Paper World: Human Body

A paper-cut book about the body

- Vibrant paper-cut artwork by award-winning British artist Gail Armstrong
- Deep die-cuts and integrated flaps on every spread provide a unique interactive look at the human body
- A fact-packed text reveals fascinating facts about the human body
- Striking cover design with a large die-cut through the cover and title page
- The Paper World series has sold over 100,000 copies worldwide
- Book 4 Paper World: Oceans coming 2024
- CONTENTS: Organs & Systems; Skeleton & Muscles; Heart & Lungs; Digestive System; Digestive Organs; The Senses; The Brain; Reproductive System; Growth of a Baby; Glossary
- Fact-checked by Dr Jennifer Paxton of the University of Edinburgh

Paper World: Human Body

Pub Date	16/02/2023
Pub Price	£16.99
ISBN	9781800782365
H x W	330 x 225mm
Binding	Hardback

Paper World: Ocean

A one-of-a-kind paper-cut book all about our planet's oceans

- The *Paper World* series has sold over 100,000 copies worldwide (as of July 2022)
- Contents: Water World; The Shore; Mangroves; Kelp Forest; Coral Reef; Ocean Zones; Ocean Depths; Polar Waters; Tides and Waves; Humans and the Ocean
- Vibrant paper-cut artwork by award-winning British artist Gail Armstrong
- Deep die-cuts and integrated flaps on every spread, with an incredible double-gatefold for the coral reef
- A fact-packed text reveals fascinating facts about the ocean - fact-checked by marine biologist Dr Helen Scales
- Striking cover design with a large die-cut through the cover and title page

Up in the Canopy

Explore the jungle layer by layer with a huge fold-out surprise at the end.

- James Aldred's book *The Goshawk Summer* won the 2022 James Cropper Wainwright Prize for Nature Writing.
- Written from the perspective of real-life Emmy-nominated cameraman and explorer, James Aldred
- Stunningly illustrated - with artwork as rich and dense as the rainforest itself
- Huge fold-out tree at the back of the book, which readers can pore over.
- Matt lam and spot UV finishes.

A stunningly illustrated tribute for train lovers of all ages, celebrating the ingenuity of trains past, present and future.

- Sample contents: The First Railways; Steam Locomotions; The Ffestiniog Railway; The Orient Express; Freight Trains; The Baikonur Cosmodrome; Mail by Rail; The California Zephyr; Mountain Railways; The Darjeeling Himalayan Railway; Trams; Sky Lines; Railways At War; The Princess Christian; High-speed Rail; The Shinkansen
- Beautiful artwork by multi award-winning artist Ryo Takemasa
- Stunning journey through the history of locomotives, suitable for all ages
- Expertly written by railway historian, Alastair Steele

Locomotion

THE FIRST RAILWAYS

Today, railways are commonplace in many parts of the world. They snake around our coastlines, zip across our countryside and transport goods and millions of passengers every single day. It is strange to think that they have only been around as we know them for about two hundred years.

The first steam engines were used in British mines during the 17th century to pump water. It wasn't long before engineers tried using steam power to propel vehicles, and in 1802 the inventor Richard Trevithick built the very first working steam locomotive.

ELECTRIC LOCOMOTIVES

The first electric train was tested as far back as 1837. Unlike steam trains, electric locomotives do not carry fuel on-board. Instead, they are powered by electricity which can be supplied from overhead lines, a third rail or in storage such as batteries. Because electric trains can be powered by renewable energy sources, they are considered less polluting than steam or diesel trains.

The first electric passenger train was presented by Werner von Siemens at an exhibition in Berlin in 1879. Consisting of a small locomotive and three cars, it reached a speed of just 13km/h.

The *ETR 200* is a record-breaking electric passenger train. It is widely considered one of the first ever high-speed trains and was put into service in 1936. In 1939, it broke the speed record for trains by reaching just over 201km/h.

The ICE (InterCity Express) is one of Germany's most successful electric trains. The third generation ICE 3, can reach speeds of 300km/h. Since 2018, it has run on entirely **renewable energy** sources.

THE GAUGE

STEAM LOCOMOTIVES

Once the possibility of steam-powered engines had been realized, a whole host of locomotives were tried and tested around the world. Some proved too heavy, others too unreliable and some were even dangerous, but the arrival of one revolutionary design changed the course of history. Hatched, designed by engineer Robert Stephenson (George Stephenson's son – see page 8) was to provide the principle of design for the vast majority of steam locomotives that followed.

DIESEL LOCOMOTIVES

In a diesel locomotive, the power comes from an engine that burns diesel oil. While a steam locomotive needed two people to crew it and hours to attain the right steam pressure, a diesel locomotive could simply be switched on and driven away, making them much easier and much cheaper to run. Rudolf Diesel patented his first diesel engine in 1898, but it wasn't until around 1912 that they were first used in a locomotive.

The famous DRG Class SVT 877 *Hamburg Flyer*, often referred to as the 'Flying Hamburger', was first put into service in 1933. Its smooth, rounded shape was influenced by Zeppelin airships allowing for minimal air resistance.

The *De10c*, built in 1956, was considered the most powerful diesel locomotive in the world at that time.

The *InterCity 125* is one of the most successful diesel trains of all time. So named because it was designed to cruise at 125 mph (about 201 km/h) when in service, it also holds the all-time speed record for diesel trains of 238 km/h, which it reached in 1987.

Automotive celebrates the ingenuity and usability of cars, trucks and motorbikes past, present and future.

- Sample contents: Steam and Electric Automobiles, Early Engines, Monte Carlo Rally, Mass Production, Motorways, Motorbikes, Isle of Man TT, Daytona 500, Concept Cars, History of Formula One, Iconic Bridges, Trucks and Road Trains, Monster Truck Races, Hot Rods, Drag Races, Special Cars, Cars in War, The Future of the Automobile
- The follow-up title to the stunning *Locomotive*
- Perfect for car lovers of all ages
- Super cool artwork by award-winning artist Ryo Takemasa

SAFETY FIRST

A single piece of history was made in 1993 when an Irish woman called Mary Ward became the first person to test an automobile. While riding in an experimental quadricycle, safety-driven car, she fell out and was killed. Three years, designers have tried to make cars safer and safer to drive. Here are just some of the safety features found on modern automobiles.

Many modern cars come with air bags located throughout the interior. Safety engineers test them and find that they function properly in the event of an accident and in a crash with another vehicle.

Other vehicles have air bags just for passengers in the passenger compartment. They can be turned off if the car has a child safety seat in the back.

Drivers in the front of the car wear the seat belt and if they don't, vehicles have an automatic system called a **passive restraint** warning that the driver is not wearing the seat belt and should wear it.

Roll-over protection stops the vehicle from tipping or sliding if the driver gets into an accident. Unfortunately, because cars are so small, they can't have a roll-over protection system between the wheels, which is why roll-over protection systems are not on all cars.

Side-impact or so-called safety bars are not placed across the sides and passengers' feet being hit. They're usually placed on the outside of the car.

Side-impact bars are located behind the B-pillars (B201).

[illegible][illegible]

STEAM AND ELECTRIC AUTOMOBILES

Since their invention in the early 1800s, steam locomotives revolutionised the way people and freight were transported. However, some travellers wanted a more convenient vehicle that they didn't have to share and could use whenever they wanted. Some engineers created small, steam-powered road vehicles, while others decided to try electric battery automobiles. Many designs were created, but by the early 20th century it was clear that the internal combustion engine was going to be king of the road.

The first steam-powered road vehicle was designed by English inventor Richard Trevithick. Using a high-pressure boiler for more power, his Puffing Devil set off with six passengers in 1801, at a speed described by one witness as "faster than I could walk" (about 6km/h). Unfortunately, only a few days after this historic journey, the boiler caught fire and Puffing Devil was destroyed.

Electric cars were very popular in Europe and the USA from the late 1800s to the early 1900s. They were quieter and smoother, didn't produce smoke and were easier to use than steam-powered automobiles. One of the first successful models was the Flockton Elektrowagen. Designed in Germany in 1888, its 1hp electric motor drove the back wheels and could reach around 16km/h.

One of the last and most advanced steam automobiles was the Doble steam car. Designed in 1924, the Doble Model E only required 30 seconds to boil the water needed to drive the engine, was easy to control and could reach speeds as high as 120km/h.

The top illustration shows a large, black steam-powered vehicle with a tall chimney emitting smoke. Two men in period clothing are standing on the platform. The middle illustration shows a small, open-top electric car with two men seated inside. The bottom illustration shows a yellow steam-powered car with a large front grille and headlights.

Three vintage cars from the early 20th century are shown against a yellow background. The top car is a dark-colored open-top touring car with large spoked wheels, carrying four people in period clothing. The middle car is a light blue open-top car with spoked wheels, carrying two people. The bottom car is a white open-top car with a prominent black grille and spoked wheels, also carrying two people. The cars are arranged vertically, showing a progression of early 20th-century automotive design.

There are Mammals Everywhere

An illustrated introduction to mammals.

- A combined quantity of over 100,000 copies worldwide (as of July 2022) has sold for Britta's *There Are...* series
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally
- Contents: There are mammals everywhere; It's a mammal! So what is that that?; Mammals have been around for ages; Where do mammals live?; The savannah; Staying alive; Feeding; Moving (elephant spotlight spread); Mammal parents; Mali elephants; Birds and people
- The colourful exploration of mammals follows on from Britta Teckentrup's *There are Fish Everywhere*, *There are Bugs Everywhere*, *There are Reptiles Everywhere* and *There are Birds Everywhere*.

There are Birds Everywhere

Explore the world of birds in a sumptuously illustrated non-fiction book

- Contents includes bird anatomy, habitats, flight, feeding, hunting, courtship, migration, and the relationship between birds and humans.
- Britta's *There Are...* series has sold a combined quantity of over 100,000 copies worldwide (as of July 2022)
- Lush and colourful illustrations to immerse young readers in the natural world
- Lively text and use of search-and-find element make these books informative and interactive.
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally

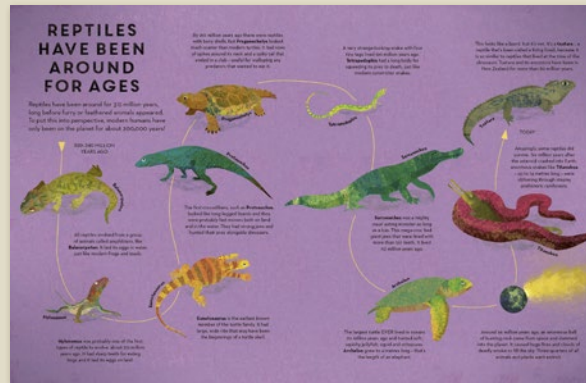

There are Reptiles Everywhere

An illustrated introduction to reptiles, now in paperback.

- The colourful exploration of reptiles follows on from Britta Teckentrup's *There are Fish Everywhere* and *There are Bugs Everywhere*
- Lush and colourful illustrations to immerse young readers in the natural world
- Lively text and use of search-and-find element make these books informative and interactive.
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally

The Incredible Pop-up Mummy

A pop-up guide to Ancient Egyptian mummies

- Incredible paper-engineering - with flaps to lift on every page and three complex multi-layered pop-ups (The Great Pyramid; Tutankhamun's Death Mask; Tutankhamun's Tomb)
- A beautiful non-fiction novelty title to mark the centenary of Howard Carter's opening the tomb of Tutankhamun.
- Made in consultation with expert Egyptologist Stephanie Boonstra, Collections Manager at The Egypt Exploration Society and Managing Editor of the Journal of Egyptian Archaeology.
- Illustrated by award-winning Vietnamese illustration duo Quang and Lien
- Cover finish: gold foil + spot UV

The World's First Rollercoaster

Amazing inventions stories in comic-book form by Blue Peter Award-winner Mike Barfield.

- An irresistible way into science and technology with a dash of history from the brilliant Mike Barfield, author of *A Day in the Life of a Poo, a Gnu and You*, winner of the 2021 Blue Peter Award for a Book With Facts. Mike's books have sold in over 40 territories.
- Featuring the greatest inventions in architecture, travel, the home, food, fashion, toys, sports, technology and more, this book is packed with facts for curious minds. Includes tips on sending in a patent and profiles of young inventors alongside greats such as Diebedo Kere, Bertha Benz, Percy Spencer, Momofuku Ando, Kano Jigoro and Jawed Karim.

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Ice Cream 14
"Creamy from dessert"

Bicycle 15
"Freedom on two wheels"

Camera 24
"Click cheese"

High-Speed Train 25
"At-speed worldwide"

Wind Turbine 34
"Harnessing the power of wind"

Helicopter 35
"A whirling way to fly"

Easy Ice Cream
This is a simple recipe for making ice cream at home. It involves mixing cream, sugar, and vanilla, then churning it in an ice cream maker. The recipe is easy to follow and suitable for children.

Perilous Penny-Farthing
The penny-farthing was a type of bicycle that was popular in the late 19th century. It had a large front wheel and a much smaller rear wheel. It was called 'perilous' because it was difficult to ride and could be dangerous.

Developed to Perfection
This section discusses the evolution of the camera from its early days to modern digital cameras. It covers the invention of photography and how cameras have become more sophisticated over time.

Marvelous Maglevs
Maglev trains are a type of train that uses magnetic levitation to travel. They are called 'maglevs' and are known for being very fast and smooth. This section explains how they work and their benefits.

Green Energy
This section focuses on wind energy and how wind turbines generate electricity. It discusses the benefits of renewable energy and how wind power is becoming a more significant part of our energy supply.

Versatile VTOL
Vertical Take-Off and Landing (VTOL) aircraft are a type of plane that can take off and land vertically. They are very versatile and can be used in a variety of ways, including for military and civilian purposes.

Wheel 17
"The revolutionary design that makes the world go round"

Internet 18
"The world at your fingertips"

Potter's Wheel
The potter's wheel is a tool used by potters to shape clay into pots and other vessels. It has been used for thousands of years and is still a vital part of pottery-making today.

World Wide Web
The World Wide Web (WWW) is a system of interlinked hypertext documents that can be accessed via the Internet. It is the foundation of the modern digital age and has revolutionized the way we communicate and access information.
