Hello Happy! Mindful Kids

I'M FEELING KINDA...

How are you feeling? Whether you're happy, sad or full of joy, it's okay. All emotions are okay - which is a good thing as we have loads of them!

Circle a name and draw the expression to fit the emotion. Or add the emotion to fit the expression.

BRAIN BREAK!

To calm your emotions and feelings you need to spend your time. To do this you need to give your brain a break by switching off from the every day things which have caused difficulty on your head.

The first thing to do is to get rid of the noise around you and learn to be alone. It may feel uncomfortable at first, but here's what you need to do:

- Turn off the TV
- Turn off any video games
- Turn off any radio or stereo
- Put smart technology, phones, tablets etc away
- Close windows to the outside world so you can't hear car engines and sirens
- Take yourself away from people talking

Once you've done this...

Sit still in a comfortable position, close your eyes and concentrate on breathing in and out, in and out.

Now, in this quiet calm state ask yourself how you are feeling.

See yourself the chance to recognize any underlying feelings of anger, sadness, worry or anxiety and give yourself permission to feel that feeling.

For example say:

"I am feeling SAD. I feel SAD because I had a bad day at school. I will not always feel SAD, but right now I feel SAD and that's OK."

Repeat the sentence 5 times.

FEELING FEELINGS

Sometimes your feelings don't want to stay inside. Sometimes they want to JUMP AND EMERGE OUT!

Write where and how you feel when you're sad on this dummy.

Write where and how you feel when you're angry on this dummy.

MY BEATING HEART

Take some time to get to know your heart rate. Take your pulse by holding the two fingers nearest your thumb to your neck or to the underside of your wrist.

TRY TAKING YOUR PULSE WHEN YOU HAVE...

- JUST WOKEN UP
- RUN ON THE SPOT FOR 3 MINUTES
- HAD A ROW WITH SOMEONE
- EATEN A BIG MEAL
- JUST BEGUN A PIECE OF HOMEWORK
- READ A CHAPTER OF A BOOK
- BEEN FOR A WALK

Write down the beats per minute for each of these.

REMEMBER! Anger can be positive. Many people have made good changes in the world because they felt so angry about something they used the anger to spur them on to positive action. What makes you angry in the world? How could you make a difference?

DID YOU KNOW? Your heart rate will also increase when you are stressed or afraid.

THE ANGER ICEBERG

Anger never exists on its own - there are always underlying emotions causing it. Add more emotions to the underwater part of the iceberg to show the other emotions which might lead to you feeling angry.

TAKE A BREATH!

Try this breathing exercise to help you relax:

STEP 1

Make sure you are sitting comfortably in a quiet and safe place. When you feel ready, close your eyes. Notice your breathing. Think about how it feels breathing in and breathing out. Try to breathe in through your nose and out through your mouth.

STEP 2

Place your hand on your tummy and focus on the feeling of your stomach rising and falling with each breath. When you breathe in, quietly say 'in' to yourself, and when you breathe out, quietly say 'out' to yourself.

STEP 3

Concentrate on nothing but your breathing and try to let go of any other thoughts you may have.

When you've had lots of practice at the breathing exercise, see if you can think about a happy memory at the same time. This way, your happy memory will take up all the space in your brain, and there won't be any room for the worries.

How To Draw Pets

Heads, paws and claws

Pets have many different types of heads, paws and claws. Studying and sketching the detailed features of a pet will help you with your final drawings.

Quick pencil sketches can help you to understand the structure of paws and claws.

Look for areas where hair should be darker and also for changes of texture.

The more you study a subject and your final drawing is the more accurate your drawing will become.

Always consider the light source and add tone to the darker areas.

19

Using photos

Drawing from photographs of pets can help you develop both your drawing skills and your eye for detail.

Make a tracing of a photograph and line up all of squares in it.

Use this as a guide for drawing your pet. You can use the grid to help you get the proportions and sizes right. You can also use the grid to help you get the proportions and sizes right. You can also use the grid to help you get the proportions and sizes right.

18

Dog

Dogs are often kept as domestic pets but some, like sheepdogs, are used for work.

Draw a circle for the head. These two circles help you to get the shape of the front legs and the chest for the top of the front legs.

Add a small rectangle to the side.

Draw the shape of the tail with curved lines.

How To Draw Fantasy Art

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Pencil is the most common drawing material. Add an eraser to your pencil and change with different pencils to create different effects. You can use special effects by smudging some parts of a drawing done with wax crayons.

Sketchbook is a kind of drawing book normally with blank sketches.

Charcoal is very soft and makes very dark, rich drawings. Add an eraser to your charcoal drawing with charcoal to prevent smudging.

Wax crayons are soft and can be used to draw on paper or cardboard. They are good for making very dark, rich drawings. They are good for making very dark, rich drawings.

Character proportions

This page shows some of the more popular fantasy figures and their proportions compared to a normal human figure. On average, the length of a human head should fit eight times into its body length. When you draw a fantasy figure anything goes - so let your imagination go wild.

Draw these simple figures to help you choose a good position for your character. You can make the figure of a character by using character poses as reference.

Man beasts

Combining a human figure with an animal's head can create a great hybrid monster. You can get inspiration by drawing from life models. Photos from sports movies and figure reference manuals are a good source too. Why not try putting a snake or insect's head on a human body - see what you can create!

Wolf is a classic half-man, half-beast.

Dragon is a classic half-man, half-beast.

Amazon warrior

This powerful female figure is a classic action fantasy character. She must look strong and powerful but retain her femininity and beauty.

Sketch cylinder shapes for each arm which join at the elbow.

Add the basic shape of the hand.

Draw in ovals for the head, neck, body and hips.

Draw a long curved line to start the position of the body.

Legs: add the curved lines of the upper and lower leg, indicating the knee joint.

Add the foot shape and direction.

Draw in the boots shapes.

Add the sword using straight lines.

Sketch in the position of the ears, nose and mouth.

Sketch in the shape of the hair mass.

Indicate the position and shape of the breasts.

Add the costume's draped cloth using simple lines.

Finish the detail on the sword. Small broken lines give the impression of shining metal.

Add shape, tone and details to the hair.

Draw in bracelets and armbands.

Draw in the top of the costume.

Add tone to the legs.

Complete the details on the boots.

Add shade to areas where the light would not reach.

Drawing hands

Practise sketching your own hands in different positions. This will help you draw expressive hands on your characters.

How To Draw Christmas

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Small Drawings can include a vast amount of detail and focus. They're especially good for a range of light and dark effects to create drawing.

Medium Drawings are the best equipment and materials will not necessarily make the best drawing - only practice will.

Big Big drawings are a range of line widths. The wide lines are good for filling in large areas of the drawing.

Light Lighter and darker in a drawing will be a lot more fun to draw. Use a range of line widths and colors. The wide lines are good for filling in large areas of the drawing.

Dark Darker lines will be a lot more fun to draw. Use a range of line widths and colors. The wide lines are good for filling in large areas of the drawing.

Christmas alphabet

It is fun to create your own hand-drawn lettering. Here is an example of how to design a job: Christmas-themed alphabet. Use it for cards, invitations and posters, or use it to spell out someone's name to personalise special gifts.

There are some ideas for a Christmas-themed alphabet.

N The construction lines for the letter 'N' are shown in the drawing.

E You can create a wide variety of different Christmas letters, such as a gift-wrapped letter or a letter that looks like a reindeer.

ABCDEFGHIJKLMNOPQRSTUVWXYZ AEOA&

Santa Claus' sleigh

The modern idea of Santa's sleigh and the names of his reindeer comes from the poem *The Night Before Christmas*. It was originally published anonymously in 1823 in the *New York Sentinel*. Rudolph was not invented until 1939, when he featured in a booklet that was sold at Montgomery Ward department stores.

Draw in the reindeer's neck legs.

These additional reindeer heads will be used for the letters 'H' and 'I'.

Add the back of the reindeer.

Now draw in Santa Claus with sack for the presents.

Add the presents and the sleigh.

Use the drawing to make other letters and features. Add drawing to the back view of reindeer head.

Draw in the curved upper edges of the sleigh's carriage and runners.

Start by drawing a rectangle for Santa's sleigh. Add a curved position line for the runners.

Use the construction lines to help position the reindeer. Draw in the small circles for the reindeer's body and legs with curved lines for the hooves.

Perspective

If you look at anything from different viewpoints, you will see that the part that is closest to you looks larger, and the part furthest away from you looks smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

The vanishing point (VP) is the place in a perspective drawing where parallel lines appear to meet. The position of the vanishing point depends on the viewer's eye level.

Two-point perspective uses two vanishing points - one for lines running along the length of the subject, and one on the opposite side for lines running across the width of the subject.

How To Draw Caricatures

Different treatments

Changing one feature can completely transform a face. For example, the size and shape of a chin can make a character look more or less bold. Superheroes often have large, pronounced chins, representing strength and power.

Amplify prominent features.

Add some detail to the face including bigger nose hair, wrinkles, and a more realistic chin. Use cross-hatching to make eye sockets darker.

Exaggerate the top and base of the nose. Change the nostril and chin. There is a lot of facial features.

Draw the forehead. It has been completely described and would add extra age to the character.

The nose and size of the chin make the face look grumpy and full of pain.

Sampled character
You can create a caricature using any old face. The shape is what's important as well as their features.

Insulting vs complimenting

The angles and facial expressions chosen can radically change the look of a caricature to create an insulting or a complimentary expression of character or personality.

Good features are the best. Drawing a caricature that is insulting or complimentary is a matter of choice.

Henry VIII was the King of England because he was a child and then he had a very large nose.

Draw the drawing as you see it. Add a construction line for the nose. Then the position of the nose will be clear.

Add some detail to the face, including eye sockets and a more realistic chin. Use cross-hatching to make eye sockets darker.

Think drawing the facial features and not the head. Make sure the features are the same and not the head.

The hair is a very important feature. It is a good idea to add shading to make the hair look more realistic.

Draw the drawing as you see it. Add a construction line for the nose. Then the position of the nose will be clear.

Macaroni

In the mid-18th century, certain well-to-do men would dress in high-fashion clothes and wear large powdered wigs. They were known as macaroni and made great subjects for caricatures.

Great exaggerate the height of the hair. There are wigs on high, but the hair on the head would be covered with a wig.

Draw a sketch of the head, hair, and body. Make the nose and chin as small as possible. Add a construction line for the nose.

Draw the drawing as you see it. Add a construction line for the nose. Then the position of the nose will be clear.

Add shading to the hair. Use cross-hatching to make the hair look more realistic.

Draw the drawing as you see it. Add a construction line for the nose. Then the position of the nose will be clear.

Looking like your pet

Scientists have found that we deliberately choose pets that look similar to us! Comparing owner and pet can be a fun caricature exercise, particularly if you exaggerate one common feature.

It's easier to choose just one similar feature to distort - large teeth or nose shapes both work very well.

Draw in a basic oval and construction lines as a guide.

For the owner, roughly sketch in the eyes, eyebrows, ears, nose and mouth. The dog's features will have exactly the same placement.

Exaggerate the features so that the facial creases will match up with the dog's saggy jaws.

When drawing the noses, make them both of a similar shape and size.

Think about your composition. By placing both characters face to face, their features are mirrored, making the similarity more obvious.

Finish off both caricatures by completing all details.

Add tone, shading in areas where light does not reach.

TATTOOS

In the early nineteenth century over 90 per cent of all sailors sported a tattoo. They marked milestones in a sailor's voyage and served as reminders of the places they had been. But mainly, tattoos were believed to be good luck talismans.

Spot the only tattoo opposite that matches this one above.

HOW TO DRAW A PIRATE CAPTAIN

Copy this step-by-step pencil drawing

Use simple ovals to draw in the main shapes of Blackbeard's head. Add construction lines for his pirate hat.

Draw in more details like the rim on his hat, his eyes, eyebrows, nostrils, ears and nostrils. Finally add his teeth and draw in the hairs of his beard.

Start drawing in his hat and his facial features.

Add Blackbeard's eyepatch, beard and moustache.

Use a soft pencil to build up tone by crosshatching.

BATTLESHIPS

YOU WILL EACH NEED:
2 grids (see page 81)
A black pen
A red pen

BATTLESHIP RULES (2 PLAYERS)

- Both players have two grids. Each player must secretly place (either horizontally or vertically) a Square rigger, a Brigantine, a Schooner and two Sloops on one grid. Use the key below to see how many squares each type of ship should fill.
- Players take turns to call out a 'co-ordinate' (a letter and a number) to guess where their opponent's ships are placed. Your opponent checks their grid, and shouts 'hit' if you have guessed correctly and 'miss' if not.
- Keep a record of all your guessed co-ordinates on your spare grid. Use black for a 'miss' and red for a 'hit'.
- The first player to sink all his enemy's ships is the winner.

ON THE LEVEL

If you pour water into a series of tubes that are connected together, the water finds the same level in all the tubes.

All tubes connected to jar A should have water reaching the same level as in jar A. All tubes connected to jar B should have the same water level as jar B.

But some of these tubes have been drawn wrongly! Can you find which tubes contain water at the wrong level?

HINT: It will help if you colour all the tubes connected to jar A red, and all the tubes connected to jar B blue.

TRICKS WITH LIGHT

Optical illusions are tricks that fool the eye. They make you see something that's not really there.

Hold the book up in front of you and tilt it to the left or right. What happens to the curved lines in the drawing below?

Can you see a triangle here? There isn't one in the drawing!

Stare very hard at the picture below, then slowly move it towards and away from you. What happens?

Are the sides of the square straight or curved? Check with a ruler.

Are the horizontal lines level or slanting?

PUT THE FISH IN THE BOWL

1. Trace the fish and bowl onto card. Colour them in, then cut out the two circles.

2. Tape the two pictures to a pencil, so both pictures face out.

3. Spin the pencil between your hands. Can you see the fish in the bowl?

DID YOU KNOW? Optical illusions aren't just for fun - they help scientists to understand how the eyes and brain work together.

GERMINATION

Most plants grow from seeds. If you plant a seed in a moist, sunny place it will start to germinate (sprout).

The tough seed case splits open (1). First, a little root grows downwards (2), so the plant can take in water. Then, a little green shoot begins to grow upwards towards the sky (3). The new plant spreads its leaves in the light (4).

You can plant bean sprouts yourself and see how fast they grow!

BEANPROOF MAZE
Help the new shoot find its way through the soil towards the light.

RISING AIR

When air is heated it rises. This is what makes a hot-air balloon rise. Air spirals upwards in currents called thermals where the sun heats the air near the ground.

This experiment uses the warm air from a radiator.

Colour the snakes, then cut them out to make a spiral. Gently pull the head and tail apart. Use scissors to make a hole in the nose, and attach a string. Hang the snakes over a radiator and watch them spin around!

How Do I Hear?

Sound is vibrating air. When it reaches your ears it makes your eardrums vibrate. These vibrations send messages to your brain, which then makes sense of what kind of sound you are hearing.

Semiochajar
Cubals
Kardaw
skall

Splash!
Woof!
Toot toot!
Bang!

Most of your ear is inside your head. The part of the ear you can see is like a funnel for sounds.

Why Do I Have Two Ears?
Having an ear on either side of your head helps you to work out the direction of sound better. It means you can hear better too.

What was the deadliest dinosaur?

Spinosaurus was the largest meat-eating dinosaur known to have existed. Unlike other dinosaurs, Spinosaurus must have been semi-aquatic (partly water-dwelling).

Spinosaurus's head and teeth were shaped like a crocodile's. Its broad feet and flat skin were ideal for paddling in water.

The deadliest dinosaur would have eaten sharks and crocodiles, as well as land animals.
