- An easy first introduction to the fundamental areas of science, perfect for a child starting school
- Contents includes: biology, chemistry, Earth science, physics, space, periodic table, energy and forces, inventions

Little Explorers: Science

A HIDDEN WORLD!
Some scientists study tiny things that can't be seen without the help of special machines. Some things are so small that they can't be seen at all though scientists can see and feel them.

What is the world made of?
Everything in the universe, from the air we breathe to the stars in the sky, are made of matter. Some people use the word 'matter' to describe all of the things which make up the universe. Matter is made of atoms. Some atoms are called 'elements' and some are called 'compounds'.

What is an atom made of?
Proton
Neutron
Electron

Chemical reactions
A chemical reaction is a reaction where one or more substances are changed into one or more new substances. This is called a chemical reaction.

Look in here
Look in there
Look in here
Look in there

The building blocks of life
All living things are made of tiny building blocks called cells. Cells are made of water and some living things, such as bacteria, only have one cell but most plants and animals are made up of millions of cells. Scientists use a microscope to look at cells. Some cells are very small and some are very large.

States of matter
Matter can be in three states: solid, liquid and gas. They are called the three states of matter. Heat things can melt or freeze. Heat can also change the state of matter.

Particles everywhere!
Molecules are tiny particles that are made of atoms. They are everywhere. They are in the air we breathe, in the water we drink, and in the food we eat. They are also in the ground and in the sky.

Some machines help us to study the world around us.
Microscope
Telescope
Binoculars
Thermometer
Barometer
Anemometer
Windmill

WHAT IS CHEMISTRY?
All the matter in the universe is made of substances called elements. Chemistry studies elements and how they are joined together to make new substances.

The periodic table
The periodic table shows all the elements. They are arranged in a special order. Each group of elements has its own name.

Group of elements
26 Fe Iron

BURSTING WITH LIFE!
Our planet is bursting with life from tiny insects to towering trees and our machines. Our bodies are made of tiny things in the same way that plants and animals are.

CLASSIFYING ANIMALS
Invertebrates
Animals that don't have a backbone such as insects and earthworms.

Vertebrates
Animals that have a backbone such as birds and mammals.

Animal babies
All animals have babies. Some babies are born with all the things they need to live. Some babies are born with just an egg. Some babies are born with just a seed. Some babies are born with just a spore.

WHAT IS SCIENCE?
Science helps us to learn about the world and find answers to our questions about it. There are lots of types of science. Each one looks at a different part of the world around us.

All kinds of science!
Each scientific area has its own special name. Here are just a few of them.

What is a scientist?
Scientists are people who study science. They come up with new ideas, then test them with experiments to discover new information. Some scientists work in laboratories, but others work outdoors. A few scientists even work in space!

What's the big idea?
An idea that a scientist wants to test is called a hypothesis. Scientists don't make guesses. They use things they already know or can see called observations, to help them come up with their hypotheses.

What is data?
Data is the word scientists use for the information they gather when they do an experiment. The data might be measurements, or things that they have noticed.

What is this scientist doing?
Observation

What is this scientist doing?
Step by step
Scientists work very carefully to avoid making mistakes. They often carry out an experiment several times, following the same steps.

What is this scientist doing?
Physics
Physics studies energy, forces and what things are made of.

BIOLOGY
Biology studies things that are alive.

CHEMISTRY
Chemistry studies chemicals and what they do.

EARTH SCIENCE
Earth science studies the planet we live on, including its land, oceans, climate and atmosphere.

Little Explorers: Food

FABULOUS FOOD!

Food is for growing your body, but what if it could be for growing your brain too? It's the energy that helps you move, think and play. Before you eat just of food you need to get it to the right place in your body.

Carbohydrates This is what gives you energy. It's found in bread, pasta, rice, potatoes, and other starchy foods. Carbohydrates are found in many fruits and vegetables.

Proteins Proteins are what your body needs to grow and repair itself. They are found in meat, fish, eggs, and dairy products. Proteins are also found in many fruits and vegetables.

Fats Fats are what your body needs to store energy. They are found in oils, butter, and fatty foods. Fats are also found in many fruits and vegetables.

Vitamins Vitamins help your body work as it should. There are 13 kinds of vitamins and they are found in many foods.

Minerals Minerals are what your body needs to stay healthy. They are found in many foods, including fruits and vegetables.

Water Water is what your body needs to stay hydrated. It's found in many drinks, including water, juice, and milk.

THE DIGESTION QUESTION

How does the food you eat get into your body? How does it get to the right place? How does it get to the right place? How does it get to the right place?

Mouth The mouth is where you eat. It's where the food goes first. The mouth is also where you swallow the food.

Esophagus The esophagus is the tube that carries food from the mouth to the stomach. It's also where you swallow the food.

Stomach The stomach is where the food is broken down. It's where the food is broken down into smaller pieces.

Small intestine The small intestine is where the food is absorbed. It's where the food is absorbed into your body.

Large intestine The large intestine is where the food is eliminated. It's where the food is eliminated from your body.

LET'S CELEBRATE!

Although food is important for our survival, it has become so much more than that. It's something that we enjoy. Food has become a big part of many celebrations around the world.

Dia This is a festival of light celebrated in India. It's a festival of light and hope. It's a festival of light and hope.

Peanuts Peanuts are common allergens. They are found in many foods, including peanut butter, peanut oil, and peanuts. They are found in many foods, including peanut butter, peanut oil, and peanuts.

FOOD PROBLEMS

The production of food can have an impact on our planet. We need to think about the environment when we eat. We need to think about the environment when we eat.

The plastic problem Plastic packaging is everywhere. It's everywhere. It's everywhere. It's everywhere. It's everywhere. It's everywhere.

Let's go! Animals are one of the best helpers on the farm. They are one of the best helpers on the farm. They are one of the best helpers on the farm.

Let's go! Bees are one of the planet's greatest helpers. Here's why. They are one of the planet's greatest helpers. Here's why.

FINDING FOOD

Usually, food appears in front of you at the dinner table. But how did it make its way there? Where does food come from? Many foods go on a journey from farms to factory to finished feast. Some food comes from much closer to home too!

Fantastic farms A farm is a place where animals might be used to produce food and crops are grown there too. Some farms grow all sorts of fruits and vegetables. Some grow wheat. Others raise cows for milk and hens for eggs.

Combine harvester These machines cut and collect crops. They also separate the parts that can't be eaten from the parts that can.

Orchard An orchard is an area of land where lots of trees are planted to grow fruit.

Tractor The tractor is the most important machine on the farm. Different attachments can be added for different jobs.

Factory stop Food grown on farms might go to a factory to be packaged up. It then travels to a supermarket. For people like you to buy and enjoy.

In the garden Some food is grown in your very own garden! People can grow delicious vegetables, such as carrots and cucumber, and fruits, such as cherries and plums, at home. Local farms might grow food you like too.

Busy bees Bees are one of the planet's greatest helpers. Here's why. They are one of the planet's greatest helpers. Here's why.
