- Full of novelty elements, secret documents, and hidden stories
- The tenth Ology in a series that has sold over 18 million copies worldwide

CHAPTER II Stars and Planets

From the our Sun, we have millions of billions of stars and planets in the galaxy and billions of galaxies in the universe. This book is a guide to the stars and planets in our galaxy and the universe. It is a guide to the stars and planets in our galaxy and the universe. It is a guide to the stars and planets in our galaxy and the universe.

THE SOLAR SYSTEM The solar system consists of the Sun, eight planets, and many moons. The planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. The moons are the natural satellites of the planets.

THE LIFE OF A STAR Stars are born in clouds of gas and dust. They spend most of their lives as main sequence stars. They eventually become red giants and then supernovae. Some supernovae become black holes.

LOGIC TEST #1

CHAPTER III Alien Biology and Physiology

There are many different types of alien life forms. Some are simple organisms, while others are complex beings with advanced intelligence. This book explores the biology and physiology of various alien species.

ALIEN ANATOMY Alien anatomy varies greatly from human anatomy. Some aliens have multiple heads, while others have no heads at all. Some have multiple arms and legs, while others have none.

REPRODUCTION BY BIRTH Many alien species reproduce by birth. The young are often born in a protective sac or egg. Some species have a gestation period, while others do not.

LOGIC TEST #2

CHAPTER IV Humanoid Aliens

Humanoid aliens are those that resemble humans in appearance and behavior. They are often the most common type of alien encountered. This book explores the biology and physiology of various humanoid alien species.

HUMANOID ALIENS Humanoid aliens are those that resemble humans in appearance and behavior. They are often the most common type of alien encountered. This book explores the biology and physiology of various humanoid alien species.

LOGIC TEST #3

CHAPTER V Technological Aliens

Many species use technology to improve their physical or mental abilities. The Cyberbrains long to extend their lifespans. To this end, they have replaced their body parts with durable mechanical components. They substituted their skulls for protective helmets made from a super-strong material called siliconium, which they believed would never break. However, a freak change in the atmosphere on their volcanic planet increased the temperature. Unfortunately, the Cyberbrains discovered that this caused some helmets to shatter - leaving many vulnerable brains exposed.

REPTON CLONES

GENERAL DESCRIPTION: Reptons in appearance, with forked tongues, body on ball, and 2000 pupils.

EARTH HABITATS: Wandering human body parts, Reptons have been known to infiltrate portions of power in areas of large concentration on Earth. They need warmth to survive, so they are most likely to be seen in the summer in large cities. They occasionally conceal themselves in swamps in subtropical zones.

MISSION: Long term, to conquer the Galaxy. Short-term, to infect the next planet.

NOTES: Five thousand clones are attached to each struck ship. A mother ship is home to two hundred thousand clones. The technology of the Reptons is advanced but no longer working, since becoming clones, they've lost the capacity for original ideas.

SPECIMEN
Above, a sample of the shed skin of a Repton Clone.

DENEBIAN CYBORGS

Although they look like machines, Denebian Cyborgs are living organisms encased in mechanical shells that give them super-strength. They are not very intelligent and have never mastered the art of remodeling. When their ancestors destroyed the wildlife on their home planet, Denebian, through over-exploitation, they were forced to offer their services to other species in exchange for a new home on foreign planets.

GENERAL DESCRIPTION: There are many different varieties of Denebian Cyborg, but they all have mechanical exo-skeletons.

EARTH HABITATS: Look for these aliens in areas where machinery abounds - car scrapyards, factories or power plants. They digress themselves as machines to give assistance.

MISSION: To feed homes on other planets.

NOTES: They often work for the Group, but they will save any race that will leave them, including the Tardians, Traders and Proboscians.

CYBERBRAINS

Though the Cyberbrains' volcanic home is no longer suitable for habitation, they wage war against the Tau Warriors in the hope of ultimately conquering the Tau's planet, Volcanox, which has a similar volcanic environment.

Cyberbrains (left) are constructed from siliconium.

GENERAL DESCRIPTION: These tall, mechanical creatures are identifiable chiefly by their transparent helmets. They have good vision, being endowed with telescopic eyes.

EARTH HABITATS: Cyberbrains hang out in laboratories or research stations on Earth, looking for technology to extend their lives and help them in their war against the Tau Warriors. They try to ensure they are not seen by humans.

MISSION: Long-term, to subvert Earth Resources and ultimately cause death. Short term, to conquer Volcanox.

NOTES: They communicate by reading the color patterns on one another's bodies, as well as by setting and receiving microwaves.

TAU WARRIORS

Enemies of the Cyberbrains for many years, the Tau live in hives ruled over by the Red Queen. They are perfectly adapted to life in an unforgiving volcanic environment.

GENERAL DESCRIPTION: The Tau Warriors have tough, bumpy, like megaliths.

EARTH HABITATS: Although rarely found on Earth, they occasionally appear near active volcanoes. If you look down into a crater, you may be able to spot their crafts, Tau Drones. They are 100% mechanical in appearance.

MISSION: To destroy all Cyberbrains.

NOTES: The Tau are technologically advanced. Their hives, created in volcanic magma tunnels, are packed with geodesics, and their heat-generating suits for use in cold habitats are terrific feats of engineering.

LOGIC TEST #7:
At the international reception, a reception area, guests had increased greatly on the site of the reception.

Blue alien: The brown alien spread off brown alien. It was the gray alien.

Gray alien: I added too it, he had.

Gray alien: The brown alien is lying!

Of course, only one alien possible is telling the truth. Which one did the speaker?
