Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 6-9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6-9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,
Let's clean your paws and face.
Here's your spoon and here's your bib
And here's your bunny plate!

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Baby Steps: It's Bedtime, Bear

Lift the flaps, find the toys!

- Illustrated by London-born illustrator, Richard Merritt.
- Big, easy-to-lift card flaps help children develop fine motor skills: with 5 big flaps to lift.
- A gentle story to build early language skills - perfect for children just starting to say their first words.
- Encourages little ones with their bedtime routine.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Baby Steps: Move Like Me

Slide the tab, copy the action!

- Illustrated by London-born illustrator, Richard Merritt.
- A simple rhyming text is fun to read aloud and easy for little ones to join in with.
- With 9 sliders to pull and push to make the animals on every page move about.
- This book will help little ones learn to name body parts and follow simple instructions.
- Moving the sliders helps children develop fine motor skills; copying the actions builds gross motor skills.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Match the Shape

A first words book that's also a shape-sorter!

- An innovative board book design that lets toddlers place three chunky shapes into matching slots. Three shapes attach to the book via ribbon: circle, square, triangle.
- A die-cut in the cover showcases the novelty and keeps the pieces securely in place when the book is shelved.
- Matching the shapes aids children in their fine motor skills, hand-eye coordination and problem-solving skills.
- Introduces familiar first words on every spread.
- Illustrated in vivid colour and effortless style by Polish artist Susie Hammer.
- Also in the series: Match the Colour (2025).

Animal Snap

A flip-flap farm book

- A chunky flip-flap board book with big and little pages - match the babies to their parents for an animal SNAP!
- With playful and adorable animal characters beautifully illustrated by Mel Matthews.
- Each animal gives a simple description of its baby. Older toddlers will love to shout out the name when they know the answer.
- A sturdy board book with rounded edges, perfect for babies and toddlers.
- Also in the series: *Animal Snap Jungle*.
- Hoping to sign up Mel for 2 more titles in 2026: potentially *Safari* and *Ocean*

Animal Snap

A flip-flap jungle book.

- A chunky flip-flap board book with big and little pages - match the babies to their parents for an animal SNAP!
- With playful and adorable animal characters beautifully illustrated by Mel Matthews.
- Each animal gives a simple description of its baby. Older toddlers will love to shout out the name when they know the answer.
- A sturdy board book with rounded edges, perfect for babies and toddlers.
- Also in the series: *Animal Snap Jungle*
- Hoping to sign up Mel for 2 more titles in 2026: potentially *Safari* and *Ocean*

The Circular Square

An uplifting rhyming story about becoming a well-rounded person.

- A quirky, philosophical rhyming picture book from the Waterstones Children's Book Prize shortlisted author, Simon Philip, offering him a new direction after the success of his *I Really Want to...* series.
- Bringing bold, graphic illustrator Neil Clark to the Templar list - a growing talent who is best known for his *CRASH, BANG, WALLOP* series with Ladybird.
- Includes back matter that encourages children to list the positives in their lives as well as lists of positives from the author and illustrator themselves.
- A meta picture book where artwork and characters engage with the layout, composition and size of the book - Square becomes the book in its square format!

Bessie's Bees

An uplifting story about starting nursery with a courageous neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list, allowing us to grow our range of underrepresented voices and experiences.
- While there has been an increase in positive representations and neurodiverse voices in middle-grade fiction, this is yet to be seen in the trade picture book market. Templar can be one of the first to champion neurodiverse voices and stories in this space.

When a little boy refuses to tidy his room, his mess has dire consequences ...

- A topical story about looking after our world
- A subtle way of introducing complex and difficult subjects
- Pollution and climate changes are themes which are globally relevant
- Demand for picture books with strong messages
- A serious message conveyed in a fun and silly way.

A hilarious rhyming romp that perfectly encapsulates how being HANGRY really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

Oh No, Flo!

A fantastically funny farmyard fiasco to read aloud!

- Taking recognisable and familiar farm animal characters to create a funny and fresh picture book for the very young.
- Featuring bold and bright illustrations from Mike Byrne, well-known for *This Book is Full of Unicorns*.
- Catherine Cawthorne is fresh to the picture book world but is already making her mark with: *We Went to Find a Woolly Mammoth* (Hachette, 2023) and *The Big Bad Wolf Investigates: Fairy Tales* (Bloomsbury, 2024).
- The light-hearted text and repeated 'OH NO, FLO!' refrain to join in with, makes it the perfect book to share with a group or individual child.
- Cover treatments: matt lam and SPUV.

Yetis Don't Exist!

A FUR-tastically funny rhyming adventure!

- Bringing rising talent, Kate Thompson, to the Templar list. She has two picture books with Welbeck and two new picture books coming with PRH in September 2024, and 2025.
- Bringing established quirky, commercial illustrator Loretta Schauer to the list with her bright palette and fantastic furry creatures. Loretta has previously worked with publishers like Ladybird, Farshore and Bloomsbury.
- Like *The Best Bear Tracker*, this book has a hilarious visual narrative alongside the text with the yetis and human explorer just missing each other more than once!
- The book's wintry, snowy setting offers the ideal seasonal gift without the story being explicitly Christmassy!
- Cover treatments: matt lam and foil.

My Name is a Gift

A heartfelt and touching celebration of the names we're given.

- Zeshan Akhter's debut picture book is filled with love and carries an important message - the perfect gift for any child.
- This lyrical ode to our names is brought to life by Åsa Gilland's expressive and detailed illustrations.
- Zeshan's second picture book with Templar, *Noah's New Home*, is due to publish in 2025.
- Includes a spread where the reader is asked about their name and has a chance to fill it in, making it the perfect activity for classroom and library settings.
- This story has roots in Muslim family traditions where dads gift their child a name, while also offering a universal message to all readers.
- Cover treatments: matt lam and foil.

THE ESCAPE

A story of 103 missing monkeys

XIMO ABADÍA

A monkey counting adventure

- A stylishly clever counting adventure from surrealist author-illustrator Ximo Abadía
- Encourages counting from 1 to 100, which children learn around age 5
- The number of monkeys to spot on each page increases through the book
- High-contrast black, white and red illustrations are both stylish and engaging for young readers
- Ximo's previous titles (including picture books *Toto*, 2018, and *I Can't Sleep*, 2020, and the STEM series including *The Speed of Starlight*, 2018) have sold more than 80,000 copies worldwide.

The Fixer of Broken Things

What happens when the famous fixer of broken things finds a problem that she can't solve?

- From the author and illustrator of *Number 7 Evergreen Street*, winner of the Royal Institute Of British Architects' Student Choice & Teacher's Choice for 5-7 year olds
- Julia Patton is an up-and-coming picture book talent in both the UK and the US. Bartleby from *The Very Very Very Long Dog* (Sourcebooks) is on the Barnes and Noble character wall of fame in the US.
- A wonderful story about sadness and how talking to a support network can help. The 'broken thing' Bea finds is a clockwork heart and speaking about her problems is what makes it work again.

I Want the Moon

A wealthy man has everything he could ever want on Earth... and now he is reaching for the moon.

- Frann Preston-Gannon is a multi-award winning illustrator and author. In 2011 she was the first UK recipient of the Sendak fellowship. Her first picture book, *The Journey Home*, won the 2012 Waterstones Prize, *I am the Seed that Grew the Tree* was the 2019 Waterstones Gift of the Year and *In the Swamp by the Light of the Moon* was Bank Street College of Education's 2020 Best Children's Book of the Year.
- *The Swamp in the Light of the Moon* has sold over 19,000 copies worldwide (as of July 2022)
- A captivating story with a message about the true value of things at its heart.

- Universal appeal, including stories from cultures on every continent
- *Winter Tales* has sold more than 80,000 copies across 15 territories
- Cover: Arlin + foil

Enchanted Tales

The Magic Fish

A tale from China

The Brothers Grimm version of "Cinderella" is the one many of us are familiar with, but there are hundreds – maybe even thousands – of different versions of this tale from around the globe. This version from China was the first to be written down, over 1,000 years ago.

Once upon a time, in a little shed outside a little house in the cave mountains of Southern China, there lived an orphan called Ye-Tsien. She was bright-eyed, clever, kind and good at making things. Ye-Tsien's stepmother loved her own daughter best, so Ye-Tsien had to do all the heaviest, most dangerous work, like collecting firewood from the deep forest or water from the high mountain pools. One day, Ye-Tsien was collecting water when up from the bottom of a deep mountain pool there was a shimmering and a glittering. It travelled up and up until something broke the surface – a tiny, shining golden fish! The fish looked up at Ye-Tsien, Ye-Tsien looked back – and from that moment, the fish

The Magic Fish

and Ye-Tsien became friends. She took it home, placed it in a basin and fed it every day with scraps from her own plate. The fish grew and grew until, one day, it had grown so big she had to take it back to the pool. Still, Ye-Tsien visited the golden fish every day, and each time the fish would poke its shining golden head out of the water and greet her.

A few weeks later, the Stepmother was hungry and had an idea. Secretly, she fished Ye-Tsien to the pool. She saw how the huge, sparkling, delicious-looking fish always came out for Ye-Tsien but stayed deep under the water when anyone else came by. *How can I outwit this clever fish?* she thought.

The next day, back at home, the Stepmother gave Ye-Tsien new clothes to put on and sent her on a long errand down the mountain. Then she disguised herself in Ye-Tsien's old clothes, went to the pool and called the fish. When it bubbled up from the bottom of the pool, the Stepmother was ready with a knife. She took the golden fish home, chopped it up, cooked it and served it up to eat with her favourite daughter.

'Delicious!' they both said, wiping their mouths. They ate every morsel and threw its bones away on the rubbish heap.

The following day, Ye-Tsien hurried to the mountain pool and called – but no fish came. Big tears fell from her eyes and splashed into the empty pool. But as she cried, the air thickened, shimmering and glittering, and a figure appeared. It spoke in a voice that reminded her of safety:

*Today you cry, today you weep,
But look upon the rubbish heap.
Your fish friend's magic bones are there.
They'll grant you wishes, never fear.*

Mythical Tales

DIONYSUS AND THE PIRATES

Long ago, a fast ship sped East, hot sunlight caressing its shadow on the sparkling sea. The wind filled its sails and rows of wooden oars cut through the water, worked by strong sailors. On the ship's deck, twenty pirates smiled. The ship's hold was full of gold, jewels, fine delicacies, and something even better: a rich passenger who was going to make their fortunes!

That morning, a young man with diamond-bright eyes, rich purple robes and long dark hair, had wined and coliced from a cliff-top:

"Sailors! Take me to the island of Naxos. I'll pay you well!"

The pirates agreed, and the young man had boarded the ship. But the pirates didn't just take goods, they were kidnappers too. The ship sailed straight past Naxos, and the captain cried, "You're our captive now! Your family will pay a ransom, or we'll sell you as a slave!"

The young man did not answer. He did not look worried either. He just stood there, eyes glittering, mouth curled up in a secret smile.

DIONYSUS AND THE PIRATES

A tale from Ancient Greece

Greek myth is bursting with colourful gods and goddesses and their dramatic dealings with each other – conquest, trickery, family feuds and love more. But some of the most strange and fascinating stories are about what happens between gods and people. Dionysus – son of the mighty god Zeus but also half-human himself – is known as the god of wine, pleasure and inspiration. This story is about one of his extremely creative ways of punishing humans who annoy him...

Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

The Incredible Voyage

Embark on an incredible adventure in a magical land this beautifully whimsical puzzle book.

- A beautifully whimsical puzzle book, mixing the fun and interactivity of puzzles with an epic adventure story. Perfect for unlocking the joy of reading.
- Written and illustrated by Aleksandra Artymowska, illustrator of bestselling *Around the World in 80 Puzzles* and *20,000 Leagues Under the Sea: A Puzzle Adventure*. Ola's puzzle books have sold over 100,000 copies worldwide.
- Featuring a strong female protagonist who shows that bravery and a sense of adventure isn't only for boys.

The Little Gardener's Handbook

A vibrant introduction to gardening.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

Tell Me About: Space

Big science for little readers.

- The third title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at space for young children, featuring topics such as: planets and moons, the solar system, stars and galaxy, constellations, what's in the night sky, gravity, the big bang, going into space and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Planet Earth

Big science for little readers.

- The fourth title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at earth science for young children, covering topics such as day and night, seasons and weather, biomes, physical landscapes, the water cycle, volcanoes and earthquakes, fossil fuels, carbon emissions and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Planet Earth

Earth is Home

You live on a brilliant ball of spinning rock called Earth. It's a planet, travelling through space on a gigantic loop around a star called the Sun.

There's another ball of rock about a quarter of the size of Earth and you can see it in the night sky. It's called the Moon.

It takes a month for the Moon to travel around Earth on an oval path.

It takes a whole year to travel all the way around the Sun. So if you are five years old, you have circled the Sun five times already!

Earth travels around the Sun on an oval path but it also spins on the spot. The spin is why it gets dark at night.

Your home turns away from the Sun at night and by morning it has turned back towards the Sun once again. It takes 24 hours for a complete spin to happen, and we call that a whole day.

Caves

Caves are big holes carved into cliffs by waves hitting the rock. But they can also form underground as rain trickles through cracks in the rock.

That's right, tiny little rain droplets can make massive caves because they dissolve the rock away a little bit at a time.

Underground rivers flow through caves. They wear the floor of the cave down to make them even bigger.

Inside the cave, some droplets of rainwater evaporate. As the liquid water drops turn into gas, they leave behind the tiny bits of rock they were carrying. The bits of rock stick to the roof.

In a thousand years, all the drops of water will have left enough rock behind to make a shape about as long as your finger. This is called a stalactite.

The same thing happens as the water drops onto the floor of the cave too. The cave floor grows upwards into a wider opening, which is called a stalagmite.

Digging and Drilling

When humans dig useful rocks and metals out of the ground, it is called mining. People also drill long holes deep down into the rock to find little pockets of gas and a liquid called oil.

The oil and gas found deep underground were once tiny sea creatures. They sank to the bottom of the sea and got squashed over millions of years. They turned into a dark liquid called oil and a gas called methane.

Cool is a black rock that gives off lots of heat when it burns. It is made from leaves that took in swamps millions of years ago.

We can burn oil, coal and methane gas to make electricity and to power vehicles.

Most metals are hidden underground with other rocks. A few metals are found just as they are at the surface, including gold, silver and copper.

Metals can make lots of useful things including bikes, phones, computers and cars.

Oceans

If you flew out into space and looked back at Earth it would look blue. That's because two thirds of our planet's surface is covered in liquid water. It's mostly found in the oceans and seas.

Waves

Waves are made on the surface of the water as the wind pushes the sea.

Tides

The sea comes in at high tide and goes out at low tide. This happens twice every day because of the way Earth is spinning beneath the Moon.

That's right, the Moon makes our tides! Gravity is a pull that happens between Earth, the Moon and the Sun. It pulls on you too. When you jump, gravity pulls you back down to Earth.

Low tide

High tide

The oceans on planet Earth slowly change shape because the rock beneath them is moving. This creates underwater valleys, caves and mountains.

Mountain

Valley

Did you know...? Seawater is salty because of salt from rocks!

Tell Me About: The Human Body

Big science for little readers

- The first in a brand-new series of non-fiction books for readers 4+.
- Written in friendly and engaging language by science educator and CBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung
- Cover finishes: matt lam and spot UV
- CONTENTS: Brilliant body; The skin; Skeleton; Muscles, Brain; Thinking; Nervous system; Eyes; Ears; Mouth and Nose; Digestive System; Blood; Water; Pumping blood; Lungs and breathing; Immune system; Feelings; Helping your body

Tell Me About: The Human Body

Brilliant Body

So many amazing things are happening in your body right now! Let's take a look at just a few of them...

As you breathe, spongy bags called lungs are sucking air in and putting it into your blood.

When you run, stretchy cords called muscles pull bones back and forward. Your bones connect together in a structure called a skeleton. And your skin wraps everything up.

Tiny electrical signals are making your heart beat - to-beat-to-beat - to pump blood around your body.

Your body is made from lots of different parts that work together to do important jobs. These parts are called organs.

If you look at the pictures in this book, you're using organs called eyes. And when you think about all of this, you use an organ called the brain.

When you think or laugh or wiggle your toes, you use energy. The energy comes from the food you eat. The food goes into your blood and all around your body.

The Skin

Let's begin our body tour with your skin. This stretchy waterproof layer wraps around your body keeping germs out and keeping your insides... inside!

Your skin is full of sensors that help you to touch and feel things. You can feel pain and warmth and the tiny footpads of an insect crawling on your arm.

Did you know...? The skin is the biggest organ in the body!

Touch sensors help you to feel how hard to press when you lift it and hold objects - so you don't drop or squash them.

The top layer of your skin is dead! Underneath it, new skin is being made. It pushes the old skin upwards until it flakes off as dust. Yes, your skin becomes dust!

Your hair and nails are made from the same stuff as skin. It's called keratin.

Your skin cools your body too. One way it does this is by making little drops of liquid called sweat.

When sweat drops are warmed by a hot body, they float off into the air taking heat away with them!

Skeleton

The thing that gives your body its wonderful shape and height is a skeleton. It is made from 206 bones that join together at hinges called joints.

Full your fingers! The bones are the hard parts, and the joints are where your fingers bend.

Strong bony bones called cartilage make up some parts of the skeleton including your ears, your nose and sections of your ribs.

The skeleton protects your insides too. Your ribs make a cage around your lungs and heart and your skull is like a helmet, protecting your brain.

Inside your biggest bones is a juice called marrow. New blood is being made in the marrow. That's right, your bones can make blood!

Bones are full of tiny holes that make them light. But the pattern of the holes makes them really strong too.

Short stretchy cords called ligaments stick the bones to each other. Longer, stretchy cords called muscles pull the bones around so you can move.

Muscles

Muscles are stretchy cords that pull body parts to make them move. If you wiggle your eyebrows and stick out your tongue, you did it using muscles!

Muscles can pull, but they can't push so they need to work in teams. One muscle pulls a body part one way, and another muscle pulls it back again.

Great teamwork muscles!

1. Bend your arm. The set of muscles at the front of your arm, called triceps, pulled it up by getting shorter.

2. Now straighten your arm. Another set of muscles at the back of your arm, called biceps, pulled your arm down to straighten it.

The muscles that move your bones around are called skeletal muscles. But they're not the only muscles you have!

Cardiac muscles make your heart squash to pump blood.

Smooth muscles line the tubes in your body. They help push things through the tubes.

Did you know...? Muscles help you hold in pee until you're ready to let it go.

Day and Night

A narrative non-fiction story of a day on Earth

- Sample contents: TWILIGHT Mule deer and mountain lion (North America); DAWN Spiders weaving webs (Australia); EARLY MORNING Hummingbirds & sweat bees (Mexico); LATE MORNING Andean condor (South America); NOON Cicadas (Western Europe); EARLY AFTERNOON Caracal, python (Africa); EARLY EVENING coral reef (Fiji); DUSK Moonflowers & sphinx moth (South Asia)
- Glow-in-the-dark ink on the nighttime pages
- This book can be read as a gentle story at bed time or to learn more about the world
- Cover treatment: matt lam + spot UV + glow-in-the-dark-ink (cover and nighttime pages)

Day and Night

A Guide to Day and Night

Polar night and midnight sun

At the very north and south of Earth, days work differently. For six months of the year the sun never rises above the horizon. This is called the **POLAR NIGHT**, and it is dark all the time. For the other six months of the year, the sun never falls below the horizon. This is called the **MIDNIGHT SUN**, and it is light all the time.

This phenomenon happens because Earth is tilted. When one pole is tilted towards the sun, the other pole is tilted away. This makes daytime or nighttime last more than 24 hours in these places.

Dawn

Before the sun has risen above the horizon, the sky lightens. This time of day is also known as twilight.

Sunrise

The sun rises higher, eventually coming up over the horizon line, warming the air.

Daytime

The period between sunrise and sunset, when the sun peaks up over the horizon line then travels in an arc across the sky. It is warmer than it is at night and there is more food around, but animals are more easily spotted by predators in the light.

Animals and plants that are active in daytime are called **DIURNAL**.

Sunset

The sun sinks below the horizon line, causing light and warmth to fade.

DIURNAL animals and plants prepare to rest for the night.

Dusk

The sun lowers even more, even though we can't see it now. The sky grows darker but there is still a faint glow of light. This time of day is also known as twilight.

CREPUSCULAR animals and plants are active again.

Night

The period between dusk and dawn, when it is dark. The air is cool and more humid. There is less food around at night but under the cover of darkness animals can avoid getting caught by predators.

Animals that are active at night are called **NOCTURNAL**.

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Ancient Love Stories

THE SACRED BAND OF THEBES

This was the final meeting place of the Sacred Band of Thebes, one of the most remarkable and most loyal armies that had ever lived. A bold experiment in an open town square by attacking war and heroes alike, who had died fighting for the freedom of the Greeks. As warriors, not just of soldiers, but of a hundred and fifty noble boys.

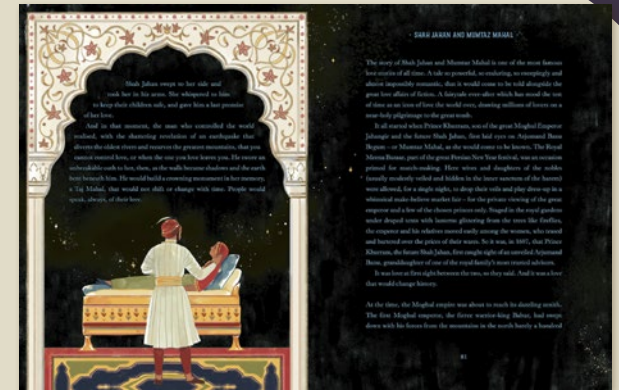

Born together by love loyalty to each other, the crack team of warriors was founded in Thebes in 378 BC by an extraordinary visionary by the name of Pausanias. It began as a resistance corps against the looming military power of Sparta (recovered the world over for its legendary military prowess across the continent to the south. These were chivalry, aristocratic, open, splashing blood across the pages of history, and well suited to the birth of a new kind of army.

HERODIAS AND ANTHOCHUS

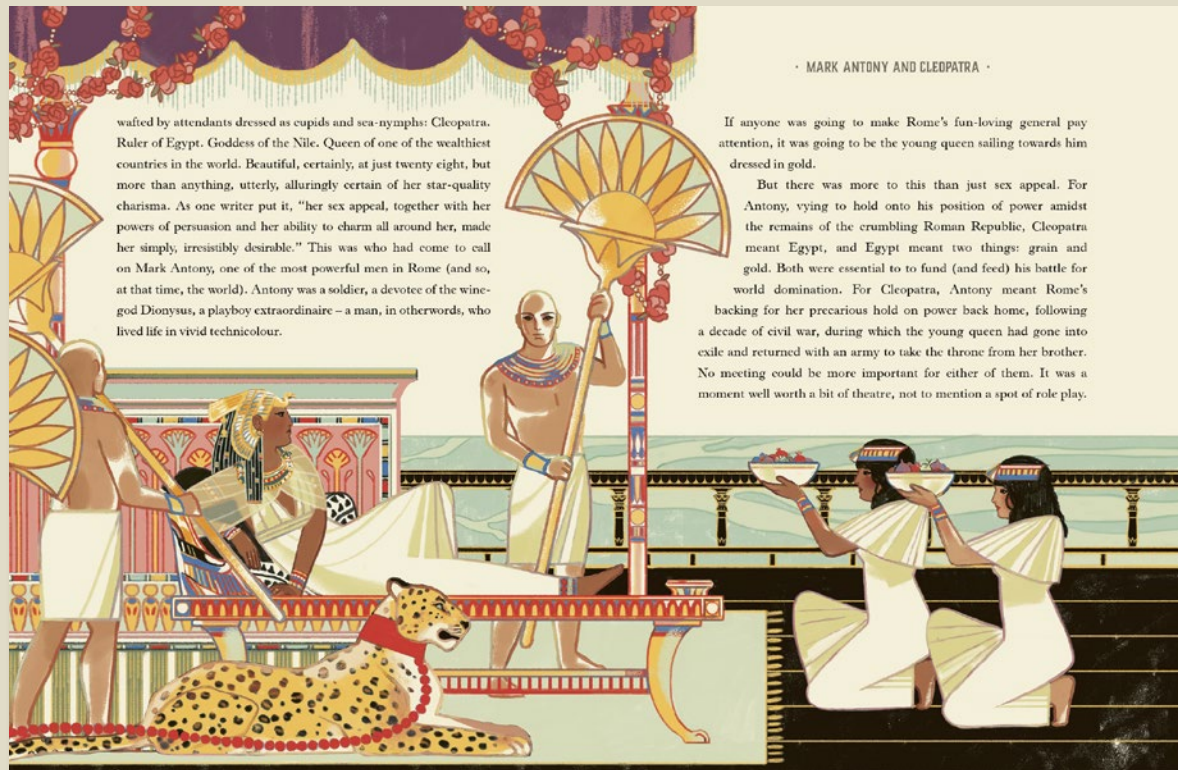

These parts first crossed across years earlier, when Herodias - ruler of the Roman world and self-proclaimed prince of peace - took a summer jaunt across the Roman province of Bithynia, in northern Turkey, where Antiochus had his home. The emperor, busy with his job, probably did not spot Antiochus among the crowds of adoring subjects and eager petitioners. But one of his maids did - and, as usual, with an eye to the emperor's taste, spent a night in the maids' quarters, the kitchen-hoed young man. Antiochus was duly offered a dinner invitation to the palace imperial suite along with a tuition package to the emperor's personal academy in Rome. To his boy from a dusty village on the fringe of the Roman empire, this must have seemed an offer too good to be true - a one-way ticket to live among the stars. But, in any good student of mythology would have known, by invitation to dinner and you might get burned.

Antiochus' rise to the top was meteoric even by Roman standards, where there were plenty of holy emperors who made it to the big time. Set among the other staff of the imperial household, Antiochus - handsome, good-looking, smart, with a magnetic personality and a nose for the emperor's favored boys - quickly caught the emperor's eye. Herodias was instantly besotted, and Antiochus became his paragon. In the summer of 108 BC, at the age of seventeen, Antiochus was personally selected to accompany Herodias on a tour of Greece (Herodias was a notorious Greek overlander, from what Asia Minor and, finally, Egypt.

SHAH JAHAN AND MUMTAZ MAHAL

The story of Shah Jahan and Mumtaz Mahal is one of the most beautiful love stories of all time. A tale of passion, devotion, tragedy and ultimate sacrifice, it is a story that has inspired millions of hearts over the years. Mumtaz Mahal, the great favorite of the emperor, was a woman of extraordinary beauty and intelligence. Her father, a nobleman, was a close friend of the emperor, and she was raised in the emperor's court. It was in 1629 that Shah Jahan and Mumtaz Mahal were married. Their love was so deep that they were often seen together in the emperor's garden, where they would spend hours in conversation. Mumtaz Mahal was a woman of great strength and courage. She was a devoted wife and mother, and she played a significant role in the emperor's life. In 1657, when the emperor fell ill, Mumtaz Mahal was the only woman who was allowed to see him. She stayed by his side until he died, and she was the one who held his hand in his final moments. Her death was a great loss to the emperor, and he was so grief-stricken that he ordered the construction of the Taj Mahal in her memory. The Taj Mahal is a masterpiece of architecture, and it stands as a testament to the love between Shah Jahan and Mumtaz Mahal. It is a place where their love is still felt, and it is a place that has inspired millions of hearts over the years.

MARK ANTONY AND CLEOPATRA

wafted by attendants dressed as cupids and sea-nymphs: Cleopatra, Ruler of Egypt. Goddess of the Nile. Queen of one of the wealthiest countries in the world. Beautiful, certainly, at just twenty eight, but more than anything, utterly, alluringly certain of her star-quality charisma. As one writer put it, "her sex appeal, together with her powers of persuasion and her ability to charm all around her, made her simply, irresistibly desirable." This was who had come to call on Mark Antony, one of the most powerful men in Rome (and so, at that time, the world). Antony was a soldier, a devotee of the wine-god Dionysus, a playboy extraordinaire - a man, in other words, who lived life in vivid technicolour.

If anyone was going to make Rome's fun-loving general pay attention, it was going to be the young queen sailing towards him dressed in gold.

But there was more to this than just sex appeal. For Antony, vying to hold onto his position of power amidst the remains of the crumbling Roman Republic, Cleopatra meant Egypt, and Egypt meant two things: grain and gold. Both were essential to to fund (and feed) his battle for world domination. For Cleopatra, Antony meant Rome's backing for her precarious hold on power back home, following a decade of civil war, during which the young queen had gone into exile and returned with an army to take the throne from her brother. No meeting could be more important for either of them. It was a moment well worth a bit of theatre, not to mention a spot of role play.

Escape Castle Dracula

A stunningly illustrated gothic puzzle adventure!

- Expanding our high-end activity offering - a core part of the Big Picture Press list
- Perfect for introducing readers to classic horror stories
- A fresh approach to an evergreen, universal subject
- Adam Allori's immersive artwork will appeal to readers of all ages
- Strong backlist and series potential - our follow up title could focus on classic adventure stories

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

One of the most popular treats given back to the world was the ice cream cone. It was first made in the United States in the 1890s. The first person to make an ice cream cone was an Italian immigrant named Urbino G. Spina. He was working in a grocery store in New York City. He had a machine that made soft-serve ice cream. One day, he was working on a hot day and the ice cream was melting. He decided to put it on a wafer. This was the first ice cream cone. It was a great idea. Today, there are many different kinds of ice cream cones. Some are made with chocolate, some with vanilla, and some with fruit. Ice cream cones are a delicious treat that everyone enjoys.

Easy Ice Cream

Put 1 cup of heavy cream, 1/2 cup of sugar, and 1/4 cup of vanilla extract in a bowl. Whisk together. Pour into a small ice cream maker and churn for 20 minutes. Transfer to a container and freeze for 2 hours. Enjoy!

Bicycle

"Freedom on two wheels"

15

Did you know that the first bicycle was called a velocipede? It was invented in France in the early 1800s. The first bicycle was made of wood and had a large front wheel and a smaller back wheel. It was called a velocipede because it was so fast. The first person to make a bicycle was a Frenchman named Michaux. He was a blacksmith. He made a bicycle for his son. The bicycle was a great invention. It allowed people to travel faster and farther. Today, there are many different kinds of bicycles. Some are for racing, some for commuting, and some for recreation. Bicycles are a healthy and fun way to get around.

Pedious Penny-Farthing

It was like a lot of things, most on the coast. They were called penny-farthings because they were so expensive. They were made of wood and had a large front wheel and a smaller back wheel. They were called penny-farthings because they were so expensive. They were made of wood and had a large front wheel and a smaller back wheel. They were called penny-farthings because they were so expensive.

Camera

"Say cheese!"

24

Although it may seem to be a simple invention, a camera is a complex piece of technology. The first camera was invented in the 18th century. It was called a camera obscura. It was a box with a small hole in one end. Light from the outside world would enter the hole and project an inverted image of the outside world onto the opposite wall. This was the first camera. The first person to make a camera was a Frenchman named Nicéphore Niépce. He was a blacksmith. He made a camera for his brother. The camera was a great invention. It allowed people to capture and share images of the world around them. Today, there are many different kinds of cameras. Some are for taking photos, some for video, and some for scientific research. Cameras are a valuable tool for many people.

Developed to Perfection

Many improvements to the camera have been made over the years. The first camera was made of wood and had a large front wheel and a smaller back wheel. It was called a camera because it was so expensive. They were made of wood and had a large front wheel and a smaller back wheel. They were called camera because they were so expensive.

High-Speed Train

"No-speed" "bullet"

25

Before the 19th century, the only way to travel long distances was by horse-drawn carriage or stagecoach. This was slow and uncomfortable. The first high-speed train was invented in the 19th century. It was called a steam locomotive. It was a train that was powered by steam. The first high-speed train was made in France. It was called the Orient Express. It was a train that was very fast. The first person to make a high-speed train was a Frenchman named Marc Segnier. He was an engineer. He made a high-speed train for his company. The high-speed train was a great invention. It allowed people to travel faster and farther. Today, there are many different kinds of high-speed trains. Some are for passenger travel, and some are for freight. High-speed trains are a valuable mode of transportation.

Marvelous Maglevs

Maglevs are a type of train that do not have wheels. They are called maglevs because they use magnetic levitation. They are very fast and smooth. They are a great invention. They allow people to travel faster and farther. They are a valuable mode of transportation.

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on a hill or in a field. Wind turbines are machines that convert the kinetic energy of the wind into electrical energy. The first wind turbine was invented in the 19th century. It was called a windmill. It was a machine that was used to grind grain. The first person to make a wind turbine was a Dutchman named Jan van Ardenne. He was an engineer. He made a wind turbine for his company. The wind turbine was a great invention. It allowed people to generate electricity from a clean and renewable source. Today, there are many different kinds of wind turbines. Some are for generating electricity, and some are for pumping water. Wind turbines are a valuable source of energy.

Green Energy

Wind turbines are a type of renewable energy. They are called green energy because they do not produce any pollution. They are a great invention. They allow people to generate electricity from a clean and renewable source. They are a valuable source of energy.

Helicopter

"A surprising way to fly"

35

When you think of a helicopter, you probably think of a machine that can fly. Helicopters are machines that can fly vertically. They are called helicopters because they can fly like a helicopter. The first helicopter was invented in the 19th century. It was called a gyrocopter. It was a machine that was used to transport people. The first person to make a helicopter was a Frenchman named Paul Goussier. He was an engineer. He made a helicopter for his company. The helicopter was a great invention. It allowed people to travel faster and farther. Today, there are many different kinds of helicopters. Some are for military use, and some are for civilian use. Helicopters are a valuable mode of transportation.

Versatile VTOLs

Vertical takeoff and landing (VTOL) aircraft are a type of aircraft that can take off and land vertically. They are called VTOLs because they can take off and land like a helicopter. They are a great invention. They allow people to travel faster and farther. They are a valuable mode of transportation.

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles – no carts, cars, bikes, buses, trucks, trains, trams or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3200 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

The very first wheels were used to make pottery. The art of pottery began around 30,000 years ago. Originally, potters would shape clay into pots with their hands, but this took a long time. The Mesopotamians invented a better method in around 3500 BCE. The potter's wheel was a large stone disc balanced on a stick called an 'axle', which could be spun. By putting clay on the wheel and spinning it, the potter could shape the clay quickly into pots. We don't know for sure, but it seems likely that the potter's wheel led to the invention of the vehicle wheel.

Internet

"The world at your fingertips"

18

The invention of the Internet – a network of computers that 'speak' to each other – was a concentrated effort in the United States. The first computers were connected to each other in 1969 during the Cold War (1947–1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: LOGIN, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want – books, food, holidays, cars – with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

World Wide Web

The World Wide Web (WWW) is a gateway to the Internet. It's made up of search engines like Google and Safari, the Internet addresses (also called URLs) we type in, and the websites that appear on our screens. It was invented by a British computer scientist called Tim Berners-Lee in 1989 while working at CERN, a science research laboratory in Switzerland. The WWW made the Internet accessible to everyone, not just scientists and academics.

Weather, Camera, Action!

A new take on a weather book - through the lens of a weather presenter

- Sample contents: Jet Streams; Worldwide Winds; Tropical Winds; Air Masses; Atlantic Hurricanes; Thunderstorms; Rarest Clouds; Precipitation; Lightning; Rainbows; Heat Waves; Winter's Wrath; Wind Chill; Humidity; Dust Storms; Dust Devils; Weather Bombs; Satellites; Air Pollution; Climate Change
- Written by expert meteorologist Liam Dutton; a bold, striking tour of our weather, guided by his lived experience of being a weather presenter
- Weather from a truly global perspective, showcasing phenomena from every continent on Earth

Talking History

150 years of world-changing speeches

- An accessible look at political and social history, and issues that remain pertinent today
- Contemporary design and illustrations from André Ducci accompany engaging text
- Authors are experienced children's writers and academics with expert knowledge on the topics discussed. In 2021, Joan Haig was selected as one of prestigious Scottish Book Trust's authors in residence, working with a school in Aberdeen
- Sample contents: Abraham Lincoln, 'The Gettysburg Address', 1863; Jawaharlal Nehru, 'A Tryst with Destiny', 1947; Nelson Mandela, 'Speech from the Dock', 1964; Harvey Milk, 'The Hope Speech', 1978; Angela Merkel, 'Address to 68th Session of the WHO', 2015 and Severn Cullis-Suzuki, 'Listen to the Children', 1992,

Talking History

In 1903, in the city of Manchester, UK, Emmeline Pankhurst and her eldest daughter Christabel founded the Women's Social and Political Union (WSPU). The organisation campaigned fearlessly for women's right to vote.

THE SUFFRAGETTE MOVEMENT

This wasn't the first time that women in Britain had fought for the vote. Since the mid-nineteenth century, female campaigners called 'suffragists' had tried to win rights for women in society through peaceful petitions and, later on, by refusing to pay their taxes.

But this campaign was slow with few results.

After years of unsuccessful peaceful protest by the suffragists, the WSPU decided that it was time for action - 'Deeds Not Words', as their motto said. Members of the WSPU took part in 'civil disobedience' to literally fight for their cause. They chained themselves to railings, heckled politicians, placed bombs in empty buildings, and smashed windows in public places, constantly clashing with the authorities.

They were so determined to achieve their political aims that they deliberately took part in violence and vandalism to influence the public and the government.

Newspapers began referring to militant WSPU campaigners as 'suffragettes'. By 1910, the WSPU had branches all over the country.

THE CAT AND MOUSE ACT

Around 1,000 suffragettes were imprisoned for their 'substance' behaviour. While in jail, some continued to fight by going on hunger strikes, refusing to eat or drink. At first, they were released to prevent them from starving, but, by 1910, prison wardens began to force-feed them. Women were badly hurt, prompting public outrage at what was seen as government torture.

The government responded by passing the 1913 'Prisoners' (Temporary Discharge for Ill Health) Act. Under this new law, when women on hunger strike became critically weak, they were sent home. As soon as they recovered, they were promptly returned to continue their sentence. It was dubbed the 'Cat and Mouse Act' because of the way a cat plays with its prey repeatedly letting it escape before catching it again.

Emmeline Pankhurst was imprisoned and released 16 times! It was in 1913, in between prison sentences, that she visited the United States to campaign for support and funding. She addressed a group of women at the Parsons Theatre in Hartford, Connecticut, in a powerful speech attempting to justify the use of militant tactics in the fight for women's rights.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
The javelin is a spear-like object used in track and field events. The first javelin was made of wood and had a stone head. Today, javelins are made of metal and have a pointed tip.

LONG JUMP
The long jump is a track and field event where athletes compete to jump the furthest distance. The long jumper runs down a runway and jumps into a sandpit.

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal at the 2004 Athens Olympics with a jump of 15.66 metres.

DISCUS
One of the most beautiful events in the ancient world is called the Discobolus or 'discus thrower'. The statue is a Greek Discus thrower. It is a bronze statue of a young man in a red tunic and a white helmet. He is shown in the middle of a discus throw. The statue is 1.80 metres high and is made of bronze.

JAN SZYBIST
Jan Szybist is a Polish javelin thrower. He won the silver medal at the 2004 Athens Olympics with a throw of 64.98 metres.

AMERICAN FOOTBALL
American football is a team sport that is played on a rectangular field. The game is played between two teams of 11 players each. The objective is to advance the ball down the field and score points by passing or kicking it into the end zone.

AIM OF THE GAME
The aim of the game is to score points by passing or kicking the ball into the end zone. The game is played on a rectangular field that is 100 yards long and 53 1/3 yards wide.

MEET THE TEAM
There are 11 players on the field. Each player has a specific role to play. The quarterback is the player who passes the ball to the other players. The running back is the player who carries the ball and runs with it. The wide receiver is the player who catches the ball and runs with it. The tight end is the player who blocks the other team's players and catches the ball. The defensive line is the group of players who try to stop the other team from advancing the ball. The defensive back is the group of players who try to stop the other team from passing the ball.

MAKING A PLAY
A play is a series of actions that happen on the field. The play starts with the quarterback passing the ball to a receiver. The receiver then runs with the ball and tries to get it into the end zone. The defensive line tries to stop the receiver from getting to the end zone. The defensive back tries to stop the receiver from catching the ball.

TOUR READY
One of the best ways to watch American football is to go to a game. The game is played on a rectangular field that is 100 yards long and 53 1/3 yards wide. The game is played between two teams of 11 players each. The objective is to advance the ball down the field and score points by passing or kicking it into the end zone.

RUGBY
Rugby is a team sport that is played on a rectangular field. The game is played between two teams of 15 players each. The objective is to advance the ball down the field and score points by passing or kicking it into the end zone.

BASEBALL
Baseball is a team sport that is played on a diamond-shaped field. The game is played between two teams of 9 players each. The objective is to score runs by hitting the ball and running the bases.

CRICKET
Cricket is a team sport that is played on a rectangular field. The game is played between two teams of 11 players each. The objective is to score runs by hitting the ball and running the bases.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patota puripatka was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

Mongolian cave paintings from 5,000 years ago show people wrestling in front of spectators.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Māori of New Zealand participated in a competition known as the Māori Games - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

An exploration of rivers with fold-out pages

- A stunning look at geography, exploring the physical features of rivers, the unique wildlife they support and how they have shaped human history.
- Featuring 6 mighty rivers from around the world, one from each continent
- CONTENTS: A World of Rivers; Where do rivers get their water?; Source; Heading Downhill; Waterfalls; Underground Rivers; Gorges; Rapids; Dams; The Danube; Around the Bend; River Life; River Highway; The Ganges; Making Lakes; The Amazon; River City; The Murray; Extraordinary Rivers; Floating Islands of the Sudd; The Nile; Deltas; Estuaries; The Mississippi; Mangroves; Salmon Run
- Includes fold-out pages throughout
- Cover treatment: matt lam + spot UV + 5th colour

Our Time on Earth

This book about animal life cycles is a celebration of creatures big and small.

- **WINNER** of the Association for Science Education Award 2022
- Sample contents: Mayfly; Honey Bee; Monarch Butterfly; Opossum; Etruscan Shrew; Giant Pacific Octopus; Axolotl; Trapdoor Spider; Grizzly Bear; Brandt's Bat; Orangutan; Laysan Albatross; African Elephant; Saltwater Crocodiles; American Lobster; Galapagos Giant Tortoise; Bowhead Whale; Greenland Shark; Immortal Jellyfish
- Consulted by wildlife cameraman and producer Fredi Devas, who has worked on David Attenborough's One Planet: Seven Worlds BBC series.
- Discover creatures who are born within a day of their mothers, or others who stay infantile for almost one hundred years.

Extra Terrestrial

Do aliens exist? Join the real-life hunt for alien life!

- Written by highly acclaimed science author, and Fellow of the Royal Astronomical Society, Colin Stuart, after who the asteroid (15347) Colinstuart is named in recognition of his efforts to popularise astronomy.
- Sample contents: Section 1 (Earth): No Place Like Home / Section 2 (Exoplanets & Techniques): Alien Hunter's Toolkit / Section 3 (Types found): Exoplanet File / Section 4 (Alien life): Searching for Alien Life
- Illustrated by the wonderfully talented Jasmine Floyd known for her vibrant colours and psychedelic vibes!

Automotive celebrates the ingenuity and usability of cars, trucks and motorbikes past, present and future.

- Sample contents: Steam and Electric Automobiles, Early Engines, Monte Carlo Rally, Mass Production, Motorways, Motorbikes, Isle of Man TT, Daytona 500, Concept Cars, History of Formula One, Iconic Bridges, Trucks and Road Trains, Monster Truck Races, Hot Rods, Drag Races, Special Cars, Cars in War, The Future of the Automobile
- The follow-up title to the stunning *Locomotive*
- Perfect for car lovers of all ages
- Super cool artwork by award-winning artist Ryo Takemasa

STEAM AND ELECTRIC AUTOMOBILES

Since their invention in the early 1800s, steam locomotives revolutionised the way people and freight were transported. However, some travellers wanted a more convenient vehicle that they didn't have to share and could use whenever they wanted. Some engineers created small, steam-powered road vehicles, while others decided to try electric battery automobiles. Many designs were created, but by the early 20th century it was clear that the internal combustion engine was going to be king of the road.

The first steam-powered road vehicle was designed by English inventor Richard Trevithick. Using a high-pressure boiler for more power, his Puffing Devil set off with six passengers in 1801 at a speed described by one witness as "faster than I could walk" (about 6km/h). Unfortunately, only a few days after this historic journey, the boiler caught fire and Puffing Devil was destroyed.

Electric cars were very popular in Europe and the USA from the late 1800s to the early 1900s. They were quieter and smoother, didn't produce smoke and were easier to use than steam-powered automobiles. One of the first successful models was the Flocken Elektrowagen. Designed in Germany in 1888, its 1hp electric motor drove the back wheels and could reach around 15km/h.

One of the last and most advanced steam automobiles was the Doble steam car. Designed in 1924, the Doble Model E only required 30 seconds to boil the water needed to drive the engine, was easy to control and could reach speeds as high as 120km/h.

EARLY ENGINES

The age of the automobile really began with the invention of the internal combustion engine. When fuels such as petrol, diesel or kerosene are burned (or 'combusted') inside the engine (using an oxidizer such as air), they produce kinetic energy, which makes the vehicle move. Internal combustion engines are more fuel-efficient than steam engines, and proved far easier and more convenient to start-up, operate and maintain.

German inventor Karl Benz developed the first automobile powered by an internal combustion engine in 1885. His revolutionary Motorwagen had a 5hp petrol engine, three-spoked wheels with solid rubber tyres and one forward gear. Its top speed was around 16km/h.

The first mass-produced car was the Oldsmobile Model R Curved Dash, 19,000 were built between 1901 and 1907. It was more affordable than most other cars at the time, had a 5hp engine, 2 forward and 1 reverse gear and came as either a 2-seater 'runabout' or a 4-seater family car.

Created in 1901 by German engineers Paul Daimler and Wilhelm Maybach as a racing car, the Mercedes 35 HP was a huge step forward in automobile design. It had a powerful petrol engine mounted at the front that drove the back wheels, a hand brake and a foot brake, 4 forward gears and 1 reverse gear.

Welcome to the Arts: Dance

TIMES BEST CHILDREN'S BOOKS OF 2023!

- The first title in the new dazzling new Welcome to the Arts series.
- The perfect gift for anyone who is a fan of *Strictly Come Dancing* or *Dancing With the Stars*
- Phenomenal immersive artwork by multi award-winning artist, Jason Raish
- Expertly written, lively text by Sadler's Wells CEO, Sir Alistair Spalding
- Published in conjunction with Sadler's Wells Theatre - one of the world's leading dance organisations
- Beautiful large format artwork makes the reader feel they are really there

Welcome to the Arts: Dance

"Dancers are the messengers of the gods."

Martha Graham

Born in 1894 in Pennsylvania, Martha Graham showed an early interest in dance, but her parents did not approve of her becoming a dancer. It was only after her father's death in 1914 that Graham, then aged 20, was able to pursue her dream and enrolled at the Denishawn school in Los Angeles. The eventual pioneer and creator of modern dance, Graham allowed and encouraged women to be at the forefront of artistic achievement.

Graham created a dance technique that allowed the performers to become aware of, and use, their gravity as opposed to ballet where the emphasis was on the dancers appearing weightless. Graham also worked on the principle of 'contracting and release', in her choreography movement comes from the tension of pulling in, or 'contracting', the pelvic muscles and curving the spine. The flow of energy is then 'released' from the body when it straightens. When repeated, this gives a rhythmic flow to the movement, a cycle similar to breathing in and out, but with more exaggerated movements. It was used in many of Graham's greatest choreographies, including the solo dance Lamentation and larger group works such as Chronicle (1926). It is still practised as a daily class in many dance companies and schools today.

The main themes of Graham's work include Greek mythology and American history. While her early works featured only female dancers, men joined Graham's company in 1938, prompting her to explore new themes. For example, the staged work Appalachian Spring (1944) explores the experiences of early American pioneers, but also the act of falling in love.

By presenting ideas and images that were unfamiliar, Graham introduced a new era in dance. She collaborated with composers such as Louis Horst and the fashion designers Calvin Klein and Donna Karan. She taught actors including Liza Minnelli and Gregory Peck and inspired future dance greats such as Merce Cunningham (see page 39) and Taylor Swift.

— NOW SHOWING —

Martha Graham stars in Lamentation, premiered 8 January 1930 at Maxine Elliott's Theatre, New York City | Choreographed by Martha Graham | Music by Zoltan Kodaly

Lamentation, sometimes referred to as the Dance of Sorrow, is a four-minute solo piece first performed by Graham herself. The costume was deliberately designed to restrict her movements and to enhance the accession of grief, but also to highlight its boundaries.

Insectarium

Dragonflies, Damselflies and Mayflies

The ancestors of dragonflies were the first insects on Earth to fly, around 300 million years ago. Unlike most insects, dragonflies have a very long life span. Some species, like the damselfly, live for several years, while others, like the dragonfly, live for only a few weeks. They are also very good at flying and can fly for hours at a time.

Dragonflies are fascinating for many reasons. They are the only insects that can fly backwards, and they are also the only insects that can fly sideways. They are also very good at flying and can fly for hours at a time.

Dragonflies are also very good at flying and can fly for hours at a time. They are also very good at flying and can fly for hours at a time.

Butterflies

Butterflies are one of the most beautiful and popular insects in the world. They are also one of the most diverse groups of insects, with over 170,000 species. They are found in almost every part of the world, and they are also very good at flying and can fly for hours at a time.

Butterflies are also very good at flying and can fly for hours at a time. They are also very good at flying and can fly for hours at a time.

Bees

Bees are one of the most important insects in the world. They are also one of the most diverse groups of insects, with over 20,000 species. They are found in almost every part of the world, and they are also very good at flying and can fly for hours at a time.

Bees are also very good at flying and can fly for hours at a time. They are also very good at flying and can fly for hours at a time.

What is an Insect?

The earliest insects appeared on Earth about 480 million years ago. To put this in perspective, we humans have been around for barely one million years, and the first dinosaurs appeared 230 million years ago.

Insects are part of a larger group of creatures including millipedes, centipedes, spiders, scorpions, crabs and shrimps, collectively known as the arthropods. They all have an external skeleton; a more or less rigid 'shell' with muscles attached on the inside. To grow, arthropods have to repeatedly shed their skeleton, which is a delicate business and leaves them soft and vulnerable for a short time.

Insects are the only arthropods to have three pairs of legs. Their body is divided into three segments: the head, thorax and abdomen. The head has eyes, a mouth and a pair of sensory antennae that taste the air. The legs and wings, if present, are attached to the thorax, which is often filled with muscles to move them. The abdomen contains the gut and reproductive organs. Other arthropods, including arachnids, crustaceans, millipedes and centipedes are not considered insects due to differences in leg count, antennae presence and body structures.

Nearly all insects start as eggs. Most undergo complete metamorphosis which means they completely change their physical appearance, transforming from a larva to the adult insect by way of a pupal phase (see page 68). In more primitive insects, such as mantids, grasshoppers, true bugs and stick insects, the life cycle is similar to many other arthropods – the adult female lays eggs, which hatch into 'nymphs'. These nymphs look roughly similar to the adults, other than being much smaller and with tiny wing buds rather than wings. All arthropods must shed their exoskeleton (skin) to grow, so the nymphs proceed through, typically, five to seven stages until they reach adult size. This life cycle is known as 'incomplete metamorphosis'.

2: Stag beetle (male)
Lucanus cervus
Length 16 to 20mm

The stag beetle has the characteristic features of insects: three body segments, one pair of antennae, three pairs of legs and two pairs of wings although the hind wings are kept hidden beneath the modified and hardened forewings.

(1) head
In males the huge jaws are used for fighting other males rather than for feeding. Females are rarely distinguished.

Key to plate

(1) head
The brain and two sensory organs are attached.

(2) antennae
Antennae detect chemicals in the air. They may be used to sniff out food or mates.

(3) compound eye
Insect eyes are made up of hundreds of individual facets. Some insects that need better vision, such as dragonflies, have much larger eyes.

(4) legs
The legs are tipped with claws for grip.

(5) elytra
In beetles, the first pair of wings has evolved into a hardened case, under which the hind wings are folded.

(6) thorax
Larger than the head, it is used to power the wings.

(7) abdomen
This contains important organs like the digestive and reproductive systems.

On The Streets of New York

A vibrant and collectable new series celebrating cities around the world - starting with New York.

- Beautifully presented and produced - with strong branding and a collectable feel.
- Each spread will act as a snapshot of a different part of the city. Non-fiction spreads at the back of the book will add further information about landmarks and history.
- Each book will be written by a poet from the city - who will be able to celebrate the hidden parts of the city, as well as the main landmarks.
- Paris proposed as book two
- Aimed at ages 7+ - perfect for reading aloud together.

Tiffany & Co.: The Story Behind the Style

The King of Diamonds: Charles Lewis Tiffany

Charles Lewis Tiffany, the man who would go on to win the moniker of New York's 'King of Diamonds', did not feel from a long line of jewellers. His start in life was more modest, making his name in high society all the more glittering.

Tiffany was born in 1812 in Canton and Ohio. Tiffany and grew up in the small town of Killbuck, Connecticut. The major business of the town was the production of cotton goods, and the family owned a manufacturing company. Tiffany was educated at local schools in the area before joining his father in the family cotton business.

By 1837, Tiffany felt restless. No longer satisfied by working at home with his family, he began to envision how he could make his own mark in business. He turned up with a school friend, J. R. Young, and the duo set in motion a plan to open a stationary store in New York City. With a \$1,000 loan from Charles' father, the ambitious 25-year-olds made the 150-mile journey north. The store, named Tiffany & Young, opened its doors at 259 Broadway that same year, and on its first day, \$4,981 rang through the till.

Tiffany & Young soon began to expand its remit, stocking glassware, silver, porcelain, clocks and jewelry, and began to develop a

OPPOSITE: Tiffany & Co. founder Charles Lewis Tiffany photographed by James Thomson Beach in 1902.

reputation as a purveyor of fine goods of taste. In 1841, the business expanded with the addition of a third partner, J. L. Ellis, and was renamed Tiffany, Young & Ellis. The trio expanded the store, doubling its size by moving the adjacent site, and continued to increase the quality of the goods they sold, with Young making buying trips to Europe to pick out English and Italian jewelry.

It was, in fact, political events in Europe that would be the making of this American luxury success story. In 1848, the status quo crumbled as republican revolutionaries sought to topple European monarchies and strip aristocrats of their power and wealth. It was a societal upheaval known as the Springtime of Nations. More than 50 countries were inspired by this, but none more so than France, where the monarchy was overthrown and replaced with a republic. Such widespread panic and disruption had an impact on the price of diamonds, and Tiffany, Young & Ellis stepped, by now, the firm

was manufacturing its own jewelry, and the opportunity to pick up diamonds at low prices per them as an advantage. The working of the antechamber also housed some important gems – the likes of which had never been seen in America before – and Tiffany secured a number of important fixtures, including the collection of Hungary's Prince Esterházy.

In 1853, Young and Ellis decided to retire from the business, but Charles Lewis Tiffany was far from finished. He found new partners to work with, and the business was, at this point, renamed Tiffany & Company. Tiffany would go on to build his empire, grabbing headlines along the way. By the 1860s, the business was well established as an exponent of choice for the rich and the famous, both for its jewelry and its top-quality silver. In 1862, President Abraham Lincoln purchased a set of pearl necklaces and earrings from Tiffany & Co. for his wife Mary Todd Lincoln, who wore them to her husband's inauguration ball.

In 1870, Tiffany & Co. moved into a large new store in New York's Union Square, marking the beginning of a major decade for the jeweller one in which Charles Lewis Tiffany would earn the title the King of Diamonds. It was a single purchase that would truly justify Tiffany into the high-jewellery atmosphere – a 237.42ct rough fancy yellow diamond. When cut and polished, what emerged was a diamond of staggering enormous proportions for a rare yellow diamond of that quality: it weighed 128.54ct and was named the Tiffany Diamond.

If the purchase of this new world famous stone, which is on permanent display at Tiffany & Co.'s Fifth Avenue store in New York, signalled Tiffany's intention to dominate the diamond market, his groundbreaking creation eight years later sealed the deal. Seeking to

celebrate the beauty of diamonds, Tiffany designed an engagement ring in 1886 that remains a sought-after classic to this day. The Tiffany Setting engagement ring kicked back against the over-fussy designs of the time with a clean, minimalist band and a six-prong setting that lifted the diamond above the ring. The purpose for this innovative setting was to allow light to flow through the stone, and therefore maximise the sparkle. It was a huge hit, and the iconic design has become synonymous with engagement rings.

Just 15 years before his death, Tiffany pulled off a final coup. The aftermath of the French Revolution that had gifted Tiffany an abundance of important gems in 1848 and its early credibility in high-jewellery circles rumbled on. In 1887, the French government was masterminding a plan to sell the crown jewels of its fallen monarchy. Outwardly, it claimed that a democracy such as France had no need for "objects of luxury, devoid of usefulness and moral worth". The rumour mill suggested that it was in fact afraid of a power grab by Bourbons, Orleanists or Bonapartists, who might use ownership of the jewels to claim a right to rule. Tiffany cared little for this political posturing, but he did see an opportunity in it. He travelled to Paris to attend the auction of the French crown jewels at the Louvre. He sat in the audience, ready to make his bids, along with fellow jewellers, including a young Frédéric Boucheron, and Orleanists, members of the French royal family, whose pockets proved too shallow on the day to win back their family heirlooms.

When the final strike of the gavel fell, Charles Lewis Tiffany had in his possession close to a third of the historic crown jewels. He placed them in specially crafted red-leather boxes, embossed in gold with the words *Diamants de la Couronne*, translating from French as Crown Diamonds. Inside, impressed on the silk lining in the lid, was Tiffany & Co. New York and Paris, thus securing Tiffany & Co.'s place in the history books as a purveyor of royal jewels and his own coronation as the King of Diamonds.

Rolex: The Story Behind the Style

PROVIDER: Hans Wilsdorf, the founder of Rolex.
 RIGHT: Representatives of watch firms in Geneva in 1908.

more wearable product would one day make the larger pocket watch obsolete. He set about trying to change the image of wristwatches.

A fundamental step was finding a manufacturer called Angler in the Swiss town of Besen that was making precision movements that could fit inside a wristwatch. Wilsdorf placed a large order, and soon Wilsdorf & Davis became one of the leading British wristwatch firms.

In a bid to establish his business as a brand rather than simply a dealer, Wilsdorf wanted to create a new name for the company: a catchy one that would look good on a dial and be easy to pronounce in many languages. He had experimented with many combinations of letters in search of this made-up name but failed to find anything that worked. Then, while riding through London's Cheapside on the upper

deck of a horse-drawn in 1908, it came to him. Or as he would later put it: "A gentle whisper: 'Rolex' in my ear."

Under this new name, Wilsdorf continued his quest to create reliable wristwatches with quality movements. In 1910, Rolex had a breakthrough when one of its products, powered by an Angler movement, became the first wristwatch in the world to receive the Swiss Certificate of Chronometric Precision – a mark of homological excellence. Four years later, another milestone would be achieved when the Kew Observatory in London awarded a Rolex wristwatch with a Class A precision certificate. This had previously only been given to marine chronometers used for navigation, and it further solidified the reputation of Rolex as a purveyor of precise timekeeping instruments.

In 1916, World War I broke out, and the following year the British government introduced a 33.3% customs duty as part of the war effort. By this time, Rolex's London office, which had a staff of 60 people, was exporting its watches all over the world and the tax change would make that difficult. As such, Wilsdorf made the decision to move the company to Geneva in Switzerland. It already had an office in La Chaux-de-Fonds, which it opened in 1917 for marketing purposes, but this move would remove it from the British watch industry altogether.

And, so, the legacy of Rolex's Swiss-made watches began, with the Swiss company Rolex S.A. registered in Geneva in 1920.

OPPOSITE TOP: A watchmaker operating in Rolex's movement factory in Geneva in 1942. TOP RIGHT: Rolex's first watch, the 'Patek' watch, circa 1880.

The Origins of the Oyster

With Rolex settled into its new home in Switzerland, the company continued to develop its watch offering with a focus on precision and durability, as well as building its brand. Though certainly catchy, the name Rolex had not become an overnight success. Tired of waiting for it to catch on, Hans Wilsdorf launched a major marketing campaign in 1925, pledging to invest at least £12,000 a year – nearly £1 million in today's money. He also increased the number of watches Rolex was producing with its own branding on the dial, as it has been producing both branded and unbranded watches up until that time.

A major leap forward for Rolex's brand was the launch of the Oyster in 1926. This new style of watch promised to be waterproof and dustproof thanks to a hermetically sealed case, proving its durability. It also made it an obvious choice for sporting activities, which would prove to be a rich source of marketing for Rolex in the years ahead.

The Oyster case had a patented system of screwing down the bezel, crown and winding crown against the middle case to seal the movement inside securely. The winding crown, which is made from 10 individual parts, was key in its action as a go-between between the sealed inner world of the case and its functional external elements.

The Oyster case would become the backbone of Rolex. Nearly every watch in its contemporary range features an Oyster case, and the name of all the models reference it. A Submariner is technically named an Oyster Perpetual Submariner and a GMT-Master II is an Oyster Perpetual GMT-Master II, and so on. The only exception is the 1908 dress watch, which does not have an oyster case.

Rolex's iconic fluted bezel is a showstopper in the early Oyster cases. Although these fluted bezels are decorative now, the ridges originally served a purpose to allow a special tool to screw the bezel securely to the mid case.

OPPOSITE: A 1959 Rolex Oyster Perpetual on a brown alligator strap. ABOVE: A close-up of a Rolex Oyster Perpetual case and bezel base.

The World's Most Famous Watch Brand

Rolex has become shorthand for luxury. There is no watch you can strap on to your wrist that will be recognised for the status symbol it is quicker than a Rolex. And for many, this is the appeal.

Yet there was a time when the name Rolex – a word completely made up by the brand's founder Hans Wilsdorf – was not famous. It would take hard work, boundary pushing and a lot of self-belief on the part of Wilsdorf, a German orphan, to jettison the name into the upper echelons of horology; starting with convincing the pocket watch-wearing gentleman of the early 20th century that they wanted to wear the time on their wrist at all.

As you will discover, Rolex won its place in history by constantly questioning what was possible and innovating at all costs. It pioneered so many elements of watchmaking and design that are standard today, such as waterproof watches, placing a date window on the dial, and even removing the need to wind our watches.

It also found its way into some of the most exciting moments in history by placing Rolex watches on the wrists of adventurers and explorers. Its watches have travelled to the world's highest peaks and to the depths of the ocean; they have survived extremes of temperature, speed and pressure.

The story of Rolex is so much more than that of its watches. It is one of epic ambition and vision. What started out as a one-man band in London's Hatton Garden would become the epicentre of the Swiss watchmaking industry, and one of the most recognisable and coveted brands in the world.

- Comp title The Little Book of Chanel has sold in excess of 61k copies TCM.

Vivienne Westwood: The Story Behind the Style

Derbyshire Days

Vivienne Isabel Swire was born on April 8 1941 to Gordon and Dora Swire at the Paragon Maternity Home, Glossop. The future fashion revolutionist had one sister, Olga Swire, born 1945, and one brother, Gordon Swire, born 1946. She grew up in the parish of Tintwistle, Derbyshire (which was formerly part of Cheshire until 1974), both during and after World War II, enjoying what has been recounted as a fairly idyllic childhood, living at the more secluded Millbrook Cottage and playing outside until late.

The young Swire clan were encouraged to be creative and make things more than they were encouraged to read. Vivienne knew from a young age that she was good at making things, notably models at school, and she especially enjoyed sewing classes. Her mother would often make their clothes, and worked as a weaver in a local cotton factory.

The young Vivienne – who remembers having a passion for art from an early age – attended Hollingworth and Tintwistle Primary Schools from 1946 to 1952, at which point she passed the scholarship exam for Glossop Grammar School. She continued to be good at art during her time at Glossop Grammar, and considered attending art school.

Among Westwood's most formative fashion memories are the make-do-and-mend philosophy that came to define

Britain in austerity, as well as the coronation of Queen Elizabeth II in 1953, when Vivienne was 12 years old. The influence of these two events can be seen throughout every era of her designs, and the make-do-and-mend philosophy is evident in the motto "Buy Less, Choose Well, Make it Last", which the brand still promotes to this day. She expertly blended the elements of customisation, tradition and antiretrograde together to create her own unique brand, which is now contrasted by her husband Andrew: *Konshalee*.

LEFT: Vivienne Westwood wearing one of her own designs in 'Buy Less, Choose Well'.

Malcolm McLaren

Westwood met Malcolm McLaren in 1965. An art student and a friend of her younger brother, Gordon, he would go on to become her creative collaborator for almost the next 20 years. Malcolm is an entrepreneur with the punk movement as Vivienne, and their partnership is legendary. He was something of a maverick of marketing strategy and distinction, before such things became commonplace in contemporary fashion. The pair were in a relationship for a time but never seem to have married.

Malcolm was interested in politics and was fascinated by the French Situationists, a creative enclave of writers and artists who wished to eradicate capitalism through acts of everyday life. He was a driving force in bringing politics, provocations, society and culture into Westwood's world. She found him to be charismatic and knowledgeable, but also full of contradictions.

In 1967, they had a son, Joseph Ferdinand Cecil, who would go on to follow in his parents' footsteps and enter the world of fashion. He founded the very successful lingerie company, *Agent Provocateur*.

It was in the early 1970s that McLaren and Westwood began to build their empire. Malcolm, in this period, had left art school and Vivienne was about to quit teaching. The plan had been to sell vintage records together, and there was talk of setting up a stall. But a retail opportunity – via a new

friend – on King's Road was about to arrive.

Tommy Roberts, of the legendary Mr Freedom fashion business, took over the lease of 430 King's Road in 1969. He and his business partner, the fashion entrepreneur Trevor Miller, were well-known for their eclectic and discerning fashion eye which appealed to the glitterati of the 1960s. It was under Miller's control the shop was renamed *Parisian Garage*; the spot was already well-known for fashion.

Vivienne and Malcolm, who were regular on King's Road, ended up leasing the back of 430 King's Road, before taking the whole thing over and rebranding it. It would be known over the coming years as *Let It Beak*, *The Fun To Live*, *The Young To Die* and *Sex and Sublimation*, all of which would encompass the raucous, confrontational and non-conformist nature of McLaren and Westwood. Eventually the shop would come to define the varied-but-defined styles we know as punk today.

LEFT: Malcolm McLaren, partner of Vivienne Westwood, and Vivienne Westwood, 1977.

A Revolutionary is Born

There are few British designers, or brands, that have made quite as much of an impact on the fashion landscape as Vivienne Westwood. A fashion designer of both cult and commercial success (which is a rare combination), she was a punk and a pioneer, a rebel and a provocateur, an activist and a change-maker.

Over the course of a career that spanned half a century, Dame Vivienne Westwood would become synonymous with the British punk scene. Punk is what immediately springs to mind for most when her name is mentioned, along with the King's Road, corsets, platforms, tarran, crinolines, pirate boots, sustainability and climate change awareness. The list goes on. Her shows and interviews have become legendary – she is famous for using fashion as a platform to speak out on the issues she cared most about.

There is no doubt that Westwood's affinity for fashion history has helped her designs stand out. They are often historically informed, yet never to the point that they look odd. Where something shouldn't work, it always did, thanks to Vivienne's ability to balance the old with the modern – she was a genius when it came to style mashups. And the original Vivienne Westwood aesthetic rooted in a DIY approach never fully went away. Her designs feel intrinsically British and perfectly eccentric.

Westwood was the original multi-hyphenate and, in many ways, light years ahead of her time. She has inspired generations of designers that came after her, whether established and successful or aspiring and eager. Fashion critics even noted whiffs of her spirit at the London Fashion Week collections of autumn/winter 2023, which took place in February 2023, after her death. It's no wonder that her name is up there with the likes of Yves Saint Laurent, Christian Lacroix and the late great Karl Lagerfeld.

ABOVE: Vivienne Westwood takes her bow at the spring/summer 2018 London Fashion Week Men's collections, June 2017.

Cartier: The Story Behind the Style

The Beginnings of Cartier

The house of Cartier started with one man, Louis-François Cartier, but it would take a family to make it one of the most recognised and respected jewellers in history.

It was, in fact, Louis-François' father, Pierre Cartier, who set the dynasty in motion, although he could never have imagined the consequences of his actions at the time. Pierre had fought in the Napoleonic wars and spent time locked in the prison ships docked off the harbour at Portsmouth in Britain. When the war ended in 1815, Pierre returned to Paris, destitute and aimless. He would go on to find employment as a watchmaker and have five children with his wife Elisabeth, a watchwoman.

The eldest of the children born into this working-class Parisian family was Louis-François, and when he was barely out of school, his father sent him to work as an apprentice in a jewellery workshop owned by Adolphe Picard on Rue Montorgueil in Paris. It was a tough education – days were long and grueling and order was maintained with a whip – but he stayed and in 1847, at the age of 27, Louis-François bought the business from Picard, renaming it Cartier.

OPPOSITE: Cartier founder, Louis-François Cartier

His makers mark – a symbol hallmark that every piece of Cartier jewellery no matter how small – was his initials, L. C., separated with an arc of letters playing cool, perhaps as a nod to the financial gamble he was taking. Luckily, the risk paid off and the Cartier business thrived and expanded. In 1866, Princess Mathilde, a cousin of Emperor Napoleon III, purchased one of his jewels, and the Cartier name was suddenly whispered among Parisian high-society, even reaching the international elite. Three years later, Louis-François bought Gillon, a Parisian jeweller better known than his own, and renamed his business Cartier Gillon.

Louis-François' son Alfred Cartier took over the family business in 1874, but it was the arrival of his own three sons – the highly ambitious Louis, Pierre and Jacques – that would really shake up the jeweller and initiate its ascendance to the global brand we know today. The brotherly revolution started with Louis, who joined the maison in 1898. A year later he spearheaded the remaining

INVIOUS: Start of the Cartier boutique in Paris in 1898.

OPPOSITE LEFT: An illustration of Louis-François Cartier c.1848.

OPPOSITE RIGHT: Pierre Cartier playing golf in 1890.

of the business, stripping over Gillon to once again be known simply as Cartier. At the same time, the business opened a boutique at 13 rue de la Paix, just a stone's throw from Place Vendôme, the heartland of luxury jewellery in Paris. This venture was funded by an enormous dowry levied through a strategic arranged marriage to Andine-Caroline Worth, granddaughter of world-famous couturier Charles Frederick Worth.

Cartier garnered a reputation for innovation, and the title of jewellers would later live by a motto, 'Never copy, only create'. One of Louis' most successful experiments at the close of the 19th century was to use platinum in place of gold. This precious metal is now widely used by jewellers across the world, but at the time it was purely an industrial metal and thus revolutionary in the jewellery market. The white metal, which, unlike silver, does not tarnish, is highly malleable and allowed Cartier to create delicate, diamond-set jewels inspired by those created by 18th-century French aristocrats, a stark contrast to the heavier, colourful, Romantic Art Nouveau jewels popular at the time. A signature Cartier Guffand style emerged, swirling across platinum stems, necklaces and earrings, that won over well-heeled women, including royals, in Europe and the United States.

Pierre Cartier, the second eldest of the brothers, would be an agitator in his own right, championing the global expansion of the brand's retail empire. He started by opening a Cartier boutique on New Burlington Street in London in 1902, where the brand showcased a new style of geometric, abstract jewels with unusual colour combinations that would lay the foundations for the Art Deco jewellery movement.

The first decade of the 20th century was an important time for Cartier. In 1904, the jeweller received its first royal certificate from King Edward VII of Britain, and soon started to supply many other royal courts including those of Russia, Spain and Siam (now Thailand). In the same year, Louis Cartier created what he believed to be the first ever men's wristwatch for aviator Alberto Santos-Dumont.

Pierre, meanwhile, embarked on a journey to Russia; one that would prove profitable in commissions from its high society, but also as a source of inspiration that would shape Cartier's jewellery designs for years to come.

In 1909, Pierre would focus his wanderlust on America, opening a Cartier boutique on New York's Fifth Avenue; the precursor to its famous flagship store further up the street, the purchase of which he would famously broker a decade later in exchange for a string of pearls. Back in London, his younger brother Jacques stepped in to take over its British branch. That same year, Cartier moved uptown to a prestigious Bond Street address, where it remains to this day.

As Cartier's man in Britain, and, as such, jeweller to King George V, Jacques joined members of the aristocracy on a trip to India for the Delhi Durbar in 1911. It was an event

LEFT: Cartier platinum pendant watch set with diamonds, rubies and a pearl, c.1890-1910.

to commemorate the coronation of the King, with two weeks of festivities, during which King George V and Queen Mary would be proclaimed Emperor and Empress of India. This adventure to a new land would also prove to be a seminal trip for the house of Cartier. Jacques' sociable nature and love of travel would win ground-breaking commissions from India's rich, jewel-loving maharajas and inspire a whole new category of jewellery, pioneered by Cartier and much copied by other companies.

Street Style: Dr. Martens

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

6

the upper and repurposed tyre rubbers to create an air-padded sole. The resulting shoe is equal parts built to last and equal parts built to live in. It's no wonder that punk rockers and hip-hop artists alike have graced thousands of stages in a pair of Dr. Martens over the years - it's a shoe made for those who live out loud. The story of how a purpose-driven product came to define one of today's most exciting lifestyle brands is one that spans a growing connection between clothing and culture. When you combine a timeless product with a chameleon-like ability to mean different things to different people, you get a shoe that is undeniably trend-proof.

ABOVE: A classic pair of Dr. Martens 1460 boots, broken in with wear.

7

NOT FINAL

Who Was Dr. Martens?

Dr. Martens may not be a real person, but Dr. Klaus Maertens certainly was. The brand as we know it today began with him. A doctor in the German Army, he found himself in post-war Munich at the age of 25, nursing a broken foot. The year was 1945, World War II had just ended, but his injury was one he earned from an unfortunate riding accident.

As he was recovering from his injury, he found that the standard issue, leather-soled Schürzenbock lowboots that had been part of the German Army uniform since 1937 actually hurt his feet more than helped them. Unconquering and footless styles were undergoing a similar shift. It had been a little more than a century since the Industrial Revolution had commercialised the footwear industry, allowing for mass production for a craft that was once exclusively handmade. Concrete sidewalks were being made where it came to what was happening in the world of vacuumed soles.

American chemist Charles Goodyear discovered that heating up rubber and adding sulphur made it even more flexible. The vulcanised process had many industrial applications, but it also made it much easier to make durable, rubber-soled shoes. Yet while canvas plimolls and burgeoning sneaker companies like Converse explicitly were meant for athletic pursuits, Maertens saw an opportunity in making a shoe that had the classic, down-toy appeal of a military boot, combined with the comfort and orthopedic benefits of a rubber sole.

OPPOSITE: Dr. Klaus Maertens, creator of the original Dr. Martens boot.

8

NOT FINAL

The first prototype of what would become the Dr. Martens 1460 leather boot took design elements from the German Schürzenbock and set it on top of a unique, air-cushioned sole originally made from heat-treated, repurposed tyre rubber. He made his proof-of-concept using a salvaged cobbler's last and a needle, but it would still take a couple of years before his brand-new shoe business got any proverbial legs behind it.

OPPOSITE: Standard issue German army field boots from World War II that were uncomfortable to Doctor Dr. Martens.

9

Disney Dreamlight Valley - The Official Guide

Official companion to the bestselling game.

- A mere ten days after its release in 2022, Disney Dreamlight Valley had attracted over one million players. As of January 2023, fans had played 76 million hours of Dreamlight Valley.
- Dreamlight Valley was awarded Best Early Access Game by PC Gamer in 2022.
- Dreamlight Valley can be played on Nintendo Switch, PlayStation 4, PlayStation 5, Windows, Xbox One, Xbox Series X/S and macOS. You can also play the Arcade Edition via Apple Arcade.
- Gameloft has released a 2024 Content Roadmap for Disney Dreamlight Valley, outlining exciting updates and additions to the game over the next twelve months. The game will continue to evolve, attracting new players as well as ensuring long-time players' attention is retained.

Disney Dreamlight Valley - The Official Guide

GEMS

Gems are rare minerals that can be sold to earn Star Coins, or used to craft a variety of decorative items from stoves to snow globes. You can gather gems by mining the rock spots around your valley with a pickaxe. Here's a handy guide for every gem, where you can find it and what it sells for.

	
Amethyst	Shiny Amethyst
Location: Forgotten Lands, Forest Heights Sells for: 500 Star Coins	Location: Forgotten Lands, Forest Heights Sells for: 2000 Star Coins

			
Diamond	Shiny Diamond	Emerald	Shiny Emerald
Location: Forgotten Lands Sells for: 600 Star Coins	Location: Forgotten Lands Sells for: 2400 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 325 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 600 Star Coins

			
Aquamarine	Shiny Aquamarine	Citrine	Shiny Citrine
Location: Double Beach, Forest of Valor Sells for: 250 Star Coins	Location: Double Beach, Forest of Valor Sells for: 600 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 300 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 600 Star Coins

		
Garnet	Shiny Garnet	Opal
Location: Pleasant Meadow, Plaza Sells for: 600 Star Coins	Location: Pleasant Meadow, Plaza Sells for: 640 Star Coins	Location: Rarely at any rock mine Sells for: 300 Star Coins

TIP Remember to take a mining companion with you when hunting for gems - you'll get additional drops!

108

			
Peridot	Shiny Peridot	Ruby	Shiny Ruby
Location: Double Beach, Pleasant Meadow Sells for: 200 Star Coins	Location: Double Beach, Pleasant Meadow Sells for: 800 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 300 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 600 Star Coins

			
Sapphire	Shiny Sapphire	Topaz	Shiny Topaz
Location: Sunlit Plateau, Plaza Sells for: 300 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 600 Star Coins	Location: Plaza Sells for: 240 Star Coins	Location: Plaza Sells for: 360 Star Coins

		
Tourmaline	Shiny Tourmaline	Violet Crystal
Location: Forest Heights, Sunlit Plateau, Plaza Sells for: 400 Star Coins	Location: Forest Heights, Sunlit Plateau, Plaza Sells for: 600 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 12 Star Coins

TIP Make sure to mine all rock spots, not just the ones where you can see gems sticking out - a lack of visible gems doesn't mean there are no gems under!

110

MERLIN

Merlin is an all-powerful wizard who's been around since the Middle Ages - no wonder he's so knowledgeable! He's a great source of information and advice, and he's also a little eccentric which makes him endlessly entertaining. He's the first person you'll meet when you begin your adventure and will be there for you every step of the way.

House
The Dreamlight Library is an incredible feat of medieval architecture boasting several astronomical features. Inside, you'll find more books than you can shake a stick at.

Disney Princess: Magical Worlds Search and Find Activity Book

An official Disney search and find activity book featuring the Disney Princesses!

- Features the twelve official Disney Princesses.
- Includes synopsis and character introductions for each film.
- Detailed search and find scenes based on the magical and enchanting worlds of the Disney Princesses.
- Disney Plus has 157.8 million paid subscribers globally as of August 2023 (was 87.6 million in 2022), and 7.14 million paid subscribers in the UK.
- The Disney Centenary celebrations will be happening throughout 2023 and include exclusive experiences, exhibitions, concerts and new products - this will be Disney's biggest ever marketing push.

Disney Fascinating Facts

Over 1,000 real-world facts to entertain all ages!

- Cover: gloss lam.
- Features facts about plants, the oceans, animals, the environment, the night sky, insects, literature, art, theatre, music, fashion, general history, Greek myths and legends, Mayan and Aztec history, Arthurian legend, space, robotics, chemistry, biology, physics, inventions, things that go, toys and games, sport, adventure and exploration, the continents and much more.

Disney Fascinating Facts

NATURE: PLANTS

There are around 75,000 different species of trees on Earth, and amazingly over 100 per cent of them can only be found in a single country! If you want to see the most unique trees in one place, head to Colombia and behold the tree that has the thickest trunk in the world.

Summer means giant sunflowers cropping up all over the place. But did you know that the 'flower' of a sunflower is a pseudanthium, or flower head, and is actually made up of many small flowers?

The Wolffia family of plants, also known as duckweed or watermeal, grow on the top of water and include the smallest flowering plants. Wolffia can be grown from seed, but can also grow itself on a rocky road. The fastest recorded flower took just under 30 hours to produce.

The baobab tree, sometimes known as the tree of life, is found largely in the continent of Africa and Australia. They can be massive in height and circumference, with some species reaching up to 22 metres tall and others 25 metres around!

NATURE: PLANTS

The tallest tree in the world is a coastal redwood in California, known as Hyperion. Coastal redwoods can grow super tall, but Hyperion is the tallest of them all, measuring in at just over 79.5 metres! Experts think it's somewhere between 600 and 800 years old!

Some fungi communicate via a system of underground threads called mycelium, which can connect them across several kilometres. If one of them is being eaten, it will send a signal through the mycelium to warn others and allow them to decompose a neighbour's chemical.

Everybody knows the smell of freshly cut grass, however, it's actually a distress call that the grass is giving off. When cut, the grass releases phenolamines that some scientists believe is a call to help signal the attack!

The jatropha tree, also known as the Brazilian goose tree, doesn't have fruit dangling from branches like apples and lemons. Instead, the fruit grows directly from the trunk of the tree, so it looks like it's growing in a janky hole!

You can tell the age of most trees when they're chopped down by counting the number of rings the trunk has, but it can also show how well the tree has grown each year. The ring will be thicker if you had an abundance of resources, or thinner when there haven't been as many.

We all know that trees need sunlight and water to survive, but aren't they much water do they need? Some oak trees can drink up to 800 litres of water a day, but that's nothing compared to the giant sequoia, which will drink up to four times that!

SCIENCE

It doesn't matter whether scientists are looking inside your body or to the far reaches of the universe, incredible discoveries are being made every day in the world of science. Now it's your turn to explore amazing facts from the laws of robotics and dwarf planets to the atoms that make up the Earth and everything in the cosmos!

SCIENCE: SPACE

Our solar system has eight planets and one space in 2007. Since then, thousands of comets have been discovered, but only a few have been named. Astronomers have captured our planets and travelled to Earth's moon and nearby stars, spacewalk may take explorers to Mars and beyond.

The first spacewalk, Spunk 1, was launched into space in 1924. Since then, thousands of comets have been discovered, but only a few have been named. Astronomers have captured our planets and travelled to Earth's moon and nearby stars, spacewalk may take explorers to Mars and beyond.

Some of our solar system's planets are pretty cool. Whereas Earth only has one moon, Saturn has 83 natural satellites that are bigger than Mercury!

Venus rotates on its axis so slowly that one day there is equivalent to 283 days on Earth. However, it only takes Venus 225 Earth days to orbit the sun, meaning the Venusian day is longer than a Venusian year!

Earth isn't the only planet that has volcanoes! In fact, if you travel just one planet along to Mars, you'll find a volcano called Olympus Mons, which is over 600 kilometres wide and 21 kilometres tall. It's almost three times the height of Mount Everest and scientists think it could still be active!

Humans have barely scratched the surface of outer space. To the future, probes and human accompanied expeditions will continue to explore. Technologies based on Earth, such as telescopes and space agencies that sense wavelengths invisible to the human eye, will also help scientists learn about our universe.

Enochian, one of Saturn's moons, is dotted with ice geysers! These geysers spray water vapour from deep beneath the moon's surface. The upper floors naturally when it leaves the ground. The frozen crystals block out Enochian's atmosphere, when they form an icy ring. The possibility? Fossilised water would be proof!

Space is completely silent! Sound travels in vibrations in the air, but space is a bit of a vacuum - it has no air or atmosphere! Astronauts have to use radio waves to communicate so that they can talk in space.

Space is completely silent! Sound travels in vibrations in the air, but space is a bit of a vacuum - it has no air or atmosphere! Astronauts have to use radio waves to communicate so that they can talk in space.

SCIENCE: SPACE

Between Jupiter and Mars, there's a huge field of asteroids known as the asteroid belt. It contains millions of floating asteroids. The largest object, Ceres, is 950 kilometres wide. It's so big that it's classified as a dwarf planet, just like Pluto!

Jupiter is a composite of the same elements as our sun - hydrogen and helium - so it has all the ingredients to be a star. However, even though it's the biggest planet in our solar system, it would need to be at least 80 times bigger to start burning!

Our solar system has eight planets, but it's also home to the dwarf planets Eris, Haumea, Makemake, Ceres and Pluto as well as several thousand comets. They don't orbit the sun like planets, but they do orbit the sun.

Universal spacewalks, sometimes known as probes, have visited every planet in our solar system. The first probe to visit any planet beyond Earth from space was Venus 1967, which further ahead, Cassini orbited Saturn for over a decade!

In the observable universe - that's all of it - there are more stars than grains of sand on all the beaches on Earth. It's estimated that a million Earths could fit into the space that the sun occupies!

NATURE

Whether you're looking at the creepy-crawly beneath your feet, or the starry sky above you, you're surrounded by the amazing natural world. Read on to discover incredible trivia about everything from mosquitoes and polar bears to talking mushrooms and bright stars millions of miles away!

NATURE: PLANTS

As well as being delicious, strawberries are one of the only fruits that grow their seeds on the outside - sometimes up to 200 of them! In fact, they're technically not seeds, but something called an achene, which is an individual fruit that holds a seed!

The biggest flower in the world is the *Rafflesia arnoldii*. It can grow to over 1 metre wide. It doesn't have its own root system, so latches onto other plants to grow. Don't sniff this flower though - its smell has been likened to rotting meat!

Pitcher plants have jug-shaped leaves and produce a nectar that entices insects and other small creatures inside. The leaves of the pitcher plant close once an animal falls in, and chemicals called enzymes digest the creature so the plant can use the nutrients!

No plant grows faster than bamboo. A Chinese bamboo variety called moso can grow almost a metre in a single day! It doesn't waste its energy growing any wider, so it can concentrate on shooting straight up.

Some animals only eat plants, but sometimes the plants bite back! The Venus fly trap has hinged leaves that look like a toothy mouth. If an insect touches the hairs inside the leaves, they snap shut so the insect can't escape. It can take the Venus fly trap up to five days to digest the trapped insect!

Disney Brain Games: Maths

Puzzle 28
EIGHT QUEENS

Mr. Gao has a chess puzzle for you to solve! In chess, the queen can move any number of spaces in a straight line – horizontally, vertically or diagonally. **Place eight queens on the chess board so that no queens is in the same line as any other queen. How many different ways can you find?**

Puzzle 29
ARCHERY PRACTICE

Merida's practicing her archery skills. To prove what a great archer she is, Merida must hit one number in the outer ring, one number in the inner ring and one number in the centre that add up to each of the three numbers below.

Can you figure out which three numbers she must hit to make each of the target scores?

Puzzle 39
MICKEY'S MAGICAL MIX UP!

The Sorcerer's Apprentice has accidentally jumbled all of his master's Plus and Minus potions over!

Can you put the pluses and minuses back in the right places so that these sums work forwards, backwards, up and down?

Puzzle 40
...AND THE KITCHEN SINK

Every time Arthur tries to clean one of Merlin's dirty dishes, the number of dirty dishes doubles. He started with one dirty dish. Arthur has tried to clean 10 dirty dishes. **How many dirty dishes are there now?**

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10

Puzzle 49
SOLVE THE RIDDLE OF THE CAVE!

To enter the Cave of Wonders, Aladdin must find the missing numbers in this puzzle.

Each square needs to be filled with a number between 1 and 9, but you can use numbers more than once. The functions surrounded by stars are carried out first.

So:

$$2 \star 3 + 6 = 12$$

$$2 \times 3 \star 6 = 18$$

Puzzle 23
SHY COCONUTS

Some Kakamora have hidden themselves among Moana's coconut harvest. You can tell which coconuts are Kakamora in disguise, because the numbers they have stuck to them have made the questions they're hiding in incorrect.

Make the sums correct by removing 1 digit from each question.

$$32 + 70 = 73$$

$$42 + 35 = 37$$

$$41 - 60 = 35$$

$$15 - 13 = 12$$

Disney Brain Games

100 exciting Disney puzzles to exercise young minds!

- Over 37,000 copies sold (as of August 2022)
- 100 puzzles across themes of word, logic, maths/number, memory and more
- Join your favourite Disney characters such as Moana, Anna and Elsa, Dory, Miguel, Belle, Aladdin, Mike and Sulley and many more as you complete the challenges.
- Features characters from across Disney and Pixar, including heroes, villains and Princesses!
- With varied and challenging puzzles with different levels of difficulty, there's enough puzzles to keep bright minds entertained.

Disney Brain Games

Puzzle 1
THE MISSING NOTE

Hector and Miguel share a passion for music, so they spend a lot of time singing and playing music together. They are rehearsing a song, but have encountered a problem – the song is missing the last note.

Find the path that connects the two singers, and discover which note is missing!

Cross off the notes in this list as you go:

C D E F G A B

The missing note is: _____

Puzzle 2
HERCULES AND THE HYDRA

Hercules is battling the terrible monster Hydra in the cave where it dwells. At the start of the battle, Hydra has only one head, but each time Hercules cuts a head off, three grow in its place. He has already cut off twelve heads.

How many heads does Hydra have now?

Heads in total: _____

Use the space if you need to work it out on paper.

Puzzle 3
I'M LATE, I'M LATE!

It's always "late" for the White Rabbit, and he's always checking his giant watch! Right now, it's 5:00 pm. The White Rabbit's next appointment is in 100 hours' time, but he is already worried about being late!

1. How many days is it until his appointment? _____

2. What time will it be at? _____

Use the space if you need to work it out on paper.

Puzzle 4
MEMORY SEQUENCE

During a test, Anger got into a fight with Fear, and that messed up Riley's memories. Luckily, Joy has a solution!

Start from memory 0 and plot the right path. Remember: each memory is equal to the sum of the two previous ones!

Use the space if you need to work it out on paper.

START

Puzzle 5
THE GREAT RUG RACE

Woody has come up with a great idea to have fun with his toy friends: a rug race! But just after they cross the finish line, the toys hear Bonnie and they freeze.

Can you work out the order they finished in?

Bear in mind that:

Woody finished two places before Buzz	Hamm finished right after Woody	Buzz finished two places before Rex	Rex finished last
---------------------------------------	---------------------------------	-------------------------------------	-------------------

Use this space if you need to work it out on paper.

Marvel Brain Games

100 exciting Marvel puzzles to exercise young minds!

- 100 puzzles across themes of word, logic, maths/number, memory and more.
- Join your favourite Marvel characters such as Ant-Man, Shuri, Captain America and many more as you complete the challenges.
- Features characters from across Marvel comics including heroes, villains and agents!
- With varied and challenging puzzles with different levels of difficulty, there's enough puzzles to keep bright minds entertained.
- Marvel has 4 of the 10 biggest movies of all time (*Avengers*, *Avengers Endgame*, *Avengers Infinity War*, *Spider-Man No Way Home*).

Marvel Brain Games

**PUZZLE 1
SPEED TEST**

Using the clues below, can you work out – in 30 seconds or less – the identities of these four comic characters?

- Red – Twin brother – Telekinetic
- Artificial Intelligence – Robot – Hank Pym
- Radiation – Web – Peter Parker
- Spy – S.H.I.E.L.D. – Black

**PUZZLE 2
ANT-MAZE**

To escape from prison, Scott Lang needs to activate his suit and reduce himself to the size of an ant. He still needs to find the way out of the maze though... can you help him plot a path to freedom?

**PUZZLE 3
WHO AM I?**

One of Black Panther's enourage has gone missing. Can you work out who it is from the letter clues below? We've filled in a few letters to get you started.

Can you work out who it is from the letter clues below?

The right letter in the right place looks like this: **O** The right letter in the wrong place looks like this: **R**

And if the letter is not in the word it looks like this: **A**

G R A S P
P I V O T
C H A S M
P O U N D
S H A R P

**PUZZLE 4
IN THE SHADOWS**

Only one of these shadows is an exact match for Captain America. But which one is it?

**PUZZLE 5
LAB WORK**

Bruce Banner is hard at work on a formula in the lab. Can you help him calculate the final formula by filling in all the blanks? The number in each circle must be the sum of the two numbers below.

Example:

```

    33
   / \
  17 16
 /   \
8     9   7
/ \   / \
5 3 6 1
    
```

87

Marvel: The Science of Super Heroes

Real world science behind superhuman powers.

- The science behind Marvel super heroes' and villains' powers is explained in this fun, informative and accessible book for kids aged 8+
- Super heroes and villains in the book include: Spider-Man, Miles Morales, Moon Girl, Iron Man, Captain America, Hulk, Black Panther, Ant-Man, Fantastic Four, X-Men, Professor X, Wolverine, Magneto, Thor, Guardians of the Galaxy, Captain Marvel, Thanos, Doctor Strange, Scarlet Witch
- Cover features matt lam, spot UV and foil
- Disney Plus has 87.6 million paid subscribers globally, with an additional 50.1 million paid subscribers for Disney Plus Hotstar. In the UK, Disney Plus has 7.5 million subscribers, which is up 21% from 2021.
- Features a foreword by Marvel comics writer Ryan North.

Marvel: The Science of Super Heroes

SPIDER-MAN: ALLIES

Spider-Man has teamed up with countless other heroes in the comic fighting center, but there are some that he counts as friends.

DAVEDEVIL
A colorful and mischievous character, Dave Devil is the only other superhero to have been named after a devil. He has a red and black costume and a mischievous personality. He is often seen as a troublemaker, but he is also a loyal friend to Spider-Man.

IN THE REAL WORLD
The character of Dave Devil is a nod to the real-world concept of a devil. In many cultures, devils are seen as mischievous and troublemaking creatures. They are often depicted as having horns and horns, and they are often associated with fire and lightning.

BLACK CAT
Black Cat is a character who has a long history with Spider-Man. She is a thief and a cat lover. She is often seen as a villain, but she has also been a hero. She is a complex character who is often caught between her criminal instincts and her love for Spider-Man.

IN THE REAL WORLD
Black Cat is a character who is often associated with cats. Cats are known for their agility and their ability to climb. This is reflected in Black Cat's character, who is a skilled thief and acrobat.

SPIDER-WOMAN
Spider-Woman is a character who has a long history with Spider-Man. She is a superhero who has the same powers as Spider-Man. She is often seen as a hero, but she has also been a villain. She is a complex character who is often caught between her superhero duties and her personal life.

IN THE REAL WORLD
Spider-Woman is a character who is often associated with spiders. Spiders are known for their ability to spin webs and their agility. This is reflected in Spider-Woman's character, who is a skilled acrobat and fighter.

THE AVENGERS: CAPTAIN AMERICA

Several heroes have taken the mantle of Captain America, serving as a symbol of liberty and a beacon of freedom. Captain America is more than one person, he is a symbol of standing up for what is right. Steve Rogers started the legacy of Captain America during the darkest days of World War II, but other heroes have picked up the shield.

SAW WILSON'S WINGS
The original wings used by Steve Rogers were designed by Bob Fawcett and made of lightweight aluminum. They were used to transport Rogers to the front lines during World War II. The wings were made of aluminum and were attached to a harness that was worn around the waist.

IN THE REAL WORLD
The original wings used by Steve Rogers were made of aluminum. Aluminum is a lightweight metal that is often used in aircraft. It is also a strong metal that can withstand a lot of stress.

THE WINTER SOLDIER'S SAM
James Barnes, Steve Rogers' best friend, was transformed into the Winter Soldier by the Red Room. He was given a cybernetic brain and enhanced strength. He is a complex character who is often caught between his loyalty to the military and his desire for redemption.

IN THE REAL WORLD
The Winter Soldier's brain is a complex piece of technology. It is made of a material called cyborgium, which is a combination of organic and synthetic materials. It is designed to be more powerful than a human brain.

CAPTAIN AMERICA'S SHIELD
Captain America's shield is a symbol of his heroism. It is made of vibranium, a rare metal that is stronger than steel. It is also a work of art, designed by the artist Jack Kirby. The shield is often used as a weapon, but it is also a symbol of hope and justice.

IN THE REAL WORLD
The shield is made of vibranium, a rare metal that is stronger than steel. It is also a work of art, designed by the artist Jack Kirby. The shield is often used as a weapon, but it is also a symbol of hope and justice.

THE FANTASTIC FOUR: POWERS

The Fantastic Four get their powers when Reed Richards took the team on a mission into space where they were blasted by cosmic rays, changing them forever. They are a team of explorers, adventurers and heroes who have saved the world countless times.

NEED INCHES - MISTER FANTASTIC
Mister Fantastic is one of Earth's greatest scientists, and he has the ability to stretch his body to any size. He is often used as a hero, but he has also been a villain. He is a complex character who is often caught between his scientific curiosity and his sense of responsibility.

IN THE REAL WORLD
Mister Fantastic's powers are based on the real-world concept of elasticity. Elasticity is the ability of a material to return to its original shape after being stretched or compressed.

COULD YOU STRETCH LIKE MISTER FANTASTIC?
Your body can stretch over the course of a day, but only very slightly. You are taller when you wake up in the morning, and you may be a few inches taller by the end of the day, but you haven't stretched. Throughout the day, Earth's gravity pulls your body down, and your body naturally compensates for this by growing, making you a few inches taller.

SUE STORM: INVISIBLE WOMAN
Sue Storm is a character who has a long history with the Fantastic Four. She is a superhero who has the ability to become invisible. She is often seen as a hero, but she has also been a villain. She is a complex character who is often caught between her superhero duties and her personal life.

IN THE REAL WORLD
Sue Storm's powers are based on the real-world concept of invisibility. Invisibility is the ability of an object to become invisible to the human eye. This is often achieved through the use of special materials or technology.

COUSIN BAY
Cousin Ben is a character who has a long history with the Fantastic Four. He is a superhero who has the ability to fly. He is often seen as a hero, but he has also been a villain. He is a complex character who is often caught between his superhero duties and his personal life.

IN THE REAL WORLD
Cousin Ben's powers are based on the real-world concept of flight. Flight is the ability of an object to move through the air without being supported by a solid surface. This is often achieved through the use of wings or other means.

SPIDER-MAN

The science behind Spider-Man is very interesting. I like him, but I would definitely NOT have named myself after an arachnid. Also, that's not how I would've made those webs, but I like what he did there. It must be some type of polymer. Cool. I've met more than one spider-guy, but I'm not sure how many there are.

- HOW DID SPIDER-MAN GET HIS POWERS?
- WHERE DOES SPIDER-MAN GET HIS WEBS FROM?
- WHAT GADGETS DOES SPIDER-MAN HAVE?
- DO THE DIFFERENT SPIDER-MEN HAVE DIFFERENT POWERS?
- HOW DO DOCTOR OCTOPUSS ARMS WORK?
- CAN THE VULTURE REALLY FLY?

Star Wars Brain Games

PUZZLE 10 BINARY BAFFLER

Luke Skywalker needs to fix a battered old astromech. The binary start-up sequence is incomplete – can you help him fill in the blanks to get the droid working again?

You must place three '0's and three '1's into each row and column, but there cannot be more than two '0's or two '1's in sequence in any row or column.

			1	1
0		0	1	0
1	1		1	0
1	1			

PUZZLE 11 JAWA JUNK

The Jawas have found a new droid while scavenging on the desert planet Tatooine, but the identification panels have been mixed up. Each set of four panels has been rearranged – but not rotated. Can you work out what two-character identification code was originally displayed on the panels?

PUZZLE 43 MIND CONNECTION

Qui-Gon will help you learn to see with the Force, by changing 'MIND' into 'SEES' in just four steps. At each step you should change just one letter to make a new word, without rearranging any of the letters. For example, you could start by changing MIND to MINE (though that will lead you down the wrong path.)

PUZZLE 44 TIE FIGHTER SHOOT OUT

Rey and Finn are being shot at by TIE fighters and must find their way to a vehicle to escape. Answer the sums and follow the correct answers to find out which vehicle they steal.

START		2=8	
10	12	11=4	5=7
7	13	10=3	8x5
12	7	24	5
4x3	9x2	5=3	6+8

8 18 2 14

PUZZLE 75 FOLLOW THE PATH

Using the letters in order from the word EMPIRE, follow the correct path to find your way through the maze.

PUZZLE 76 TANGLED WIRES

The door controls have been destroyed! Connect the right wires so the Mandalorian, Din Djarin, and Grogu can escape! But be warned – the door is guarded by a noisy gatekeeper droid. Avoid it at all costs!

Look at the tangle of cables and figure out which button to push to open the door and which turns off the lights.

PUZZLE 9 SHADOW MATCH

The galaxy is full of heroes and villains, including the daring Resistance pilot Poe Dameron and scavenger-turned-fugitive Rey. Match the character's shadows to their names.

1. Rey
2. Stormtrooper
3. Poe Dameron
4. BB-8
5. Captain Phasma
6. Chewbacca
7. Kylo Ren
8. Finn

A collection of more than 100 *Star Wars*-themed brain-training puzzles and exercises to keep your mind as sharp as a Jedi's.

- 100+ fascinating and devious logic problems and brain training exercises, with a Jedi theme
- Test yourself against three levels of complexity, from Padawan to Jedi Knight to Jedi Master
- A perfect gift for adult *Star Wars* fans who have enjoyed titles such as *Murdle*

Star Wars: Jedi Mind Training

PUZZLE 03 PADAWAN

UNEQUAL

Inequality, greater, and lesser are concepts that are all too often encountered in the universe. They are of interest for the Jedi, who do not deal in absolutes and who strive for knowledge over ignorance. Bigger is not always better; smaller is not always weaker.

The number square must be fully completed so that each number appears once only in each row and column. In addition, each greater than (>) or smaller than (<) symbol must be correct.

Starting from square 1, move any number of squares in the direction of the arrow. Then move any number of squares in the direction of the arrow to the square you end up in, and so forth. Each square in the grid must be visited once only, and you must end in square 16.

NOT FINAL

PUZZLE 03 PADAWAN

LOGICAL DEDUCTION

Han Solo's blaster pistol has been stolen in the Mos Eisley Cantina, and you have to work out who did it. There are three suspects.

- Greedo: You that know him and Han simply don't get on.
- Dr Cornelius Evazan: There's something very unpleasant about this guy.
- Luke Skywalker: You never know who your friends are, do you?

Each suspect was found holding another item. And there are three places the theft could have happened:

- A light Saber
- A Moo horn
- A glass of Blue Milk
- Bandstand
- Booth
- Bar

There are five clues:

- Greedo trusted the suspect who used a light Saber.
- Dr Cornelius Evazan was holding a Moo horn when you saw him.
- A glass of Blue Milk was not found in the booth.
- Luke was spotted hiding under the bar.
- The blaster was eventually found in the bandstand.

Use the clues to fill in the grid opposite and log what you know, then use logical deduction to work out what you don't!

PUZZLE 03 PADAWAN

BALANCE: DARK SIDE/LIGHT SIDE

For there to be peace, there should be balance. A Jedi will seek balance in everyday life, and will learn to concentrate and feel their way as different elements seek to dominate; order must be restored, balance must prevail.

In this puzzle, each row and column must contain the same number of dark side tiles and light side tiles, but care must be taken, for neither may have more than two next to each other, vertically or horizontally. No row may be identical in sequence to any other row; the same rule applies to columns, which must also all be unique.

PUZZLE 04 PADAWAN

PATTERN RECOGNITION

Allow your inner calm to enhance your focus and clarity of thought. First look at the pattern, looking for intricacies, repetitions, and any variations that may be apparent. Now think of the flow, noticing how one colour becomes another. Let your intuition guide you.

Which of the blocks a, b, c, d, e, f completes the sequence in line 3?
