Up in the Canopy

Explore the jungle layer by layer with a huge fold-out surprise at the end.

- James Aldred's book *The Goshawk Summer* won the 2022 James Cropper Wainwright Prize for Nature Writing.
- Written from the perspective of real-life Emmy-nominated cameraman and explorer, James Aldred
- Stunningly illustrated - with artwork as rich and dense as the rainforest itself
- Huge fold-out tree at the back of the book, which readers can pore over.
- Matt lam and spot UV finishes.

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- **Winner of the 2024 SLA Information Book Award Judges' Choice Category 8-12**
- As told by UK Sepsis Ambassador Patrick TJ Kane
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics
- The forefront of diversity - featuring stories from celebrities and people around the world

INTRODUCTION

Imagine a world where all around us are people with bionic limbs, machines attached to their heads and cameras for eyes. This same world has cyborgs who can hear colours and communicate via their teeth, and even people who use robotic skeletons to walk elsewhere. In this world, children have to hear with external ears, and people have without legs can walk using ones made of metal and carbon fibre. Some people use chips inside their bodies to get into their offices, or to pay for their coffees on their way into work. This world is full of incredible people who are using technology to do amazing things. But the most amazing part of all is that this world is the one we already live in.

Technology has changed all of our lives, and not just with the smartphones or tablets that we use. For many people, particularly those with disabilities, recent technological advances have created the means of the greatly improved, and reached a place of possibility. The idea of a bionic limb, for example, is a great example of this. It's not just a prosthetic limb, but a bionic limb, and it's a great example of the future we already live in.

THE FIRST PROSTHESES

For as long as humans have been around, we have been losing limbs, or we have been without them. Whether due to an injury or congenital impairment (a condition that is present from birth), people have been trying to replace missing arms, legs, fingers and toes for thousands of years. Early prostheses were made of wood, but over time, as the technology improved, they became more sophisticated.

The earliest known example of a prosthesis (an artificial body part) belonged to an Egyptian mummyman over 2,000 years ago. This wooden prosthesis replaced the big toe on his right foot, and even had a ridge in the shape of a nail carved into it to make it appear more realistic. It would have been strapped onto his foot with string, and it's believed that it would have greatly altered his balance.

Count Götz von Berlichingen Perhaps the most famous example of an early prosthesis is that belonging to the German knight Count Götz von Berlichingen, who lost his hand during battle in the early 1500s. Count Götz asked local craftsmen to make an iron hand with digits, fingers and thumb that could lock into place, so he could hold a horse's reins or a weapon. This hand was so effective that it inspired the phrase, 'He rode with an iron fist'.

WHAT IS BIONIC?

Bionics refers to the transfer of technology between artificial objects and living organisms. The word 'bionics' comes from a combination of the Greek words for 'bio' (life) and 'nautics' (navigation). It was coined by American engineer and science fiction writer Jack E. Stone in the 1960s.

When Stone, the American engineer, first coined the word 'bionics', it was intended to describe the transfer of technology from biology to technology. In 1960, Stone presented an ambitious lecture and reported a gathering of experts on the topic of how new technologies could be discovered by looking at natural systems. This kind of research is known as biomimicry. A lot of the bionics that we see today are the result of biomimicry, which is the process of looking at nature for inspiration and then applying that knowledge to technology.

BIONIC LIMBS AND IMPLANTABLE DEVICES

A prosthesis can be internal or external to the body. The ways in which people can replace parts of their body can largely be broken down into two groups: bionic limbs and implantable devices.

'Implantable devices' is a broad term describing anything that is surgically implanted inside the body. Because surgery is required to gain access, these devices cannot easily be removed, and are typically designed to stay inside the body forever. Examples of these include pacemakers and cochlear implants.

Bionic limbs are artificial body parts, which are intended to replace the function of a human body part, such as an arm or a leg. These are attached to the body, usually via a belt, strap or socket, and can be easily taken on and off by their wearer.

If either a bionic limb or an implant has batteries that need to be charged, they are called 'active'. Those that do not are called 'passive'. Some implants, such as cochlear implants, need batteries. These sit outside the body and attach to the implant via a wire, so the user does not need surgery every time the battery runs out (see pages 28–29).

This visually extraordinary book presents the history of money as it has never been seen before – from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

RICH AND POOR

THE HISTORY OF WEALTH

Wealth is the difference in wealth between the richest and the poorest. It has been around since the beginning of time. In the early days, wealth was measured in terms of land and livestock. As time went on, it became more complex, including money, property, and even knowledge.

WEALTH CONCENTRATION

One of the biggest reasons for inequality is the way that wealth tends to get concentrated in the hands of a few. This is often due to the fact that wealthy people have more resources to invest and grow their wealth. This can lead to a situation where a small number of people own most of the wealth in a country.

CAUSES OF INEQUALITY

There are many reasons for wealth inequality. Some people have more opportunities than others to get ahead. Some people have more resources to invest and grow their wealth. Some people have more connections and influence than others. All of these factors can contribute to wealth inequality.

WHAT'S WRONG WITH WEALTH INEQUALITY?

Having too much wealth in the hands of a few can be a problem. It can lead to a situation where the wealthy have more power and influence than the rest of the population. This can lead to a lack of social mobility and a sense of unfairness.

GOLDEN YEARS

When a country enjoys the gold standard, its currency becomes convertible into gold at a fixed rate. For example, in the early 20th century, the gold standard was used by many countries. This meant that the value of a country's currency was tied to the value of gold.

AN INTERNATIONAL SYSTEM

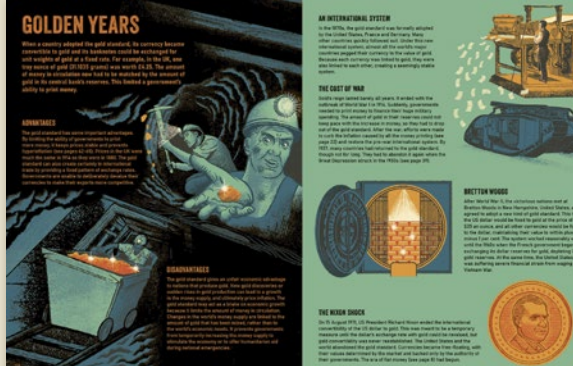

In the 19th century, the gold standard was a key part of an international system. It allowed countries to trade with each other without the need for a common currency. This system was based on the fact that gold was a universally accepted form of wealth.

THE COST OF WAR

After World War I, the gold standard was abandoned. This was due to the fact that the war had caused a massive loss of gold reserves for many countries. Without gold, countries could no longer maintain the gold standard.

THE GOLD DUCK

In the 1930s, the gold standard was abandoned. This was due to the fact that the war had caused a massive loss of gold reserves for many countries. Without gold, countries could no longer maintain the gold standard.

FROM COUNTERFEIT COINS TO FALSE NOTES

For as long as money has existed, people have tried to forge it. Counterfeiting is the act of creating fake money. It has been around since the beginning of time. In the early days, people would create fake coins or notes. As time went on, the technology improved, and people started creating more sophisticated counterfeit money.

FIRST COUNTERFEITS

The first counterfeit coins were created in ancient times. They were often made of a different metal than the real coins. This made them easier to identify. However, as the technology improved, counterfeit coins became more difficult to detect.

THE FIRST FALSE NOTES

The first false notes were created in the 17th century. They were often made of a different material than the real notes. This made them easier to identify. However, as the technology improved, false notes became more difficult to detect.

THE FIRST COUNTERFEIT COINS

The first counterfeit coins were created in ancient times. They were often made of a different metal than the real coins. This made them easier to identify. However, as the technology improved, counterfeit coins became more difficult to detect.

FINANCIAL MARKETS

At regular markets people buy and sell things like food and clothing. At financial markets, people trade money-related assets. These include stocks and bonds. Stocks are shares in a company that the company sells to raise capital. Shareholders are paid dividends (regular sums paid out of the company's profits). Bonds are certificates issued by a government or corporation, promising to repay borrowed money at a fixed rate of interest. Financial markets can be physical places, like the New York Stock Exchange, or they can take place online.

THE FIRST BONDS

In the twelfth century, the government of Venice came up with a new way of raising money to fight a war. It offered its citizens certificates, known as prestiti, in exchange for a loan, promising to pay them back by a certain time, plus 5 per cent interest. These were the first government bonds. Before long they became a popular investment, and a market developed for the buying and selling of prestiti.

THE FIRST STOCKS

Founded in 1602, the Dutch East India Company was the first company to sell shares to the public. The money it raised from this funded its voyages to the East Indies, and it paid its shareholders out of the profits from its trade in enslaved people and spices. The shares were traded in the Amsterdam Stock Exchange, also established that year.

THE DAILY NEWS

OCTOBER 1929 NEW YORK CITY

THE WALL STREET CRASH

FINANCIAL MARKETS CAN BE VOLATILE. A RUMOUR OR A MINOR PIECE OF ECONOMIC NEWS CAN CAUSE BIG SWINGS IN PRICES. THE DESIRE TO MAKE MONEY OR AVOID LOSING IT IS A POWERFUL ONE, AND A HERD INSTINCT CAN SOMETIMES TAKE OVER WITH PEOPLE STAMPEDING TO BUY OR SELL. THE MOST SPECTACULAR EXAMPLE OF THIS WAS THE WALL STREET CRASH OF 1929.

THE ROARING TWENTIES

The 1920s was boom time in the United States. There was a spirit of optimism in the country and it became fashionable to play the stock market. Share prices soon rocketed to a point where they represented a value far greater than the total worth of their companies' assets. This was now a mania – a period when everyone, from wealthy financiers to common investors, lost touch with reality and seemed to believe that prices could keep rising forever.

AFTER EFFECTS

As a result of the crash, businesses were bankrupted, banks closed, millions lost their jobs and the world plunged into a deep and lasting economic depression. This had a big political impact. In Europe, extreme right-wing parties exploited the misery of mass unemployment, blaming 'foreigners' such as Jews. Germany's Nazi Party rose to power in 1933. The consequences for the world would be devastating.

DISASTER

The crash occurred at the end of October 1929, during three calamitous days of trading at the New York Stock Exchange on Wall Street, when huge numbers of people decided collectively it was time to sell. With so many sellers, there were few buyers, and share prices plummeted. In those three days, billions of dollars were wiped off the value of American companies. And over the following years the market kept on falling. By 1932, stocks had lost nearly 90 per cent of their pre-crash value.

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

INTRODUCTION

When I was a kid growing up in Mississippi and Tennessee in the United States, I learned early on about social injustices that exist in the world.

I remember defending myself against bullies who did not like me because of my dark skin. I recall watching my favourite TV shows and learning about South African apartheid, police brutality, the global AIDS crisis and historic movements for civil rights through episodes that dared to highlight these causes. As I recognised the power of the media in expanding my knowledge, I began to create art in my teens that reflected the issues happening around me - 9/11, Hurricane Katrina, the Jena Six trials. And by the time I found myself as an arts organiser on the ground in the 2014 Ferguson Uprising, I felt equipped with the experience to deploy art as a way of bringing people together to raise our collective voices.

Throughout this book, you will learn the art of protest through the work of artists, experiences and campaigns that have been created across the world to protest social injustices and advocate for the rights and liberties of diverse people. You will learn about the art of protest, and how it can be used to challenge the status quo, convey collective goals and persuade others to take action.

With this, you might be more aware of the issues, causes and global concerns that matter to you. Our society constantly experiences waves of social movements, campaigns for justice and rights against climate change and disease on a global scale. And as what language the world will encourage and inspire you to use art in a language and movement that we hope you champion your chosen cause.

01 WHY ART MATTERS IN SOCIAL MOVEMENTS

MY STORY AS AN ARTIST IN FERUGSON

On August 9, 2014, my life - like those of many in my home city of St. Louis, Missouri - was forever changed when I learned that a teenager had been killed by a police officer while walking along the streets of his grandmother's neighbourhood. His name was Michael Brown Jr., and his body lay in the street for four and a half hours as news media captured photos and people crowded around in dismay. Over the days that followed, hundreds of people began to march in protest across the small municipality of Ferguson, Missouri, where he lived. I was one of them, and after daily - and when nightly - protesting, I wanted to do something more.

At that time, I was an advocate of our local contemporary art movement. I had learned an intense lesson in social work, and its importance in addressing the needs and desires of a community. I had learned that art is a powerful tool for social change, and that it can be used to challenge the status quo, convey collective goals and persuade others to take action.

I applied and amplified the stories of people involved in the uprising. And my best friend, David, and I were part of the first group to set up a protest in the street. We were part of the first group to set up a protest in the street. We were part of the first group to set up a protest in the street.

THE MIRROR CASKET

All the projects that the artists and I created are meant to be seen by the public. The art of protest is a form of communication that is meant to be seen by the public. The art of protest is a form of communication that is meant to be seen by the public. The art of protest is a form of communication that is meant to be seen by the public.

WHY ART MATTERS IN SOCIAL MOVEMENTS

Most art that is created in protest will not be acquired by museums, nor is this usually the goal of activists and artists working together. Most often, we aim to reflect and respond to the immediate causes that are grounded in our social movements. And whether used in a march, a social media campaign or as guerrilla art in a public space, protest art helps social movements inform the public of issues, challenge the status quo, convey collective goals and messaging, imagine a vision of change and persuade others to take action.

Informing the Public
When used in public spaces, protest art serves as a mighty tool to help people learn about social issues. As an example, *Chalked Unarmed* was a guerrilla art series by public performance artist and *Mirror Casket* collaborator Mallory Nezam. The project invited citizen collaborators to create chalk outlines, like police outlines of murder victims, on pavements across their communities. Each outline was filled with the name, date and location of a person who had been murdered by a police officer.

Making Messages Visible
In protests across the globe, people tend to write and illustrate their calls to action on cardboard, posters or banners.

At marches, where it can be hard for target audiences to hear each individual's voice, signage allows each person's message to be seen, and the results are often full of creativity and passion.

Imagining a Vision for Change
Protest art effectively helps people develop a language and create a vision for how outcomes in a community can be better. While projects like the *Mirror Casket* challenge viewers to look inward to see themselves differently and empathise with those whose lives have been lost, other works may propel people forward to imagine a new reality.

Influencing Action
Efforts like *Decolonise This Place* and *Theatre of the Oppressed* use performances, flash mobs and "spect-acting" (whereby a member of the audience also becomes part of the performance) to engage with people across the world and explore how justice and equality can become reality. Each experience that the artists facilitate is directly tied to demands for organizations and government leaders to change a policy, boycott unjust spaces, disinvest from harmful companies or stop violent or inequitable public actions. For example, *Theatre of the Oppressed* ran a performance in 2016 entitled *The Housing Circus*, based on the real life experiences of different individuals trying to receive housing benefits. Told from the perspective of LGBTQ+ individuals and war veterans living in New York City, *Theatre of the Oppressed* used this performance to suggest policy changes.

Challenging the Status Quo

One of the common impacts of protest art is to push against the norms and rules of society. Artists like Elizabeth Vega, Ai Weiwei, Banksy and others have mastered using art as dissent. Such works often take existing materials and cultural artefacts and re-purpose them, or they might remix messages from advertisements, buildings, monuments, news articles or political documents in ways that point to their hypocrisy, outdated messages or other flaws.

My First Book of Weather

A bright first book about the weather

- *My First Book of Nature*, the first title in the series, has sold over 60,000 copies worldwide (as of July 2022)
- Comprised of four clear sections
- Sample contents: **What is weather?** Up in the air/The sun/The wind; **What's the weather today?** Land and sea/Nature's weather warnings/A storm is on the way; **World Weather** Cold Earth/Warm Earth/Climates; **Extreme Weather** Wild Weather Events/Hot and cold/Weird weather
- Includes a search-and-find element to look for in every scene and 4 tear-out wipe-clean spotting cards, with writing and drawing activities
- Consulted and *endorsed* by the Royal Meteorological Society
- Illustrated by Taiwanese artist Cinyee Chiu - bold, bright, fun and appealing to early readers

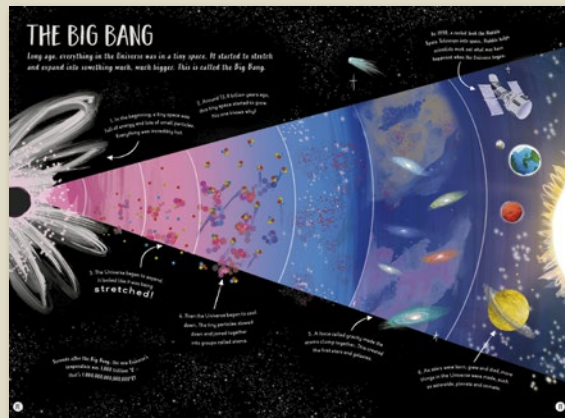

My First Book of Space

Explore the wonders of the cosmos in this gorgeously illustrated first guide to space.

- Split into four clear sections for guided reading and learning about the topic
- Charming illustrations by award-winning illustrator Aaron Cushley (won the SLA Information Book Award 2021 for *How Many Mice Make an Elephant*)
- Large format for lap-time reading, with busy pages to pore over again and again
- Includes a search-and-find element featuring a shooting star on every page
- *My First Book of Nature* has sold over 64,000 copies worldwide (as of September 2023)

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney
