Hello Happy! Mindful Kids

I'M FEELING KINDA...

How are you feeling? Whether you're happy, sad or full of joy, it's okay. All emotions are okay - which is a good thing as we have loads of them!

Circle a name and draw the expression to fit the emotion. To fit the expression.

I'M FEELING Happy

I'M FEELING Sad

I'M FEELING

BRAIN BREAK!

To calm your emotions and feelings you need to spend your time. To do this you need to give your brain a break by switching off from the every day things which have caused difficulty on your head.

The first thing to do is to get rid of the noise around you and learn to be silent. It may feel uncomfortable at first, but here's what you need to do:

- Turn off the TV
- Turn off any video games
- Turn off any radio or stereo
- Put smart technology, phones, tablets etc away
- Close windows to the outside world so you can't hear car engines and sirens
- Take yourself away from people talking

Once you've done this, sit still in a comfortable position, close your eyes and concentrate on breathing in and out, in and out.

Now, in this quiet calm state ask yourself how you are feeling?

See yourself the chance to recognize any underlying feelings of anger, sadness, worry or anxiety and give yourself permission to feel that feeling.

For example say, "I am feeling SAD. I feel SAD because I had a bad day at school. I will not always feel SAD, but right now I feel SAD and that's OK."

Repeat the sentence 5 times.

FEELING FEELINGS

Sometimes your feelings don't want to stay inside. Sometimes they want to JUMP AND TINKLE OUT!

Write where and how you feel when you're sad on this dummy.

MY BEATING HEART

Take some time to get to know your heart rate. Take your pulse by holding the two fingers nearest your thumb to your neck or to the underside of your wrist.

Like all emotions, anger releases chemicals in your brain, which then cause changes in your body that you can feel. One of these changes is an increased heart rate.

TRY TAKING YOUR PULSE WHEN YOU HAVE...

- JUST WOKEN UP
- RUN ON THE SPOT FOR 3 MINUTES
- HAD A ROW WITH SOMEONE
- EATEN A BIG MEAL
- JUST BEGUN A PIECE OF HOMEWORK
- READ A CHAPTER OF A BOOK
- BEEN FOR A WALK

Write down the beats per minute for each of these.

REMEMBER! Anger can be positive. Many people have made good changes in the world because they felt so angry about something they used the anger to spur them on to positive action. What makes you angry in the world? How could you make a difference?

DID YOU KNOW? Your heart rate will also increase when you are stressed or afraid.

THE ANGER ICEBERG

Anger never exists on its own - there are always underlying emotions causing it. Add more emotions to the underwater part of the iceberg to show the other emotions which might lead to you feeling angry.

Draw or stick a picture of somewhere you feel completely safe and happy.

TAKE A BREATH!

Try this breathing exercise to help you relax:

STEP 1

Make sure you are sitting comfortably in a quiet and safe place. When you feel ready, close your eyes. Notice your breathing. Think about how it feels breathing in and breathing out. Try to breathe in through your nose and out through your mouth.

STEP 2

Place your hand on your tummy and focus on the feeling of your stomach rising and falling with each breath. When you breathe in, quietly say 'in' to yourself, and when you breathe out, quietly say 'and out' to yourself.

STEP 3

Concentrate on nothing but your breathing and try to let go of any other thoughts you may have.

When you've had lots of practice at the breathing exercise, see if you can think about a happy memory at the same time. This way, your happy memory will take up all the space in your brain, and there won't be any room for the worries.

Be Green! Mindful Kids Global Citizen

BUY NOTHING DAY

You watch do you consume and throw away in a single day? The answer probably varies on different days of the week and at different times of the year. In quality part of the world, we make waste and pollution a problem. Talk a day and ask everyone in your household to agree to make it a buy nothing day.

Set down with your family and make a list of all the things you buy in a normal week. It could include everything from your food to magazines, clothes and gifts.

For one day make a promise to make do with what you have. Do not buy anything. How do you feel? How does the day go?

At the end of the day, make a list of the money you saved. How much less did you spend than last week?

Now consider the future. How could you buy less and waste less in your everyday life?

WHY DO YOU THINK PEOPLE BUY SO MUCH STUFF?

DO YOU THINK THEY NEED EVERYTHING THAT THEY BUY WHY?

THINK POSITIVE

When it comes to creating a greener, cleaner world there is a lot to do, but lots of good things are also happening every single day, right across the globe. Fill in a sticky note every time you find out about something positive. Being happy to help the environment. It could be locally or in a wider world.

WRITE ONE:

What's the natural news? Talk to your friends? Check out local community initiatives?

PROJECT PROTECT

Many animal species being today are endangered and some have already become extinct. Name three and their actions are the biggest threat that animals face today.

As we spread out across more and more of the planet, we destroy natural habitats, making it very difficult for some species to survive.

Do your bit to find out about animal conservation! Pick an endangered species that you care about, then find out about it either online or at the library. Now write about it on these project pages.

THE TYPE OF ANIMAL I WANT TO PROTECT IS:

DRAW A PICTURE OF IT HERE:

DRAW AN ARROW TO SHOW WHERE THIS ANIMAL LIVES:

Reasons why this animal is endangered:

Three things that I can do to help:

This animal is amazing because:

I CAN SEE A RAINBOW

MAKE A BEAUTIFUL RAINBOW OUT OF OLD MAGAZINES

- 1 Tear up the pages of a glossy magazine or come back with small scraps of paper.
- 2 Sort the scraps into coloured piles.
- 3 Fold some glue, then stick the main mosaic pieces onto the rainbow arch.

PAPER IS SIMPLE AND EASY TO RECYCLE. INSTEAD OF THROWING YOUR COPIES AND MAGAZINES AWAY, CONSIDER:

- Using them to cover your schoolbooks
- Creating party, multicultural bunting
- Flashing them into card to make gift tags
- Cutting out headlines letters and creating cool slogan posters

OUR FRIEND, THE EARTH

Colour in our amazing planet

The Earth gives us a home to live in, food to eat, medicine to heal us, water to drink, air to breathe, and energy to run our machines, towns and cities. It is more important than ever to treasure and protect it.

WHAT IS THE ENVIRONMENT?
When we talk about the environment, we mean everything in the world around us. This includes the air, water, plants, animals and food chains.

ONE AND ONLY
The Earth is the only planet in the Solar System with exactly the right conditions for us to survive. It is not too hot, nor too cold, allowing it to support life.

NATURAL HABITATS
The Earth is very diverse. There are mountains and deserts, forests and oceans, ice caps and grasslands. This rich variety provides homes for countless species of plants and animals.

UNDER THREAT
Over the course of many centuries, the Earth's human population has grown. We have had a massive impact on the environment in which we live. We have created pollution on the land, in the skies and in the seas.

CLIMATE CHANGE
One of the biggest consequences of pollution is climate change - the Earth is warming up faster than ever before. Scientists believe that this warming could seriously disrupt the way that our environment works.

ALL CONNECTED
The Earth is finely balanced. The water cycle, weather, plants and animals, and the passing of the seasons, all work in harmony with each other. A small change to any of these can affect others massively.

WE'VE ONLY GOT ONE EARTH. IT'S OUR JOB TO TRY TO PRESERVE THIS UNIQUE ENVIRONMENT. LET'S DO IT TOGETHER!

BEHAVIOUR BOTHER

When someone says or does something unkind, it can make you feel sad, bad or angry. Being unkind to someone can make you feel negative emotions too. You may also feel guilty for your actions.

YOU ARE REALLY RUBBISH AT RUNNING!
I wish I could run as fast as you.

ONLY BABIES AREN'T ALLOWED TO PLAY OUT IN THE PARK AFTER SCHOOL.

YOU HAVE NO FRIENDS!
I'm not sure if people really like me.

HE'S WORRIED THAT ELIS MIGHT PICK ON ME NEXT!
I wish I didn't have to play out, but I don't really want to go home because Mum and Dad aren't getting on.

ELISA SAYS NO ONE SHOULD TALK TO YOU BECAUSE YOU'RE SNEAKY.

It is important to understand that you are not a bad person just because you have said or done something negative. The important thing is to apologise and to do things differently next time.

Look at the people below. Draw a line between the matching thought and speech bubble.

It can be difficult but useful to think about your own mistakes. Write down some of the unkind things you have said or done in the past on the below page. Think about how the other person felt, any consequences of your unkindness and what you have learned since.

WHAT CAN WE LEARN ABOUT OURSELVES?
Being unkind is often a reaction to anger rather than malice. It's important not to take unkindness personally, but not do you have to tolerate it. Take some time to look at yourself, and think about when and why you've been unkind.

SMILING IS CONTAGIOUS

A heartfull smile is the first step on the road to kindness. Smiling is a simple way to lighten anyone's day. It is also contagious. The more you smile, the more you'll make others smile.

Draw a smile on each face once you've given each of these practical activities a try.

Smile when you walk into a shop.

Smile at your teacher.

Smile at the person who answers your post.

Smile at someone who is not in your school year.

Smile at a neighbour.

Smile while you talk on the phone, even though they can't see you!

STUCK FOR SMILES?
On a separate piece of paper, write down three silly things that have happened this week and share the funny stories with anyone who needs a giggle.

#CHOOSE KIND

With online bullying and social media issues often in the spotlight, it's easy to forget that technology can also be a force for good. Sending an email or a text message is a super-fast way to spread some joy.

Think about the people in your life and then write some short but positive messages on these screens.

WORD TO THE WISE!
Check with a trusted adult before sending text or online messages.

How To Draw Pets

Heads, paws and claws

Pets have many different types of heads, paws and claws. Studying and sketching the detailed features of a pet will help you with your final drawings.

Quick pencil sketches can help you to understand the structure of paws and claws.

Look for areas where hair should be darker and also for changes of texture.

The more you study a subject and your final drawing is the more accurate your drawing will become.

Always consider the light source and add tone to the darker areas.

10

Using photos

Drawing from photographs of pets can help you develop both your drawing skills and your eye for detail.

Make a tracing of a photograph and line up all of the important lines.

Use this as a guide to draw your own drawing. You can use a pencil to trace the lines and then use a pen or marker to draw the final drawing. You can also use a pencil to draw the final drawing.

12

Dog

Dogs are often kept as domestic pets but some, like sheepdogs, are used for work.

Draw a circle for the head. These two circles help you to find the shape of the front legs and the chest for the shape of the back legs.

Add a small rectangle to the side.

Draw the shape of the tail with curved lines.

Sketch in the dog's ears, adding to the back and front.

Sketch in the dog's body, adding to the back and front.

Add lines to the front to define the front paws.

Sketch in the dog's legs, adding to the back and front.

Sketch in the dog's tail, adding to the back and front.

Complete the drawing of the dog.

18

Rabbit

Rabbits are popular pets that are usually kept outside in a hutch.

Draw a circle for the head and two ovals for the shoulders and rear.

Draw two long connecting curved lines.

Add two front legs using straight lines, and use half circles for the front paws.

Sketch in the basic shape of the rear legs and paws.

Position the rabbit's ears on its head.

Add a little round tail.

Add the head details: draw in the ears, eyes, small nose and mouth.

Add tone to the rabbit's body to give the impression of fur.

Add shading to areas where the light would not reach.

How To Draw Cartoons

Perspective

If you look at any object from different viewpoints, you will see that the part that is closest to you looks larger, and the part furthest away from you looks smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

If you begin you will understand it better, you should draw the horse in perspective.

The vanishing point (V.P.) is the point in a perspective drawing where parallel lines appear to meet. The number of vanishing points depends on how many lines are drawn at right angles to the picture plane.

Two-point perspective drawing

For a good perspective drawing, the vanishing points should be far from the picture plane. The lines should be drawn at right angles to the picture plane. The lines should be drawn at right angles to the picture plane.

How To Draw Christmas

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Small Drawings can include a vast amount of detail and focus. They're especially good for different grades of pencil to get a range of light and dark effects in your drawing.

Pen and ink Remember the best equipment and materials will not necessarily make the best drawing - only practice will!

Ballpoint pens Add light and dark to a drawing with an ink pen can be tricky. You will need to be very confident about the lines you draw and the way you use the pen. It's best to use a ballpoint pen for the lightest lines and a fountain pen for the darkest lines.

Charcoal Charcoal is a drawing material that can be used in many ways. It's best to use charcoal for the lightest lines and a fountain pen for the darkest lines.

Christmas alphabet

It is fun to create your own hand-drawn lettering. Here is an example of how to design a job, Christmas-themed alphabet. Use it for cards, invitations and posters, or use it to spell out someone's name to personalise special gifts.

There are some ideas for a Christmas-themed alphabet.

NP The numbers in this line can be used to represent your own name in your alphabet.

EE You can create a wide variety of different Christmas letters, such as a gift-wrapped letter or a letter that looks like a gift.

ABCDEFGHIJKL MNOPQRSTUVWXYZ AEOA&

Santa Claus' sleigh

The modern idea of Santa's sleigh and the names of his reindeer comes from the poem *The Night Before Christmas*. It was originally published anonymously in 1823 in the *New York Sentinel*. Rudolph was not invented until 1939, when he featured in a booklet that was sold at Montgomery Ward department stores.

Draw in the white with red ink.

Start by drawing a rectangle for Santa's sleigh. Add a curved position line for the reindeer.

Draw in the curved shape of the sleigh, its carriage and corners.

Use the construction lines to help you position the reindeer. Draw in the reindeer's heads, antlers, whiskers, body and legs with curved lines to draw.

Now draw a Santa Claus with sack for the presents.

Add the harness and headstall.

Use the drawing to make other colors and features. Add shading to the back view of reindeer legs.

Draw in the reindeer's neck legs.

Now add a reindeer head with antlers and harness.

Add the harness of reindeer.

Use the drawing to make other colors and features. Add shading to the back view of reindeer legs.

Perspective

If you look at anything from different viewpoints, you will see that the part that is closest to you looks larger, and the part furthest away from you looks smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

The vanishing point (VP) is the place in a perspective drawing where parallel lines appear to meet. The position of the vanishing point depends on the viewer's eye level.

Two-point perspective uses two vanishing points: one for lines running along the length of the subject, and one on the opposite side for lines running across the width of the subject.

How To Draw Planes

Fokker DR1 Triplane

Triplanes have three sets of wings. One of the most famous triplanes was the Fokker Driveler (DR1), used by Germany in WW1 to battle the British Sopwith triplane. It had a single pilot and was armed with two machine guns. Its most famous pilot was Baron Manfred von Richthofen.

Take a line from the center of the nose. Draw the center line of the fuselage.

Draw the nose and cockpit.

Add lines for the fuselage.

Add lines for the wings.

Draw the tail and rudder.

Add lines for the landing gear.

The DR1 was a difficult aircraft to fly and was regarded as a machine only for the experienced pilot.

Background
 The DR1 was designed by German designer Reinhold Platz for Fokker. It was the first triplane to be used in combat. It was used by the German Air Force during WW1. The DR1 was the most successful triplane of WW1. It was used by the German Air Force during WW1. The DR1 was the most successful triplane of WW1.

Supermarine S6B

The Supermarine S6B Seaplane became the fastest aircraft on Earth in September 1931 when it achieved a record-breaking speed of 656 km/h.

Draw the fuselage.

Draw the wings.

Draw the tail.

Draw the landing gear.

The S6B was designed by Supermarine's chief designer, Rex Handley. It was the first seaplane to be used in combat. It was used by the Royal Navy during WW2. The S6B was the fastest seaplane of WW2.

Light and dark
 Start with a light pencil sketch. Then use a darker pencil to add detail. Use a sharp pencil to add fine detail.

Airbus A380

The double-decker Airbus A380 is able to carry up to 853 passengers, making it the world's largest passenger-carrying airliner.

Draw the fuselage.

Draw the wings.

Draw the tail.

Draw the landing gear.

The first flight took place on 27 April 2005. It was the first time that a double-decker aircraft had ever taken to the sky.

Think 3-D
 Draw your sketch in 3-D. Use a ruler to draw the lines. Use a sharp pencil to add detail.

Sketching

We can't always rely on our memories, so it's important to look around and find real-life things to draw. Taking a sketchbook with you wherever you go is one of the best ways to improve your drawing skills. Learn to observe objects carefully: notice how they move, how they're made, and how they work. What you draw should be based on what you've seen.

Sketching
 A sketch that has taken a short time can say as much as a careful drawing that has taken many hours.

Sketching models
 Try drawing model planes. It will be good practice for seeing and observing. The larger the model is, the better it is to draw because its proportions are better.

Aviation museums are filled with many different types of plane from past and present.

You will be able to walk all the way around many of the planes and see them from different perspectives.

How To Draw Fantasy Art

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Paints are used either from a palette, and come in a wide range of colours. Add an adult to prepare paint. Change with water to control changing.

Watercolours are used either by mixing water with a drawing fluid with wax crayons.

Sketching is a kind of drawing that normally uses black ink.

Charcoal is very soft and malleable and is used for quick sketches. Add an adult to prepare charcoal. Change with water to prevent smudging.

Clay comes in many colours and is used to make figures and objects. Don't worry about smudging as there is no need to be fast on the drawing as it dries up.

Character proportions

This page shows some of the more popular fantasy figures and their proportions compared to a normal human figure. On average, the length of a human head should fit eight times into its body length. When you draw a fantasy figure anything goes - so let your imagination go wild.

Draw these simple figures to help you choose a good position for your character. You can measure the position of a character by using character poses as a reference.

Man beasts

Combining a human figure with an animal's head can create a great hybrid monster. You can get inspiration by drawing from life models. Photos from sports movies and figure reference manuals are a good source too. Why not try putting a snake or insect's head on a human body - see what you can create!

Woman is a human that takes on the shape of a wolf when there is a full moon.

Dragon man: The body of a man with the characteristics of a dragon's tail.

Amazon warrior

This powerful female figure is a classic action fantasy character. She must look strong and powerful but retain her femininity and beauty.

Sketch cylinder shapes for each arm which join at the elbow.

Add the basic shape of the hand.

Draw in ovals for the head, neck, body and hips.

Draw a long curved line to start the position of the body.

Legs: add the curved lines of the upper and lower leg, indicating the knee joint.

Add the foot shape and direction.

Drawing hands
Practise sketching your own hands in different positions. This will help you draw expressive hands on your characters.

Add the sword using straight lines.

Sketch in the position of the ears, nose and mouth.

Sketch in the shape of the hair mass.

Indicate the position and shape of the breasts.

Add the costume's draped cloth using simple lines.

Finish the detail on the sword. Small broken lines give the impression of shining metal.

Add shape, tone and details to the hair.

Draw in bracelets and armbands.

Add tone to the legs.

Draw in the top of the costume.

Complete the details on the boots.

Add shade to areas where the light would not reach.

How To Draw Caricatures

Different treatments

Changing one feature can completely transform a face. For example, the size and shape of a chin can make a character look more or less bold. Superheroes often have large, pronounced chins, representing strength and power.

Amplify prominent features.

Add some detail to the face including bigger nose, hair, wrinkles, lines, creases, shading to make eye darker areas.

Exaggerate the top and base of the nose, elongate the nostrils and chin. There is little facial furrows.

Draw the forehead. It has been considerably stretched and would add extra age to the character.

The nose and size of the chin make the face look grumpy and full of pain.

Sampled character
You can create a caricature using any odd idea. The shape of the nose is exaggerated with different hair styles.

Insulting vs complimenting

The angles and facial expressions chosen can radically change the look of a caricature to create an insulting or a complimentary expression of character or personality.

Good features are the best. Exaggerate or make them deeper, pointed nostrils.

Henry VIII was the King of England between the years of 1509 and 1547. He had a very large nose.

Think drawing the facial features and not so hard. Make sure the features are the same and not looking angry.

That hair is very messy. It is almost as if it is falling out. To make it more messy, you can draw it in a way that it is falling out. It is almost as if it is falling out.

Draw the drawing on a piece of paper. It is almost as if it is falling out. To make it more messy, you can draw it in a way that it is falling out. It is almost as if it is falling out.

Macaroni

In the mid-18th century, certain well-to-do men would dress in high-fashion clothes and wear large powdered wigs. They were known as macaroni and made great subjects for caricature.

Great exaggerate the height of the hair. There are wigs so high that the hair on the head could be seen with a sword.

Draw a small face, but the hair is large. Make the nose and big nose and add a sword to the side.

Draw the hair on the head. Make the hair large and add a sword to the side.

Add a sword to the side. Make the hair large and add a sword to the side.

Add a sword to the side. Make the hair large and add a sword to the side.

Add a sword to the side. Make the hair large and add a sword to the side.

Add a sword to the side. Make the hair large and add a sword to the side.

Looking like your pet

Scientists have found that we deliberately choose pets that look similar to us! Comparing owner and pet can be a fun caricature exercise, particularly if you exaggerate one common feature.

It's easier to choose just one similar feature to distort - large teeth or nose shapes both work very well.

Think about your composition. By placing both characters face to face, their features are mirrored, making the similarity more obvious.

Draw in a basic oval and construction lines as a guide.

For the owner, roughly sketch in the eyes, eyebrows, ears, nose and mouth. The dog's features will have exactly the same placement.

Exaggerate the features so that the facial creases will match up with the dog's saggy jaws.

When drawing the noses, make them both of a similar shape and size.

Add tone, shading in areas where light does not reach.

Finish off both caricatures by completing all details.

TATTOOS

In the early nineteenth century over 90 per cent of all sailors sported a tattoo. They marked milestones in a sailor's voyage and served as reminders of the places they had been. But mainly, tattoos were believed to be good luck talismans.

YOU WILL EACH NEED:
2 grids (see page 81)
A black pen
A red pen

BATTLESHIP RULES (2 PLAYERS)

- Both players have two grids. Each player must secretly place (either horizontally or vertically) a Square rigger, a Brigantine, a Schooner and two Sloops on one grid. Use the key below to see how many squares each type of ship should fill.
- Players take turns to call out a 'co-ordinate' (a letter and a number) to guess where their opponent's ships are placed. Your opponent checks their grid, and shouts 'hit' if you have guessed correctly and 'miss' if not.
- Keep a record of all your guessed co-ordinates on your spare grid. Use black for a 'miss' and red for a 'hit'.
- The first player to sink all his enemy's ships is the winner.

ON THE LEVEL

If you pour water into a series of tubes that are connected together, the water finds the same level in all the tubes.

All tubes connected to jar A should have water reaching the same level as in jar A. All tubes connected to jar B should have the same water level as jar B.

But some of these tubes have been drawn wrongly! Can you find which tubes contain water at the wrong level?

HINT: It will help if you colour all the tubes connected to jar A red, and all the tubes connected to jar B blue.

TRICKS WITH LIGHT

Optical illusions are tricks that fool the eye. They make you see something that's not really there.

Hold the book up in front of you and tilt it to the left or right. What happens to the curved lines in the drawing below?

Can you see a triangle here? There isn't one in the drawing!

Stare very hard at the picture below, then slowly move it towards and away from you. What happens?

Are the sides of the square straight or curved? Check with a ruler.

Are the horizontal lines level or slanting?

PUT THE FISH IN THE BOWL

1. Trace the fish and bowl onto card. Colour them in, then cut out the two circles.

2. Tape the two pictures to a pencil, so both pictures face out.

3. Spin the pencil between your hands. Can you see the fish in the bowl?

DID YOU KNOW? Optical illusions aren't just for fun - they help scientists to understand how the eyes and brain work together.

GERMINATION

Most plants grow from seeds. If you plant a seed in a moist, sunny place it will start to germinate (sprout).

The tough seed coat splits open (1). First, a little root grows downwards (2), so the plant can take in water. Then, a little green shoot begins to grow upwards towards the sky (3). The new plant spreads its leaves in the light (4).

You can plant bean sprouts yourself and see how fast they grow!

BEANPROFIT MAZE
Help the new shoot find its way through the soil towards the light.

RISING AIR

When air is heated it rises. This is what makes a hot-air balloon rise. Air spirals upwards in currents called thermals where the sun heats the air near the ground.

This experiment uses the warm air from a radiator.

String

Warm air rising

Colour the snakes, then cut them out to make a spiral. Gently pull the head and tail apart. Use scissors to make a hole in the nose, and attach a string. Hang the snakes over a radiator and watch them spin around!
