Hello Happy! Mindful Kids

I'M FEELING KINDA...

How are you feeling? Whether you're happy, sad or full of joy, it's okay. All emotions are okay - which is a good thing as we have loads of them!

Circle a name and draw the expression to fit the emotion. To fit the expression.

I'M FEELING Happy
 I'M FEELING Sad
 I'M FEELING
 I'M FEELING
 I'M FEELING
 I'M FEELING

BRAIN BREAK!

To calm your emotions and feelings you need to spend your time. To do this you need to give your brain a break by switching off from the every day things which have caused difficulty in your head.

The first thing to do is to get rid of the noise around you and learn to be alone. It may feel uncomfortable at first, but here's what you need to do:

- Turn off the TV
- Turn off any video games
- Turn off any radio or stereo
- Put smart technology, phones, tablets etc away
- Close windows to the outside world so you can't hear car engines and sirens
- Take yourself away from people talking

Once you've done this...

Sit still in a comfortable position, close your eyes and concentrate on breathing in and out, in and out.

Now, in this quiet calm state ask yourself how you are feeling.

See yourself the chance to recognize any underlying feelings of anger, sadness, worry or anxiety and give yourself permission to feel that feeling.

For example say:

"I am feeling SAD. I feel SAD because I had a bad day at school. I will not always feel SAD, but right now I feel SAD and that's OK."

Repeat the sentence 5 times.

FEELING FEELINGS

Sometimes your feelings don't want to stay inside. Sometimes they want to JUMP AND EMERGE OUT!

Write where and how you feel when you're sad in this diary.

Write where and how you feel when you're angry in this diary.

MY BEATING HEART

Take some time to get to know your heart rate. Take your pulse by holding the two fingers nearest your thumb to your neck or to the underside of your wrist.

Like all emotions, anger releases chemicals in your brain, which then cause changes in your body that you can feel. One of these changes is an increased heart rate.

TRY TAKING YOUR PULSE WHEN YOU HAVE...

- JUST WOKEN UP
- RUN ON THE SPOT FOR 3 MINUTES
- HAD A ROW WITH SOMEONE
- EATEN A BIG MEAL
- JUST BEGUN A PIECE OF HOMEWORK
- READ A CHAPTER OF A BOOK
- BEEN FOR A WALK

Write down the beats per minute for each of these.

REMEMBER! Anger can be positive. Many people have made good changes in the world because they felt so angry about something they used the anger to spur them on to positive action. What makes you angry in the world? How could you make a difference?

DID YOU KNOW? Your heart rate will also increase when you are stressed or afraid.

THE ANGER ICEBERG

Anger never exists on its own - there are always underlying emotions causing it. Add more emotions to the underwater part of the iceberg to show the other emotions which might lead to you feeling angry.

TAKE A BREATH!

Try this breathing exercise to help you relax:

STEP 1

Make sure you are sitting comfortably in a quiet and safe place. When you feel ready, close your eyes. Notice your breathing. Think about how it feels breathing in and breathing out. Try to breathe in through your nose and out through your mouth.

STEP 2

Place your hand on your tummy and focus on the feeling of your stomach rising and falling with each breath. When you breathe in, quietly say 'in' to yourself, and when you breathe out, quietly say 'and out' to yourself.

STEP 3

Concentrate on nothing but your breathing and try to let go of any other thoughts you may have.

When you've had lots of practice at the breathing exercise, see if you can think about a happy memory at the same time. This way, your happy memory will take up all the space in your brain, and there won't be any room for the worries.

BUY NOTHING DAY

You watch do you consume and throw away in a single day? The answer probably varies on different days of the week and at different times of the year. In quality part of the world, we make waste and pollution a problem. Talk a day and ask everyone in your household to agree to make it a buy nothing day.

Set down with your family and make a list of all the things you buy in a normal week. It could include everything from your food to magazines, clothes and gifts.

For you also make a promise to make do with what you have. Do not buy anything that you don't need. How does the day go?

At the end of the day, make a list of the money you saved. How much less did you spend than last week?

Now consider the future. How could you buy less and waste less in your everyday life?

WHY DO YOU THINK PEOPLE BUY SO MUCH STUFF?

DO YOU THINK THEY NEED EVERYTHING THAT THEY BUY WHY?

THINK POSITIVE

When it comes to creating a greener, cleaner world there is a lot to do, but lots of good things are also happening every single day, right across the globe. It's a really nice idea every time you find out about something positive. Being happy to help the environment. It could be locally or in a wider world.

PROJECT PROTECT

Many animal species being today are endangered and some have already become extinct. Name some and their actions that animals face today.

As we spread out across more and more of the planet, we destroy natural habitats, making it very difficult for some species to survive.

Do your bit to find out about animal conservation! Pick an endangered species that you care about, then find out about it either online or at the library. Now write about it on these project pages.

THE TYPE OF ANIMAL I WANT TO PROTECT IS:

DRAW A PICTURE OF IT HERE:

DRAW AN ARROW TO SHOW WHERE THIS ANIMAL LIVES:

Reasons why this animal is endangered:

Three things that I can do to help:

This animal is amazing because:

I CAN SEE A RAINBOW

MAKE A BEAUTIFUL RAINBOW OUT OF OLD MAGAZINES

- 1 Tear up the pages of a glossy magazine or come back with small scraps of paper.
- 2 Sort the scraps into coloured piles.
- 3 Fold some glue, then stick the main mosaic pieces onto the rainbow arch.

PAPER IS SIMPLE AND EASY TO RECYCLE. INSTEAD OF THROWING YOUR COPIES AND MAGAZINES AWAY, CONSIDER:

- Using them to cover your schoolbooks
- Creating party, multicultural bunting
- Flashing them into card to make gift tags
- Cutting out headlines letters and creating cool slogan posters

OUR FRIEND, THE EARTH

Colour in our amazing planet!

The Earth gives us a home to live in, food to eat, medicine to heal us, water to drink, air to breathe, and energy to run our machines, towns and cities. It is more important than ever to treasure and protect it.

WHAT IS THE ENVIRONMENT?
When we talk about the environment, we mean everything in the world around us. This includes the air, water, plants, animals and food chains.

ONE AND ONLY
The Earth is the only planet in the Solar System with exactly the right conditions for us to survive. It is not too hot, nor too cold, allowing it to support life.

NATURAL HABITATS
The Earth is very diverse. There are mountains and deserts, forests and oceans, ice caps and grasslands. This rich variety provides homes for countless species of plants and animals.

UNDER THREAT
Over the course of many centuries, the Earth's human population has grown. We have had a massive impact on the environment in which we live. We have created pollution on the land, in the skies and in the seas.

CLIMATE CHANGE
One of the biggest consequences of pollution is climate change - the Earth is warming up faster than ever before. Scientists believe that this warming could seriously disrupt the way that our environment works.

ALL CONNECTED
The Earth is finely balanced. The water cycle, weather, plants and animals, and the passing of the seasons, all work in harmony with each other. A small change to any of these can affect others massively.

WE'VE ONLY GOT ONE EARTH. IT'S OUR JOB TO TRY TO PRESERVE THIS UNIQUE ENVIRONMENT. LET'S DO IT TOGETHER!

Be Kind! Mindful Kids Global Citizen

BEHAVIOUR BOTHER

When someone says or does something unkind, it can make you feel sad, bad or angry. Being unkind to someone can make you feel negative emotions too. You may also feel guilty for your actions.

YOU ARE REALLY RUBBISH AT RUNNING!
I wish I could run as fast as you.

ONLY BABIES AREN'T ALLOWED TO PLAY OUT IN THE PARK AFTER SCHOOL.

YOU ARE NO FRIENDS!
I'm not sure if people really like me.

HE WORRIED THAT ELIS MIGHT PICK ON ME NEXT!
I wish I didn't have to play out, but I don't really want to go home because Mum and Dad aren't getting on.

ELISA SAYS NO ONE SHOULD TALK TO YOU BECAUSE YOU'RE SNEAKY.

It is important to understand that you are not a bad person just because you have said or done something negative. The important thing is to apologise and to do things differently next time.

Look at the people below. Draw a line between the matching thought and speech bubble.

It can be difficult but useful to think about your own mistakes. Write down some of the unkind things you have said or done in the past on the label tape. Think about how the other person felt, any consequences of your unkindness and what you have learned since.

WHAT CAN WE LEARN ABOUT OURSELVES?
Being unkind is often a reaction to anger rather than malice. It's important not to take unkindness personally, but not do you have to tolerate it. Take some time to look at yourself, and think about when and why you've been unkind.

SMILING IS CONTAGIOUS

A heartfull smile is the first step on the road to kindness. Smiling is a simple way to lighten anyone's day. It is also contagious. The more you smile, the more you'll make others smile.

Draw a smile on each face once you've given each of these practical activities a try.

Smile when you walk into a shop.

Smile at your teacher.

Smile at a neighbour.

Smile while you talk on the phone, even though they can't see you.

Smile at the person who answers your post.

STUCK FOR SMILES?
On a separate piece of paper, write down three silly things that have happened this week and share the funny stories with anyone who needs a giggle.

#CHOOSE KIND

With online bullying and social media issues often in the spotlight, it's easy to forget that technology can also be a force for good. Sending an email or a text message is a super-fast way to spread some joy.

Think about the people in your life and then write some short but positive messages on these screens.

WORD TO THE WISE!
Check with a trusted adult before sending text or online messages.

How To Draw Pets

Heads, paws and claws

Pets have many different types of heads, paws and claws. Studying and sketching the detailed features of a pet will help you with your final drawings.

Quick pencil sketches can help you to understand the structure of paws and claws.

Look for areas where hair should be darker and also for changes of texture.

The more you study a subject and your final drawing is the more accurate your drawing will become.

Always consider the lightness and add tone to the darker areas.

19

Using photos

Drawing from photographs of pets can help you develop both your drawing skills and your eye for detail.

Make a tracing of a photograph and line up all of squares that it occupies.

Use this as a guide for drawing your own pet. You can use the grid to help you get the proportions right. You can also use the grid to help you get the proportions right. You can also use the grid to help you get the proportions right.

18

Dog

Dogs are often kept as domestic pets but some, like sheepdogs, are used for work.

Draw a circle for the head. These two circles help you to find the shape of the front legs and the chest for the top of the front legs.

Add a small rectangle to the side.

Draw the shape of the tail with curved lines.

Sketch in the construction lines to show the structure.

Rabbit

Rabbits are popular pets that are usually kept outside in a hutch.

Draw a circle for the head and two ovals for the shoulders and rear.

Draw two long connecting curved lines.

Add two front legs using straight lines, and use half circles for the front paws.

Sketch in the basic shape of the rear legs and paws.

Position the rabbit's ears on its head.

Add a little round tail.

Add the head details: draw in the ears, eyes, small nose and mouth.

Add tone to the rabbit's body to give the impression of fur.

Add shading to areas where the light would not reach.

How To Draw Christmas

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Small Drawings can include a vast amount of detail and focus. They're especially good for a range of light and dark effects to create drawing.

Medium Drawings are the best equipment and materials will not necessarily make the best drawing - only practice will.

Big Big drawings are a great way to get a sense of scale and to experiment with different drawing techniques.

Light Light and dark in a drawing will set the tone for the drawing. Use a range of different drawing materials to create different effects. Use a range of different drawing materials to create different effects.

Dark Dark drawing can be used to create a sense of depth and to draw attention to the most important parts of the drawing.

Light Light drawing can be used to create a sense of depth and to draw attention to the most important parts of the drawing.

Christmas alphabet

It is fun to create your own hand-drawn lettering. Here is an example of how to design a job: Christmas-themed alphabet. Use it for cards, invitations and posters, or use it to spell out someone's name to personalise special gifts.

There are some ideas for a Christmas-themed alphabet.

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z AEOA&

The construction lines for the letter 'E' are shown to help you understand how to draw it.

You can create a wide variety of different Christmas letters, such as a gift-wrapped letter or a letter with a reindeer or a snowman.

Santa Claus' sleigh

The modern idea of Santa's sleigh and the names of his reindeer comes from the poem *The Night Before Christmas*. It was originally published anonymously in 1823 in the *New York Sentinel*. Rudolph was not invented until 1939, when he featured in a booklet that was sold at Montgomery Ward department stores.

Draw in the reindeer using legs.

These additional reindeer heads can be used for letters, but not for the sleigh.

Add the harness and reins.

Use the drawing to create a range of different Christmas letters, such as a gift-wrapped letter or a letter with a reindeer or a snowman.

Perspective

If you look at anything from different viewpoints, you will see that the part that is closest to you looks larger, and the part furthest away from you looks smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

The vanishing point (VP) is the place in a perspective drawing where parallel lines appear to meet. The position of the vanishing point depends on the viewer's eye level.

Two-point perspective uses two vanishing points, one for lines running along the length of the subject, and one on the opposite side for lines running across the width of the subject.

How To Draw Planes

Fokker DR1 Triplane

Triplanes have three sets of wings. One of the most famous triplanes was the Fokker Drivestricher (DR1), used by Germany in WW1 to battle the British Sopwith triplane. It had a single pilot and was armed with two machine guns. Its most famous pilot was Baron Manfred von Richthofen.

Try drawing a triplane from a side view. Take a line from the center of the top wing to the center line of the plane.

Add lines for the fuselage.

Add lines for the propeller.

Add lines for the landing gear.

Add lines for the tail.

Add lines for the tail wings.

The DR1 was a difficult aircraft to fly and was regarded as a machine strictly for experienced pilots.

Background
 Adolf Lipp found a certain death and living plane for his brother right in his backyard. He had a plane that was made of wood and was called the 'Lipp's Flying Machine'. It was built for his brother and was used for his own flying lessons and for his own flying school.

Baron Manfred von Richthofen was born in Breslau, Germany (now Wrocław, Poland) and died on 21 April 1918, aged 28, in the skies over Vaux-en-France, France. The German military has lost Baron's Flying Machine (The Red Baron's Plane) to the French and it is now in the hands of the British Royal Air Force. The plane was used by the British Royal Air Force in the First World War.

14

Supermarine S6B

The Supermarine S6B Seaplane became the fastest aircraft on Earth in September 1931 when it achieved a record-breaking speed of 656 km/h.

Try drawing the tail wing. Draw the fuselage. Draw the landing gear. Draw the propeller. Draw the tail.

The S6B was designed by Reginald D. Miles, who later became famous for designing the iconic Supermarine Spitfire fighter. It was powered by a Rolls-Royce K engine and was a single-engine biplane.

When you draw the propeller, remember to draw the blades. The propeller was made of wood and was painted black.

Light and dark
 Start with a light pencil sketch. Then use a darker pencil to add more detail. Use a sharp pencil to add fine lines and shading.

In September 1931, the Supermarine S6B won the Schneider Trophy Seaplane Contest for speed over a set course. It was the first seaplane to do this.

15

Airbus A380

The double-decker Airbus A380 is able to carry up to 853 passengers, making it the world's largest passenger-carrying airliner.

Draw the fuselage. Draw the tail. Draw the wings. Draw the landing gear. Draw the propellers.

The first flight took place on 27 April 2005. It was the world's largest passenger-carrying airliner.

Think 3-D
 Draw a 3-D model of the plane. Use a ruler and compass to draw the lines. Use a sharp pencil to add fine lines and shading.

When you draw a 3-D model, remember to draw the hidden lines. Use a light pencil to draw the hidden lines. Use a darker pencil to draw the visible lines.

16

Sketching

We can't always rely on our memories, so it's important to look around and find real-life things to draw. Taking a sketchbook with you wherever you go is one of the best ways to improve your drawing skills. Learn to observe objects carefully: notice how they move, how they're made, and how they work. What you draw should be based on what you've seen.

Sketching
 A sketch that has taken a short time can say as much as a careful drawing that has taken many hours.

Sketching models
 Try drawing model planes. It will be good practice for seeing and observing. The larger the model is, the better it is to draw because its proportions are better.

Aviation museums are filled with many different types of plane from past and present.

You will be able to walk all the way around many of the planes and see them from different perspectives.

How To Draw Fantasy Art

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Paints are used either from a palette, and come in a wide range of colours. Add an adult to prepare paint. Change with water to control changing.

Watercolours are used either by mixing water with a drawing fluid with wax crayons.

Sketching is a kind of drawing that normally uses black ink.

Charcoal is very soft and makes very dark black drawings. Add an adult to prepare charcoal. Change with water to prevent smudging.

Clay comes in many colours and is used to make figures and objects. Don't worry about smudging as there is no limit to the drawing as it dries.

Character proportions

This page shows some of the more popular fantasy figures and their proportions compared to a normal human figure. On average, the length of a human head should fit eight times into its body length. When you draw a fantasy figure anything goes - so let your imagination go wild.

Draw these simple figures to help you choose a good position for your character. You can measure the position of a character by using character poses as a reference.

Man beasts

Combining a human figure with an animal's head can create a great hybrid monster. You can get inspiration by drawing from life models. Photos from sports movies and figure reference manuals are a good source too. Why not try putting a snake or insect's head on a human body - see what you can create!

Warrior A human that takes on the shape of a wolf when there is a full moon.

Dragon man. The body of a man with the characteristics of a dragon's tail.

Amazon warrior

This powerful female figure is a classic action fantasy character. She must look strong and powerful but retain her femininity and beauty.

Sketch cylinder shapes for each arm which join at the elbow.

Add the basic shape of the hand.

Draw in ovals for the head, neck, body and hips.

Draw a long curved line to start the position of the body.

Legs: add the curved lines of the upper and lower leg, indicating the knee joint.

Add the foot shape and direction.

Drawing hands
Practise sketching your own hands in different positions. This will help you draw expressive hands on your characters.

Add the sword using straight lines.

Sketch in the position of the ears, nose and mouth.

TATTOOS

In the early nineteenth century over 90 per cent of all sailors sported a tattoo. They marked milestones in a sailor's voyage and served as reminders of the places they had been. But mainly, tattoos were believed to be good luck talismans.

Spot the only tattoo opposite that matches this one above.

HOW TO DRAW A PIRATE CAPTAIN

Copy this step-by-step pencil drawing

Use simple ovals to draw in the main shapes of Blackbeard's head. Add construction lines for his pirate hat.

Draw in more details like the skin on his hat, his eyes, eyebrows, nostrils, ears and nostrils. Finally add his teeth and draw in the hairs of his beard.

Start drawing in his hat and his facial features.

Add Blackbeard's eyepatch, beard and moustache.

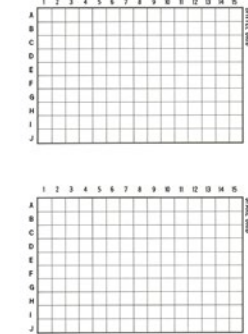

Use a soft pencil to build up tone by crosshatching.

BATTLESHIPS

YOU WILL EACH NEED:
2 grids (see page 81)
A black pen
A red pen

BATTLESHIP RULES (2 PLAYERS)

- Both players have two grids. Each player must secretly place (either horizontally or vertically) a Square rigger, a Brigantine, a Schooner and two Sloops on one grid. Use the key below to see how many squares each type of ship should fill.
- Players take turns to call out a 'co-ordinate' (a letter and a number) to guess where their opponent's ships are placed. Your opponent checks their grid, and shouts 'hit' if you have guessed correctly and 'miss' if not.
- Keep a record of all your guessed co-ordinates on your spare grid. Use black for a 'miss' and red for a 'hit'.
- The first player to sink all his enemy's ships is the winner.

BUCCANEERS

Colour in this picture.

Most early buccaneers lived on Hispaniola (now Haiti) and other nearby Caribbean islands during the 17th and 18th centuries. They regularly attacked Spanish vessels and made their headquarters on Tortuga island.

ON THE LEVEL

If you pour water into a series of tubes that are connected together, the water finds the same level in all the tubes.

All tubes connected to jar A should have water reaching the same level as in jar A. All tubes connected to jar B should have the same water level as jar B.

But some of these tubes have been drawn wrongly! Can you find which tubes contain water at the wrong level?

HINT: It will help if you colour all the tubes connected to jar A red, and all the tubes connected to jar B blue.

TRICKS WITH LIGHT

Optical illusions are tricks that fool the eye. They make you see something that's not really there.

Hold the book up in front of you and tilt it to the left or right. What happens to the curved lines in the drawing below?

Can you see a triangle here? There isn't one in the drawing!

Stare very hard at the picture below, then slowly move it towards and away from you. What happens?

Are the sides of the square straight or curved? Check with a ruler.

Are the horizontal lines level or slanting?

PUT THE FISH IN THE BOWL

1. Trace the fish and bowl onto card. Colour them in, then cut out the two circles.

2. Tape the two pictures to a pencil, so both pictures face out.

3. Spin the pencil between your hands. Can you see the fish in the bowl?

DID YOU KNOW? Optical illusions aren't just for fun - they help scientists to understand how the eyes and brain work together.

GERMINATION

Most plants grow from seeds. If you plant a seed in a moist, sunny place it will start to germinate (sprout).

The tough seed coat splits open (1). First, a little root grows downwards (2), so the plant can take in water. Then, a little green shoot begins to grow upwards towards the sky (3). The new plant spreads its leaves in the light (4).

You can plant bean sprouts yourself and see how fast they grow!

BEANPROUT MAZE
Help the new shoot find its way through the soil towards the light.

RISING AIR

When air is heated it rises. This is what makes a hot-air balloon rise. Air spirals upwards in currents called thermals where the sun heats the air near the ground.

This experiment uses the warm air from a radiator.

Colour the snakes, then cut them out to make a spiral. Gently pull the head and tail apart. Use scissors to make a hole in the nose, and attach a string. Hang the snakes over a radiator and watch them spin around!

What was the deadliest dinosaur?

Spinosaurus was the largest meat-eating dinosaur known to have existed. Unlike other dinosaurs, Spinosaurus must have been semi-aquatic (partly water-dwelling).

Spinosaurus's head and teeth were shaped like a crocodile's. Its broad feet and flat skin were ideal for paddling in water.

The deadliest dinosaur would have eaten sharks and crocodiles, as well as land animals.

Why do giraffes have long necks?

Giraffes are the tallest animals in the world. Their long legs and necks help them to reach tasty leaves at the tops of trees.

Acacia tree

Giraffes have long thick tongues that can curl leaves from branches. They spend most of the day eating. An adult consumes about 34 kilograms (75 pounds) of leaves and twigs each day.

The leaves of the acacia tree are one of the giraffe's favorite foods.

How Do I Hear?

Sound is vibrating air. When it reaches your ears it makes your eardrums vibrate. These vibrations send messages to your brain, which then makes sense of what kind of sound you are hearing.

Semiochlar
Cubals
Eardrum
Skull

Splash!
Woof!
Toot toot!
Bang!

Most of your ear is inside your head. The part of the ear you can see is like a funnel for sounds.

Why Do I Have Two Ears?
Having an ear on either side of your head helps you to work out the direction of sound better. It means you can hear better too.
