Street Style: Dr. Martens

Visual history of the iconic street style brand.

- Illustrated with full colour photographs showcasing the brand's history.
- Cover finishes: mat lam and foil.
- Written by Jian DeLeon, the editorial director for Highsnobiety. Jian is an expert on the intersection of streetwear, sneakers and luxury fashion. He co-hosts 'The Dropcast', Highsnobiety's weekly news podcast,

Street Style: Dr. Martens

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

6

the upper and repurposed tyre rubbers to create an air-padded sole. The resulting shoe is equal parts built to last and equal parts built to live in. It's no wonder that punk rockers and hip-hop artists alike have graced thousands of stages in a pair of Dr. Martens over the years - it's a shoe made for those who live out loud. The story of how a purpose-driven product came to define one of today's most exciting lifestyle brands is one that spans a growing connection between clothing and culture. When you combine a timeless product with a chameleon-like ability to mean different things to different people, you get a shoe that is undeniably trend-proof.

ABOVE: A classic pair of Dr. Martens 1460 boots, broken in with wear.

7

NOT FINAL

Who Was Dr. Martens?

Dr. Martens may not be a real person, but Dr. Klaus Maertens certainly was. The brand as we know it today began with him. A doctor in the German Army, he found himself in post-war Munich at the age of 25, nursing a broken foot. The year was 1945, World War II had just ended, but his injury was one he earned from an unfortunate riding accident.

As he was recovering from his injury, he found that the standard issue, leather-soled Schürzenbock lowboots that had been part of the German Army uniform since 1937 actually hurt his feet more than helped them. Unconquering and footless styles were undergoing a similar shift. It had been a little more than a century since the Industrial Revolution had commercialised the footwear industry, allowing for mass production for a craft that was once exclusively handmade. Concrete sidewalks were being made where it came to what was happening in the world of vacuumed soles.

American chemist Charles Goodyear discovered that heating up rubber and adding sulphur made it even more flexible. The vulcanised process had many industrial applications, but it also made it much easier to make durable, rubber-soled shoes. Yet while canvas plimsoles and burgeoning sneaker companies like Converse explicitly were meant for athletic pursuits, Maertens saw an opportunity in making a shoe that had the classic, down-toy appeal of a military boot, combined with the comfort and orthopedic benefits of a rubber sole.

OPPOSITE: Dr. Klaus Maertens, creator of the original Dr. Martens boot.

8

NOT FINAL

The first prototype of what would become the Dr. Martens 1460 leather boot took design elements from the German Schürzenbock and set it on top of a unique, air-cushioned sole originally made from heat-treated, repurposed tyre rubber. He made his proof-of-concept using a salvaged cobbler's last and a needle, but it would still take a couple of years before his brand-new shoe business got any proverbial legs behind it.

OPPOSITE: Standard issue German army footboots from World War II that were used to inspire Dr. Martens shoes.

9

NOT FINAL

Disney Brain Games: Maths

100 Disney-themed maths puzzles to exercise young minds!

- The first *Disney Brain Games* book has sold over 58,000 copies (as of August 2023)
- 100 fun and challenging maths-based puzzles
- Features a wide range of beloved Disney and Pixar characters, from Anna and Elsa to Woody and Buzz Lightyear
- Varied and challenging puzzles with different levels of difficulty to keep bright minds entertained
- Supports KS2 Maths curriculum
- Disney+ has 157.8 million paid subscribers globally, and 7.14 million paid subscribers in the UK

Disney Brain Games: Maths

Puzzle 28
EIGHT QUEENS

Mr. Gao has a chess puzzle for you to solve! In chess, the queen can move any number of spaces in a straight line – horizontally, vertically or diagonally. **Place eight queens on the chess board so that no queens is in the same line as any other queen. How many different ways can you find?**

Puzzle 29
ARCHERY PRACTICE

Merida's practicing her archery skills. To prove what a great archer she is, Merida must hit one number in the outer ring, one number in the inner ring and one number in the centre that add up to each of the three numbers below.

Can you figure out which three numbers she must hit to make each of the target scores?

Puzzle 39
MICKEY'S MAGICAL MIX UP!

The Sorcerer's Apprentice has accidentally jumbled all of his master's Plus and Minus potions over!

Can you put the pluses and minuses back in the right places so that these sums work forwards, backwards, up and down?

Puzzle 40
...AND THE KITCHEN SINK

Every time Arthur tries to clean one of Merlin's dirty dishes, the number of dirty dishes doubles. He started with one dirty dish. Arthur has tried to clean 10 dirty dishes. **How many dirty dishes are there now?**

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10

Puzzle 49
SOLVE THE RIDDLE OF THE CAVE!

To enter the Cave of Wonders, Aladdin must find the missing numbers in this puzzle.

Each square needs to be filled with a number between 1 and 9, but you can use numbers more than once. The functions surrounded by stars are carried out first.

So:

$$2 \star 3 + 6 = 12$$

$$2 \times 3 \star 6 = 18$$

Puzzle 23
SHY COCONUTS

Some Kakamora have hidden themselves among Moana's coconut harvest. You can tell which coconuts are Kakamora in disguise, because the numbers they have stuck to them have made the questions they're hiding in incorrect.

Make the sums correct by removing 1 digit from each question.

$$32 + 70 = 73$$

$$42 + 35 = 37$$

$$41 - 60 = 35$$

$$15 - 13 = 12$$

Disney Fascinating Facts

Over 1,000 real-world facts to entertain all ages!

- Cover: gloss lam.
- Features facts about plants, the oceans, animals, the environment, the night sky, insects, literature, art, theatre, music, fashion, general history, Greek myths and legends, Mayan and Aztec history, Arthurian legend, space, robotics, chemistry, biology, physics, inventions, things that go, toys and games, sport, adventure and exploration, the continents and much more.

Disney Fascinating Facts

NATURE

Whether you're looking at the creepy-crawly beneath your feet, or the starry sky above you, you're surrounded by the amazing natural world. Read on to discover incredible trivia about everything from meowles and polar bears to talking mushrooms and bright stars millions of miles away!

NATURE: PLANTS

As well as being delicious, strawberries are one of the only fruits that grow their seeds on the outside - sometimes up to 200 of them! In fact, they're technically not seeds, but something called an achene, which is an individual fruit that holds a seed!

The biggest flower in the world is the *Rafflesia arnoldii*. It can grow to over 7 metres tall. It doesn't have its own root system, so leeches onto other plants to get its nutrients. Don't sniff this flower though - its smell has been likened to rotting meat!

Ferns are some of the oldest plants on Earth. They've been around since before the dinosaurs! In fact, the *Fossilium* fern, which was about 400 million years ago, was the first fern to appear on Earth.

Fisher plants have jagged leaves and produce a nectar that attracts moths and other small creatures. The leaves of the fisher plant close once an animal falls in, and chemicals called enzymes digest the creature so the plant can use the nutrients!

No plant grows faster than bamboo. A Chinese bamboo variety called *Phyllostachys puberula* can grow almost a metre in a single day! It doesn't waste its energy growing any wider, so it can concentrate all its energy into shooting straight up.

Some animals only eat plants, but sometimes the plants like best! The Venus fly trap has tangled leaves that look like a hairy mouth. If an insect touches the hairs inside the leaves, they snap shut and digest the insect. It can take the Venus fly trap up to five days to digest the trapped insect!

NATURE: PLANTS

There are around 30,000 different species of trees on Earth, and among them 10% are said to be found in a single country. If you want to see the most unique trees in the world, head to the Netherlands, the demand was so great that they were said to be more expensive than gold! However, the most famous and best-loved of people with a very unique plant collection that they couldn't sell!

Summer means great sunbathers cropping up all over the place. But did you know that the 'flower' of a sunflower is pseudanthium, or flowerhead, and it's actually made up of many small flowers!

The Waffle family of plants, also known as *Delonix* or *Wafflewood*, grow on the top of water and include the smallest floating plants. Waffle plants can be grown from seed, but can also clone itself very quickly! The fastest recorded clone took just under 30 hours to produce.

The oldest documented tree in the world is known as Methuselah, a Great Basin bristlecone pine tree that grows in the White Mountains of California, USA. It has lived for over 4,800 years!

The baobab tree, sometimes known as the tree of life, is found largely in the countries of Africa and Australia. They can measure in height and circumference, with some specimens reaching up to 25 metres tall and others 25 metres around!

Tulips were introduced to Europe in the 16th century from Turkey. In the 17th century, particularly in the Netherlands, the demand was so great that they were said to be more expensive than gold! However, the most famous and best-loved of people with a very unique plant collection that they couldn't sell!

Some fungi communicate via a system of underground threads called mycelium, which can connect them across several kilometres. One of the first fungi to be used in a signal through the mycelium to warn others and allow them to dig up a nutrient chemical.

Everyone loves the smell of freshly cut grass, however, it's actually a distress call that the grass is giving off. When cut, the grass releases phenolamines that some insects believe is a call of help against the attack!

The palmetto tree, also known as the *Bursera* grape tree, doesn't have fruit hanging from branches like apples and lemons. Instead, the fruit grows directly from the trunk of the tree, so it looks like it's growing in a baggy hole!

You can tell the age of most trees when they're chopped down by counting the number of rings the trunk has, but it can also show how well the tree has grown each year. The ring will be thicker if it has had an abundance of resources, or thinner when there have been fewer.

We all know that trees need sunlight and water to survive, but mostly trees need water. They need 'Some old trees can drink up to 400 litres of water a day, but that's nothing compared to the giant sequoia, which can drink up to four times that!

SCIENCE

It doesn't matter whether scientists are looking inside your body or to the far reaches of the universe, incredible discoveries are being made every day in the world of science. Now it's your turn to explore amazing facts from the laws of robotics and dwarf planets to the stars that make up you, the Earth and everything in the cosmos!

SCIENCE: SPACE

Our solar system has eight planets orbiting around its star, the Sun, but there are some planets that don't orbit the Sun. Scientists call these 'rogue planets' and they just float through interstellar space on their own. Some estimate there could be up to 200 billion rogue planets in our galaxy alone!

A company called Mars One planned to build a human colony on the planet Mars by the year 2032 and over 400,000 people signed up to be the first whole world to land! However, the Mars One team lost out of business in early 2019, so these adventures will have to wait for their Martian voyage.

Humans have barely scratched the surface of outer space. In the future, probes and human-occupied expeditions will continue to explore. Technologies based on Earth, such as telescopes and space stations that sense wavelengths invisible to the human eye, will also help scientists learn about our universe.

Enkeboid, one of Saturn's moons, is dotted with ice geysers! These geysers spew water vapour from deep beneath the moon's surface. The vapour freezes instantly when it leaves the ground. The frozen crystals blast into Enkeboid's atmosphere, where they form an icy ring. The incredible! Future would be proof!

Space is completely silent! Sound travels on vibrations in the air, but space is what's known as a vacuum - it has no air or atmosphere! Astronauts have to use radio wave communication so that they can talk in space.

SCIENCE: SPACE

Some of our solar system's planets are greedy with moons. Whereas Earth only has one moon, Saturn has 146 natural satellites that we know of! It's biggest moon, Titan, is bigger than Mercury!

Venus rotates on its axis so slowly that one day there is equivalent to 243 days on Earth. However, it only takes Venus 225 Earth days to orbit the sun, meaning the Venusian day is longer than a Venusian year!

Between Jupiter and Mars, there's a huge field of asteroids known as the asteroid belt. It contains millions of floating asteroids. The largest object, Ceres, is 952 kilometres wide. It's so big, that it's classed as a dwarf planet, just like Pluto!

Earth isn't the only planet that has volcanoes! In fact, if you travel just one planet along to Mars, you'll find a volcano called Olympus Mons, which is over 600 kilometres wide and 21 kilometres tall! It's almost three times the height of Mount Everest and scientists think it could still be active!

Researchers at Yale University think they've discovered a very pricey planet. It's called 55 Cancri e, is twice the size of Earth and is possibly formed of diamond! Unfortunately, it's 40 light-years away, so we can't visit it to pick up some precious gems!

The hottest planet in our solar system isn't the one that's closest to the sun! The temperature on Venus can reach 450 degrees Celsius (232 Fahrenheit), helped by its super-thick atmosphere, which retains heat. Mercury has no temperature-regulating atmosphere, so its heat fluctuates more.

SCIENCE: SPACE

The Sun generates energy by converting hydrogen into helium, which increases its mass. When its mass increases enough, it will be classed as a red giant star and it will expand to reach Mars, swallowing Earth in the process. Don't worry, it will take another 5 billion years to reach us!

Jupiter is composed of the same elements as our sun - hydrogen and helium - so it has all the ingredients to be a star. However, even though it's the largest planet in our solar system, it would need to be at least 80 times bigger to start burning!

Our solar system has eight planets, but it's also home to five dwarf planets! Eris, Haumea, Makemake, Ceres and Pluto are all classed as dwarf planets because they don't dictate the orbits of objects in their close vicinity.

Unmanned spaceships, sometimes known as probes, have visited every planet in our solar system! The first probe to visit any planet beyond Earth flew past Venus in 1962, while further afield, Cassini orbited Saturn for over a decade!

In the observable universe - that's all of the universe that humans can see with their most powerful equipment - there are estimated to be two trillion galaxies! It's worth noting that every galaxy can have millions of stars and there are still parts of the universe we can't see yet!

Though it's always growing, the Sun is already pretty huge. It's estimated that a million Earths could fit into the space that the sun occupies!

Disney Dreamlight Valley - The Official Guide

Official companion to the bestselling game.

- A mere ten days after its release in 2022, Disney Dreamlight Valley had attracted over one million players. As of January 2023, fans had played 76 million hours of Dreamlight Valley.
- Dreamlight Valley was awarded Best Early Access Game by PC Gamer in 2022.
- Dreamlight Valley can be played on Nintendo Switch, PlayStation 4, PlayStation 5, Windows, Xbox One, Xbox Series X/S and macOS. You can also play the Arcade Edition via Apple Arcade.
- Gameloft has released a 2024 Content Roadmap for Disney Dreamlight Valley, outlining exciting updates and additions to the game over the next twelve months. The game will continue to evolve, attracting new players as well as ensuring long-time players' attention is retained.

Disney Dreamlight Valley - The Official Guide

GEMS
Gems are rare minerals that can be sold to earn Star Coins, or used to craft a variety of decorative items from stoves to snow globes. You can gather gems by mining the rock spots around your valley with a pickaxe. Here's a handy guide for every gem, where you can find it and what it sells for.

	
Amethyst	Shiny Amethyst
Location: Forgotten Lands, Forest Heights Sells for: 500 Star Coins	Location: Forgotten Lands, Forest Heights Sells for: 2000 Star Coins

			
Diamond	Shiny Diamond	Emerald	Shiny Emerald
Location: Forgotten Lands Sells for: 600 Star Coins	Location: Forgotten Lands Sells for: 2400 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 325 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 600 Star Coins

			
Aquamarine	Shiny Aquamarine	Citrine	Shiny Citrine
Location: Double Beach, Forest of Valor Sells for: 250 Star Coins	Location: Double Beach, Forest of Valor Sells for: 600 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 300 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 600 Star Coins

Star Wars: Jedi Mind Training

A collection of more than 100 *Star Wars*-themed brain-training puzzles and exercises to keep your mind as sharp as a Jedi's.

- 100+ fascinating and devious logic problems and brain training exercises, with a Jedi theme
- Test yourself against three levels of complexity, from Padawan to Jedi Knight to Jedi Master
- A perfect gift for adult *Star Wars* fans who have enjoyed titles such as *Murdle*

Star Wars: Jedi Mind Training

PUZZLE 03 PADAWAN

UNEQUAL

Inequality, greater, and lesser are concepts that are all too often encountered in the universe. They are of interest for the Jedi, who do not deal in absolutes and who strive for knowledge over ignorance. Bigger is not always better; smaller is not always weaker.

The number square must be fully completed so that each number appears once only in each row and column. In addition, each greater than (>) or smaller than (<) symbol must be correct.

6

NOT FINAL

PUZZLE 03 PADAWAN

LOGICAL DEDUCTION

Han Solo's blaster pistol has been stolen in the Mos Eisley Cantina, and you have to work out who did it. There are three suspects.

- Greedo: You that know him and Han simply don't get on.
- Dr Cornelius Evazan: There's something very unpleasant about this guy.
- Luke Skywalker: You never know who your friends are, do you?

Each suspect was found holding another item. And there are three places the theft could have happened:

- A light Saber
- A Moo horn
- A glass of Blue Milk
- Bandstand
- Booth
- Bar

There are five clues:

- Greedo trusted the suspect who used a lightsaber.
- Dr Cornelius Evazan was holding a Moo horn when you saw him.
- A glass of Blue Milk was not found in the booth.
- Luke was spotted hiding under the bar.
- The blaster was eventually found in the bandstand.

Use the clues to fill in the grid opposite and log what you know, then use logical deduction to work out what you don't!

PUZZLE 03 PADAWAN

BALANCE: DARK SIDE/LIGHT SIDE

For there to be peace, there should be balance. A Jedi will seek balance in everyday life, and will learn to concentrate and feel their way as different elements seek to dominate; order must be restored, balance must prevail.

In this puzzle, each row and column must contain the same number of dark side tiles and light side tiles, but care must be taken, for neither may have more than two next to each other, vertically or horizontally. No row may be identical in sequence to any other row; the same rule applies to columns, which must also all be unique.

PUZZLE 04 PADAWAN

PATTERN RECOGNITION

Allow your inner calm to enhance your focus and clarity of thought. First look at the pattern, looking for intricacies, repetitions, and any variations that may be apparent. Now think of the flow, noticing how one colour becomes another. Let your intuition guide you.

Which of the blocks a, b, c, d, e, f completes the sequence in line 3?

A New Hope (Star Wars Cinematic Classics)

CINEMATIC CLASSICS

C-3PO wandered away, complaining bitterly. He passed the giant skeleton of a knight dragon that lay bleached on the sand. Then he spotted something on the distance.

"A transport," he said excitedly, waving his metal arms in the air. "I've saved! Over here, they! Please help!"

Meanwhile, R2-D2 had reached the dark hills. The little astromech whizzed safely as he travelled through a stormy river. Luke still believed that he was being watched. Behind the rocks, hooded creatures known as Jawas whispered to one another. Their yellow eyes glowed as the droid passed by.

Then one of the Jawas sprang up in front of Artoo and fired an ion blaster. The blue energy bolt struck the droid, knocking him off his feet.

EPISODE IV: A NEW HOPE

The Jawa gestured eagerly. "Ubini!" he cried, and the others crowded round, lifting Artoo. They carried him through the ravine to their gigantic sandcrawler, where they fitted the little droid with a restraining bolt to prevent him from escaping. Then a large air-pipe stalked down from the sandcrawler and sucked Artoo inside.

Artoo was dumped into a large chamber filled with strange droids. They came in all shapes and sizes, from bony power droids also known as gank droids, to machines built for moisture farming, mining and security. There a pair of glowing eyes spotted Artoo.

"Destroyed," he told the others. "By the Empire."

Luke couldn't believe that such a thing was possible, but there was no time to discuss it. A ship had appeared on their scopes: a small Imperial TIE fighter. It blasted the Falcon, then it strafed away.

"It's heading for that small moon," Luke pointed.

"That's no moon," Obi-Wan told him. "It's a space station. I Han Solo tried to turn the Falcon around, but it was too late. They were caught in an invisible tractor beam, pulling them deadily closer to the Death Star."

"Destroyed," he told the others. "By the Empire."

On the battle station, Grand Moff Tarkin received a report that a ship had been captured. "They must be trying to return the stolen plans to the Princess. She may yet get her of some use to us," Darth Vader said, and went to investigate.

But when his men searched the ship, they found no sign of anyone on board. "According to the log, the crew abandoned ship right after take-off," the commander reported. "It must be a decoy. Several of the escape pods have been positioned."

"Send a scanning crew aboard," Vader ordered. I want every part of this

CINEMATIC CLASSICS

Obi-Wan Kenobi slipped through the corridors of the Death Star, drawing closer to the Millennium Falcon. But before he could reach it, he came face to face with an old acquaintance. Darth Vader stood blocking his path, a red lightsaber humming in his hand.

"I've been waiting for you, Obi-Wan," the Dark Lord boomed. "We meet again at last. The circle is now complete. When I left you, I was but the learner. Now I am the master."

Obi-Wan moved swiftly, countering blow after blow. "You can't win, Darth," he said in former apprentice. "If you strike me down, I will become more powerful than you can possibly imagine."

"You should not have come back," Vader replied, lunging at Obi-Wan, but the old Jedi was too quick.

Spotting the duel from across the hangar, the stormtroopers guarding the Millennium Falcon pushed away, turning to the aid of their quarters.

Luke, Leia, Han and Chewie had made it back to the hangar, where Artoo and Threepio joined them. With the guards distracted, they ran for the Falcon. But as he neared the garage, Luke saw his mentor locked in combat with the monstrous Darth Vader.

In the Death Star's control room, an aide approached Grand Moff Tarkin, offering to ready his ship in case the Rebels were successful. "Evacuate?" Tarkin asked disbelievingly. "In our moment of triumph? I think you overestimate their chances." He was sure that this ragtag army posed no threat to his battle station.

Meanwhile, Red Leader had guided another group of fighters into the trench. Vader was right behind them, taking out first one, then two of Red Leader's wingmen. But the Dark Lord was too late. Red Leader was in

EPISODE IV: A NEW HOPE

range. He fired, and his torpedoes streaked towards the target.

The shot was no good. The torpedoes missed, exploding on the surface of the Death Star. And as Red Leader turned to flee, Darth Vader's TIE fighter swooped in. Red Leader's X-wing slammed into the battle station and burst into flame.

Luke saw the ship explode and knew that time was running out. Flanked by Biggs and Wedge, he flew at full speed into the trench. But Darth Vader's fighter was right behind them and closing fast.

The Dark Lord fired, scoring a hit on Wedge's engine. "I'm hit!" Wedge cried, peeling off. Vader ignored him, keeping his focus on Luke and Biggs. They swooped from side to side, trying desperately to evade the Dark Lord's fire.

It was no good. Biggs's ship was hit, and Luke watched as his best friend's ship exploded into shards of flame. There was no time to grieve. He knew that he was the Rebels' last hope for victory.

Luke switched on his targeting computer and prepared to fire his torpedoes. As he struggled to lock on to the target, Ben Kenobi's ghostly voice spoke to him once more. "Use the Force, Luke," the old Jedi told him. "Let go. Luke, trust me."

Luke deactivated his computer. He was determined to trust his instincts.
