Discover the rich history, vibrant culture and unique identity of each nation through its flag!

- A vibrant exploration of our world's marvellous flags! Take a fact-filled and fun journey across the contents to discover all that lies in our national flags.
- Content is split into 5 chapters based on the continents: Europe, Asia, the Americas, Africa and Oceania. Each section features a chapter opener, 4-5 spreads looking at specific flags in detail, and a theme spread which looks at the world more broadly.
- Feature spreads look at an individual flag's history, symbolism and meaning, and also include 2 or more other flags which share a similarity in some way, whether that be a symbol, geographical location or a shared history.

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

On the hot day of August 18th, 1791, a Frenchman named Nicolas Appert was in the kitchen of a Parisian hotel. He was looking for a way to preserve food for the army. He decided to try making ice cream. He used milk, sugar, and vanilla. He put it in a glass jar and froze it. When he took it out, it was still good. He had invented ice cream.

Easy Ice Cream

Put 1 cup of milk, 1/2 cup of sugar, and 1/2 cup of vanilla in a glass jar. Seal the jar and freeze it for 24 hours. When you take it out, it will be ice cream.

Bicycle

"Freedom on two wheels"

15

Did you know that the first bicycle was called a velocipede? It was made of wood and had a large wheel in front and a smaller wheel in back. It was used by people who wanted to travel quickly. The first bicycle was made in 1791. It was called a velocipede. It was made of wood and had a large wheel in front and a smaller wheel in back. It was used by people who wanted to travel quickly.

Petition Penny-Farthing

It was the first of a new design, made up of the same Penny Farthing. It was made of wood and had a large wheel in front and a smaller wheel in back. It was used by people who wanted to travel quickly.

Camera

"Tag along"

24

Although it was not an instant snap, the camera was a revolutionary invention. It was made of wood and had a lens in front and a shutter in back. It was used by people who wanted to take pictures. The first camera was made in 1816. It was called a camera obscura. It was made of wood and had a lens in front and a shutter in back. It was used by people who wanted to take pictures.

Developed to Perfection

Many improvements to the camera have been made since 1816. The first camera was made of wood and had a lens in front and a shutter in back. It was used by people who wanted to take pictures.

High-Speed Train

"10-speed"

25

By the 1980s, the world was seeing high-speed trains. They were made of metal and had a long nose. They were used by people who wanted to travel quickly. The first high-speed train was made in 1954. It was called a Shinkansen. It was made of metal and had a long nose. It was used by people who wanted to travel quickly.

Marvelous Maglevs

The Shinkansen is a high-speed train. It is made of metal and has a long nose. It is used by people who want to travel quickly.

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on a hill. It is made of metal and has three blades. It is used by people who want to generate electricity. The first wind turbine was made in 1890. It was called a windmill. It was made of metal and had three blades. It was used by people who wanted to generate electricity.

Green Energy

Wind turbines are a green energy source. They are made of metal and have three blades. They are used by people who want to generate electricity.

Helicopter

"A sailing way to fly"

35

While it might seem like a helicopter is a modern invention, it has been around for a long time. The first helicopter was made in 1783. It was called a Montgolfier balloon. It was made of paper and had a basket. It was used by people who wanted to fly.

Versatile VTOLs

The helicopter is a versatile vehicle. It can fly, land, and take off. It is used by people who want to travel quickly.

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles—no carts, cabs, bikes, buses, trucks, trains, or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3500 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

The very first wheels were used to make pottery. The art of pottery began around 30,000 years ago. Originally, potters would shape clay into pots with their hands, but this took a long time. The Mesopotamians invented a better method in around 3500 BCE. The potter's wheel was a large stone disc balanced on a stick called an 'axle', which could be spun. By putting clay on the wheel and spinning it, the potter could shape the clay quickly into pots. We don't know for sure, but it seems likely that the potter's wheel led to the invention of the vehicle wheel.

Internet

"The world at your fingertips"

18

The invention of the Internet—a network of computers that 'speak' to each other—was a concentrated effort in the United States. The first computers were connected to each other in 1969, but scientists first began developing the Internet in the early 1950s during the Cold War (1947–1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: LOGIN, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want—books, food, holidays, cars—with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

World Wide Web

The World Wide Web (WWW) is a gateway to the Internet. It's made up of search engines like Google and Safari, the Internet addresses (also called URLs) we type in, and the websites that appear on our screens. It was invented by a British computer scientist called Tim Berners-Lee in 1989 while working at CERN, a science research laboratory in Switzerland. The WWW made the Internet accessible to everyone, not just scientists and academics.

This visually extraordinary book presents the history of money as it has never been seen before – from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

RICH AND POOR

THE HISTORY OF INEQUALITY

Inequality – the difference in wealth between the richest and the poorest – has been a feature of human societies since the dawn of time. In the early days, the rich were those who owned more land and livestock, and the poor were those who worked the land for them. In the Middle Ages, the rich were the nobles and the poor were the peasants. In the 19th century, the rich were the industrialists and the poor were the workers. In the 20th century, the rich were the capitalists and the poor were the labourers. In the 21st century, the rich are the tech billionaires and the poor are the gig economy workers.

WEALTH CONCENTRATION

One of the biggest reasons for inequality is the way that wealth tends to get concentrated in the hands of a few people. This is because the rich can invest their money in ways that the poor cannot. For example, the rich can buy stocks and bonds, which can grow in value over time. The poor, on the other hand, often have to live on their wages, which are not enough to cover their needs. This means that the rich can accumulate more wealth over time, while the poor struggle to get ahead.

THE COST OF WAR

War has also been a major factor in the creation of inequality. In the 20th century, there were two world wars, which caused massive destruction and loss of life. The rich, however, were able to escape the worst of the war, while the poor were left to pick up the pieces. This led to a massive increase in inequality, as the rich became even richer and the poor became even poorer.

THE GREAT CRASH

The 1920s were a time of great prosperity in the United States. The stock market was booming, and many people were getting rich. However, in 1929, the stock market crashed, and the economy went into a deep recession. This led to a massive loss of wealth for many people, and inequality increased even further.

THE ROARING TWENTIES

The 1920s were a time of great prosperity in the United States. The stock market was booming, and many people were getting rich. However, in 1929, the stock market crashed, and the economy went into a deep recession. This led to a massive loss of wealth for many people, and inequality increased even further.

GOLDEN YEARS

AN INTERNATIONAL SYSTEM

In the 1920s, the gold standard was a system where the value of a country's currency was linked to the amount of gold it held. This system was used by many countries, and it helped to create a stable international financial system. However, in 1933, the United States abandoned the gold standard, and this led to a loss of confidence in the system.

THE COST OF WAR

War has also been a major factor in the creation of inequality. In the 20th century, there were two world wars, which caused massive destruction and loss of life. The rich, however, were able to escape the worst of the war, while the poor were left to pick up the pieces. This led to a massive increase in inequality, as the rich became even richer and the poor became even poorer.

FROM COUNTERFEIT COINS TO FALSE NOTES

THE HISTORY OF COUNTERFEITING

Counterfeiting has been around since the beginning of time. In the ancient world, people would create fake coins to use as money. In the Middle Ages, people would create fake gold and silver coins. In the 19th century, people would create fake banknotes. In the 20th century, people would create fake credit cards. In the 21st century, people would create fake digital currencies.

FINANCIAL MARKETS

At regular markets people buy and sell things like food and clothing. At financial markets, people trade money-related assets. These include stocks and bonds. Stocks are shares in a company that the company sells to raise capital. Shareholders are paid dividends (regular sums paid out of the company's profits). Bonds are certificates issued by a government or corporation, promising to repay borrowed money at a fixed rate of interest. Financial markets can be physical places, like the New York Stock Exchange, or they can take place online.

THE FIRST BONDS

In the twelfth century, the government of Venice came up with a new way of raising money to fight a war. It offered its citizens certificates, known as prestiti, in exchange for a loan, promising to pay them back by a certain time, plus 5 per cent interest. These were the first government bonds. Before long they became a popular investment, and a market developed for the buying and selling of prestiti.

THE FIRST STOCKS

Founded in 1602, the Dutch East India Company was the first company to sell shares in its business to the public. The money it raised from this funded its voyages to the East Indies, and it paid its shareholders out of the profits from its trade in enslaved people and spices. The shares were traded in the Amsterdam Stock Exchange, also established that year.

THE DAILY NEWS

OCTOBER 1929 NEW YORK CITY

THE WALL STREET CRASH

FINANCIAL MARKETS CAN BE VOLATILE. A RUMOUR OR A MINOR PIECE OF ECONOMIC NEWS CAN CAUSE BIG SWINGS IN PRICES. THE DESIRE TO MAKE MONEY OR AVOID LOSING IT IS A POWERFUL ONE, AND A HERD INSTINCT CAN SOMETIMES TAKE OVER WITH PEOPLE STAMPEDING TO BUY OR SELL. THE MOST SPECTACULAR EXAMPLE OF THIS WAS THE WALL STREET CRASH OF 1929.

THE ROARING TWENTIES

The 1920s was boom time in the United States. There was a spirit of optimism in the country and it became fashionable to play the stock market. Share prices soon rocketed to a point where they represented a value far greater than the total worth of their companies' assets. This was now a 'mania' – a period when everyone, from wealthy financiers to common investors, lost touch with reality and seemed to believe that prices could keep rising forever.

AFTER EFFECTS

As a result of the crash, businesses were bankrupted, banks closed, millions lost their jobs and the world plunged into a deep and lasting economic depression. In Europe, extreme right-wing parties exploited the misery of mass unemployment, blaming 'foreigners' such as Jews. Germany's Nazi Party rose to power in 1933. The consequences for the world would be devastating.

DISASTER

The crash occurred at the end of October 1929, during three calamitous days of trading at the New York Stock Exchange on Wall Street, when huge numbers of people decided collectively it was time to sell. With so many sellers, there were few buyers, and share prices plummeted. In those three days, billions of dollars were wiped off the value of American companies. And over the following years the market kept on falling. By 1932, stocks had lost nearly 90 per cent of their pre-crash value.
