Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

The World's First Rollercoaster

Amazing inventions stories in comic-book form by Blue Peter Award-winner Mike Barfield.

- An irresistible way into science and technology with a dash of history from the brilliant Mike Barfield, author of *A Day in the Life of a Poo, a Gnu and You*, winner of the 2021 Blue Peter Award for a Book With Facts. Mike's books have sold in over 40 territories.
- Featuring the greatest inventions in architecture, travel, the home, food, fashion, toys, sports, technology and more, this book is packed with facts for curious minds. Includes tips on sending in a patent and profiles of young inventors alongside greats such as Diebedo Kere, Bertha Benz, Percy Spencer, Momofuku Ando, Kano Jigoro and Jawed Karim.

HIGHLY INVENTIVE

DIBÉDO KÉRÉ FRANÇOIS

naïf! My name is Dibédo François. In 1971, I became the first African to win the Pulitzer Architecture Prize. I was awarded for people who design to improve life.

But I had been a long journey – literally!

I grew up in a tiny village called Didié in Senegal, West Africa. There were no schools, but we were still very family. The biggest argument in the village – people and built houses by the side. "What's wrong," we said to each other in Senegal? We were the best and we could be healthy if technology was here.

I read and wrote. **My first journey?**

My parents were very busy. My little sister got sick, and we needed education. So I went to school. This was where I learned that one day I would be responsible for everyone – designing beautiful houses for all!

After leaving school, I became a carpenter, working with wood. But I saw that one takes you far. With tools like the hammer, saw, and a wrench, you can be useful in your workshop.

Could I make my dream come true?

"Maybe," I decided now to finish to build an architecture school with the help of the community. We made the school and built it. They can understand and learn to make things by hand to do what they truly build.

If you lived in 1950 with a school, you could use the land and build a school. But if you lived in 1950, you could use the land to build a big school, and you could learn to build better than that.

My kind of art was called inspired artists like to be built. Now I have designed buildings all over the world that work with nature, not against it.

DIKÉ KÉRÉ, SENEGAL
PULITZER AWARD, 1971

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

One of the oldest sweet treats goes back to the ancient Egyptians. Around 3000 BCE, they made a dessert called *shari* from date syrup and honey. The Greeks made a dessert called *dyktamnion* from honey and wine. The Romans made a dessert called *crema* from milk and honey. The first ice cream was made in Italy in the 14th century. It was made from milk, sugar, and ice. The first ice cream machine was invented in France in the 17th century. It was made of wood and had a hand crank. The first ice cream factory was built in London in the 18th century. It was called the *Ice Cream Man*.

Easy Ice Cream

Put 1 cup of milk, 1/2 cup of sugar, and 1/4 cup of cream in a bowl. Stir well. Pour into a mold. Freeze for 4 hours. Turn out. Enjoy!

Bicycle

"Freedom on two wheels"

15

Did you know that the first bicycle was called a *velocipede*? It was made of wood and had a single wheel. The first bicycle with two wheels was invented in France in the 18th century. It was called the *velocipede*. The first bicycle with a chain drive was invented in England in the 19th century. It was called the *velocipede*. The first bicycle with a rubber tire was invented in the United States in the 19th century. It was called the *velocipede*. The first bicycle with a chain drive and rubber tires was invented in the United States in the 19th century. It was called the *velocipede*.

Petition Penny-Farthing

It gives you a lot of design, more than you can find in any other bicycle. It's a bicycle with a large front wheel and a small rear wheel. It's called a *penny-farthing*. It was invented in England in the 19th century. It was called the *penny-farthing*. It was invented in England in the 19th century. It was called the *penny-farthing*.

Camera

"Tag along"

24

Although it's not a new invention, the camera has a long history. The first camera was invented in the 18th century. It was called the *camera obscura*. The first camera with a lens was invented in the 19th century. It was called the *camera obscura*. The first camera with a lens and a shutter was invented in the 19th century. It was called the *camera obscura*. The first camera with a lens and a shutter was invented in the 19th century. It was called the *camera obscura*.

Developed to Perfection

The camera has come a long way since the first camera. It's now a small, portable device that can take pictures of anything. It's called a *camera*. It was invented in the 19th century. It was called the *camera*.

High-Speed Train

"10-speed"

25

Before the high-speed train, the fastest train was the *steam locomotive*. The first high-speed train was invented in France in the 19th century. It was called the *high-speed train*. The first high-speed train was invented in France in the 19th century. It was called the *high-speed train*.

Marvelous Maglevs

The *maglev* train is a new type of train. It's called a *maglev*. It was invented in the 19th century. It was called the *maglev*.

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on a hill. It's called a *wind turbine*. The first wind turbine was invented in the 19th century. It was called the *wind turbine*. The first wind turbine was invented in the 19th century. It was called the *wind turbine*.

Green Energy

The *wind turbine* is a new type of energy source. It's called a *wind turbine*. It was invented in the 19th century. It was called the *wind turbine*.

Helicopter

"A sailing way to fly"

35

What if you could fly? The first helicopter was invented in the 19th century. It was called the *helicopter*. The first helicopter was invented in the 19th century. It was called the *helicopter*.

Versatile VTOLs

The *VTOL* is a new type of aircraft. It's called a *VTOL*. It was invented in the 19th century. It was called the *VTOL*.

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles - no carts, bikes, buses, trucks, trains, cars or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3000 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

The very first wheels were used to make pottery. The art of pottery began around 30,000 years ago. Originally, potters would shape clay into pots with their hands, but this took a long time. The Mesopotamians invented a better method in around 3500 BCE. The potter's wheel was a large stone disc balanced on a stick called an *axle*, which could be spun. By putting clay on the wheel and spinning it, the potter could shape the clay quickly into pots. We don't know for sure, but it seems likely that the potter's wheel led to the invention of the vehicle wheel.

Internet

"The world at your fingertips"

18

The invention of the Internet - a network of computers that 'speak' to each other - was a concentrated effort in the United States. The first computers were connected to each other in 1969, but scientists first began developing the Internet in the early 1950s during the Cold War (1947-1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: *LOGIN*, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want - books, food, holidays, cars - with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

World Wide Web

The World Wide Web (WWW) is a gateway to the Internet. It's made up of search engines like Google and Safari, the Internet addresses (also called URLs) we type in, and the websites that appear on our screens. It was invented by a British computer scientist called Tim Berners-Lee in 1989 while working at CERN, a science research laboratory in Switzerland. The WWW made the Internet accessible to everyone, not just scientists and academics.
