Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

The Little Gardener's Handbook

ALL ABOUT SOIL

Soil is the brown earth that plants grow in and it plays a very important role in supporting life on our planet. The best way to keep your plants happy is to take care of their soil!

Check a seed has sprouted, the soil helps to anchor the plant's roots in the ground. From here, the roots can absorb water, nutrients and minerals from the soil that help the plant to grow.

Soil is teeming with life. Did you know that there are more living things in a handful of soil than there are humans on earth? Look for all of these organisms such as worms, fungi, insects and bacteria.

These organisms have special functions. Worms, for example, are little underground diggers. As they dig, they stir up what they have eaten, which is a valuable kind of food for the soil.

GET TO KNOW YOUR SOIL

Soil is not just dirt. It's a mix of organic matter, like, like, moisture and air. As a gardener, it's important to get to know your soil. If a plant is from a warm part of the world and you're growing it in a cool soil, it won't be happy! Similarly, a plant from a damp area won't like to grow in a sandy soil.

1. Bring a shovel from pages 10-11. Collect a soil sample from your garden. Cut it to a depth of 10cm, because any bigger bits, like twigs or stones, could mess up your soil test.
2. Next, get 100g of soil and put it in a clear plastic bag. Put the lid on tightly and then give it a good shake. Let the soil sit for at least 24 hours to settle.
3. You should now be able to see the different layers of your soil. The amount of soil in different layers and the texture when you touch it, tells you a lot about it. Use the soil test kit to see what you can do to improve your soil.

GARDEN FOES

Sometimes your garden might be visited by some not so welcome wildlife visitors - something that may threaten your plants and other hardworking weeds of hard work. Rather than using harmful chemical pesticides, there are some natural ways you can discourage any unwanted visitors to your garden.

ENCOURAGE BENEFICIAL ANIMALS

You can encourage beneficial creatures naturally by encouraging beneficial visitors such as ladybirds, bees, hoverflies, birds and frogs in your garden. The planting of flowers that attract these insects, making a bug hotel or adding a bird bath.

PEST REPELLENTS

To repel insects, you can make your own natural repellents using a mixture of water, garlic, onion and chili.

PROTECT PLANTS

Use netting to protect plants from birds and other pests.

KEEP AN EYE OUT FOR PESTS

Slugs and snails can eat a whole batch of seedlings overnight. You can try adding a little slug bait to your garden. Remember to check your plants every day for signs of pest damage - gently washing them and watering them in another part of your garden.

BEETLES AND OTHER PESTS

Beetles and other pests can eat your plants. You can try using a natural repellent made from garlic and chili.

PLANTS THAT HELP OTHER PLANTS

Did you know that certain plants can help other plants grow better? Some plants can help other plants grow better by releasing natural chemicals that repel pests. These plants are called companion plants. They can help your plants grow better by releasing natural chemicals that repel pests.

GROW CUPS OF NASTURTIUMS

Did you know that you can eat the petals from certain flowers? Nasturtiums are bright and colourful, and they have a little peppery taste. You can add them to a salad for a burst of extra flavour.

YOU WILL NEED:

- Old cups or tins
- Water
- Nasturtium seeds
- Wool

1. In the bottom of each cup, add a layer of gravel. This is to allow the water to drain away from the roots because the cups do not have any drainage holes.
2. Fill each cup with compost.
3. Place a couple of holes in the compost and drop in the seeds.
4. Cover with a little extra compost and add water to the cups and to the water tank above each cup.
5. After a week or two, the seeds will start to grow. When they are about 5cm tall, they can be eaten. They are best eaten raw.
6. In a few more weeks, flowers will appear. You can harvest them whenever you like. If you do on the plants, just pull them off and a new one will grow in its place.

WELCOME TO THE WONDERFUL WORLD OF GARDENING!

Whether you have a big garden or a small windowsill, you can make the world a greener place. Gardening is one of the best hobbies in the world and it's good for you, your neighbourhood and our planet! People have been gardening in one way or another for thousands of years, so you will be continuing a very long and important tradition.

In this book, you'll learn about how plants work, how to grow your own vegetables, how to encourage wildlife to your garden and why protecting plants is important for our lovely planet. Along the way, there will be plenty of activities and experiments for you to try for yourself - mostly using everyday materials you can find at home.

What are you waiting for? Let's begin!

The World's First Rollercoaster

Amazing inventions stories in comic-book form by Blue Peter Award-winner Mike Barfield.

- An irresistible way into science and technology with a dash of history from the brilliant Mike Barfield, author of *A Day in the Life of a Poo, a Gnu and You*, winner of the 2021 Blue Peter Award for a Book With Facts. Mike's books have sold in over 40 territories.
- Featuring the greatest inventions in architecture, travel, the home, food, fashion, toys, sports, technology and more, this book is packed with facts for curious minds. Includes tips on sending in a patent and profiles of young inventors alongside greats such as Diebedo Kere, Bertha Benz, Percy Spencer, Momofuku Ando, Kano Jigoro and Jawed Karim.

The World's First Rollercoaster

HIGHLY INVENTIVE

DIÉBÉDÓ KÉRÉ

Called 'the man in yellow' for his brightly coloured suits, Diébédo Kéré is the world's most famous young architect.

But it has been a long journey - literally!

He grew up in a tiny village called Gando in Burkina Faso, West Africa. There isn't any electricity, but he wants to see his family. He joined a school in the village. He got good and built himself a table. When his school moved to his own town, he went to the city of Ouagadougou to learn to read and write. He got a job.

He started to see why his village was so poor. He started to think about how to make it better. He started to think about how to make it better. He started to think about how to make it better.

IT's been a great journey - and it isn't over yet!

BULLET TRAIN

THE BULLET TRAIN IS THE FASTEST TRAIN IN THE WORLD. IT CAN TRAVEL AT 300 KILOMETRES PER HOUR.

IT'S SO FAST THAT IT CAN GO FROM LONDON TO PARIS IN JUST TWO HOURS.

IT'S SO FAST THAT IT CAN GO FROM NEW YORK TO LOS ANGELES IN JUST TEN HOURS.

WHATEVER NEXT? BULLET POINTS

HELLO, YELLOW!

HELLO, LO!

HELLO, KITTY!

FLUSH TOILET

THE FLUSH TOILET WAS INVENTED BY JOHN FLINCHER IN 1859.

IT WAS A HUGE STEP FORWARD IN THE HISTORY OF TOILETS.

BEFORE THAT, PEOPLE USED TOILETS WITH A SMALL HOLE IN THE GROUND.

WHATEVER NEXT? TAKE A SEAT

THE SEAT WAS INVENTED BY JOHN FLINCHER IN 1859.

IT WAS A HUGE STEP FORWARD IN THE HISTORY OF SEATS.

BEFORE THAT, PEOPLE USED TOILETS WITH A SMALL HOLE IN THE GROUND.

ROLLERCOASTER

THE IDEA FOR ROLLERCOASTERS CAME FROM WHAT ICE SLIDERS BUILT FOR WINTER FUN IN RUSSIA. 400 YEARS AGO, PEOPLE RODE ON BLOCKS OF ICE!

IT'S A SLIPPERY SLIDER!

THE WORLD'S FIRST ROLLERCOASTER APPEARED IN PARIS, FRANCE, IN 1827. AND HAD WHEELED CARS ON A HEART-SHAPED TRACK...

PEOPLE BEGAN BUILDING BIGGER AND BETTER WOODEN RIDES IN SEARCH OF THRILLS.

THE WORLD'S FIRST ROLLERCOASTER WITH STEEL TUBES FOR TRACKS OPENED IN BUSINESBURG, USA, IN 1853.

IT'S A GREAT EXPERIMENT!

THERE ARE WELL OVER 2,000 ROLLERCOASTERS IN THE WORLD TODAY. AND TUBULAR STEEL TRACKS ALLOW DESIGNERS TO INCLUDE TIGHT BENDS THAT FLIP CARS UPSIDE DOWN (BUT NOT FOR LONG!).

THAT'S FINALLY LATER!

WHATEVER NEXT? ON A ROLL

WE HAVE LIFT OFF!

The forces felt by rollercoaster riders can be greater than those felt by astronauts during rocket launches, but for much briefer times.

ZOOM!

The world's fastest rollercoaster is the Formula Rossa in Abu Dhabi, Dubai. The cars reach a speed of 240 km/h in under five seconds!

GOING UP!

Rollercoaster fans have their own language. The floating feeling you get on hills is known as 'airtime'.

GOING LOOPY!

Rollercoaster loops are shaped like upside-down teardrops - not circles - as this makes them safer to ride.

SMILE PLEASE

Rollercoaster cameras have snapped some odd sights.

PLAYING JENGA

PUTTING ON MAKE UP

SLEEPING!

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

Of all the food items that have been invented, ice cream is probably the most popular. It's a treat that's enjoyed by people of all ages and in all climates. The first ice cream was made in ancient Persia, where it was made from snow and fruit. The first ice cream machine was invented in 1765 by an Italian inventor named Perini. The first ice cream parlour was opened in London in 1774. The first ice cream factory was opened in 1805. The first ice cream truck was invented in 1911. The first ice cream cone was invented in 1906. The first ice cream sundae was invented in 1881. The first ice cream social was held in 1792. The first ice cream social was held in 1792. The first ice cream social was held in 1792.

Easy Ice Cream

Bicycle

"Freedom on two wheels"

15

Did you know that the first bicycle was invented in 1791? It was called a 'velocipede' and was made of wood. The first bicycle with a chain drive was invented in 1839. The first bicycle with a pneumatic tire was invented in 1888. The first bicycle with a diamond frame was invented in 1896. The first bicycle with a chain drive and pneumatic tires was invented in 1885. The first bicycle with a chain drive and pneumatic tires was invented in 1885. The first bicycle with a chain drive and pneumatic tires was invented in 1885.

Pedious Penny-Farthing

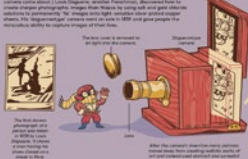

Camera

"Magicians"

24

Although it's often said to be a 'magical' invention, the camera is actually a very scientific device. The first camera was invented in 1816 by Nicéphore Niépce. The first camera with a lens was invented in 1826. The first camera with a bellows was invented in 1839. The first camera with a lens and bellows was invented in 1839. The first camera with a lens and bellows was invented in 1839. The first camera with a lens and bellows was invented in 1839.

Developed to Perfection

High-Speed Train

"No-speed" "No-stops"

25

Before the 1950s, the fastest train in the world was the Bluebell Railway. The first high-speed train was the Shinkansen, which was introduced in Japan in 1959. The first high-speed train was the Shinkansen, which was introduced in Japan in 1959. The first high-speed train was the Shinkansen, which was introduced in Japan in 1959. The first high-speed train was the Shinkansen, which was introduced in Japan in 1959.

Marvelous Maglevs

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on an island or in a field. The first wind turbine was invented in 1890 by a Danish inventor named Lauring. The first wind turbine was invented in 1890 by a Danish inventor named Lauring. The first wind turbine was invented in 1890 by a Danish inventor named Lauring. The first wind turbine was invented in 1890 by a Danish inventor named Lauring.

Green Energy

Helicopter

"A surprising way to fly"

35

When you think of a helicopter, you probably think of a military helicopter. The first helicopter was invented in 1907 by a French inventor named Paul Cornu. The first helicopter was invented in 1907 by a French inventor named Paul Cornu. The first helicopter was invented in 1907 by a French inventor named Paul Cornu. The first helicopter was invented in 1907 by a French inventor named Paul Cornu.

Versatile VTOLs

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles – no carts, cars, bikes, buses, trucks, trains, trams or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3200 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

Internet

"The world at your fingertips"

18

The invention of the Internet – a network of computers that 'speak' to each other – was a concentrated effort in the United States. The first computers were connected to each other in 1969 during the Cold War (1947–1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: LOGIN, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want – books, food, holidays, cars – with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

Raising the Roof

A cool introduction to classical music

- Broadcaster, songwriter, composer and Scala Radio presenter Jack Pepper is an exciting, young voice in classical music.
- A fun and approachable introduction to classical music
- Includes a playlist, so you can listen as you read
- **SAMPLE CONTENTS:** Hildegard of Bingen 1098-1179; Claudio Monteverdi 1567-1643; Barbara Strozzi 1619-c. 1664; JS Bach 1685-1750; Joseph Bologne 1745-1799; Ludwig van Beethoven 1770-1827; Richard Wagner 1813-1883; Giuseppe Verdi 1813-1901; Ethel Smyth 1858-1944; Arnold Schoenberg, 1874-1951; Igor Stravinsky, 1882-1971; Florence Price, 1887 - 1953; George Gershwin, 1898-1937; Leonard Bernstein, 1918-1990

Raising the Roof

SYMPHONY

The symphony has changed over the centuries, but it is essentially an extended piece of music for a large group of players. The word had even been the Greek meaning 'sounding together'. It is often a composer's lifetime piece because the size and cost of the orchestra is hard to pull off.

LEARNING TIP Listen to the music in the accompanying audio. Try to identify the instruments and the different sections of the orchestra. Try to identify the instruments and the different sections of the orchestra.

1800s The first symphony was written by Joseph Haydn in 1763. It was a single movement work for a small orchestra.

1776 Wolfgang Amadeus Mozart's Symphony No. 41 'Jupiter' was the last of his six symphonies. It was a five-movement work for a large orchestra.

1800s Beethoven's Symphony No. 9 was the first symphony to include voices. It was a five-movement work for a large orchestra.

1872 Richard Wagner's Ring Cycle was a four-opera work for a large orchestra.

1878 Johannes Brahms's Symphony No. 1 was a five-movement work for a large orchestra.

Present The modern symphony is a five-movement work for a large orchestra.

Richard Wagner

1813-1883

To Listen or Not to Listen...

Can we separate opera from Wagner? Or can we say that Wagner is the composer who defined the modern opera? Wagner was a German composer, conductor, and theorist. He is best known for his operas, which he called 'music dramas'. He was a pioneer of the concept of the total work of art, in which music, drama, and visual arts are combined into a single, unified work.

Wagner's Sound

Wagner's music is often described as 'monolithic' – a single line, a tone on its own (mono means one, plonic means sound). This creates a sense of calm, perfect for a focused, intense contemplation of faith. He wrote mostly sacred plainchant (where people all sing the same line, with religious texts used for the words), intended for use in church. The abbey consisted of 50 monks who all had trained voices and would sing daily. It's believed a Benedictine nun at the time would sing for eight hours each day! With an in-house choir, then, an abbey provided an ideal testing ground for new music. Music becomes a form of prayer, and having everyone sing the same line creates a powerful symbol of togetherness through faith.

LISTEN!

George Gershwin

1898-1937

George's Sound

Gershwin was the first major African American composer to be widely recognized. He was a pianist, composer, and conductor. He is best known for his jazz-influenced compositions, which he called 'American music'. He was a pioneer of the concept of the total work of art, in which music, drama, and visual arts are combined into a single, unified work.

Gershwin's Sound

Gershwin's music is often described as 'monolithic' – a single line, a tone on its own (mono means one, plonic means sound). This creates a sense of calm, perfect for a focused, intense contemplation of faith. He wrote mostly sacred plainchant (where people all sing the same line, with religious texts used for the words), intended for use in church. LISTEN!

Hildegard of Bingen

1098-1179

Here's someone who was, in every sense, a visionary Hildegard of Bingen had visions of God and wrote them down as poems and music.

Music was just one part of a lifetime of interests. Hildegard of Bingen – named after the German town she came from – was fearless! A nun, diplomat, writer, leader, adviser, plant expert, scientist, public speaker... and a composer. But it all came back to faith. Hildegard became a nun aged 15 and later created her own monastery with 18 sisters. As if that wasn't enough, Hildegard then developed her own language and alphabet, possibly to help bring her nuns together. She used her talents – for music and for words – to unite people. It was all ultimately about expression. Hildegard wrote books on natural history, plants and medicine, and was even the first person to write a morality play, a drama where good battles evil (think Star Wars, but in the 1100s). That made her the 'influence' of the time! She became a pen pal of popes, kings, emperors and cardinals, and was herself a major public leader: she went on at least four public speaking tours of Germany. This was bold stuff, given that women of the time were not allowed to travel as preacher-teachers, she was in many ways an early feminist, championing the rights of women and dealing with men on an equal footing. No wonder why, in the centuries after her death, Hildegard was considered for sainthood by no less than four different popes!

Learning by Ear

The Greeks were the first to use letters of the alphabet to represent different notes. Yet until the Middle Ages, almost all music was passed down the generations by mouth, instead of being written down. There was a lot to learn: in the 600s, monks in churches are estimated to have memorised 80 hours of music, all by ear! By the 900s, it took around 10 years to teach a young chorister all the pieces they'd need to know for future services. And you think school is intense...

LISTEN!

A Feather on the Breath of God sung by Gothic Voices

Hildegard was a Bala-Ivona name even in musical circles, until early music became widely performed and recorded from the 1970s onwards. One of the recordings in this album, released in 1985.

She sent me a letter!

And a botany book to me!

I'm scheduling that next tour!

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

World of Sport

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
The javelin is a spear-like object used in track and field events. The first javelin was made of wood and was used in ancient Greece. The modern javelin was made of metal and was used in the 19th century. The javelin was first used in the 19th century. The javelin was first used in the 19th century.

LONG JUMP
The long jump is a track and field event in which the athlete jumps as far as possible into a sandpit. The long jump was first used in ancient Greece. The long jump was first used in ancient Greece.

GALINA CHISTAKOVA
Galina Chistakova is a Russian long jumper. She won the gold medal in the long jump at the 1996 Summer Olympics in Atlanta. She won the gold medal in the long jump at the 1996 Summer Olympics in Atlanta.

DISCUS
The discus is a track and field event in which the athlete throws a flat, circular object. The discus was first used in ancient Greece. The discus was first used in ancient Greece.

JAN SZENT
Jan Szent is a Hungarian discus thrower. He won the gold medal in the discus at the 1924 Summer Olympics in Paris. He won the gold medal in the discus at the 1924 Summer Olympics in Paris.

AMERICAN FOOTBALL
American football is a team sport that originated in the United States. It is a contact sport that involves running with the ball and passing it to other players. American football is a team sport that originated in the United States.

AIM OF THE GAME
The aim of the game is to score points by passing the ball to other players. The aim of the game is to score points by passing the ball to other players.

MEET THE TEAM
The team consists of 11 players on the field. The team consists of 11 players on the field.

MAKING A PLAY
A play is a series of actions that start with the snap of the ball. A play is a series of actions that start with the snap of the ball.

FOR READY
The ready position is a stance that players take when they are waiting for the snap. The ready position is a stance that players take when they are waiting for the snap.

RUGBY
Rugby is a team sport that originated in England. It is a contact sport that involves running with the ball and passing it to other players. Rugby is a team sport that originated in England.

BASEBALL
Baseball is a team sport that originated in the United States. It is a bat-and-ball game in which the batter attempts to hit the ball into the field of play. Baseball is a team sport that originated in the United States.

CRICKET
Cricket is a team sport that originated in England. It is a bat-and-ball game in which the batter attempts to hit the ball into the field of play. Cricket is a team sport that originated in England.

HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patata puripatsha was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

The Māori of New Zealand participated in a competition known as the *Māori Games* - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

Mongolian cave paintings from 5,000 years ago show people wrestling in front of spectators.

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.
