Little Explorers: Maths

A fun, novelty intro to maths.

- Over 30 flaps included
- A new title in the successful and long-running *Little Explorers* series which has sold over 1.25 million copies worldwide (as of July 2022)
- An easy first introduction to the fundamental areas of maths, perfect for a child starting school
- Supports the KS1 core curriculum with topics including: numerals, addition, subtraction, multiplication, division, fractions, measurements, shapes and probability

Little Explorers: Maths

ALL KINDS OF NUMBERS!
Numbers are amazing but only have 10 number symbols, but they can be used to write any size of number that we want and can be all sorts of things!

Odd and even numbers
Even numbers are whole numbers that can be divided evenly into pairs. Odd numbers are whole numbers that cannot be divided into pairs. There's a trick to tell what kind of number that we want. Can you spot all the odd numbers in the street? How many pairs of the even numbers?

What is infinity?
You can always add one to a number and keep going forever. The idea is called infinity.

Big numbers
Look at these numbers. Can you point to the biggest one?
10 100 1,000

Positive and negative numbers
Look at the four numbers for the building. The numbers that are bigger than zero are positive numbers. The numbers that are smaller than zero are called negative numbers. Negative numbers have a minus sign (-) in front of them.

From numbers
Some numbers such as 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 and 100 are called whole numbers.

WHAT CAN NUMBERS DO?
When you start looking and notice that numbers are everywhere, you can see how numbers can help people in this busy city.

Recipe maths
Recipes are very useful and all have different things to add. Some are easy, but some are not. The recipe for pizza is easy. You can use a calculator to help you. Can you help the chef?

Square numbers and square roots
If you square a number by multiplying it by itself, you get a square number.
 $3 \times 3 = 9$
Square numbers can be arranged in a square shape.
If you find the square root of a number, it's the opposite of squaring a number. The square root of 9 is 3.

Money
You can use money to buy things. You can use a calculator to help you. Can you help the shopkeeper?

Time
You can use a clock to tell the time. You can use a calculator to help you. Can you help the clock?

PIRATE GOLD!
The treasure hunter Captain Jack can help you find the gold. You can use a calculator to help you. Can you help the captain?

START!
The ship will leave at 10 o'clock. The gold is in the treasure chest. Can you find it?

Maths in the sea
The sea is full of numbers. You can use a calculator to help you. Can you help the sea?

Log water
You can use a calculator to help you. Can you help the log?

Legged rocks
You can use a calculator to help you. Can you help the rocks?

Sea life
You can use a calculator to help you. Can you help the sea life?

Maths in the sky
You can use a calculator to help you. Can you help the sky?

A WHOLE WORLD OF MATHS!
We use maths every day in lots of different ways. Often, we don't even realise that we are using it. How many different kinds of maths can you spot in this scene?

Maths helps us to be on time
We can tell the time using the clock.

Maths helps us to buy the right amount of things
Signs with numbers on give information to help us make choices.

Maths can help with stacking these boxes, so they don't topple over!

Maths helps us to buy the right amount of things
Whenever we use money, we use maths.

Maths helps us to buy the right amount of things
1 kilogram of apples, please!

Maths helps us to buy the right amount of things
2 for 1!

Maths helps us to buy the right amount of things
50% off!

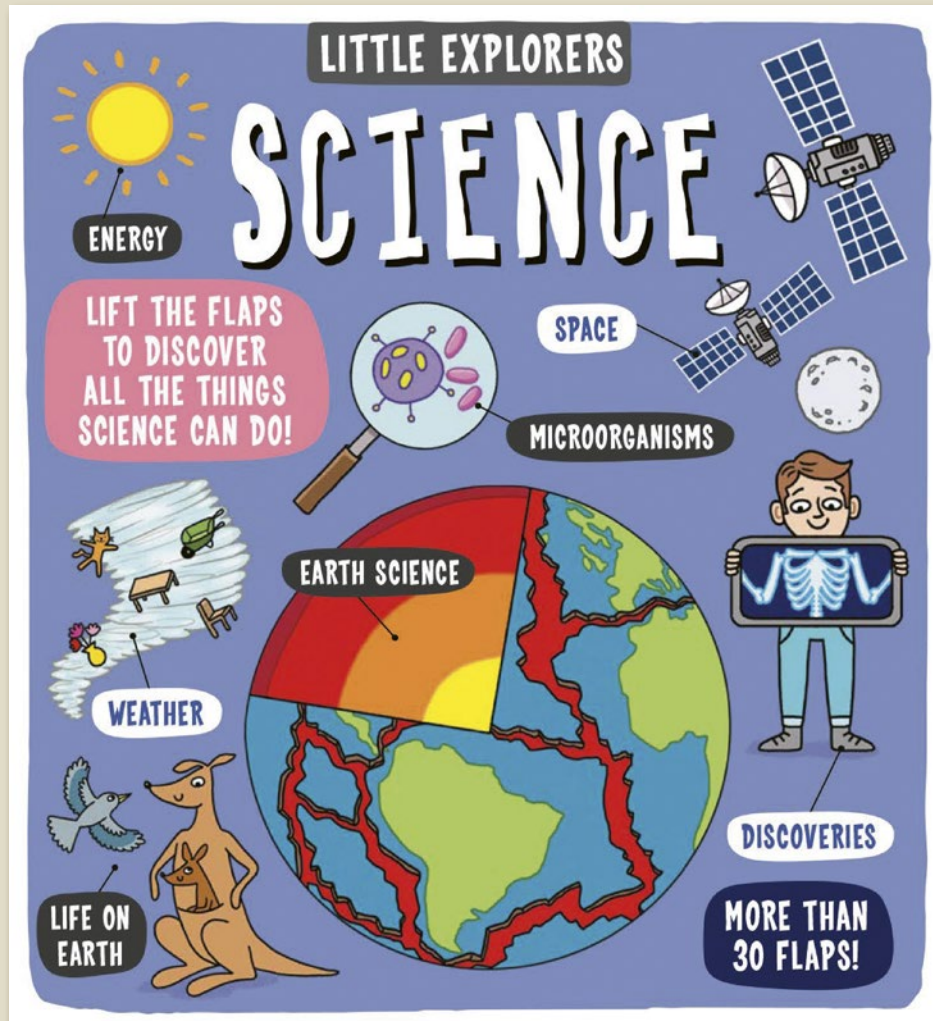

Maths helps us to buy the right amount of things
Today it is a sunny 25 °C

Maths helps us to buy the right amount of things
Numbers can tell us how hot (or cold) it is.

Maths helps us to buy the right amount of things
Maths helps to keep us safe.

Little Explorers: Science

A fun, novelty introduction to science.

- Over 30 flaps included
- A new title in the successful and long-running *Little Explorers* series which has sold over 1.25 million copies worldwide (as of July 2022)
- An easy first introduction to the fundamental areas of science, perfect for a child starting school
- Contents includes: biology, chemistry, Earth science, physics, space, periodic table, energy and forces, inventions

Little Explorers: Science

A HIDDEN WORLD!
Some scientists study tiny things that can't be seen without the help of special machines. Some things are so small that they can't be seen at all. They are called microorganisms.

What is the world made of?
Everything in the universe is made of matter. Matter is anything that has mass and takes up space. Matter is made of atoms. Atoms are made of even smaller things called subatomic particles. Scientists study matter and subatomic particles.

What is an atom made of?
An atom is made of three particles: protons, neutrons, and electrons. Protons and neutrons are in the nucleus of the atom, which is surrounded by electrons.

Chemical reactions
A chemical reaction is a process where one or more substances change into one or more new substances. This is called a chemical reaction.

Look in here
Look in here!
Look in here!

The building blocks of life
All living things are made of molecules called building blocks. Some building blocks are called amino acids, and some are called nucleic acids. Some living things, such as bacteria, only have one cell, but most plants and animals are made up of billions of cells. Scientists use microscopes to look at cells. Some cells are so small that you need a microscope to see them.

States of matter
Matter can be in three states: solid, liquid, and gas. They are called the three states of matter. Heat things can melt or freeze. Heat can also change the state of matter.

Atoms are made of even smaller particles called protons, neutrons, and electrons. The protons and neutrons are packed in the nucleus of the atom, which is surrounded by electrons.

Some molecules help us to adjust the food we eat. They are called enzymes. They can make our food easier to digest.

Some molecules help us to adjust the food we eat. They are called enzymes. They can make our food easier to digest.

Some molecules help us to adjust the food we eat. They are called enzymes. They can make our food easier to digest.

Some molecules help us to adjust the food we eat. They are called enzymes. They can make our food easier to digest.

WHAT IS CHEMISTRY?
All the matter in the universe is made of substances called elements. Chemistry studies elements and how they are joined together to make new substances.

The periodic table
The periodic table shows all the elements. They are arranged in a regular pattern. Each group of elements has similar properties.

Group of elements
The elements are arranged in groups. Each group has elements with similar properties. For example, the elements in Group 1 are called alkali metals. They are very reactive. The elements in Group 18 are called noble gases. They are not very reactive.

26 Fe Iron

BURSTING WITH LIFE!
Our planet is bursting with life. From tiny insects to towering trees and our ourselves. Our bodies are made of tiny things. They are called cells. Cells are the building blocks of life. They are made of molecules. Molecules are made of atoms. Atoms are made of even smaller things called subatomic particles. Scientists study life and how it works.

There are millions of different plants and animals on Earth. Scientists study them to learn how they work. They are called biologists. They study how living things grow, how they change, and how they survive.

There are millions of different plants and animals on Earth. Scientists study them to learn how they work. They are called biologists. They study how living things grow, how they change, and how they survive.

There are millions of different plants and animals on Earth. Scientists study them to learn how they work. They are called biologists. They study how living things grow, how they change, and how they survive.

WHAT IS SCIENCE?
Science helps us to learn about the world and find answers to our questions about it. There are lots of types of science. Each one looks at a different part of the world around us.

BILOGY
Biology studies things that are alive.

CHEMISTRY
Chemistry studies chemicals and what they do.

EARTH SCIENCE
Earth science studies the planet we live on, including its land, oceans, climate and atmosphere.

PHYSICS
Physics studies energy, forces and what things are made of.

All kinds of science!
Each scientific area has its own special name. Here are just a few of them.

What is a scientist?
Scientists are people who study science. They come up with new ideas, then test them with experiments to discover new information. Some scientists work in laboratories, but others work outdoors. A few scientists even work in space!

What is this scientist doing?
A scientist is using a microscope to look at a small object.

Step by step
Scientists work very carefully to avoid making mistakes. They often carry out an experiment several times, following the same steps.

What's the big idea?
An idea that a scientist wants to test is called a hypothesis. Scientists don't make guesses. They use things they already know or can see, called observations, to help them come up with their hypotheses.

What is data?
Data is the word scientists use for the information they gather when they do an experiment. The data might be measurements, or things that they have noticed.

What is this scientist doing?
A scientist is using a microscope to look at a small object.

I know that some things float, but others sink. Observation

Little Explorers: Food

Take a bite into the tasty world of food, with more than 30 flaps to lift and explore!

- A new edition to the popular non-fiction series, *Little Explorers*, which has sold over 1.25 million copies worldwide, this time exploring delicious food!
- More than 30 sturdy flaps to lift, revealing interesting and fun facts to help children engage with each topic.
- Introduces new concepts and vocabulary in a simple and approachable way -through bright, child-friendly artwork and accessible, bite sized text.
- Can be used as a tool to complement KS1 curriculum learning

Little Explorers: Food

FABULOUS FOOD!

Food can be grown in your kitchen, but what if it could? What if you could get it all in the average that helps you move, think and play before you eat just of food you need to get it all around food to be.

VITAMINS
Vitamins help your body work as it should. There are 13 known vitamins and they all have different jobs.

MINERALS
Minerals are salt like elements that help the body work. There are an important group of minerals called calcium, iron and potassium.

PROTEINS
Proteins are the building blocks that help your body grow. They come from eggs, meat and beans.

DIETARY FIBRE
This is a kind of fibre that helps the body work. It is found in fruits, vegetables and whole grains.

WATER
If you are thirsty, you need to drink water. It is the most important thing for your body to have.

THE DIGESTION QUESTION
How does the food you eat turn into energy inside your body? How does it get to the places it needs to go? The parts of your body that help break down our food are called the digestive system.

TEETH
The teeth in our mouth help us to chew our food. They are made of a hard material called enamel.

ESOPHAGUS
The esophagus is the tube that carries food from the mouth to the stomach.

STOMACH
The stomach is the organ that breaks down food into smaller pieces.

SMALL INTESTINE
The small intestine is where most of the nutrients from food are absorbed.

LARGE INTESTINE
The large intestine is where the body gets rid of waste.

LET'S CELEBRATE!

Although food is important for our survival, it has become so much more than that. It's something that we enjoy. Food has even become a big part of many celebrations around the world!

Dahl
Dahl is a traditional Indian dish made from lentils. It is often served with rice and a side of chutney.

Lunar New Year
The beginning of a new lunar year is celebrated with food that is said to bring luck, health and happiness.

Passover
The Jewish festival of Passover is celebrated in many homes. During the eight days of the festival, people do not eat anything made with leavened bread.

Thanksgiving
In the United States, Thanksgiving is a time to give thanks for the good things in our lives.

Idol at Aïda
Using the traditional ingredients, people around the world make their own Idols. It is a fun way to celebrate the festival.

Happy birthday!
People celebrate their birthdays in different ways around the world. In many countries, there are birthday cakes with candles. In other countries, people have birthday parties with games and gifts.

NOT FOR ME!

Some people's bodies can become sensitive to certain foods. These bodies react to try to get the food out of their system.

Which foods cause an allergic reaction?
Different people can react to different things. Some common foods that can cause allergies are:

- Eggs
- Milk
- Wheat
- Soy
- Peanuts
- Tree nuts
- Fish
- Shellfish

FOOD PROBLEMS
The production of food can have an impact on our planet. With more and more people in the world, there is a lot of food being produced. This can have a big impact on the environment.

Let's go!
Animals can help us in many ways. They can help us to grow food, they can help us to transport things, and they can help us to keep our homes safe.

FINDING FOOD

Usually, food appears in front of you at the dinner table. But how did it make its way there? Where does food come from? Many foods go on a journey from farms to factory to finished feast. Some food comes from much closer to home too!

Fantastic farms
A farm is a place where animals might be used to produce food, and crops are grown there too. Some farms grow all sorts of fruits and vegetables. Some grow wheat. Others raise cows for milk and hens for eggs.

Combine harvester
These machines cut and collect crops. They also separate the parts that can't be eaten from the parts that can.

Orchard
An orchard is an area of land where lots of trees are planted to grow fruit.

Tractor
The tractor is the most important machine on the farm. Different attachments can be added for different jobs.

factory stop
Food grown on farms might go to a factory to be packaged up. It then travels to a supermarket, for people like you to buy and enjoy.

In the garden
Some food is grown in your very own garden! People can grow delicious vegetables, such as carrots and cucumbers, and fruits, such as cherries and plums, at home. Local farms might grow food you like too.

Busy bees
Bees are one of the planet's greatest helpers. Here's why...
