devildar is the right-hand man of Doctor Doom. He is a powerful sorcerer and a master of the occult. He has the ability to control the minds of others and to create powerful illusions. He is a major antagonist in the Spider-Man universe.

IN THE REAL WORLD
The character of Dave Devildar is a fictional character, but the concept of a powerful sorcerer is a real one. In the real world, there are many different types of magic, including black magic, white magic, and ceremonial magic. Each type of magic has its own unique history and practices.

BLACK CAT
Felicia Hardy is a cat burglar and a close friend of Spider-Man. She is a skilled thief and a master of disguise. She is also a skilled fighter and a member of the Avengers. She is a complex character with a dark past and a bright future.

IN THE REAL WORLD
The character of Felicia Hardy is a fictional character, but the concept of a cat burglar is a real one. In the real world, there are many different types of burglars, including cat burglars, who are known for their stealth and agility.

SPIDER-WOMAN
Jessica Drew is a former member of the Skrull Empire and a close friend of Spider-Man. She is a powerful telepath and a master of disguise. She is also a skilled fighter and a member of the Avengers. She is a complex character with a dark past and a bright future.

IN THE REAL WORLD
The character of Jessica Drew is a fictional character, but the concept of a telepath is a real one. In the real world, there are many different types of telepaths, including those who can read minds and those who can communicate with animals.

THE AVENGERS: CAPTAIN AMERICA

Several heroes have taken the mantle of Captain America, serving as a symbol of liberty and a beacon of freedom. Captain America is more than one person, he is a symbol of standing up for what is right. Steve Rogers started the legacy of Captain America during the darkest days of World War II, but other heroes have picked up the shield.

SAW WILSON'S WINGS
The original wings used by Steve Rogers were designed by Paul Fierman and made of lightweight aluminum. They were used to carry Rogers to the sky, allowing him to fly at speeds up to 200 mph. The wings have since been replaced with a new, stronger material called Vibranium.

IN THE REAL WORLD
The concept of wings is a real one. In the real world, there are many different types of wings, including those of birds, insects, and even some mammals. Each type of wing has its own unique structure and function.

THE WINTER SOLDIER'S SAM
James Buchanan "Bucky" Barnes was the first Winter Soldier. He was a close friend of Steve Rogers and a member of the Avengers. He was transformed into a Winter Soldier by the Red Room, a secret Soviet program that used a combination of genetic engineering and cybernetics to create super soldiers.

IN THE REAL WORLD
The concept of a Winter Soldier is a fictional one, but the concept of a super soldier is a real one. In the real world, there are many different types of super soldiers, including those who are enhanced with genetic engineering, cybernetics, or other technologies.

CAPTAIN AMERICA'S SHIELD
Cap's shield is made of Vibranium, a rare metal that is stronger than any other material on Earth. It is also indestructible and can absorb and store energy. The shield is a symbol of Captain America's courage and leadership.

IN THE REAL WORLD
The concept of a shield is a real one. In the real world, there are many different types of shields, including those used by soldiers, police officers, and even firefighters. Each type of shield has its own unique design and purpose.

THE FANTASTIC FOUR: POWERS

The Fantastic Four get their powers when Reed Richards took the team on a mission into space where they were blasted by cosmic rays, changing them forever. They are a team of explorers, adventurers and heroes who have saved the world countless times.

NEED INCHES - MISTER FANTASTIC
Mister Fantastic is one of Earth's greatest scientists, and he has the ability to stretch his body to any size. He is a member of the Fantastic Four and a close friend of Spider-Man. He is a complex character with a dark past and a bright future.

IN THE REAL WORLD
The concept of stretching is a real one. In the real world, there are many different types of stretching, including those used by athletes, dancers, and even some animals. Each type of stretching has its own unique benefits and risks.

SUE STORM: INVISIBLE WOMAN
Sue Storm is a member of the Fantastic Four and a close friend of Spider-Man. She is a powerful telekinetic and a master of disguise. She is also a skilled fighter and a member of the Avengers. She is a complex character with a dark past and a bright future.

IN THE REAL WORLD
The concept of telekinesis is a fictional one, but the concept of a telekinetic is a real one. In the real world, there are many different types of telekinetics, including those who can move objects with their minds and those who can communicate with animals.

COULD YOU STRETCH LIKE MISTER FANTASTIC?
Your body can stretch over the course of a day, but only very slightly. You are able to stretch your muscles up to the morning, and you may be able to stretch a little more by the end of the day, but you haven't stretched. Throughout the day, your body is constantly stretching and contracting.

COULD YOU STRETCH LIKE MISTER FANTASTIC?

SPIDER-MAN

The science behind Spider-Man is very interesting. I like him, but I would definitely NOT have named myself after an arachnid. Also, that's not how I would've made those webs, but I like what he did there. It must be some type of polymer. Cool. I've met more than one spider-guy, but I'm not sure how many there are.

- HOW DID SPIDER-MAN GET HIS POWERS?
- WHERE DOES SPIDER-MAN GET HIS WEBS FROM?
- WHAT GADGETS DOES SPIDER-MAN HAVE?
- DO THE DIFFERENT SPIDER-MEN HAVE DIFFERENT POWERS?
- HOW DO DOCTOR OCTOPUSS ARMS WORK?
- CAN THE VULTURE REALLY FLY?

- Cover finishes: mat lamination.

Star Wars Brain Games

PUZZLE 10 BINARY BAFFLER

Luke Skywalker needs to fix a battered old astromech. The binary start-up sequence is incomplete – can you help him fill in the blanks to get the droid working again?

You must place three '0's and three '1's into each row and column, but there cannot be more than two '0's or two '1's in sequence in any row or column.

			1	1
0		0	1	0
1	1		1	0
1	1			

PUZZLE 11 JAWA JUNK

The Jawas have found a new droid while scavenging on the desert planet Tatooine, but the identification panels have been mixed up. Each set of four panels has been rearranged – but not rotated. Can you work out what two-character identification code was originally displayed on the panels?

PUZZLE 43 MIND CONNECTION

Qui-Gon will help you learn to see with the Force, by changing 'MIND' into 'SEES' in just four steps. At each step you should change just one letter to make a new word, without rearranging any of the letters. For example, you could start by changing MIND to MINE (though that will lead you down the wrong path.)

PUZZLE 44 TIE FIGHTER SHOOT OUT

Rey and Finn are being shot at by TIE fighters and must find their way to a vehicle to escape. Answer the sums and follow the correct answers to find out which vehicle they steal.

START		2=8	
10	12		
11-4	5+7		
7	13	10	
4x3	10-3	8x5	
12	7	24	5
4+4	9x2	5-3	6+8
8	18	2	14

PUZZLE 75 FOLLOW THE PATH

Using the letters in order from the word EMPIRE, follow the correct path to find your way through the maze.

PUZZLE 76 TANGLED WIRES

The door controls have been destroyed! Connect the right wires so the Mandalorian, Din Djarin, and Grogu can escape! But be warned – the door is guarded by a noisy gatekeeper droid. Avoid it at all costs!

Look at the tangle of cables and figure out which button to push to open the door and which turns off the lights.

PUZZLE 9 SHADOW MATCH

The galaxy is full of heroes and villains, including the daring Resistance pilot Poe Dameron and scavenger-turned-fugitive Rey. Match the character's shadows to their names.

1. Rey
2. Stormtrooper
3. Poe Dameron
4. BB-8
5. Captain Phasma
6. Chewbacca
7. Kylo Ren
8. Finn

A New Hope (Star Wars Cinematic Classics)

CINEMATIC CLASSICS

C-3PO wandered away, complaining bitterly. He passed the giant skeleton of a knight dragon that lay bleached on the sand. Then he spotted something on the distance.

"A transport," he said excitedly, waving his metal arms in the air. "I've saved! Over here, they! Please help!"

Meanwhile, R2-D2 had reached the dark hills. The little astromech whirled softly as he trundled through a stormy rain. Luke still believed that he was being watched. Behind the rocks, hooded creatures known as Jawas whispered to one another. Their yellow eyes glowed as the droid passed by.

Then one of the Jawas sprang up in front of Artoo and fired an ion blaster. The blue energy bolt struck the droid, knocking him off his feet.

Concept art of C-3PO and R2-D2 on the planet of Tatooine after landing on the escape pod. **Ralph McQuarrie**

- 14 -

EPISODE IV: A NEW HOPE

The Jawa gestured eagerly. "Uh-ho!" he cried, and the others crowded round, lifting Artoo. They carried him through the rain to their gigantic sandcrawler, where they fitted the little droid with a restraining bolt to prevent him from escaping. Then a large air-pipe stalked down from the sandcrawler and sucked Artoo inside.

Artoo was dumped into a large chamber filled with strange droids. They came in all shapes and sizes, from boxy power droids also known as gaud droids, to machines built for moisture farming, mining and security. There a pair of glowing eyes spotted Artoo.

Concept art of Artoo being loaded into a sandcrawler. **Ben McQuarrie**

- 15 -

CINEMATIC CLASSICS

"Destroyed," he told the others. "By the Empire."

Luke couldn't believe that such a thing was possible, but there was no time to discuss it. A ship had appeared on their scopes: a small Imperial TIE fighter. It blasted the Falcon, then it strafed away.

"It's heading for that small moon," Luke pointed.

"That's no moon," Obi-Wan told him. "It's a space station. I Han Solo tried to turn the Falcon around, but it was too late. They were caught in an invisible tractor beam, pulling them deadily closer to the Death Star."

"Destroyed," he told the others. "By the Empire."

On the battle station, Grand Moff Tarkin received a report that a ship had been captured. "They must be trying to return the stolen plans to the Rebellion. She may yet be of some use to us," Darth Vader said, and went to investigate.

But when his men searched the ship, they found no sign of anyone on board. "According to the log, the crew abandoned ship right after take-off," the commander reported. "It must be a decoy. Several of the escape pods have been piloted."

"Send a scanning crew aboard," Vader ordered. I want every part of this

Concept art for the Death Star showing the docking bay where the Falcon has landed. **Ben McQuarrie**

- 18 -

EPISODE IV: A NEW HOPE

"Only a master of evil, Darth," Obi-Wan replied.

Vader strode forward, raising his black. Obi-Wan took a step back and ignited his saber. Vader swung and the two swords clashed together, filling the hallway with light and noise. "Your powers are weak, old man," he said.

Obi-Wan moved nimbly, countering blow after blow. "You can't win, Darth," he said in former apprentice. "If you strike me down, I will become more powerful than you can possibly imagine."

"You should not have come back," Vader replied, lunging at Obi-Wan, but the old Jedi was too quick.

Spotting the duel from across the hangar, the stormtroopers guarding the Millennium Falcon peeled away, turning to the aid of their quarters.

Luke, Leia, Han and Chewie had made it back to the hangar, where Artoo and Threepio joined them. With the guards distracted, they ran for the Falcon. But as he neared the hangar, Luke saw his mentor locked in combat with the monstrous Darth Vader.

- 19 -

CINEMATIC CLASSICS

Obi-Wan Kenobi slipped through the corridors of the Death Star, drawing closer to the Millennium Falcon. But before he could reach it, he came face to face with an old acquaintance. Darth Vader stood blocking his path, a red lightsaber humming in his hand.

"I've been waiting for you, Obi-Wan," the Dark Lord boomed. "We meet again at last. The circle is now complete. When I left you, I was but the learner. Now I am the master."

Concept art for Darth Vader. **Ben McQuarrie**

CINEMATIC CLASSICS

In the Death Star's control room, an aide approached Grand Moff Tarkin, offering to ready his ship in case the Rebels were successful. "Evacuate?" Tarkin asked disbelievingly. "In our moment of triumph? I think you overestimate their chances." He was sure that this ragtag army posed no threat to his battle station.

Meanwhile, Red Leader had guided another group of fighters into the trench. Vader was right behind them, taking out first one, then two of Red Leader's wingmen. But the Dark Lord was too late. Red Leader was in

- 58 -

EPISODE IV: A NEW HOPE

range. He fired, and his torpedoes streaked towards the target.

The shot was no good. The torpedoes missed, exploding on the surface of the Death Star. And as Red Leader turned to flee, Darth Vader's TIE fighter swooped in. Red Leader's X-wing slammed into the battle station and burst into flame.

Luke saw the ship explode and knew that time was running out. Flanked by Biggs and Wedge, he flew at full speed into the trench. But Darth Vader's fighter was right behind them and closing fast.

The Dark Lord fired, scoring a hit on Wedge's engine. "I'm hit!" Wedge cried, peeling off. Vader ignored him, keeping his focus on Luke and Biggs. They swooped from side to side, trying desperately to evade the Dark Lord's fire.

It was no good. Biggs's ship was hit, and Luke watched as his best friend's ship exploded into shards of flame. There was no time to grieve. He knew that he was the Rebels' last hope for victory.

Luke switched on his targeting computer and prepared to fire his torpedoes. As he struggled to lock on to the target, Ben Kenobi's ghostly voice spoke to him once more. "Use the Force, Luke," the old Jedi told him. "Let go. Luke, trust me."

Luke deactivated his computer. He was determined to trust his instincts.

- Test yourself against three levels of complexity, from Padawan to Jedi Knight to Jedi Master
- A perfect gift for adult *Star Wars* fans who have enjoyed titles such as *Murdle*

Star Wars: Jedi Mind Training

PUZZLE 03 PADAWAN

UNEQUAL

Inequality, greater, and lesser are concepts that are all too often encountered in the universe. They are of interest for the Jedi, who do not deal in absolutes and who strive for knowledge over ignorance. Bigger is not always better; smaller is not always weaker.

The number square must be fully completed so that each number appears once only in each row and column. In addition, each greater than (>) or smaller than (<) symbol must be correct.

PUZZLE 03 PADAWAN

LOGICAL DEDUCTION

Han Solo's blaster pistol has been stolen in the Mos Eisley Cantina, and you have to work out who did it. There are three suspects.

There are five clues:

- Greedo trusted the suspect who used a lightsaber.
- Dr Cornelius Evazan was holding a Moo horn when you saw him.
- A glass of Blue Milk was not found in the booth.
- Luke was spotted hiding under the bar.
- The blaster was eventually found in the bandstand.

Use the clues to fill in the grid opposite and log what you know, then use logical deduction to work out what you don't!

Each suspect was found holding another item. And there are three places the theft could have happened:

PUZZLE 03 PADAWAN

BALANCE: DARK SIDE/LIGHT SIDE

For there to be peace, there should be balance. A Jedi will seek balance in everyday life, and will learn to concentrate and feel their way as different elements seek to dominate; order must be restored, balance must prevail.

In this puzzle, each row and column must contain the same number of dark side tiles and light side tiles, but care must be taken, for neither may have more than two next to each other, vertically or horizontally. No row may be identical in sequence to any other row; the same rule applies to columns, which must also all be unique.

PUZZLE 04 PADAWAN

PATTERN RECOGNITION

Allow your inner calm to enhance your focus and clarity of thought. First look at the pattern, looking for intricacies, repetitions, and any variations that may be apparent. Now think of the flow, noticing how one colour becomes another. Let your intuition guide you.

Which of the blocks a, b, c, d, e, f completes the sequence in line 3?
