- Cover: matt Lam, spot UV + holo foil

Raising the Roof

[illegible][illegible]

A MUSICAL HISTORY

The history of Western classical music can be divided into different time periods, each of which were marked by unique styles and influences. Here's a quick timeline:

Early Music c. 500-1500

Early music, also known as medieval music, was the first style of Western classical music. It was characterized by simple, monophonic melodies and was often used in religious settings. Key figures include Gregor the Great and Hildegard of Bingen.

The Renaissance Era 1500-1600

The Renaissance era was a period of great cultural and artistic achievement in Europe. In music, this was reflected in the development of new styles, such as the madrigal and the opera. Key figures include Josquin des Prez and Claudio Monteverdi.

The Baroque Era 1600-1750

The Baroque era was a period of great artistic and cultural achievement in Europe. In music, this was reflected in the development of new styles, such as the opera and the concerto. Key figures include Johann Sebastian Bach and Antonio Vivaldi.

The Classical Era 1750-1825

The Classical era was a period of great artistic and cultural achievement in Europe. In music, this was reflected in the development of new styles, such as the symphony and the concerto. Key figures include Wolfgang Amadeus Mozart and Ludwig van Beethoven.

The Romantic Era 1825-1900

The Romantic era was a period of great artistic and cultural achievement in Europe. In music, this was reflected in the development of new styles, such as the symphony and the concerto. Key figures include Franz Liszt and Richard Wagner.

The Twentieth Century 1900-2000

The Twentieth century was a period of great artistic and cultural achievement in Europe. In music, this was reflected in the development of new styles, such as the symphony and the concerto. Key figures include Igor Stravinsky and Benjamin Britten.

Contemporary 2000-Present

Contemporary music is a term used to describe music that is created in the present. It is characterized by a wide range of styles and influences, and is often used to describe music that is created in the present.

THE INGREDIENTS OF SOUND

What is music made of? As a composer, I have lots of different ingredients. I can include to make my musical dish. Music can be broken down – so let's tuck in, into parts that work together to make a piece whole – so let's tuck in and see what music is made of...

NOTES

Every individual sound you hear with a specific pitch is a "note". On a page of sheet music, these are represented by dots of different shapes. Western classical music is a tradition that is written down – notated – in contrast to something like jazz, which is based on improvisation (making up your own notes as you play).

C D E F G A B C

RYTHM

The sequence of long and short notes, and the patterns these make together, is called rhythm. When we clap or we tap our feet, this is a rhythm.

TEXTURE

The layers of a piece of music. Some pieces might spotlight a single instrument for a few moments: an exposed feature. Others might include a whole orchestra playing at the same time in an explosion of sound: a dense texture.

TEMPO

The speed of a piece. Often indicated by a single Italian word like *allegro* (fast), *andante* (at a walking pace) or *adagio* (slow).

TIMBRE

The character and quality of sound created by an instrument. A single instrument can have a wide variety of sounds. For example, a horn played at the bottom of its range sounds like an angry growl, but high up it can sound angelic.

MELODY

The melody is the tune. As a piece unfolds, the original melody might be stretched or shortened, heard backwards or in a different rhythm, or played by another instrument.

RANGE

Instruments are categorised by how high or low they can play - a flute plays much higher notes than a bassoon (a bass instrument that plays much lower notes). Some instruments like the piano or violin have a very broad range with both high and low notes.

PHRASE

A sentence in music - it's made up of just a few musical notes.

Movement

A piece of music might be broken down into different movements, like the chapters of a novel. There are often three or four movements.

Listen to it!

Consider all of these areas of music to listen out for in a piece and ways of describing what you hear, every work can be broken down into these key areas. Ask yourself: is this moment showing a flick or a full thrust? Is this harmony dissonant [clashing]? All these ingredients work together to make a piece distinct and emotive.

LINE

Sheet music is like a map of a piece, telling us who plays what and when; on the page, each instrument has its own line.

HARMONY

The sound made when multiple notes are played at the same time. These combinations of notes are called chords. These can be consonant [pleasant sounding, with the notes fitting together nicely] or dissonant [harsh sounding, where the notes clash].

DYNAMICS

Composers can specify changes in volume: this is called dynamics. Pieces often contrast a loud burst of notes with a quiet one. This creates a sense of contrast and dialogue.

pp p mp mf f ff

REGISTER

How high or low the music 'sits' for an instrument. If lots of the notes are very high, we'd call it a high 'register'.

Discover 12 upheavals which changed the world forever.

- A thought-provoking exploration of the idea of revolution: how upheavals, ideas and technology have irreversibly changed the world.
- Content split into three distinct chapters: power struggles, social revolutions and new technology. Chapter openers discuss what the word “revolution” means in each of these contexts, while showing how the idea is linked across all areas.
- Written by long-time author and history enthusiast Joan Lennon, who is a Royal Literary Fund Fellow at Dundee University and regular contributor on The History Girls blog. Her previous non-fiction book *Talking History* was shortlisted for the SLA Information Book Award 2023 and longlisted for the UKLA Book Awards 2023 in the Information Books category.

Revolutions

A Symphony of Sound
