Jane Foster's Baby's First Stories: 0-3 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble, each book perfectly suits your baby's needs at every stage of their first year
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books usually have little text. Reading aloud soothes babies from birth, promotes baby-carer bonding, builds children's language skills, and increases the chances that parents will continue to read to babies as they grow older
- Perfect for parents who use the Wonder Weeks App, read Your Baby Week by Week, or use milestone cards to mark big moments
- 4 books in the series, all featuring the same animal characters: 0-3 months; 3-6 months; 6-9 months; 9-12 months

Jane Foster's Baby's First Stories: 6–9 months

A series that grows with your baby

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *6-9 months* has black, white, red and blue art, as from 6 months, babies can see most colours. The story relates to routines, to reflect little ones starting to wean, and settling into more regular patterns.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Jane Foster's Baby's First Stories: 6-9 months

Bunny's Lunch Time

It's lunch time, Little Bunny,
Let's clean your paws and face.
Here's your spoon and here's your bib
And here's your bunny plate!

Jane Foster's Baby's First Stories: 9-12 months

A beautifully illustrated series that grows with your baby.

- Written in consultation with Early Years Expert, Lizzie Noble
- Fills a gap in the market: parents are told to read to their baby every day, but black and white books often have little text. Reading aloud soothes babies, promotes bonding, builds language skills, and increases the chance that parents will read to babies as they grow older. *9-12 months* has black, white, red, blue and yellow art, as babies' eyesight becomes more like our own. The stories introduce questions and spotting elements for older babies who can notice small details and respond to basic questions.
- Perfect for parents who use the Wonder Weeks App, read *Your Baby Week by Week*, or use milestone cards to mark big moments

Baby Steps: It's Bedtime, Bear

Lift the flaps, find the toys!

- Illustrated by London-born illustrator, Richard Merritt.
- Big, easy-to-lift card flaps help children develop fine motor skills: with 5 big flaps to lift.
- A gentle story to build early language skills - perfect for children just starting to say their first words.
- Encourages little ones with their bedtime routine.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Baby Steps: Faces and Feelings

**Trace the shape,
name the feeling -
features a real mirror!**

- Illustrated by London-born illustrator, Richard Merritt.
- With trace-the-trail elements on every page AND a mirror!
- A simple rhyming text is fun to read aloud and easy for little ones to join in with.
- This book will help little ones learn to recognise and name a range of emotions.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid-19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Baby Steps: Move Like Me

Slide the tab, copy the action!

- Illustrated by London-born illustrator, Richard Merritt.
- A simple rhyming text is fun to read aloud and easy for little ones to join in with.
- With 9 sliders to pull and push to make the animals on every page move about.
- This book will help little ones learn to name body parts and follow simple instructions.
- Moving the sliders helps children develop fine motor skills; copying the actions builds gross motor skills.
- Featuring S&BÂ®'s innovative anti-bacterial finish on all pages: 100% natural, plant based and sustainable, offering 99.99% germ control including covid 19, MRSA, E-coli, mold and yeast. This green formulation is safe for babies and contains no microplastics.

Match the Shape

A first words book that's also a shape-sorter!

- An innovative board book design that lets toddlers place three chunky shapes into matching slots. Three shapes attach to the book via ribbon: circle, square, triangle.
- A die-cut in the cover showcases the novelty and keeps the pieces securely in place when the book is shelved.
- Matching the shapes aids children in their fine motor skills, hand-eye coordination and problem-solving skills.
- Introduces familiar first words on every spread.
- Illustrated in vivid colour and effortless style by Polish artist Susie Hammer.
- Also in the series: Match the Colour (2025).

Bessie's Bees

An uplifting story about starting nursery with a courageous neurodiverse character at its centre.

- Bringing debut, neurodiverse author George Kirk to the Templar picture book list, allowing us to grow our range of underrepresented voices and experiences.
- While there has been an increase in positive representations and neurodiverse voices in middle-grade fiction, this is yet to be seen in the trade picture book market. Templar can be one of the first to champion neurodiverse voices and stories in this space.

Oh No, Flo!

A fantastically funny farmyard fiasco to read aloud!

- Taking recognisable and familiar farm animal characters to create a funny and fresh picture book for the very young.
- Featuring bold and bright illustrations from Mike Byrne, well-known for *This Book is Full of Unicorns*.
- Catherine Cawthorne is fresh to the picture book world but is already making her mark with: *We Went to Find a Woolly Mammoth* (Hachette, 2023) and *The Big Bad Wolf Investigates: Fairy Tales* (Bloomsbury, 2024).
- The light-hearted text and repeated 'OH NO, FLO!' refrain to join in with, makes it the perfect book to share with a group or individual child.
- Cover treatments: matt lam and SPUV.

A hilarious rhyming romp that perfectly encapsulates how being HANGRY really makes you feel!

- Bringing debut author Kathryn Wanless as well as established, commercial talent Fred Blunt to the Templar list with his wit and humour.
- Exploring a theme that isn't currently seen in the picture book market - there are plenty of books about being hungry OR angry, but not both!
- This story uses humour as a conversation starter for children to talk about the very real, intense emotions that come with hunger.
- The book acts as a reminder that we all get hangry, even grown-ups, but it's how we deal with those feelings that matters.
- Cover treatment: matt lam, SPUV and pantone.

Yetis Don't Exist!

A FUR-tastically funny rhyming adventure!

- Bringing rising talent, Kate Thompson, to the Templar list. She has two picture books with Welbeck and two new picture books coming with PRH in September 2024, and 2025.
- Bringing established quirky, commercial illustrator Loretta Schauer to the list with her bright palette and fantastic furry creatures. Loretta has previously worked with publishers like Ladybird, Farshore and Bloomsbury.
- Like *The Best Bear Tracker*, this book has a hilarious visual narrative alongside the text with the yetis and human explorer just missing each other more than once!
- The book's wintry, snowy setting offers the ideal seasonal gift without the story being explicitly Christmassy!
- Cover treatments: matt lam and foil.

My Name is a Gift

A heartfelt and touching celebration of the names we're given.

- Zeshan Akhter's debut picture book is filled with love and carries an important message - the perfect gift for any child.
- This lyrical ode to our names is brought to life by Åsa Gilland's expressive and detailed illustrations.
- Zeshan's second picture book with Templar, *Noah's New Home*, is due to publish in 2025.
- Includes a spread where the reader is asked about their name and has a chance to fill it in, making it the perfect activity for classroom and library settings.
- This story has roots in Muslim family traditions where dads gift their child a name, while also offering a universal message to all readers.
- Cover treatments: matt lam and foil.

A poignant and heartwarming picture book exploring the nature of sadness.

- Over 22,000 copies sold worldwide (as of July 2022)
- A poignant and heartwarming text addressing the hugely important and topical issue of sadness and depression
- Dealing with abstract emotions in an approachable and child-friendly way
- Anne Booth is known for the exceptional warmth and authenticity of her writing. She was inspired to write this book by the words of Etty Hillesum, a Holocaust victim.
- With superb illustrations from multi-award winning David Litchfield, who has sensitively visualized the nature of Sadness

A Shelter for Sadness

The shelter I will build for my Sadness will have light from the sun or from the moon and stars.

But the windows will have curtains that Sadness can draw when it wants to. And there will be candles or lamps if Sadness needs them.

The Baker by the Sea

A seaside storybook about community and family

- Atmospheric pen-and-ink artwork from debut author and illustrator Paula White. Paula was winner of the 2019 Templar Design and Illustration Awards.
- Reminiscent of the Greenaway winning *Town is by the Sea* (Walker, 2018).
- The story offers a window onto the past, guiding us around the Beach Village that once stood where Paula grew up, in Lowestoft, Suffolk. This busy, bustling place once made its living from the sea - but was eventually swept away by those very same waves.
- A moving exploration of the importance of community, with a strong father-son relationship at its heart.
- An artistic fishing village story which should be popular with retailers in seaside locations.

The Flickering Fires

A journey through life's elemental forces by Greenaway award-winner Grahame Baker-Smith.

- Narrative non-fiction that explores the extraordinary impact of fire in our world.
- The final book in *The Elements* series, which has sold over 180,000 copies worldwide (as of November 2023).
- Award-winning books include the Greenaway shortlisted *Leon and the Place Between*, *FArTHER* which won the Kate Greenaway medal in 2011, and the first title in this series; *The Rhythm of the Rain* which won the English 4-11 Picture Book Award.

The Flickering Fires

When mixed with clouds of interstellar gas
and dust they form the building blocks of new stars.
Like our Sun. And new planets. Like Earth.

A world with a fiery heart.
Assembled in a vast cosmic forge of rock and heat.
Alive with star dust.

Enchanted Tales

The Magic Fish

A tale from China

The Brothers Grimm version of "Cinderella" is the one many of us are familiar with, but there are hundreds – maybe even thousands – of different versions of this tale from around the globe. This version from China was the first to be written down, over 1,000 years ago.

Once upon a time, in a little shed outside a little house in the cave mountains of Southern China, there lived an orphan called Ye-Tsien. She was bright-eyed, clever, kind and good at making things. Ye-Tsien's stepmother loved her own daughter best, so Ye-Tsien had to do all the heaviest, most dangerous work, like collecting firewood from the deep forest or water from the high mountain pools. One day, Ye-Tsien was collecting water when up from the bottom of a deep mountain pool there was a shimmering and a glittering. It travelled up and up until something broke the surface – a tiny, shining golden fish! The fish looked up at Ye-Tsien, Ye-Tsien looked back – and from that moment, the fish

The Magic Fish

and Ye-Tsien became friends. She took it home, placed it in a basin and fed it every day with scraps from her own plate. The fish grew and grew until, one day, it had grown so big she had to take it back to the pool. Still, Ye-Tsien visited the golden fish every day, and each time the fish would poke its shining golden head out of the water and greet her.

A few weeks later, the Stepmother was hungry and had an idea. Secretly, she fished Ye-Tsien to the pool. She saw how the huge, sparkling, delicious-looking fish always came out for Ye-Tsien but stayed deep under the water when anyone else came by. *How can I outwit this clever fish?* she thought.

The next day, back at home, the Stepmother gave Ye-Tsien new clothes to put on and sent her on a long errand down the mountain. Then she disguised herself in Ye-Tsien's old clothes, went to the pool and called the fish. When it bubbled up from the bottom of the pool, the Stepmother was ready with a knife. She took the golden fish home, chopped it up, cooked it and served it up to eat with her favourite daughter.

'Delicious!' they both said, wiping their mouths. They ate every morsel and threw its bones away on the rubbish heap.

The following day, Ye-Tsien hurried to the mountain pool and called – but no fish came. Big tears fell from her eyes and splashed into the empty pool. But as she cried, the air thickened, shimmering and glittering, and a figure appeared. It spoke in a voice that reminded her of safety:

*Today you cry, today you weep,
But look upon the rubbish heap.
Your fish friend's magic bones are there.
They'll grant you wishes, never fear.*

Mythical Tales

DIONYSUS AND THE PIRATES

Long ago, a fast ship sped East, hot sunlight caressing its shadow on the sparkling sea. The wind filled its sails and rows of wooden oars cut through the water, worked by strong sailors. On the ship's deck, twenty pirates smiled. The ship's hold was full of gold, jewels, fine delicacies, and something even better: a rich passenger who was going to make their fortunes!

That morning, a young man with diamond-bright eyes, rich purple robes and long dark hair, had wined and coliced from a cliff-top:

"Sailors! Take me to the island of Naxos. I'll pay you well!"

The pirates agreed, and the young man had boarded the ship. But the pirates didn't just take goods, they were kidnappers too. The ship sailed straight past Naxos, and the captain cried, "You're our captive now! Your family will pay a ransom, or we'll sell you as a slave!"

The young man did not answer. He did not look worried either. He just stood there, eyes glittering, mouth curled up in a secret smile.

DIONYSUS AND THE PIRATES

A tale from Ancient Greece

Greek myth is bursting with colourful gods and goddesses and their dramatic dealings with each other – conquest, trickery, family feuds and love more. But some of the most strange and fascinating stories are about what happens between gods and people. Dionysus – son of the mighty god Zeus but also half-human himself – is known as the god of wine, pleasure and inspiration. This story is about one of his extremely creative ways of punishing humans who annoy him...

Animal Homes: Ocean

Dive in and explore the ocean in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the ocean (the ocean trench) and each subsequent shaped spread introduces the next layer of the ocean (the abyss, the midnight zone, the twilight zone and the sunlight zone). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

Animal Homes: Rainforest

Explore the rainforest in this introduction to habitats for the very young.

- Using Natasha Durley's striking and recognisable animals from *Creature Features* and newly illustrated plants and environments, her colourful and engaging artwork will be enjoyed by a whole new age of reader.
- The first spread starts on the lowest layer of the rainforest (the forest floor) and each subsequent shaped spread introduces the next layer of the rainforest (the understory, the canopy, the emergent). Add a new layer with each page turn until the final spread reveals the full habitat. This tactile, die-cut board book format is a new way to explore and introduce animal habitats, making this series an essential addition to parents' and educators' STEM library.

The Little Gardener's Handbook

A vibrant introduction to gardening.

- A vibrant first introduction to gardening for ages 6+
- Includes DIY activities to try at home.
- Text by expert ecologist and educator, Michael Holland.
- Colourful, charming artwork by illustrator Maria Dek.
- Expanding the younger side of the Big Picture Press list.
- Gardening is a subject only growing in popularity.
- Arlin quarter binding and matt lam cover finishes.

The Little Gardener's Handbook

ALL ABOUT SOIL

Soil is the brown earth that plants grow in and it plays a very important role in supporting life on our planet. The best way to keep your plants happy is to take care of their soil!

Check a seed has sprouted, the soil helps to anchor the plant's roots in the ground. From here, the roots can absorb water, nutrients and minerals from the soil that help the plant to grow.

Soil is teeming with life. Did you know that there are more living things in a handful of soil than there are humans on earth? Look for all of the living organisms such as worms, fungi, insects and bacteria.

These organisms have special functions. Worms, for example, are little underground diggers. They move dirt through the soil's surface. This allows oxygen to reach the soil. They also help out what they have eaten, which is a valuable kind of food for the soil.

GET TO KNOW YOUR SOIL

Soil is not just dirt. It's a mix of different things, like sand, silt, clay, moisture and air. As a gardener, it's important to get to know your soil. If a plant is from a warm part of the world and you're growing it in a cool soil, it won't be happy! Similarly, a plant from a damp area won't like to grow in a sandy soil.

1. Bring a shovel from pages 30-32. Collect a soil sample from your garden. Cut it to a depth of 10cm, because any bigger bits, like twigs or stones, could mess up your test.
2. Next, get 100g of soil into a clear plastic bag. Put the lid on tightly and then give it a good shake. Let the soil sit for at least 24 hours to settle.
3. You should now be able to see the different layers of your soil. The amount of soil in different layers and the texture when you touch it, tells you a lot about it. Use the table below to help you identify what you see. Use what you see to write up in your garden book in the water.

GARDEN FOES

Sometimes your garden might be visited by some not so welcome wildlife visitors - something that creep through your plants and nibbling away at them. Rather than using harmful chemical pesticides, there are some natural ways you can discourage any unwanted visitors to your garden.

ENCOURAGE BENEFICIAL ANIMALS

You can encourage beneficial creatures naturally by encouraging beneficial visitors such as ladybirds, bees, hoverflies, birds and frogs in your garden. The planting of flowers that attract these insects, making a bug hotel or adding a bird bath.

PEST REPELLENTS

To repel insects, you can make your own natural repellents using a mixture of water, garlic, onion and chili.

PROTECT PLANTS

Use netting to protect plants from birds and rabbits.

KEEP AN EYE OUT FOR PESTS

Slugs and snails can eat a whole batch of seedlings overnight. You can try adding a little slug and snail bait to your garden. Remember to check your plants every day for signs of pest damage - gently washing them and watering them in another part of your garden.

RABBITS ARE ON THE LOOSE!

Rabbits are on the loose! They can eat a whole batch of seedlings overnight. You can try adding a little rabbit repellent to your garden. Remember to check your plants every day for signs of pest damage - gently washing them and watering them in another part of your garden.

PLANTS THAT HELP OTHER PLANTS

Did you know that certain plants can deter or encourage insects to your garden? Some particular plants together can also act as companions, attract bees and even help your tomatoes grow.

Some plants can deter insects. The longer these plants stay in the garden, the more they will help your plants.

Some plants can help other plants grow. They can help your plants grow better.

GROW CUPS OF NASTURTIUMS

Did you know that you can eat the petals from certain flowers? Nasturtiums are bright and colourful, and they have a little peppery taste. You can add them to a salad for a burst of extra flavour.

YOU WILL NEED:

- Old cups or tins
- Water
- Nasturtium seeds
- Wool

1. In the bottom of each cup, add a layer of gravel. This is to allow the water to drain away from the roots because the cups do not have any drainage holes.
2. Fill each cup with compost.
3. Place a couple of holes in the compost and drop in the seeds.
4. Cover with a little extra compost and add water to the cups and to the water tank above each cup.
5. After a week or two, the seeds will start to grow. When they are about 5cm tall, they can be eaten. They are best eaten raw.
6. In a few more weeks, flowers will appear. You can harvest them whenever you like. If you do on the plants, cut and place them off with a scissors. They will grow again.

WELCOME TO THE WONDERFUL WORLD OF GARDENING!

Whether you have a big garden or a small windowsill, you can make the world a greener place. Gardening is one of the best hobbies in the world and it's good for you, your neighbourhood and our planet! People have been gardening in one way or another for thousands of years, so you will be continuing a very long and important tradition.

In this book, you'll learn about how plants work, how to grow your own vegetables, how to encourage wildlife to your garden and why protecting plants is important for our lovely planet. Along the way, there will be plenty of activities and experiments for you to try for yourself - mostly using everyday materials you can find at home.

What are you waiting for? Let's begin!

Bend your knees, roll your shoulders back, and press your hands together.

SAI "I AM HAPPY"

CHILD'S POSE

Bend your legs, fill your body on to your thighs and either rest your arms by your sides or extend them in front of you, whichever feels more comfortable.

SAI "I AM AT REST"

CAT POSE

Breathe in and look up, lifting your back drop down. Breathe out and tuck in your chin, lifting your back in a high arch.

SAI "I AM AT EASE"

SLEEP POSE

Lie on your back and take slow breaths. Close your eyes if you want. Try to empty yourself of thoughts. If your mind wanders away, notice where it goes, then bring your attention back to your breathing.

SAI "I AM AT HOME"

COLOUR THIS IN

EVERY
PROBLEM
HAS AN
ANSWER

YOUR SAFE PLACE

Draw or stick a picture of somewhere you feel completely safe and happy.

Your safe place could be somewhere you've seen or been to, heard about, read about or dreamt about. A special, safe place where everything feels peaceful, joyful and wonderful.

COLOUR THIS IN

I AM
LOVED

TAKE A BREATH!

Try this breathing exercise to help you relax:

STEP 1

Make sure you are sitting comfortably in a quiet and safe place. When you feel ready, close your eyes. Notice your breathing. Think about how it feels breathing in and breathing out. Try to breathe in through your nose and out through your mouth.

STEP 2

Place your hand on your tummy and focus on the feeling of your stomach rising and falling with each breath. When you breathe in, quietly say 'in' to yourself, and when you breathe out, quietly say 'and out' to yourself.

STEP 3

Concentrate on nothing but your breathing and try to let go of any other thoughts you may have.

When you've had lots of practice at the breathing exercise, see if you can think about a happy memory at the same time. This way, your happy memory will take up all the space in your brain, and there won't be any room for the worries.

Hello Happy! Mindful Kids

Children can colour and doodle their way to happiness, calm and confidence.

- *Mindful Kids* is an activity book series designed and written for children about emotions and feelings.
- Includes an introduction to the book, and notes for grown-ups by consultant Dr Sharie Coombes, Child & Family Psychotherapist.
- Use creativity to combat negative feelings, work out worries and put anger back in its place with the writing and doodling activities.
- Combined, the *Mindful Kids* series has sold 1 millions copies worldwide (as of July 2022)

Hello Happy! Mindful Kids

I'M FEELING KINDA...

How are you feeling? Whether you're happy, sad or full of joy, it's okay. All emotions are okay - which is a good thing as we have loads of them!

Circle a one and draw the expression to fit the emotion. Or add the emotion to fit the expression.

I'M FEELING Happy

I'M FEELING Sad

I'M FEELING []

I'M FEELING []

I'M FEELING []

I'M FEELING []

I'M FEELING []

I'M FEELING []

embarrassed
shocked
frustrated
angry shy
scared
lonely tired
anxious

BRAIN BREAK!

To calm your emotions and feelings you need to spend your time. To do this you need to give your brain a break by switching off from the every day things which have caused difficulty on your head.

The first thing to do is to get rid of the noise around you and learn to be alone. It may feel uncomfortable at first, but here's what you need to do:

- Turn off the TV
- Turn off any video games
- Turn off any radio or stereo
- Put smart technology, phones, tablets etc away
- Close windows to the outside world so you can't hear car engines and sirens
- Take yourself away from people talking

Once you've done this...

Sit still in a comfortable position, close your eyes and concentrate on breathing in and out, in and out.

Now, in this quiet calm state ask yourself how you are feeling.

See yourself the chance to recognise any underlying feelings of anger, sadness, worry or anxiety and give yourself permission to feel that feeling.

For example say:

"I am feeling SAD. I feel SAD because I had a bad day at school. I will not always feel SAD, but right now I feel SAD and that's OK."

Repeat the sentence 5 times.

FEELING FEELINGS

Sometimes your feelings don't want to stay inside. Sometimes they want to JUMP AND EMERGE OUT!

Write where and how you feel when you're sad on this dummy.

Write where and how you feel when you're angry on this dummy.

MY BEATING HEART

Take some time to get to know your heart rate. Take your pulse by holding the two fingers nearest your thumb to your neck or to the underside of your wrist.

Like all emotions, anger releases chemicals in your brain, which then cause changes in your body that you can feel. One of these changes is an increased heart rate.

TRY TAKING YOUR PULSE WHEN YOU HAVE...

- JUST WOKEN UP
- RUN ON THE SPOT FOR 3 MINUTES
- HAD A ROW WITH SOMEONE
- EATEN A BIG MEAL
- JUST BEGUN A PIECE OF HOMEWORK
- READ A CHAPTER OF A BOOK
- BEEN FOR A WALK

Write down the beats per minute for each of these.

REMEMBER! Anger can be positive. Many people have made good changes in the world because they felt so angry about something they used the anger to spur them on to positive action. What makes you angry in the world? How could you make a difference?

DID YOU KNOW? Your heart rate will also increase when you are stressed or afraid.

THE ANGER ICEBERG

Anger never exists on its own - there are always underlying emotions causing it. Add more emotions to the underwater part of the iceberg to show the other emotions which might lead to you feeling angry.

ANGER

frustrated

lonely

Be Resilient!

THING-SPRING-O-METER

HOW MUCH BOUNCE IS IN YOUR THING-SPRING?

Show how resilient you already are on the THING-SPRING-O-METER.

Decide how far your THING-SPRING can stretch when you need to do something big, new or a bit scary or difficult!

Colour the THING-SPRING-O-METER to show how high they'd reach right now. The book will show you how to get them to stretch the rest of the way.

THING-SPRING STRETCHER

It's time to strengthen and stretch your THING-SPRING. Are you ready to collect some THING-SPRING points?

Whenever you complete an activity, colour and collect the THING-SPRING points on the page. Then add them to the THING-SPRING STRETCHER by colouring in the number of points you've earned - see how far you can go and become a RESILIENCE SUPERSTAR!

For every THING-SPRING point you earn, colour in one section. If an activity's worth three THING-SPRING points, colour three sections, or if it's worth five THING-SPRING points, colour five sections, and so on. If you repeat an activity, you can collect the points again!

YOUR HERO TEAM!

Your resilience can't grow super strong and stretchy all by itself. You'll need 'side-kicks' around you to build the healthiest THING-SPRING!

The first in your own HERO TEAM? Your HERO TEAM have their own superpowers and are all important parts of YOU!

Design a colourful costume for each member of your HERO TEAM. Think about their special qualities and try to build them into your design.

You'll be using a lot more of your HERO TEAM and getting to know all about them and their jobs in the following pages. The activities will show you why your HERO TEAM together, so they'll be ready to spring into action to support you whenever your bounce feels a bit flat!

If you are a superhero! or a hero! then HERO action is really a really awesome! but harder to hear your HERO TEAM if they don't know you! you can hear them more easily as you go through this book.

THIS ACTIVITY EARN'S YOU FIVE THING-SPRING POINTS

PICK YOUR OWN SUPPORT SQUAD

Complete this set of SQUAD CARDS to remind you who you can support you as you grow your resilience. Draw their portraits and add their important information onto the cards.

✓ You've got your HERO TEAM organised, so it's go ahead and pick your SUPPORT SQUAD!

✓ Everyone needs a SUPPORT SQUAD to grow healthy THING-SPRING!

TIP Pick your SUPPORT SQUAD members from your home, family, school, clubs, community and organisations you belong to. Include people and pets and at least one of your favourite toys. Pick team members who are helpful or listening, encouraging, being funny, reassuring, challenging, cheering or comforting you.

Sometimes your resilience gets stretched so far as it can go for now, and that's when you need to ask an adult for help. It can take a little time for you to feel the spring in your step again but it's all there and will bounce back with support.

Remember, you don't have to BE RESILIENT by yourself and it's NOT all your responsibility like your SUPPORT SQUAD!

Now you can bounce around all over this book. How far - you've got that!

Remember to ask your SUPPORT SQUAD for help to train the whole HERO TEAM together, wherever you need to.

Practice means who they are to you, such as friends, teacher and so on.

WHEN THE GOING GETS TOUGH

What happens to you when you do something that feels big, new, scary or difficult? Perhaps you feel excited, anxious, stressed, nervous, scared, frustrated or angry?

These are called **EMOTIONS**

You might not always know the name of the emotion you're feeling, but it's important to learn to recognise the sensations you feel in your body and where you feel them.

This is called **INTEROCEPTION** (in-ter-o-sep-shun)

When you can identify your body's sensations, you can **BE RESILIENT!** The more you try to recognise your feelings, the easier it becomes to manage and confront them.

Think of a fun THING you'd like to do that's difficult to face or you're worried about. Write it in this box.

Try out for a team or performance

Ask someone to be my friend

Read to the class

Sing a solo

Take a penalty

Take part in a group activity

Draw yourself using the outline. Now, really imagine yourself confronting that THING. Circle any of the feelings you notice and draw an arrow to where you feel them.

Hard to swallow or lump in throat

Hot or cold face

Feeling separate from everyone else

Ringing in your ears

Tight chest

Fast breathing

Feeling dizzy, faint or light-headed

Numb or tingly hands

Hot or cold waves

Sweaty palms

Racing or fluttery heart

Trembling or shaking

Needing the toilet

Feeling sick

Numb or tingly feet

Upset tummy

Butterflies in your tummy

Pain in your muscles

Next time you have a challenge to face, come back to this page and go through the activity again to see what body sensations you notice. This will stretch your THING-SPRINGS and change how your brain copes with challenges - you'll soon be fearless! You can also come back any time you need to explain to someone what's happening for you.

Tell Me About: Space

Big science for little readers.

- The third title in a brand-new series of non-fiction books for readers 4+.
- A fun, accessible look at space for young children, featuring topics such as: planets and moons, the solar system, stars and galaxy, constellations, what's in the night sky, gravity, the big bang, going into space and much more!
- Written in friendly and engaging language by science educator and cBeebies writer, Emily Dodd.
- Vibrant, eye-catching design and playful illustrations by Chorkung. The distinct lack of diagrams and focus on child-friendly illustrations makes this perfect for little readers!
- Cover finishes: matt lam + spot UV.

Tell Me About: Planet Earth

Earth is Home

You live on a brilliant ball of spinning rock called Earth. It's a planet, travelling through space on a gigantic loop around a star called the Sun.

There's another ball of rock about a quarter of the size of Earth and you can see it in the night sky. It's called the Moon.

It takes a month for the Moon to travel around Earth on an oval path.

It takes a whole year to travel all the way around the Sun. So if you are five years old, you have circled the Sun five times already!

Earth travels around the Sun on an oval path but it also spins on the spot. The spin is why it gets dark at night.

Your home turns away from the Sun at night and by morning it has turned back towards the Sun once again. It takes 24 hours for a complete spin to happen, and we call that a whole day.

Caves

Caves are big holes carved into cliffs by waves hitting the rock. But they can also form underground as rain trickles through cracks in the rock.

That's right, tiny little rain droplets can make massive caves because they dissolve the rock away a little bit at a time.

Underground rivers flow through caves. They wear the floor of the cave down to make them even bigger.

Inside the cave, some droplets of rainwater evaporate. As the liquid water drops turn into gas, they leave behind the tiny bits of rock they were carrying. The bits of rock stick to the roof.

In a thousand years, all the drops of water will have left enough rock behind to make a shape about as long as your finger. This is called a stalactite.

The same thing happens as the water drops onto the floor of the cave too. The cave floor grows upwards into a wider opening, which is called a stalagmite.

Digging and Drilling

When humans dig useful rocks and metals out of the ground, it is called mining. People also drill long holes deep down into the rock to find little pockets of gas and a liquid called oil.

The oil and gas found deep underground were once tiny sea creatures. They sank to the bottom of the sea and got squashed over millions of years. They turned into a dark liquid called oil and a gas called methane.

Coal is a black rock that gives off lots of heat when it burns. It is made from leaves that took in swamps millions of years ago.

We can burn oil, coal and methane gas to make electricity and to power vehicles.

Most metals are hidden underground with other rocks. A few metals are found just as they are at the surface, including gold, silver and copper.

Metals can make lots of useful things including bikes, phones, computers and cars.

Oceans

If you flew out into space and looked back at Earth it would look blue. That's because two thirds of our planet's surface is covered in liquid water. It's mostly found in the oceans and seas.

Waves

Waves are made on the surface of the water as the wind pushes the sea.

Tides

The sea comes in at high tide and goes out at low tide. This happens twice every day because of the way Earth is spinning beneath the Moon.

That's right, the Moon makes our tides! Gravity is a pull that happens between Earth, the Moon and the Sun. It pulls on you too. When you jump, gravity pulls you back down to Earth.

The oceans on planet Earth slowly change shape because the rock beneath them is moving. This creates underwater valleys, caves and mountains.

Did you know...? Seawater is salty because of salt from rocks!

Tell Me About: The Human Body

Brilliant Body

So many amazing things are happening in your body right now! Let's take a look at just a few of them...

As you breathe, spongy bags called lungs are sucking air in and putting it into your blood.

When you run, stretchy cords called muscles pull bones back and forward. Your bones connect together in a structure called a skeleton. And your skin wraps everything up.

When you think or laugh or wiggle your toes, you use energy. The energy comes from the food you eat. The food goes into your blood and all around your body.

Tiny electrical signals are making your heart beat - to-beat-to-beat - to pump blood around your body.

Your body is made from lots of different parts that work together to do important jobs. These parts are called organs.

If you look at the pictures in this book, you're using organs called eyes. And when you think about all of this, you use an organ called the brain.

The Skin

Let's begin our body tour with your skin. This stretchy waterproof layer wraps around your body keeping germs out and keeping your insides... inside!

Your skin is full of sensors that help you to touch and feel things. You can feel pain and warmth and the tiny footpads of an insect crawling on your arm.

Did you know...? The skin is the biggest organ in the body!

Touch sensors help you to feel how hard to press when you lift it and hold objects - so you don't drop or squash them.

The top layer of your skin is dead! Underneath it, new skin is being made. It pushes the old skin upwards until it flakes off as dust. Yes, your skin becomes dust!

Your hair and nails are made from the same stuff as skin. It's called keratin.

Your skin cools your body too. One way it does this is by making little drops of liquid called sweat.

When sweat drops are warmed by a hot body, they float off into the air taking heat away with them!

Skeleton

The thing that gives your body its wonderful shape and height is a skeleton. It is made from 206 bones that join together at hinges called joints.

Full your fingers! The bones are the hard parts, and the joints are where your fingers bend.

Strong bony bones called cartilage make up some parts of the skeleton including your ears, your nose and sections of your ribs.

The skeleton protects your insides too. Your ribs make a cage around your lungs and heart and your skull is like a helmet, protecting your brain.

Inside your biggest bones is a juice called marrow. New blood is being made in the marrow. That's right, your bones can make blood!

Bones are full of tiny holes that make them light. But the pattern of the holes makes them really strong too.

Muscles

Muscles are stretchy cords that pull body parts to make them move. If you wiggle your eyebrows and stick out your tongue, you did it using muscles!

Muscles can pull, but they can't push so they need to work in teams. One muscle pulls a body part one way, and another muscle pulls it back again.

Great teamwork muscles!

1. Bend your arm. The set of muscles at the front of your arm, called triceps, pulled it up by getting shorter.

2. Now straighten your arm. Another set of muscles at the back of your arm, called biceps, pulled your arm down to straighten it.

The muscles that move your bones around are called skeletal muscles. But they're not the only muscles you have!

Cardiac muscles make your heart squash to pump blood.

Smooth muscles line the tubes in your body. They help push things through the tubes.

Did you know...? Muscles help you hold in pee until you're ready to let it go.

The World's First Rollercoaster

Amazing inventions stories in comic-book form by Blue Peter Award-winner Mike Barfield.

- An irresistible way into science and technology with a dash of history from the brilliant Mike Barfield, author of *A Day in the Life of a Poo, a Gnu and You*, winner of the 2021 Blue Peter Award for a Book With Facts. Mike's books have sold in over 40 territories.
- Featuring the greatest inventions in architecture, travel, the home, food, fashion, toys, sports, technology and more, this book is packed with facts for curious minds. Includes tips on sending in a patent and profiles of young inventors alongside greats such as Diebedo Kere, Bertha Benz, Percy Spencer, Momofuku Ando, Kano Jigoro and Jawed Karim.

Along Came a... Burp!

A laugh-out-loud science storybook all about the human body!

- A fun, fact, and fart-packed picture book approach to early science for readers 4+.
- Graphic-novel-style layouts present facts in memorable and hilarious fashion.
- Paula Bowles's artwork is an explosion of colour, bringing to life a zany cast of anatomical characters, from stinky poos, to friendly farts, to super-speedy sneezes. Paula was shortlisted for the Indie Book Awards 2023 and The Alligators Mouth Award 2023.
- With warm, funny text by rising-star Saskia Gwinn (author of *Scientists are Saving the World* and *I am Not the Easter Bunny*).

Day and Night

A narrative non-fiction story of a day on Earth

- Sample contents: TWILIGHT Mule deer and mountain lion (North America); DAWN Spiders weaving webs (Australia); EARLY MORNING Hummingbirds & sweat bees (Mexico); LATE MORNING Andean condor (South America); NOON Cicadas (Western Europe); EARLY AFTERNOON Caracal, python (Africa); EARLY EVENING coral reef (Fiji); DUSK Moonflowers & sphinx moth (South Asia)
- Glow-in-the-dark ink on the nighttime pages
- This book can be read as a gentle story at bed time or to learn more about the world
- Cover treatment: matt lam + spot UV + glow-in-the-dark-ink (cover and nighttime pages)

Day and Night

A Guide to Day and Night

Polar night and midnight sun

At the very north and south of Earth, days work differently. For six months of the year the sun never rises above the horizon. This is called the **POLAR NIGHT**, and it is dark all the time. For the other six months of the year, the sun never falls below the horizon. This is called the **MIDNIGHT SUN**, and it is light all the time.

This phenomenon happens because Earth is tilted. When one pole is tilted towards the sun, the other pole is tilted away. This makes daytime or nighttime last more than 24 hours in these places.

<p>Dawn</p> <p>Before the sun has risen above the horizon, the sky lightens. This time of day is also known as twilight.</p>	<p>Sunrise</p> <p>The sun rises higher, eventually coming up over the horizon line, warming the air.</p>	<p>Daytime</p> <p>The period between sunrise and sunset, when the sun peaks up over the horizon line then travels in an arc across the sky. It is warmer than it is at night and there is more food around, but animals are more easily spotted by predators in the light.</p>	<p>Sunset</p> <p>The sun sinks below the horizon line, causing light and warmth to fade.</p>	<p>Dusk</p> <p>The sun lowers even more, even though we can't see it now. The sky grows darker but there is still a faint glow of light. This time of day is also known as twilight.</p>	<p>Night</p> <p>The period between dusk and dawn, when it is dark. The air is cool and more humid. There is less food around at night but under the cover of darkness animals can avoid getting caught by predators.</p>
<p>Animals and plants that are active in twilight are called CREPUSCULAR.</p>		<p>Animals and plants that are active in daytime are called DIURNAL.</p>	<p>DIURNAL animals and plants prepare to rest for the night.</p>	<p>CREPUSCULAR animals and plants are active again.</p>	<p>Animals that are active at night are called NOCTURNAL.</p>

Around the World in 80 Inventions

80 inventions from around the world

- A fun and accessible look at history and STEM with ties to the curriculum
- Written by emerging author Matt Ralphs, who has titles published with Nosy Crow, DK and Flying Eye
- Exciting talent Robbie Cathro has worked for clients including Aquila Magazine, Natural History Museum and Kingfisher.
- A travel theme inspired by postcards and travel posters gives this book a fun and engaging aesthetic
- Expertly checked by science writer Anne Rooney

Around the World in 80 Inventions

Ice Cream

"Dreaming from dessert"

14

Of all the food items that have been invented, ice cream is probably the most popular. It's a treat that's enjoyed by people of all ages and in all climates. The first recorded recipe for ice cream was written in a Chinese text from the 10th century. It was made with snow and fruit. In the 17th century, a French chef named Lazzaro Spallanzani created a recipe for 'ice cream' that was made with cream and sugar. This was the first 'modern' ice cream. In the 18th century, an Italian chef named Francesco Procopio created the first 'ice cream parlour' in Milan. This was the first place where people could buy ice cream. In the 19th century, an American chef named James Watson created the first 'ice cream machine'. This was the first machine that could make ice cream at home. In the 20th century, an American chef named Purcell Young created the first 'ice cream cone'. This was the first 'modern' ice cream cone. In the 21st century, an American chef named David Lebovitz created the first 'ice cream truck'. This was the first 'modern' ice cream truck.

Bicycle

"Freedom on two wheels"

Did you know that the first bicycle was invented in 1817? It was called a 'velocipede' and it was made of wood. The first bicycle with a chain drive was invented in 1851. It was called a 'boneshaker'. The first bicycle with a diamond frame was invented in 1873. It was called a 'safety bicycle'. The first bicycle with a pneumatic tire was invented in 1888. It was called a 'Michelin tire'. The first bicycle with a chain drive and pneumatic tires was invented in 1885. It was called a 'diamond bicycle'. The first bicycle with a chain drive and pneumatic tires was invented in 1885. It was called a 'diamond bicycle'. The first bicycle with a chain drive and pneumatic tires was invented in 1885. It was called a 'diamond bicycle'.

Pertious Penny-Farthing

Camera

"Magicians"

24

Although it's often said to be the most important invention of the 19th century, the camera was actually invented in the 15th century. The first camera was called a 'camera obscura' and it was used to project images onto a wall. The first camera with a lens was invented in 1608. It was called a 'camera lucida'. The first camera with a lens and a shutter was invented in 1816. It was called a 'camera obscura'. The first camera with a lens and a shutter was invented in 1816. It was called a 'camera obscura'. The first camera with a lens and a shutter was invented in 1816. It was called a 'camera obscura'.

Developed to Perfection

High-Speed Train

"No-speed" "No-stops"

25

Before the 19th century, the only way to travel long distances was by horse-drawn carriage. The first high-speed train was invented in 1825. It was called the 'locomotive'. The first high-speed train with a steam engine was invented in 1825. It was called the 'locomotive'. The first high-speed train with a steam engine was invented in 1825. It was called the 'locomotive'. The first high-speed train with a steam engine was invented in 1825. It was called the 'locomotive'.

Marvelous Maglevs

Wind Turbine

"Harnessing the power of wind"

34

You might have seen a wind turbine on a hill or in a field. It's a machine that converts the kinetic energy of the wind into electrical energy. The first wind turbine was invented in 1890. It was called a 'windmill'. The first wind turbine with a generator was invented in 1890. It was called a 'windmill'. The first wind turbine with a generator was invented in 1890. It was called a 'windmill'.

Green Energy

Helicopter

"A surprising way to fly"

35

When you think of a helicopter, you probably think of a machine that can fly. The first helicopter was invented in 1783. It was called a 'aerostat'. The first helicopter with a rotor was invented in 1852. It was called a 'helicoptere'. The first helicopter with a rotor was invented in 1852. It was called a 'helicoptere'. The first helicopter with a rotor was invented in 1852. It was called a 'helicoptere'.

Versatile VTOLs

Wheel

"The revolutionary design that makes the world go round"

17

Can you imagine a world without wheels? Apart from sledges and ships, there would be no vehicles – no carts, cars, bikes, buses, trucks, trains, trams or aeroplanes. The first wheeled vehicles were animal-drawn carts with solid wooden wheels. They were invented in Mesopotamia (modern-day Iraq) around 3200 BCE. 300 years after the horizontal potter's wheel. These carts carried cargo to market and heavy loads, such as stone and timber for building projects. The horse-drawn chariot came next. In about 2500 BCE, chariot wheels were spoked rather than solid like a cartwheel, so they were faster and lighter. The wheel may be one of the simplest inventions, but without it our world would be completely different.

Potter's Wheel

The very first wheels were used to make pottery. The art of pottery began around 30,000 years ago. Originally, potters would shape clay into pots with their hands, but this took a long time. The Mesopotamians invented a better method in around 3500 BCE. The potter's wheel was a large stone disc balanced on a stick called an 'axle', which could be spun. By putting clay on the wheel and spinning it, the potter could shape the clay quickly into pots. We don't know for sure, but it seems likely that the potter's wheel led to the invention of the vehicle wheel.

Internet

"The world at your fingertips"

18

The invention of the Internet – a network of computers that 'speak' to each other – was a concentrated effort in the United States. The first computers were connected to each other in 1969 during the Cold War (1947–1991), a time of heightened hostility between the USSR and the United States and when computers were the size of an entire room. The United States government wanted a communication system that couldn't be destroyed in a single attack, so they created ARPANET (Advanced Research Projects Agency Network): a series of linked computers across different locations, which allowed information to be relayed along telephone lines. The first message was sent in 1969. It was a single word: LOGIN, but only the 'L' and the 'O' got through before the network crashed. By the end of the same year four computers were connected on the ARPANET. It took years to create the 'network protocol' that allows computers to transfer data and 'speak' to each other. From the 1970s this network grew into the global Internet, which now links billions of devices. Today, whatever you want – books, food, holidays, cars – with the Internet you simply click a button and wait for it to arrive. Social media sites allow people all over the world to communicate instantly. We can consume films, television shows, music and video games, and even do our banking online.

World Wide Web

The World Wide Web (WWW) is a gateway to the Internet. It's made up of search engines like Google and Safari, the Internet addresses (also called URLs) we type in, and the websites that appear on our screens. It was invented by a British computer scientist called Tim Berners-Lee in 1989 while working at CERN, a science research laboratory in Switzerland. The WWW made the Internet accessible to everyone, not just scientists and academics.

Dinosaur Desert

A dino-mite adventure story to inspire the next generation of scientists and explorers!

- Publishing on the 100th anniversary of Zofia Jaworowska's birth, the book has been created in collaboration with her family using extensive archive material.
- Beautifully illustrated by Polish artist Ola Plocinska, the book includes a mix of graphic novel spreads, kit lists and wonderful scenes of the Gobi Desert as well as detailed information on how to find fossils to inspire budding palaeontologists.

Discover the rich history, vibrant culture and unique identity of each nation through its flag!

- A vibrant exploration of our world's marvellous flags! Take a fact-filled and fun journey across the contents to discover all that lies in our national flags.
- Content is split into 5 chapters based on the continents: Europe, Asia, the Americas, Africa and Oceania. Each section features a chapter opener, 4-5 spreads looking at specific flags in detail, and a theme spread which looks at the world more broadly.
- Feature spreads look at an individual flag's history, symbolism and meaning, and also include 2 or more other flags which share a similarity in some way, whether that be a symbol, geographical location or a shared history.

Food from Flowers: The Great Pollination Investigation

Explore the secrets of nature in this pollination investigation.

- This non-fiction picture book is packed full of facts with information on photosynthesis, the pollination process, the life cycle of plants, flower anatomy, animal and insect pollinators, such as bats, bees, beetles, birds and more.
- Full of scientific information that supports the curriculum.
- Fun novelty elements help kids engage with the subject matter.
- This book is the perfect picture book for children aged 5+ who are fascinated by nature and the plants that grow in it.
- Bright and beautiful artwork from author-illustrator Deborah Hocking.

Earthlings

FAKTY NA KONIEC

There are eight billion Earthlings living on Earth.

There are more and more earthlings. 200 years ago, one billion people walked the planet. In 2056 there will already be ten billion.

More than half of Earthlings today live in cities, but for most of history, Earthlings lived mainly in villages. As recently as 200 years ago, 95 out of 100 Earthlings lived outside of the cities.

Nine out of ten earthlings in cities breathe polluted air.

Three out of ten residents of cities live in slums.

Na 100 dorosłych Ziemiaków 87 potrafi czytać i pisać, 87 poszło do szkoły podstawowej, 66 uczyło się w szkole średniej, 40 zdobyło jakiś rodzaj wykształcenia wyższego, a siedmiu ukończyło studia uniwersyteckie.

Dawniej umiejętność czytania i pisania była u Ziemiaków niezwykle rzadka. Pisać i czytać potrafili tylko przedstawiciele władzy, duchowieństwo i nauki. W Europie niezliczeni piśmiennicy posługiwali się wyłącznie łacyną. Książek, przepisywanych rękopiśmiennymi, było mało. Były one bardzo drogie i dla większości niedostępne. Dopiero wynalazek druku około 1450 roku, które spowodowało masową dostępność książek i gazet w językach narodowych, wpłynęło na rozpowszechnienie się umiejętności czytania. Zmienił się też sposób lektury: zamiast na głos zaczęto czytać cicho, prywatnie.

W tym roku Ziemia miała 8 miliardów mieszkańców. W 1900 roku Ziemia miała 1,65 miliarda mieszkańców, w 1927 - 2,05 miliarda, a w 1960 - 3,05 miliarda. W 2056 roku Ziemia będzie miała 10 miliardów mieszkańców.

Against the Odds

Meet the adventurers who have tried, failed and succeeded against the odds!

- *Alastair Humphreys's Great Adventurers* won the Stanford Travel and Teach Primary Book awards and has sold over 45,000 copies worldwide (as of July 2022)
- Sample contents: , Junko Tabei, Juanita Harrison, Ffyona Campbell, Bernard Moitessier, Goran Kropp, Terry Fox, Matthew Henson, Frank Wild, Joe Simpson, Jack Swigert, Jeanne Baret, Robert Smalls, Zheng He, Emile Leray , Karen Darke, Beth French and Marianne Du Toit.
- Author Alastair Humphreys - National Geographic Adventurer of the Year 2012 - has hand-selected 20 inspiring adventurers and retold their stories in his own words

Against the Odds

JEANNE BARET

Small text describing the story of Jeanne Baret, a French explorer who traveled to South America in the 18th century.

INTO THE WILDERNESS

A MAN IN DISGUISE

Small text describing her journey and the challenges she faced.

A CLEVER DISGUISE

Small text describing the story of a man who used a clever disguise to escape slavery.

A NEW LIFE

Small text describing the man's new life after escaping.

Was Robert Smith's legend?

Small text discussing the legend of Robert Smith.

JUNKO Tabei

Small text describing the story of Junko Tabei, a Japanese mountaineer who was the first woman to reach the summit of Mount Everest.

Small text describing her achievements and the challenges she faced.

ROBERT SMALLS

Robert Smalls was born into slavery in 18th-century America, deep in the South. He was desperate for his family to escape to a better life. But the outbreak of the American Civil War seemed certain to end his hopes of freedom and safety.

As a child, Robert Smalls worked as an enslaved cotton picker on a plantation.

When he was 12, he was sent to Charleston as a labourer, working in a hotel and then as a lamplighter.

As a teen, he worked on the docks. He got to know the ships well and became a helmsman, in charge of steering the boat.

At 17, Robert got married and was desperate to buy his family's freedom. But for every \$15 he earned as an enslaved man, he was only allowed to keep a single dollar. This made it impossible to save the \$800 he needed. Robert was trapped, as his people had been for centuries, and he knew that if he wanted to be free, he would need to come up with a spectacular plan.

US CIVIL WAR 1861 - 1865

DREAMS OF FREEDOM

The American Civil War began in 1861 between the Southern States (the Confederacy) who wanted to keep slavery, and the Northern States (the Union) who did not.

In 1861, Robert was forced into service on a transport ship for the Confederate Army called the CSS Planter, delivering ammunition and supplies up and down the coast. The ship was led by Captain Bevela, with two other white officers and a crew of enslaved Black men.

The captain always wore a wide-brimmed straw hat to protect his head from the bright southern sun. This gave Robert the first glimmering of an idea...

Talking History

150 years of world-changing speeches

- An accessible look at political and social history, and issues that remain pertinent today
- Contemporary design and illustrations from André Ducci accompany engaging text
- Authors are experienced children's writers and academics with expert knowledge on the topics discussed. In 2021, Joan Haig was selected as one of prestigious Scottish Book Trust's authors in residence, working with a school in Aberdeen
- Sample contents: Abraham Lincoln, 'The Gettysburg Address', 1863; Jawaharlal Nehru, 'A Tryst with Destiny', 1947; Nelson Mandela, 'Speech from the Dock', 1964; Harvey Milk, 'The Hope Speech', 1978; Angela Merkel, 'Address to 68th Session of the WHO', 2015 and Severn Cullis-Suzuki, 'Listen to the Children', 1992,

Talking History

In 1903, in the city of Manchester, UK, Emmeline Pankhurst and her eldest daughter Christabel founded the Women's Social and Political Union (WSPU). The organisation campaigned fearlessly for women's right to vote.

THE SUFFRAGETTE MOVEMENT

This wasn't the first time that women in Britain had fought for the vote. Since the mid-nineteenth century, female campaigners called 'suffragists' had tried to win rights for women in society through peaceful petitions and, later on, by refusing to pay their taxes.

But this campaign was slow with few results. After years of unsuccessful peaceful protest by the suffragists, the WSPU decided that it was time for action - 'Deeds Not Words', as their motto said. Members of the WSPU took part in 'civil disobedience' to literally fight for their cause. They chained themselves to railings, hacked politicians' plants, bonked in empty buildings, and smashed windows in public places, constantly clashing with the authorities. They were so determined to achieve their political aims that they deliberately took part in violence and vandalism to influence the public and the government.

Newspapers began referring to militant WSPU campaigners as 'suffragettes'. By 1910, the WSPU had branches all over the country.

THE CAT AND MOUSE ACT

Around 1,000 suffragettes were imprisoned for their 'substance' behaviour. While in jail, some continued to fight by going on hunger strikes, refusing to eat or drink. At first, they were released to prevent them from starving, but, by 1910, prison wardens began to force feed them. Women were badly hurt, prompting public outrage at what was seen as government torture.

The government responded by passing the 1913 'Prisoners' (Temporary Discharge for Ill Health) Act. Under this new law, when women on hunger strike became critically weak, they were sent home. As soon as they recovered, they were promptly returned to continue their sentence. It was dubbed the 'Cat and Mouse Act' because of the way a cat plays with its prey repeatedly letting it escape before catching it again.

Emmeline Pankhurst was imprisoned and released 16 times! It was in 1913, in between prison sentences, that she visited the United States to campaign for support and funding. She addressed a group of women at the Parsons Theatre in Hartford, Connecticut, in a powerful speech attempting to justify the use of militant tactics in the fight for women's rights.

HUMAN GENOME PROJECT

Genome is the name for all the genetic information. It is the blueprint that contains the information about who we are and how we are made. Genes are the instructions for making proteins. In the human genome, there are about 20,000 genes. The Human Genome Project was a massive international research programme which

aimed to identify all the genes that make up the human genome. The project was a massive international research programme which aimed to identify all the genes that make up the human genome. SCIENCE CERN AND THE LARGE HADRON COLLIDER

CERN (Conseil Européen pour la Recherche Nucléaire) is the European Organisation for Nuclear Research. It is an international scientific research organisation for the study of high-energy particle physics. There is a huge CERN laboratory on the border between France and Switzerland which brings thousands of scientists from all over the world together to collaborate on groundbreaking

scientific research. Over 12,500 scientists of more than 110 nationalities collaborate at CERN. CERN is the home of the Large Hadron Collider, which is the largest and most powerful particle accelerator in the world. It cost around \$10 billion to create. It is a 27-km (17-mile) ring of superconducting magnets,

Sharing research means that scientists all around the world can collaborate and build on each other's work. CERN is the home of the Large Hadron Collider, which is the largest and most powerful particle accelerator in the world. It cost around \$10 billion to create. It is a 27-km (17-mile) ring of superconducting magnets,

which is big enough to circle the entire city of Geneva. It works by creating two beams of energy, then firing them at each other at nearly the speed of light. When the beams hit each other, tiny subatomic particles smash into each other and break apart, which gives scientists a glimpse of the building blocks of creation. It's incredibly difficult work, as the particles involved are so small. It's the equivalent of firing two needles 10 km (6 miles) away from each other and making them hit in the middle. The Large Hadron Collider has a special cryogenic cooling system to keep it at -271.3°C (-456.34°F), which

means that it is colder than outer space. The Large Hadron Collider was able to confirm the existence of the Higgs boson. The Higgs boson is a fundamental particle which gives mass to other particles. The Large Hadron Collider is the only place in the world where Higgs bosons can be studied. Previously, scientists had predicted the existence of these particles, but we did not have the equipment to study them. It's a very important piece of scientific discovery and helps us understand not only the past, but also the future of our

universe. Hundreds of scientists, engineers and programmers worked together on the Large Hadron Collider to make this scientific feat possible. While it is one of the most important pieces of scientific research to have ever been attempted, the Large Hadron Collider is still at the mercy of outside influences. Animals have managed to damage the Collider twice. In 2016 a weasel chewed through electrical wiring which meant the power had to stop, and there was another power outage in 2009 when a bird dropped a bit of baguette onto electrical equipment!

World of Sport

In this beautifully illustrated book, learn about the incredible variety of sports that are played around the world.

- A lively, inspiring and fact-filled exploration of a globally unifying topic: sport! From ancient times to today, covering every corner of the world.
- Featuring extensive coverage of women's sports and sporting heroes, plus sports from different, lesser-known regions and cultures around the world.
- Positioned to publish in time for the 2024 Olympic Games.
- With vibrant, energetic illustrations from Violeta Noy, author and illustrator of *The Right One*.

TRACK AND FIELD SPORTS
Track and field sports take place outdoors on a running track. Track events are running competitions and in field events, athletes compete in jumping and throwing events.

JAVELIN
Javelin was developed from the spear used by ancient warriors. The first javelin was made of wood and iron. It was used in the ancient Greek Olympics. The first javelin was made of wood and iron. It was used in the ancient Greek Olympics. The first javelin was made of wood and iron. It was used in the ancient Greek Olympics.

LONG JUMP
The long jump is one of the oldest track and field events. It was first recorded in ancient Greece. The long jump is one of the oldest track and field events. It was first recorded in ancient Greece. HOW SPORT BEGAN
People have always enjoyed getting together and competing to find out who's the strongest, fastest or best at something. Humans have been playing sport since ancient times.

WHAT WAS THE FIRST SPORT?
Can you see any ancient cave paintings on the map? We don't know for certain what the world's first sport was, but we can guess from these ancient artworks.

GRAND BEGINNINGS
The first competitive sport we know about was recorded in a famous story, the *Epic of Gilgamesh*, from 2100 BC. In it King Gilgamesh fights a wild man to see who is stronger.

Patata puripatka was played in the ancient Mexican city of Teotihuacan as long ago as 1500 BC. It was a bit like hockey except the ball was on fire!

In chunky, played for centuries by Native Americans, a stone disc was rolled across the ground. Teams throw spears to predict where they thought it would land.

The ancient Mayan ballgame of pitz was invented sometime between 2,000 and 4,500 years ago. Competitors had to get a ball through a stone hoop without using their hands.

Sometimes rival cities settled disagreements with pitz instead of going to war.

Stone pitz hoops can still be seen in ruined Mayan ball courts in South America.

Wall paintings made in caves in Lascaux, France, around 20,000 years ago, seem to show people running and wrestling.

Some ancient Egyptian tomb paintings demonstrate wrestling positions.

The army of ancient Rome played harpastum, a dangerous sport a bit like rugby, as a way of training their soldiers.

During the Western Zhou Dynasty (1046-771 BC), archery was part of the education of wealthy men.

Mongolian cave paintings from 5,000 years ago show people wrestling in front of spectators.

In boat jousting, two people in a boat would fight with long poles or 'maces'. Ancient Egyptian carvings show fishermen jousting. They tried to push each other into the river Nile!

Surfing has been popular in the Pacific for hundreds of years. In Hawaii, chiefs competed in fierce competitions, and good surfers could win high social status.

The Māori of New Zealand participated in a competition known as the *Māori Games* - often between neighbouring villages. Men, women and children all competed in canoe races, athletics and martial arts.

Raising the Roof

A cool introduction to classical music

- Broadcaster, songwriter, composer and Scala Radio presenter Jack Pepper is an exciting, young voice in classical music.
- A fun and approachable introduction to classical music
- Includes a playlist, so you can listen as you read
- **SAMPLE CONTENTS:** Hildegard of Bingen 1098-1179; Claudio Monteverdi 1567-1643; Barbara Strozzi 1619-c. 1664; JS Bach 1685-1750; Joseph Bologne 1745-1799; Ludwig van Beethoven 1770-1827; Richard Wagner 1813-1883; Giuseppe Verdi 1813-1901; Ethel Smyth 1858-1944; Arnold Schoenberg, 1874-1951; Igor Stravinsky, 1882-1971; Florence Price, 1887 - 1953; George Gershwin, 1898-1937; Leonard Bernstein, 1918-1990

Raising the Roof

SYMPHONY

The symphony has changed over the centuries, but it is essentially an extended piece of music for a large group of players. The word itself comes from the Greek, meaning 'sounding together'. It is often a composer's lifetime piece because the size and cost of the orchestra is hard to pull off.

LEARNING TIP
Have a go at writing your own symphony. It's a challenge, but you can start by writing the melody for one instrument, then add other instruments to create a full orchestral sound.

1800s
The first symphony was written by Joseph Haydn in 1765. It was a single movement work for a small orchestra.

1700s
The symphony became a multi-movement work. It was now written for a larger orchestra and performed in public.

1776
Ludwig van Beethoven wrote his first symphony in 1793. It was a landmark work that showed the potential of the symphony as a dramatic and emotional form.

1800s
The symphony became a major genre. Composers like Franz Schubert and Felix Mendelssohn wrote beautiful and popular symphonies.

1872
The symphony became a major genre. Composers like Franz Schubert and Felix Mendelssohn wrote beautiful and popular symphonies.

1748
The symphony became a major genre. Composers like Franz Schubert and Felix Mendelssohn wrote beautiful and popular symphonies.

Present
The symphony remains a major genre. Composers like Gustav Mahler and Johannes Brahms wrote powerful and emotional symphonies.

Richard Wagner

1813-1883

To Listen or Not to Listen...
Can you imagine a genre that was so powerful it could make you feel like you were living through a war? That's what Wagner's music was like. He wrote operas that were so dramatic and emotional, they were called 'music dramas'. He was a pioneer of the 'Gesamtkunstwerk' (total work of art) concept, where music, drama, and visual arts were all combined into one.

Wagner's Sound
Wagner's music is often described as 'monophonic' - a single line, a tone on its own. It creates a sense of calm, perfect for a focused, intense contemplation of faith. He wrote mostly sacred plainchant (where people all sing the same line, with religious texts used for the words), intended for use in church. The abbey consisted of 50 monks who all had trained voices and would sing daily. It's believed a Benedictine nun at the time would sing for eight hours each day! With an in-house choir, then, an abbey provided an ideal testing ground for new music. Music becomes a form of prayer, and having everyone sing the same line creates a powerful symbol of togetherness through faith.

LISTEN!
The Greeks were the first to use letters of the alphabet to represent different notes. Yet until the Middle Ages, almost all music was passed down the generations by mouth, instead of being written down. There was a lot to learn in the 600s, monks in churches are estimated to have memorised 80 hours of music, all by ear! By the 900s, it took around 10 years to teach a young chorister all the pieces they'd need to know for future services. And you think school is intense...

George Gershwin

1898-1937

George's Sound
Gershwin had a gift for melody. He wrote music that was so catchy and popular, it was everywhere. He was a pioneer of the 'jazz symphony' genre, where jazz and classical music were combined. He wrote some of the most famous pieces in American music, including 'Rhapsody in Blue' and 'An American in Paris'.

LISTEN!
The Greeks were the first to use letters of the alphabet to represent different notes. Yet until the Middle Ages, almost all music was passed down the generations by mouth, instead of being written down. There was a lot to learn in the 600s, monks in churches are estimated to have memorised 80 hours of music, all by ear! By the 900s, it took around 10 years to teach a young chorister all the pieces they'd need to know for future services. And you think school is intense...

Hildegard of Bingen

1098-1179

Here's someone who was, in every sense, a visionary Hildegard of Bingen had visions of God and wrote them down as poems and music.

Music was just one part of a lifetime of interests. Hildegard of Bingen - named after the German town she came from - was (deep breath!) a nun, diplomat, writer, leader, adviser, plant expert, scientist, public speaker... and a composer. But it all came back to faith. Hildegard became a nun aged 15 and later created her own monastery with 18 sisters. As if that wasn't enough, Hildegard then developed her own language and alphabet, possibly to help bring her nuns together. She used her talents - for music and for words - to unite people. It was all ultimately about expression. Hildegard wrote books on natural history, plants and medicine, and was even the first person to write a morality play, a drama where good battles evil (think Star Wars, but in the 1100s). That made her the 'influencer' of the time! She became a pen pal of popes, kings, emperors and cardinals, and was herself a major public leader: she went on at least four public speaking tours of Germany. This was bold stuff, given that women of the time were not allowed to travel as preacher-teachers, she was in many ways an early feminist, championing the rights of women and dealing with men on an equal footing. No wonder why, in the centuries after her death, Hildegard was considered for sainthood by no less than four different popes!

Learning by Ear
The Greeks were the first to use letters of the alphabet to represent different notes. Yet until the Middle Ages, almost all music was passed down the generations by mouth, instead of being written down. There was a lot to learn in the 600s, monks in churches are estimated to have memorised 80 hours of music, all by ear! By the 900s, it took around 10 years to teach a young chorister all the pieces they'd need to know for future services. And you think school is intense...

LISTEN!
A Feather on the Breath of God sung by Gothic Voices
Hildegard was a Bible-leaver name even in musical circles, until early music became widely performed and recorded from the 1970s onwards. One of the recordings in this album, released in 1985.

She sent me a letter!
And a botany book to me!
I'm scheduling that next tour!

Ancient Love Stories

A striking collection of love stories from ancient history.

- Final contents - Sappho (ancient Greek), Nebuchadnezzar II and Amytis (Babylonian), The Sacred Band of Thebes (ancient Greek), Sima Xiangru and Zhuo Wenjun (Chinese), Mark Antony and Cleopatra (ancient Rome), The Lovers of Pompeii (ancient Rome), Hadrian and Antinous (ancient Rome), Eloise and Abelard (French), Frances Howard and Robert Carr (English), Shah Jahan and Mumtaz Mahal (Indian), The Sanchos (USA)
- Written by award-winning classicist and author, Emily Hauser.
- Featuring a range of true stories from around the world, discover the astonishing lengths humankind have gone to in the name of love.
- A list of Sander's publishers: US - Penguin Random House; Germany - Knesebeck Von Dem GmbH

Ancient Love Stories

THE SACRED BAND OF THEBES

This was the final meeting place of the Sacred Band of Thebes, one of the most remarkable and most loyal armies that had ever lived. A bold experiment in an open town square by attacking war and heroes alike, who had died fighting for the freedom of the Greeks. An army, not just of soldiers, but of a hundred and fifty noble boys.

Born together by love loyalty to each other, the crack team of warriors was founded in Thebes in 378 BC by an extraordinary visionary by the name of Pammenes. It began as a resistance corps against the looming military power of Sparta (recovered the world over for its legendary military prowess across the continent to the south. These were chivalry, aristocratic, open, splashing blood across the pages of history, and well suited to the birth of a new kind of army.

HERODIAS AND ANTOCHUS

These parts first crossed across years earlier, when Herodias - ruler of the Roman world and self-proclaimed prince of peace - took a summer jaunt across the Roman province of Bithynia, in northern Turkey, where Antiochus had his home. The emperor, busy with his job, probably did not spot Antiochus among the crowds of adoring subjects and eager petitioners. But one of his mistresses did - and, as usual, with an eye to the emperor's taste, spent a night in the palace in the beautiful bedroom named after the name of Pammenes. This must have seemed an offer too good to be true - a one-way ticket to live among the stars. But, in any good market of opportunity, you'd have known, by reaction to the sun and you might get heated.

Antiochus' rise to the top was meteoric even by Roman standards, where there were plenty of holy emperors who made it to the big time. Set among the other staff of the imperial household, Antiochus - handsome, good-looking, smart, with a magnetic personality and a sensitive taste for Herodias' favored wine - quickly caught the emperor's eye. Herodias was instantly besotted, and Antiochus became his paragon. In the summer of 118 AD, at the age of seventeen, Antiochus was personally selected to accompany Hadrian on a tour of Greece (Hadrian was a notorious Greekophile), then later Asia Minor and, finally, Egypt.

HERODIAS AND ANTOCHUS

It was clear to everyone that Herodias was willing to let Antiochus out of his sight - and together, they took part in many extraordinary experiences over their around-the-world trip. A night-long dip into mystical waters at the Thessalonian Mountains of Greece. A bank heist in the highlands of Asia Minor. A quest - about the searching out of Hadrian's much-loved Greek mythology books - to take down a mountain lion that had been terrorizing the people of Licia. On all these adventures, the new obsession with each other grew steadily.

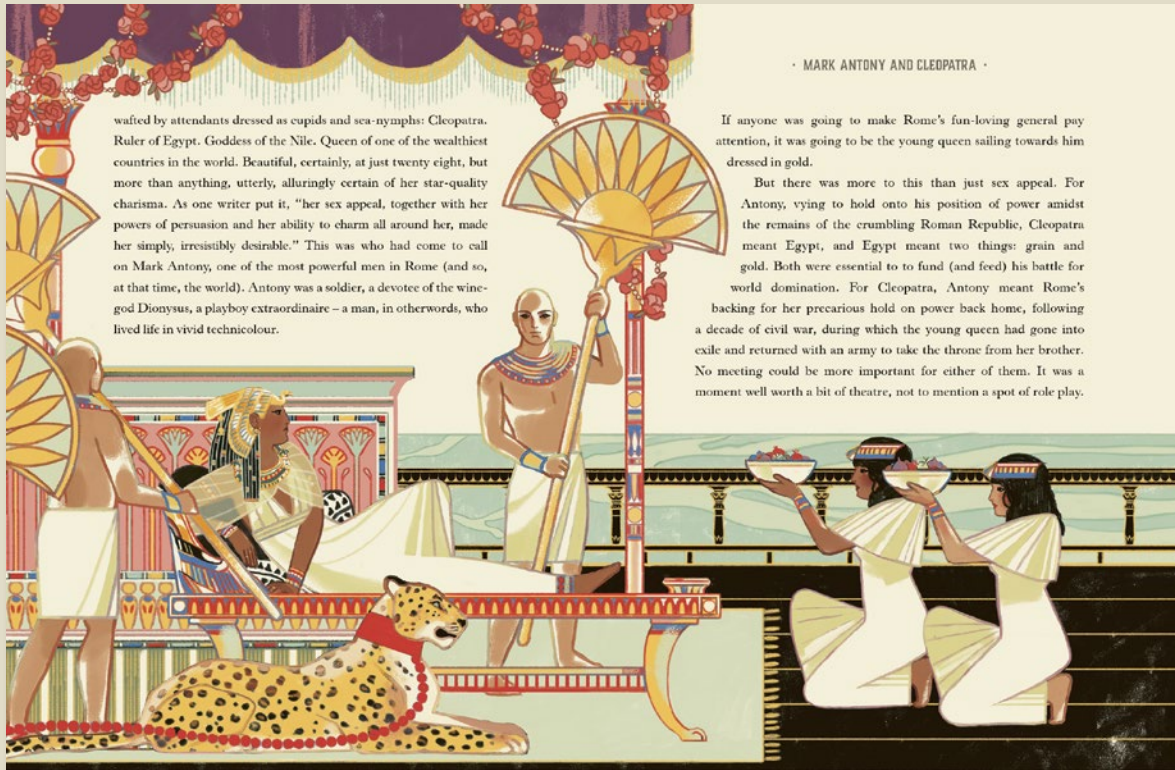

SHAH JAHAN AND MUMTAZ MAHAL

The story of Shah Jahan and Mumtaz Mahal is one of the most beautiful love stories of all time. A tale of passion, devotion, tragedy and ultimate sacrifice, their love story is a testament to the power of love.

It all started when Shah Jahan, one of the great Mughal Emperors, fell in love with Mumtaz Mahal, the most beautiful woman in the world. They were married in 1629, and their love was so strong that they had five daughters and three sons. Mumtaz Mahal was the most beloved of all, and she was the one who inspired Shah Jahan to build the Taj Mahal, a masterpiece of architecture that stands as a testament to their love.

At the time, the Mughal empire was down to its last days, and Shah Jahan was struggling to hold it together. He was a man of many talents, a brilliant strategist and a skilled administrator. But he was also a man of deep faith, and he believed in the power of love. He was a man who believed in the power of love, and he was a man who believed in the power of love.

MARK ANTONY AND CLEOPATRA

wafted by attendants dressed as cupids and sea-nymphs: Cleopatra, Ruler of Egypt. Goddess of the Nile. Queen of one of the wealthiest countries in the world. Beautiful, certainly, at just twenty eight, but more than anything, utterly, alluringly certain of her star-quality charisma. As one writer put it, "her sex appeal, together with her powers of persuasion and her ability to charm all around her, made her simply, irresistibly desirable." This was who had come to call on Mark Antony, one of the most powerful men in Rome (and so, at that time, the world). Antony was a soldier, a devotee of the wine-god Dionysus, a playboy extraordinaire - a man, in other words, who lived life in vivid technicolour.

If anyone was going to make Rome's fun-loving general pay attention, it was going to be the young queen sailing towards him dressed in gold.

But there was more to this than just sex appeal. For Antony, vying to hold onto his position of power amidst the remains of the crumbling Roman Republic, Cleopatra meant Egypt, and Egypt meant two things: grain and gold. Both were essential to fund (and feed) his battle for world domination. For Cleopatra, Antony meant Rome's backing for her precarious hold on power back home, following a decade of civil war, during which the young queen had gone into exile and returned with an army to take the throne from her brother. No meeting could be more important for either of them. It was a moment well worth a bit of theatre, not to mention a spot of role play.

There are Mammals Everywhere

An illustrated introduction to mammals.

- A combined quantity of over 100,000 copies worldwide (as of July 2022) has sold for Britta's *There Are...* series
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally
- Contents: There are mammals everywhere; It's a mammal! So what is that that?; Mammals have been around for ages; Where do mammals live?; The savannah; Staying alive; Feeding; Moving (elephant spotlight spread); Mammal parents; Mali elephants; Birds and people
- The colourful exploration of mammals follows on from Britta Teckentrup's *There are Fish Everywhere*, *There are Bugs Everywhere*, *There are Reptiles Everywhere* and *There are Birds Everywhere*.

There are Mammals Everywhere

IT'S A MAMMAL! (SO WHAT IS THAT?)

There are almost 6,000 species of mammal alive today. Mammals may look very different on the outside, but they all have **skullcaps** that allow them to perform a wide range of movements. Some mammals have four legs and a tail, but others walk on two legs, fly using two wings, or have flippers and fins.

BIG BRAINS
Mammals have big brains for their body size. This means they can think and learn from their experiences. They can also remember things for a long time.

BREATHING AIR
Mammals have lungs to breathe in and out. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

RECORD-BREAKERS
Mammals are the only animals that can fly. They are also the only animals that can walk on water. Some mammals can even walk on their hind legs.

WINGS
Mammals have wings to fly. They are the only animals that can fly. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

CATS
Mammals have claws to catch their prey. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

TEETH
Mammals have teeth to eat their food. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

HAIR
Mammals have hair to keep them warm. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

WALKING
Mammals have legs to walk. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

SWIMMING
Mammals have flippers to swim. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

FLYING
Mammals have wings to fly. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

MAMMALS HAVE BEEN AROUND FOR AGES

Mammals have been around for a really long time. The first mammals looked like shrews, which are tiny animals with long, whiskered snouts. They lived about 200 million years ago. Other mammals looked like cats and some of these grew much bigger than cats. They lived about 100 million years ago. Some mammals looked like horses and some of these grew much bigger than horses. They lived about 50 million years ago. Some mammals looked like elephants and some of these grew much bigger than elephants. They lived about 20 million years ago. Some mammals looked like giraffes and some of these grew much bigger than giraffes. They lived about 10 million years ago. Some mammals looked like humans and some of these grew much bigger than humans. They lived about 5 million years ago.

PROBOSCIDEANS
The first proboscideans were small, shrew-like animals. They lived about 60 million years ago. Some proboscideans looked like pigs and some of these grew much bigger than pigs. They lived about 20 million years ago. Some proboscideans looked like elephants and some of these grew much bigger than elephants. They lived about 10 million years ago.

PRIMATE
The first primates were small, shrew-like animals. They lived about 60 million years ago. Some primates looked like monkeys and some of these grew much bigger than monkeys. They lived about 20 million years ago. Some primates looked like humans and some of these grew much bigger than humans. They lived about 10 million years ago.

WALKING
The first walking mammals were small, shrew-like animals. They lived about 60 million years ago. Some walking mammals looked like horses and some of these grew much bigger than horses. They lived about 20 million years ago. Some walking mammals looked like elephants and some of these grew much bigger than elephants. They lived about 10 million years ago.

FLYING
The first flying mammals were small, shrew-like animals. They lived about 60 million years ago. Some flying mammals looked like bats and some of these grew much bigger than bats. They lived about 20 million years ago. Some flying mammals looked like humans and some of these grew much bigger than humans. They lived about 10 million years ago.

SWIMMING
The first swimming mammals were small, shrew-like animals. They lived about 60 million years ago. Some swimming mammals looked like whales and some of these grew much bigger than whales. They lived about 20 million years ago. Some swimming mammals looked like humans and some of these grew much bigger than humans. They lived about 10 million years ago.

WHY ARE MAMMALS UNIQUE?

Mammals are a large and very successful group of animals. They have been able to spread across the world and survive in all sorts of habitats because they have some unique ways to stay warm, find their young and get food.

WARM BLOOD
Mammals are endothermic, which means they can control their body temperature. They can keep their body temperature warm even in cold weather. This allows them to live in a wide range of habitats. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

BIG BRAINS
Mammals have big brains for their body size. This means they can think and learn from their experiences. They can also remember things for a long time. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

SEA OTTERS
Sea otters are the only mammals that live in the Pacific Ocean. They have a thick layer of fur that keeps them warm in the water. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

RECORD-BREAKERS
Mammals are the only animals that can fly. They are also the only animals that can walk on water. Some mammals can even walk on their hind legs. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

WINGS
Mammals have wings to fly. They are the only animals that can fly. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

CATS
Mammals have claws to catch their prey. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

TEETH
Mammals have teeth to eat their food. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

HAIR
Mammals have hair to keep them warm. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

WALKING
Mammals have legs to walk. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

SWIMMING
Mammals have flippers to swim. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

FLYING
Mammals have wings to fly. They have a diaphragm, a muscle that contracts and relaxes to pull air into the lungs and push it out.

WHERE DO MAMMALS LIVE?

Nearly all species of mammals live on land – about 98 per cent of them. However, there are groups of mammals that spend most, or all, of their lives in water. These include **pinnipeds, whales and dolphins**. Other groups of mammals are superb swimmers and spend lots of time in the water, but choose to stay on land when they give birth or raise their young.

WHALES
Whales are perfectly adapted to life in the ocean. They have smooth skin and torpedo-shaped bodies that slip easily through the water. They have **flippers** instead of legs and they breathe using **blowholes** on the top of their heads.

Blue whale babies are enormous and they grow a thousand times faster than a human baby!

WHALES mothers give birth in the ocean. Their babies are called **calves** and they stay close to their mothers while they grow and learn how to find food.

WHALES are good swimmers. They enter the water through tunnels underwater and can stay safe and warm in their home during long, cold winters.

BEAVERS
Beavers belong to a group of mammals called **rodents** that have super-strong front teeth. They use these teeth to gnaw trees and branches and use the wood to build their homes in the middle of a pond or slow-flowing river.

A beaver's home is called a lodge. It contains rooms, called chambers, where young beavers are kept safe from predators.

BEAVERS are good swimmers. They enter the lodge through tunnels underwater and can stay safe and warm in their home during long, cold winters.

TUNDRA

The land around the Arctic is called the **tundra** and it is famous for its snowy blizzards and blustery winds. It is a difficult place to live – unless you can stay snug inside your own super-thick fur coat. **Musk oxen** have hair that almost touches their toes and they snuggle up next to each other to get the benefit of some buddy-body-warmth!

FORESTS
Tropical forests are packed with tall trees that bloom all year round, producing plenty of fruit for any animals that can reach it. **Orang-utans** spend almost all of their lives in the branches, using their strong arms to climb from tree to tree, following the fruit as it ripens.

DESERTS
Deserts are very dry habitats that experience extreme temperatures. **Bactrian camels** survive desert life by storing food and water as fat inside their two **humps**. They grow thick, shaggy fur for the icy winter, and shed it for the hot summer months.

CAVES
Many species of bats gather together in caves in big groups called **colonies**. They rest during the day by hanging upside down from the cave ceiling and go hunting at night. Some caves can house more than five million bats!

CAN YOU FIND?
Other animals like to camp out in a beaver's lodge, including **water voles**. Can you find one of those small, furry rodents with a long tail?

There Are Amphibians Everywhere

An illustrated introduction to amphibians.

- Contents: There are amphibians everywhere; It's an amphibian! (So what is that that?); Amphibians have been around for ages; Where do amphibians live?; How do amphibians live?; Moving; Feeding; Life stories; Metamorphosis; Staying alive; Tropical terrors (poisonous frog spotlight spread); Amphibians and people
- Britta's There Are... series has sold a combined quantity of over 100,000 copies worldwide (as of July 2022)
- Lush and colourful illustrations to immerse young readers in the natural world
- Lively text and use of search-and-find element make these books informative and interactive.
- Britta's 'One is Not a Pair' series has sold 250,000 copies internationally

Art is Everywhere

A playful introduction to art history.

- Growing demand for children's art books that aren't biography or activity
- Fresh, inspiring take on a strong topic
- Highly accessible angle - discusses ideas and techniques that can be applied to art anywhere and everywhere
- Author is a knowledgeable art historian with a witty, unique tone, and years of experience with leading art workshops for children
- Both UK and international sales have seen demand for more 'art' titles. A great opportunity for us to show support for suffering creative arts scene and fill a gap on our list.
- Subjects covered - Why Do we Make Art?, Brush Strokes, Patterns, The Power of Colour, Art Can be Anything, Symbols

Art is Everywhere

The **INCIDENT** was this.

Keith was in a big gallery somewhere, looking at the artwork on display. There were a lot of other people doing the same thing. I mean A LOT. With some pieces of art, you even had to wait your turn to look! And then Keith noticed something.

There were hundreds, there were THOUSANDS of beautiful, gorgeous, sumptuous pieces of art. Art as far as the eye could see! But the people visiting the gallery were only looking at the art that they were told to look at, or at the pieces that they recognised. They took a photograph, and then they quickly moved on.

Keith tried to get the crowd's attention to show them the many other marvellous paintings, sculptures, pots and textiles, but they ignored her. This made Keith rather angry.

An exploration of rivers with fold-out pages

- A stunning look at geography, exploring the physical features of rivers, the unique wildlife they support and how they have shaped human history.
- Featuring 6 mighty rivers from around the world, one from each continent
- CONTENTS: A World of Rivers; Where do rivers get their water?; Source; Heading Downhill; Waterfalls; Underground Rivers; Gorges; Rapids; Dams; The Danube; Around the Bend; River Life; River Highway; The Ganges; Making Lakes; The Amazon; River City; The Murray; Extraordinary Rivers; Floating Islands of the Sudd; The Nile; Deltas; Estuaries; The Mississippi; Mangroves; Salmon Run
- Includes fold-out pages throughout
- Cover treatment: matt lam + spot UV + 5th colour

Celebrate the achievements made in medical engineering and take a glimpse into the future.

- Sample contents: The First Prosthetics, Jack E. Steele - Father of Bionics, Arne Larsson - The First Pacemaker Patient, How Cochlear Implants Work, Eye Replacements, Keith Hayman - The First Bionic Eye, How Bionic Limbs Work, Campbell Aird - The First Prosthetic Arm, Exoskeletons, Neural Implants, The Paralympics, Neil Harbisson - The First Cyborg, Ethics
- Phenomenal artwork by highly acclaimed artist Samuel Rodriguez
- As told by UK Sepsis Ambassador Patrick TJ Kane
- The first of its kind - a book that celebrates the history of medical implantables and prosthetics

PROSTHETIC LEGS THROUGH THE AGES

16th Century: The earliest example of a prosthetic leg is from around 1500. These were made of wood and were attached to the body with a strap. They were often made of a single piece of wood and were attached to the body with a strap.

17th Century: In the 17th century, prosthetic legs were made of wood and were attached to the body with a strap. They were often made of a single piece of wood and were attached to the body with a strap.

18th Century: In the 18th century, prosthetic legs were made of wood and were attached to the body with a strap. They were often made of a single piece of wood and were attached to the body with a strap.

19th Century: In the 19th century, prosthetic legs were made of wood and were attached to the body with a strap. They were often made of a single piece of wood and were attached to the body with a strap.

20th Century: In the 20th century, prosthetic legs were made of metal and were attached to the body with a strap. They were often made of a single piece of metal and were attached to the body with a strap.

21st Century: In the 21st century, prosthetic legs are made of advanced materials and are attached to the body with a strap. They are often made of multiple pieces of advanced materials and are attached to the body with a strap.

BLAKE LEEPER

"Life is 10% what you deal with and 90% how you deal with it."

Retired American Paralympic athlete Blake Leeper was born in 1980 with both of his legs missing below the knee. Leeper's father was a coach, so he grew up with a natural affinity for sports. Leeper wanted to pursue a career in athletics, but a prosthetic leg made being that for "hardly" to be able to run and jump like the rest of the world.

Thanks to Leeper's hard work and determination and off, and he made his debut for the US Paralympic team in 2008. Since 2007, Leeper has won a total of eight Paralympic, Track and Field medals for his country, and even set a world record in the 400m dash in 2012. His remarkable achievements were made in 2012, when he became the first amputee to compete against able-bodied Olympic athletes at the US Track & Field Championships.

Later, Leeper's career came to an end in 2010, when he was diagnosed with a rare form of cancer. He was given a choice between surgery and chemotherapy, but he chose surgery. He was given a choice between surgery and chemotherapy, but he chose surgery. He was given a choice between surgery and chemotherapy, but he chose surgery.

BEYOND BIONICS

So far, bionics has been playing catch-up with the body parts they are trying to emulate. While the devices available today have changed a lot, they are still not as smooth, functional, sensitive and efficient as the organs and limbs that bionics has promised. As we look at the next advancements that have been made since the start of the last century, we can be certain that technology will replace the human. Instead of giving them the appearance of an arm, leg or eye, the creative engineers will bring to life the real thing.

Science and the bionics will continue to provide more options that are less expensive, more durable and better at copying what humans can do. But there may come a point where we will see something that is a quantum leap. For example, a device that can be used to replace a human eye. It could be charged and used to replace the human eye. It could be used to replace the human eye. It could be used to replace the human eye.

Looking further ahead, it could be possible to replace all of our body parts with bionics. Bionics in the future could be one that is able to replace all of our body parts with bionics. Bionics in the future could be one that is able to replace all of our body parts with bionics.

EYEWEAR

Eyeglasses may seem commonplace today, but it has taken hundreds of years to develop them to where they are now, helped by a series of inventions along the way. The ancient Romans first wrote about using glass beads to read, similar to how reading glasses work today. However, it was the Arab scientist Al-Hasan Ibn al-Haytham, a man known as the 'father of modern optics', who first wrote about using convex (outwards curved) lenses to magnify an image. Eventually, Ibn al-Haytham's literature made its way to Western Europe, and translations of his work led to glass 'reading stones' becoming common. The Italians improved further on these stones to create the first eyeglasses in the late 1200s.

New materials have allowed frames for glasses to become lighter and more durable. The colour of lenses has changed too, creating the first purpose-built sunglasses. These work by adding cerium oxide (a type of chemical compound) into the glass to filter out harmful ultraviolet light from the sun. Sunglasses quickly became fashionable, and in 1938, it was reported that 20 million sunglasses had been sold the year before in the US. Interestingly, only a quarter of those people needed sunglasses for medical reasons. This development is an example of a product that was initially designed to benefit a few but ended up benefitting many. It is testament to the importance of innovation within the disabled community.

The latest breakthrough in eyewear has come more recently, with EnChrome® glasses first launching in 2012. These special glasses are designed to help alleviate problems caused by colour-blindness.

People who are colour-blind find it difficult to distinguish between certain colours, such as red and green. EnChrome® glasses use the same principle as cerium oxide in the first sunglasses, but instead of filtering out harmful UV light, EnChrome® glasses filter out the wavelengths of light that get confused by the brain in those people with red-green colour vision deficiency.

Our Time on Earth

This book about animal life cycles is a celebration of creatures big and small.

- **WINNER of the Association for Science Education Award 2022**
- Sample contents: Mayfly; Honey Bee; Monarch Butterfly; Opossum; Etruscan Shrew; Giant Pacific Octopus; Axolotl; Trapdoor Spider; Grizzly Bear; Brandt's Bat; Orangutan; Laysan Albatross; African Elephant; Saltwater Crocodiles; American Lobster; Galapagos Giant Tortoise; Bowhead Whale; Greenland Shark; Immortal Jellyfish
- Consulted by wildlife cameraman and producer Fredi Devas, who has worked on David Attenborough's One Planet: Seven Worlds BBC series.
- Discover creatures who are born within a day of their mothers, or others who stay infantile for almost one hundred years.

Up in the Canopy

Explore the jungle layer by layer with a huge fold-out surprise at the end.

- James Aldred's book *The Goshawk Summer* won the 2022 James Cropper Wainwright Prize for Nature Writing.
- Written from the perspective of real-life Emmy-nominated cameraman and explorer, James Aldred
- Stunningly illustrated - with artwork as rich and dense as the rainforest itself
- Huge fold-out tree at the back of the book, which readers can pore over.
- Matt lam, fluoro pantone and spot UV finishes.

Under the Starlit Sky

This beautifully illustrated book takes readers on a journey from the roots to the canopy of a majestic old oak tree, right in the heart of Europe's most ancient forest ... with a huge fold-out surprise on the final spread.

- The follow up title to the beautiful *Up in the Canopy*
- As told by real life explorer and tree climber, James Aldred (winner of the 2022 Wainwright Prize for Non-Fiction)
- Illustrated by award-winning duo *Good Wives and Warriors*.

The Science of Sound

The Science of Sound

B P P

COVER TO BE REVEALED

**A visual exploration
of the science behind
sound and music.**

- An visually extraordinary take on the subject of sound
- Perfect for primary schools (on KS2 curriculum), but also the ideal gift book for general interest readers
- Engaging text by Trevor Cox - a professor of acoustics and engineering at Salford University.

This visually extraordinary book presents the history of money as it has never been seen before - from coins to contactless, bankruptcy to billionaires

- Vibrant illustrations and dynamic layouts will appeal to the audience
- Digestible and easy-to-understand text by expert children's author, Alex Woolf.
- A global topic with growing relevance in today's world. There is a significant lack of publishing for children on this subject.
- Pantone and 100% foil cover finishes.

DIFFERENT KINDS OF MONEY

Money serves because it is traded, but this trade doesn't come out of nowhere. It has to be based on something. There are several reasons why money might be valued. Some money is traded because it is made of something valuable, such as gold or silver. This is called commodity money. Another kind is traded because it represents something valuable. This is called representative money. A third kind is traded simply because a government tells it is valuable. This is called fiat money.

COMMODITY MONEY

The earliest form of commodity money was cowrie shells. They were small, round, and easy to carry. They were used in many parts of the world, including the Indian Ocean and the Mediterranean. Commodity money is made from things that have value on their own. It can be used to buy things, and it can be traded for other things. Commodity money is often used in places where there is no government or where the government is weak. It is also used in places where there is a lot of trade, such as in the Silk Road.

REPRESENTATIVE MONEY

The earliest form of representative money was gold coins. They were made of gold and had a picture of a ruler on them. They were used in many parts of the world, including the Roman Empire and the Islamic world. Representative money is made from things that represent something valuable. It can be used to buy things, and it can be traded for other things. Representative money is often used in places where there is a government and where the government is strong.

FIAT MONEY

The earliest form of fiat money was paper money. It was made of paper and had a picture of a ruler on it. It was used in many parts of the world, including the Chinese Empire and the Islamic world. Fiat money is made from things that have no value on their own. It is only valuable because a government tells it is. Fiat money is often used in places where there is a government and where the government is strong.

A WORLD WITHOUT MONEY

To understand why money is useful, let's try to imagine a world without money. In such a world, the only way to get hold of the things you need would be to make or grow them, or steal them from other people. These people are called barter. Barter is the exchange of goods or services for other goods or services without using money.

BARTER AND GIFTS

Barter is the exchange of goods or services for other goods or services without using money. It is often used in places where there is no money or where the money is not used. Barter is often used in places where there is a lot of trade, such as in the Silk Road. Barter is often used in places where there is a government and where the government is weak.

THE PROBLEMS WITH BARTER

Barter has several problems. First, it is difficult to find someone who has what you need and who wants what you have. Second, it is difficult to measure the value of things. Third, it is difficult to store things. Fourth, it is difficult to transport things. Fifth, it is difficult to divide things. Sixth, it is difficult to trade for things that are not needed immediately.

CONSEQUENCE OF WANT

Barter is often used in places where there is a government and where the government is weak. It is also used in places where there is a lot of trade, such as in the Silk Road. Barter is often used in places where there is a government and where the government is strong.

WHAT MAKES A GOOD FORM OF MONEY?

The earliest forms of money were very different to the money we use today. There was no paper or printing process or machines to make money. People had to make it with their hands. They used things like gold, silver, and copper. They used things like cowrie shells, beads, and stones. They used things like cowrie shells, beads, and stones. They used things like cowrie shells, beads, and stones.

LEATHER MONEY

Leather money was used in many parts of the world, including the Islamic world. It was made of leather and had a picture of a ruler on it. It was used in many parts of the world, including the Islamic world. Leather money is often used in places where there is a government and where the government is strong.

MINERAL PRODUCTS

Mineral products were used in many parts of the world, including the Islamic world. They were made of minerals and had a picture of a ruler on them. They were used in many parts of the world, including the Islamic world. Mineral products are often used in places where there is a government and where the government is strong.

LEATHER MONEY

Leather money was used in many parts of the world, including the Islamic world. It was made of leather and had a picture of a ruler on it. It was used in many parts of the world, including the Islamic world. Leather money is often used in places where there is a government and where the government is strong.

QUIRKY CURRENCIES

Many unusual objects were used as money in the era before notes and coins. These included foodstuffs such as barley, rice, corn and wheat. The Chinese used tea bricks to pay for things, whereas the Aztecs used cacao beans, and the peoples of ancient Africa and the Middle East measured value in coffee beans. The Mesopotamians kept sacks of grain in protected barns, much like the banks of today. When stored carefully, these foods could provide a reasonable store of value. But a storm or a bad harvest could wipe out your wealth.

MONEY YOU CAN EAT

Some surprising foods have been used as units of exchange in different parts of the world. Here are some of them.

BUTTER

The Hittites of ancient Mesopotamia used butter as a form of money. They used it to pay for things and to trade with other people.

CHEESE

In ancient Mesopotamia, cheese was used as a form of money. It was used to pay for things and to trade with other people.

EELS

In ancient China, eels were used as a form of money. They were used to pay for things and to trade with other people.

COCONUTS

In ancient Hawaii, coconuts were used as a form of money. They were used to pay for things and to trade with other people.

EGGS

In ancient Japan, eggs were used as a form of money. They were used to pay for things and to trade with other people.

POTATO MASHERS

In ancient Cameroon, potato mashers were used as a currency. These heavy iron objects, called ensusbas, were shaped like a club.

KISSI PENNIES

The kissi penny was a currency used mainly in West Africa in the first half of the twentieth century. They were long iron rods, usually arranged in bundles of twenty. A cow could be bought for 30 or 40 bundles.

IRON SNAKES

The Lobi tribe of Burkina Faso used iron snakes as a currency. They would also attach them to their calves as a protection from snake bites and lightning.

KNIVES

Large bronze knives circulated as currency in ancient China between 600 and 200 BCE. According to one story, this started when a prince who was running low on money to pay his troops allowed them to use their knives to pay for goods in the local village.

RAI STONES

The small Pacific island of Yap possesses the world's biggest money. Rai stones are huge discs of rock weighing up to 8 tonnes each. The stones are rarely moved, and are not used for day-to-day transactions, but they change hands as ceremonial gifts, to forge alliances, resolve conflicts or to apologise for wrongdoing.

From Shore to Ocean Floor

From sandy beaches to mysterious, inky depths, this beautiful book is the story of ocean exploration.

- Sequel to *Balloon to the Moon*, winner of the 12-16 category in the British Book Design and Production Awards
- A wonderful combination of mythology, science and history that takes readers on a narrative journey through one of the world's most fascinating stories of exploration
- Gill Arbuthnott is a former secondary school science teacher.
- Made in consultation with the Maritime Museum.

From Cells to Ourselves

From the Big Bang to the abundance of life that surrounds us today, this beautiful book is the story of evolution, from the very first cells to ourselves.

- The third title in the *Balloon to the Moon* series, which won the 12-16 category in the British Book Design and Production Awards 2019
- A wonderful combination of mythology, science and history that takes readers on a journey through one of the most fascinating subjects in natural history
- Gill Arbuthnott is a former secondary school science teacher.
- Cover treatments: 100% foil, uncoated varnish

From Cells to Ourselves

HOW DID LIFE BEGIN?

THE 1920s American chemist Stanley Miller and British biologist Harold Urey conducted the Miller-Urey experiment in 1953. They simulated the conditions of the early Earth in a laboratory. They used a mixture of gases (methane, ammonia, hydrogen, and water vapor) and passed an electric spark through them, mimicking lightning. This process produced amino acids, the building blocks of proteins, suggesting that life could have begun through natural processes.

THE 1950s British biologist Francis Crick and American physicist James Watson discovered the structure of DNA in 1953. They proposed the double helix model, which showed how genetic information is passed from one generation to the next.

THE 1960s American biologist Lynn Margulis proposed the endosymbiotic theory in 1967. She suggested that mitochondria and chloroplasts were once free-living organisms that were taken into a larger cell and eventually became part of it.

THE 1970s American biologist James Watson and British biologist Francis Crick discovered the structure of DNA in 1953. They proposed the double helix model, which showed how genetic information is passed from one generation to the next.

THE 1980s American biologist Lynn Margulis proposed the endosymbiotic theory in 1967. She suggested that mitochondria and chloroplasts were once free-living organisms that were taken into a larger cell and eventually became part of it.

THE 1990s American biologist James Watson and British biologist Francis Crick discovered the structure of DNA in 1953. They proposed the double helix model, which showed how genetic information is passed from one generation to the next.

THE DINOSAUR DETECTIVES

In the 19th century, scientists discovered, investigated and named many species of dinosaurs. But for a long time, these dinosaurs remained hidden.

MARY ANNING (1804-1847) was a fossil collector in Lyme Regis, Dorset. She discovered the first Ichthyosaurus fossil in 1830. She also discovered the first Plesiosaurus fossil in 1830. Her discoveries were the first evidence of dinosaurs in the UK.

WILLIAM BUCKLAND (1784-1861) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He named it Megalosaurus. He also discovered the first dinosaur fossil in 1824. He named it Megalosaurus.

RICHARD OWEN (1804-1892) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He named it Megalosaurus. He also discovered the first dinosaur fossil in 1824. He named it Megalosaurus.

OSBORN MARTELL (1790-1852) was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He named it Megalosaurus. He also discovered the first dinosaur fossil in 1824. He named it Megalosaurus.

THE GREAT OCEAN WALKER was a geologist and paleontologist. He discovered the first dinosaur fossil in 1824. He named it Megalosaurus. He also discovered the first dinosaur fossil in 1824. He named it Megalosaurus.

THE END OF THE DINOSAUR AGE

For a long time, people believed that the dinosaurs were the only animals that ever lived on Earth. But in the 19th century, scientists discovered that there had been many other animals that lived on Earth at the same time as the dinosaurs. This led to the discovery of the dinosaurs.

THE 19th century was a time of great discovery. Scientists discovered many new species of dinosaurs. They also discovered that the dinosaurs were not the only animals that ever lived on Earth.

THE 20th century was a time of great discovery. Scientists discovered many new species of dinosaurs. They also discovered that the dinosaurs were not the only animals that ever lived on Earth.

THE 21st century is a time of great discovery. Scientists are discovering many new species of dinosaurs. They are also discovering that the dinosaurs were not the only animals that ever lived on Earth.

EARLY IDEAS ABOUT EVOLUTION

How long is a million seconds? Have you been alive for one billion seconds? What was happening a million days ago? We find it very difficult to comprehend these huge numbers. If we don't have a feel for how long a million seconds is, how can we possibly comprehend time spans of millions or billions of years? This is one reason why some people have a problem with evolution. The idea that single, primitive cells evolved into all the species that have ever lived seems incredible, unless you get to grips with the timespans involved.

In ancient Greece, philosopher Anaximander suggested that one type of animal could change into another, while Empedocles thought that new types of living things could be made from a range of parts that already existed.

Theologian Gregory of Nazianzus and Augustine both thought that although God had created all the original animals and plants, new types had developed from them. Their ideas were in response to the practical problems that would have arisen from trying to get two of everything into the Ark.

The naturalist George-Louis Leclerc proposed a way for the Earth to have formed from debris in space. Although he believed in spontaneous generation, he thought that animals could change as they migrated to different conditions. This later explains the discovery of elephant fossils in North America, and mammoth fossils in Siberia, although living elephants are today only found in Africa and South Asia. He suggested the American ones had become extinct, while the mammoths had changed as they migrated south.

Erasmus Darwin was Charles Darwin's grandfather. He was a doctor, poet and naturalist, and in his book Zoonomia, or 'The Laws of Organic Life' he was one of the first people to propose a theory of evolution. He never hit on the idea of natural selection, but did recognise the importance of sexual selection (see page 59) and realised it could cause changes in species.

GRADUAL CHANGES

In the early 1800s Jean-Baptiste Lamarck, inventor of the terms 'invertebrate' and 'biology', was the first person to develop a coherent theory of the development of life on Earth and its evolution. He believed that life had originated by spontaneous generation, rather than creation by deity, and had then become more complex and varied over many generations. Lamarck suggested how this could happen. His idea is often called the 'Theory of Evolution by Acquired Characteristics'. In simple terms, he thought that the more an animal used an organ during its lifetime, the more well-developed it would become and that these changes could be inherited by offspring if both parents had the same developments.

THE EVOLUTION OF THE GIRAFFE'S NECK, ACCORDING TO LAMARCK:

- 1) Early giraffes had short necks.
- 2) Giraffes reach upward to graze on leaves.
- 3) This stretches their necks very slightly over their lifetimes.
- 4) The next generation of giraffes inherits these slightly longer necks.
- 5) This process is repeated over many generations until we arrive at modern, long-necked giraffes. Lamarck was not suggesting that their necks suddenly shoot out like telescopic poles!

THE PROCESS ALSO WORKED THE OTHER WAY:

- 1) Early penguins had wings with which they could fly.
- 2) Penguins spend most of their time swimming and very little flying.
- 3) Their wings become smaller, with smaller feathers, from lack of flying.
- 4) The next generation of penguins inherits these smaller, more flipper-like wings.
- 5) This process is repeated over many generations until we arrive at the modern penguin, which can no longer fly and whose wings are now adapted to help it swim instead.

Art of Protest

Discover the power of words, images and much more in this analytical and thought-provoking look at protest art.

- Stunning artwork by contemporary artists around the world
- As told by TED talker, activist, lecturer and artist De Nichols
- De's *Mirror Casket* project was commended by legendary activist Angela Davis in Smithsonian Magazine.
- **WINNER OF THE BRITISH BOOK DESIGN & PRODUCTION AWARDS IN THE CHILDREN'S TRADE 9 TO 16 CATEGORY!**
- **WINNER OF THE 2023 BOLOGNA RAGAZZI AWARD!**
- Uncoated and fluoro pantone cover treatments with flaps.

Art of Protest

Protest art often makes use of symbols, which can quickly convey powerful meaning.

SYMBOLISM

Paper Cranes
In Japan, it is believed that someone who folds 1,000 origami cranes will be granted a wish. In 1945, two-year-old Sadako Sasaki was in the vicinity of the atomic bomb dropped on Hiroshima. She suffered long-term effects from that exposure, including developing leukaemia. Before she died at the age of 12, Sadako folded more than 1,000 cranes, and the paper crane went on to become a symbol of peace.

The Peace Sign
The peace sign was created by the British artist Gerald Holtom in 1958 as the logo for a campaign for nuclear disarmament in the UK. It has since become an iconic symbol of calls for peace.

Umbrellas
During protests for democracy in Hong Kong in 2014, activists used umbrellas as shields against tear gas and other aggressions by the police. The umbrellas came to symbolize the protests and gave the movement its name (read more on pages 52-53).

The Clenched Fist
The image of an upraised clenched fist is a powerful symbol of protest and resistance. Some of its first uses were by labour unions in the early 1900s, before it grew in popularity and became a symbol of many causes, including Black Power, the anti-apartheid movement and the feminist movement.

The Rainbow
The rainbow is the most iconic symbol of the LGBTQ+ movement. It represents diversity, acceptance and the spectrum of human sexualities and genders.

A stunningly illustrated tribute for train lovers of all ages, celebrating the ingenuity of trains past, present and future.

- Sample contents: The First Railways; Steam Locomotions; The Ffestiniog Railway; The Orient Express; Freight Trains; The Baikonur Cosmodrome; Mail by Rail; The California Zephyr; Mountain Railways; The Darjeeling Himalayan Railway; Trams; Sky Lines; Railways At War; The Princess Christian; High-speed Rail; The Shinkansen
- Beautiful artwork by multi award-winning artist Ryo Takemasa
- Stunning journey through the history of locomotives, suitable for all ages
- Expertly written by railway historian, Alastair Steele

Locomotion

THE FIRST RAILWAYS

Today, railways are commonplace in many parts of the world. They enable around one billion people to travel around the world, and transport goods and millions of passengers every single day. It is amazing to think that they have only been around for less than 200 years.

Railways were first used in the 18th century in Europe. They were used to transport heavy goods, such as coal, iron, and stone. The first railway was built in 1782 in Cornwall, England. It was used to transport tin ore from the mines to the coast.

The first steam engines were used in Britain in the 18th century. They were used to pump water out of mines. The first steam engine was built by James Watt in 1769. It was used to pump water out of mines in Scotland.

One of the first steam engines was built in 1769 by James Watt. It was used to pump water out of mines in Scotland. The first steam engine was built in 1769 by James Watt. It was used to pump water out of mines in Scotland.

THE GAUGE

One of the first steam engines was built in 1769 by James Watt. It was used to pump water out of mines in Scotland. The first steam engine was built in 1769 by James Watt. It was used to pump water out of mines in Scotland.

STEAM LOCOMOTIVES

Once the possibility of mass-produced engines had been realized, a whole host of locomotives were tried and tested around the world. Some proved to be better, others to be unreliable and some were dangerous, but the arrival of one revolutionary design changed the course of history. Another, designed by engineer Robert Stephenson (George Stephenson's son - see page 51) was to provide the principles of design for the rest of the century of steam locomotives that followed.

The first steam locomotive was built in 1804 by Richard Trevithick. It was used to transport iron ore from the mines to the coast. The first steam locomotive was built in 1804 by Richard Trevithick. It was used to transport iron ore from the mines to the coast.

- RAILWAYS OF THE WORLD - THE FESTINIING RAILWAY

The Festiniog Railway is a small but significant engineering feat. It was built in 1825, the first year of the railway age. It was built in 1825, the first year of the railway age. It was built in 1825, the first year of the railway age.

The Festiniog Railway is a small but significant engineering feat. It was built in 1825, the first year of the railway age. It was built in 1825, the first year of the railway age. It was built in 1825, the first year of the railway age.

ELECTRIC LOCOMOTIVES

The first electric train was tested as far back as 1837. Unlike steam trains, electric locomotives do not carry fuel on-board. Instead, they are powered by electricity which can be supplied from overhead lines, a third rail or in storage such as batteries. Because electric trains can be powered by renewable energy sources, they are considered less polluting than steam or diesel trains.

The first electric passenger train was presented by Werner von Siemens at an exhibition in Berlin in 1879. Consisting of a small locomotive and three cars, it reached a speed of just 13km/h.

The ETR 200 is a record-breaking electric passenger train. It is widely considered one of the first ever high-speed trains and was put into service in 1936. In 1938, it broke the speed record for trains by reaching just over 201km/h.

The ICE (Intercity Express) is one of Germany's most successful electric trains. The third generation ICE 3 can reach speeds of 300km/h. Since 2018, it has run on entirely renewable energy sources.

DIESEL LOCOMOTIVES

In a diesel locomotive, the power comes from an engine that burns diesel oil. While a steam locomotive needed two people to crew it and hours to attain the right steam pressure, a diesel locomotive could simply be switched on and driven away, making them much easier and much cheaper to run. Rudolf Diesel patented his first diesel engine in 1898, but it wasn't until around 1912 that they were first used in a locomotive.

The famous DRG Class SVT 877 *Hamburg Flyer*, often referred to as the 'Flying Hamburger', was first put into service in 1933. Its smooth, rounded shape was influenced by Zeppelin airships allowing for minimal air resistance.

The De10c, built in 1956, was considered the most powerful diesel locomotive in the world at that time.

The Intercity 125 is one of the most successful diesel trains of all time. So named because it was designed to cruise at 125 mph (about 201km/h) when in service, it also holds the all-time speed record for diesel trains of 238km/h, which it reached in 1987.

Welcome to the Museum: A Christmas Pop-Up Advent Calendar

The perfect gift, spread joy this Christmas with this decadent pop-up advent calendar, part of the bestselling Welcome to the Museum family.

- Published in conjunction with the Royal Botanic Gardens Kew
- High quality and made from sturdy material, the re-usable decorations and beautiful tree will take pride of place on any Christmas table, year after year.
- Beautiful artwork by textile designer, Emily Carter
- Luxury finishes including 100% foil cover, and interior box.

Welcome to the Museum: A Christmas Pop-Up Advent Calendar

MAMMALS

Reindeer

It is no coincidence that Father Christmas chose reindeer to pull his sleigh, as they are strong, hardy and capable of travelling more than 1,000km a year. As one of the earliest domesticated animals, reindeer share an ancient alliance with humans. These antlered deer thrive in colder climates of Europe, North America and Asia, residing in the frozen northern forests and the Arctic tundra. Covered in fur from head to hoof, reindeer use their useful dew claws to grip onto slippery surfaces and burrow through the snow, feasting on the ferns, fungi and lichen hidden below.

Unlike their magical counterparts, these animals do not need a glowing red nose to illuminate the way. As one of the few large mammals that can see ultraviolet light, reindeer are able to find food, locate predators and stay safe even in the dark, bleak winter when sunlight is scarce.

Key to plate

1: White spruce
This evergreen conifer is the most common species of North America. However, recent studies suggest the tree is originating further north, towards the Arctic Circle. It is possible that working temperatures caused by climate change have allowed them to grow here, in an area where the soil would normally be too shallow.

2: Reindeer
Reindeer are found in the Arctic Circle.

4

BIRDS

European Robin

With its rust-coloured plumage and curious expression, the European robin is a plump, small-billed bird that breeds throughout Europe, Western Asia and parts of North Africa. A much-loved sight, the robin can be spotted all year round, the welcome sound of its melodic warbling filling the frosty air even during winter. As natural ground feeders, robins can be found hopping around gardens, woodlands and parks, foraging for insects and worms.

Despite being only 14cm long, these tiny birds are fiercely territorial, puffing up their scarlet chests and fighting off any feathered intruders that invade their patch. Robins are considered modern Yuletide mascots. They first appeared on Victorian Christmas cards as an ode to the vermilion-coloured uniform of the postmen who delivered them. These postal workers were aptly nicknamed 'redbreasts'.

Key to plate

1: European robin
Erithacus rubecula

2: Common holly
Ilex aquifolium

The UK's most festive plant and for hundreds of years it has been used, along with ivy, to decorate homes at Christmas. Today, this prickly plant, with its water-resistant waxy leaves and bright red berries, makes the ideal festive wreath.

The evergreen holly bush is

FRUITS AND SPICES

Festive Flavours

As Christmas draws near, festive flavours walk through kitchens across the globe, filling the air with traditional aromas of nutmeg, ginger and clove. In Europe, roasted sweet chestnuts make a tasty Christmas treat, harvested from the *Castanea sativa* tree with its prickly husks and grooved bark. The gingy orange is another popular festive food, gifted to well-loved children or peppered with cloves to make a pomander ball. This practice dates back to medieval times, when such spice-studded pomander balls perfumed the frosty air to ward off bad spirits and winter illnesses.

The iconic Christmas pudding also has humble origins, dating back to a porridge-like prune dish served in the 14th century. Although it originally formed part of a British tradition, the Christmas pudding is a global festive phenomenon, enjoyed by families far and wide in countries like South Africa, Australia and Canada. This dessert is often seasoned with cinnamon, a warm, fragrant spice derived from the inner bark of the Ceylon tree of Sri Lanka.

Key to plate

1: Christmas pudding
Filled with the quintessential flavours of the festive season, Christmas puddings are packed with dried fruits, nuts, cloves and spices, and a small amount of alcohol. It has become a staple of the festive season.

2: Orange
Clinging oranges at Christmas may be a tradition, but the orange is a symbol of hope and joy. It is a symbol of hope and joy, and is a symbol of hope and joy.

3: Star anise
Star anise is the same plant as the fennel, but it has a more licorice-like flavour. It is a symbol of hope and joy, and is a symbol of hope and joy.

26

Tales from Beyond the Stars

An anthology of classic science fiction stories.

- Stories will be broken up with a series of 'theme' spreads, which will add a non-fiction element to the book. These spreads cover everything from the rise of the science fiction genre to how it has inspired real life inventions.
- There's a gap in the market for a striking, beautifully illustrated science fiction anthology.
- Evergreen publishing with strong backlist potential and global appeal.
- An opportunity to expand the Big Picture Press list into the adult gift market.
- Resurgence of interest in titles that offer readers 'escapism' on TikTok, including fantasy and science fiction

Tales from Beyond the Stars

starting towards Kensington Gardens, wondering at this strange, red-dusted walling. It was as if that mighty desert of houses had found a voice for its fear and solitude.

Drawn by the sound, I crossed the river at Waterloo Bridge, littered with corpses, and wandered on through the silent streets until I came out at last upon Regent's Park. And as I emerged from the top of Baker Street, I saw far away over the trees in the clearness at the sunset the hood of the Martian giant from which this howling proceeded. I was not terrified. I came upon him as if it were a matter of course. The tripod did not move. The Martian appeared to be standing and yelling, for no reason that I could discover.

Regents canal was choked with the red weed, and it had spread across the grasses and was growing amongst the trees, a spongy mass of dark-red vegetation. As I stood watching, the sound of "Ulla, ulla, ulla, ulla," ceased. Cut off. The silence came like a thunderclap.

A terror seized me. The dusky houses about me stood faint and tall and dim; the trees in the park were growing black. Night, the mother of fear and mystery, was coming down.

I fled. In front of me the road became pitch black as though it were covered in tar, and I saw a contorted shape lying across the pathway. I could not bring myself to go on. I turned down St. John's Wood Road and ran headlong from this unendurable stillness towards Kilburn. I hid from the night and the silence, until long after midnight, in a cabmen's shelter in Harrow Road.

Before the dawn my courage returned, and while the stars were still in the sky I turned once more towards Regent's Park. I had to know what had happened to the tripod.

As I drew nearer and the light grew, I saw that a multitude of black birds was circling and clustering about the hood. At that my heart gave a bound, and I began running along the road.

Tales of the Damned

An anthology of terrifying tales from around the world.

- Stories will be broken up with a series of 'theme' spreads, which will add a non-fiction element to the book. These spreads cover everything from the rise of the horror genre to famous monsters and vampire mass hysteria.
- There's a gap in the market for striking, beautifully illustrated horror anthology.
- Contents: The Mask of Red Death by Edgar Allen Poe; Edgar Allen Poe and the Birth of Horror Literature (NF); Dracula; Vampire Mass Hysteria (NF); The Monkey's Paw; Zombies and the Undead (NF); Red Riding Hood; The Original Dark Fairy Stories (NF); Frankenstein; Mary Shelley and the impact of Frankenstein (NF); Whistle and I'll Come To You; Ghosts and the Victorians (NF); Baba Yaga; Witches (NF); Bluebeard; Blood and Gore (NF)

Cartier: The Story Behind the Style

The Beginnings of Cartier

The house of Cartier started with one man, Louis-François Cartier, but it would take a family to make it one of the most recognised and respected jewellers in history.

It was, in fact, Louis-François' father, Pierre Cartier, who set the dynasty in motion, although he could never have imagined the consequences of his actions at the time. Pierre had fought in the Napoleonic wars and spent time locked in the prison ships docked off the harbour at Portsmouth in Britain. When the war ended in 1815, Pierre returned to Paris, destitute and aimless. He would go on to find employment as a watchmaker and have five children with his wife Elisabeth, a watchwoman.

The eldest of the children born into this working-class Parisian family was Louis-François, and when he was barely out of school, his father sent him to work as an apprentice in a jewellery workshop owned by Adolphe Picard on Rue Montorgueil in Paris. It was a tough education – days were long and grueling and order was maintained with a whip – but he stayed and in 1847, at the age of 27, Louis-François bought the business from Picard, renaming it Cartier.

OPPOSITE: Cartier founder, Louis-François Cartier

His makers mark – a symbol hallmark that every piece of Cartier jewellery no matter how small – was his initials, L. C., separated with an arc of letters playing cool, perhaps as a nod to the financial gamble he was taking. Luckily, the risk paid off and the Cartier business thrived and expanded. In 1866, Princess Mathilde, a cousin of Emperor Napoleon III, purchased one of his jewels, and the Cartier name was suddenly whispered among Parisian high-society, even reaching the international elite. Three years later, Louis-François bought Gillon, a Parisian jeweller better known than his own, and renamed his business Cartier Gillon.

Louis-François' son Alfred Cartier took over the family business in 1874, but it was the arrival of his own three sons – the highly ambitious Louis, Pierre and Jacques – that would really shake up the jeweller and initiate its ascendance to the global brand we know today. The brotherly revolution started with Louis, who joined the maison in 1898. A year later he spearheaded the remaining

OPPOSITE RIGHT: Pierre Cartier playing golf in 1890s.

of the business, stripping over Gillon to once again be known simply as Cartier. At the same time, the business opened a boutique at 13 rue de la Paix, just a stone's throw from Place Vendôme, the heartland of luxury jewellery in Paris. This venture was funded by an enormous dowry levied through a strategic arranged marriage to Andine-Caroline Worth, granddaughter of world famous couturier Charles Frederick Worth.

Cartier garnered a reputation for innovation, and the title of jewellers would later live by a motto, 'Never copy, only create'. One of Louis' most successful experiments in the close of the 19th century was to use platinum in place of gold. This precious metal is now widely used by jewellers across the world, but at the time it was purely an industrial metal and thus revolutionary in the jewellery market. The white metal, which, unlike silver, does not tarnish, is highly malleable and allowed Cartier to create delicate, diamond-set jewels inspired by those created by 18th-century French aristocrats, a stark contrast to the heavier, colourful, Romantic Art Nouveau jewels popular at the time. A signature Cartier Guffand style emerged, swirling across platinum stems, necklaces and earrings, that won over well-heeled women, including royals, in Europe and the United States.

Pierre Cartier, the second eldest of the brothers, would be an agitator in his own right, championing the global expansion of the brand's retail empire. He started by opening a Cartier boutique on New Burlington Street in London in 1902, where the brand showcased a new style of geometric, abstract jewels with unusual colour combinations that would lay the foundations for the Art Deco jewellery movement.

The first decade of the 20th century was an important time for Cartier. In 1904, the jeweller received its first royal certificate from King Edward VII of Britain, and soon started to supply many other royal courts including those of Russia, Spain and Siam (now Thailand). In the same year, Louis Cartier created what he believed to be the first ever men's wristwatch for aviator Alberto Santos-Dumont.

Pierre, meanwhile, embarked on a journey to Russia; one that would prove profitable in commissions from its high society, but also as a source of inspiration that would shape Cartier's jewellery designs for years to come.

In 1909, Pierre would focus his wanderlust on America, opening a Cartier boutique on New York's Fifth Avenue; the precursor to its famous flagship store further up the street, the purchase of which he would famously broker a decade later in exchange for a string of pearls. Back in London, his younger brother Jacques stepped in to take over its British branch. That same year, Cartier moved uptown to a prestigious Bond Street address, where it remains to this day.

As Cartier's man in Britain, and, as such, jeweller to King George V, Jacques joined members of the aristocracy on a trip to India for the Delhi Durbar in 1911. It was an event

to commemorate the coronation of the King, with two weeks of festivities, during which King George V and Queen Mary would be proclaimed Emperor and Empress of India. This adventure to a new land would also prove to be a seminal trip for the house of Cartier. Jacques' sociable nature and love of travel would win ground-breaking commissions from India's rich, jewel-loving maharajas and inspire a whole new category of jewellery, pioneered by Cartier and much copied by other companies.

Tiffany & Co.: The Story Behind the Style

The King of Diamonds: Charles Lewis Tiffany

Charles Lewis Tiffany, the man who would go on to win the moniker of New York's 'King of Diamonds', did not feel from a long line of jewellers. His start in life was more modest, making his name in high society all the more glittering.

Tiffany was born in 1812 in Canton and Ohio. Tiffany and grew up in the small town of Killbuck, Connecticut. The major business of the town was the production of cotton goods, and the family owned a manufacturing company. Tiffany was educated at local schools in the area before joining his father in the family cotton business.

By 1837, Tiffany felt restless. No longer satisfied by working at home with his family, he began to envision how he could make his own mark in business. He turned up with a school friend, J. R. Young, and the duo set in motion a plan to open a stationary store in New York City. With a \$1,000 loan from Charles' father, the ambitious 25-year-olds made the 150-mile journey north. The store, named Tiffany & Young, opened its doors at 259 Broadway that same year, and on its first day, \$4,981 rang through the till.

Tiffany & Young soon began to expand its remit, stocking glassware, silver, porcelain, clocks and jewelry, and began to develop a

OPPOSITE: Tiffany & Co. founder Charles Lewis Tiffany photographed by James Thomson Beach in 1902.

reputation as a purveyor of fine goods of taste. In 1841, the business expanded with the addition of a third partner, J. L. Ellis, and was renamed Tiffany, Young & Ellis. The trio expanded the store, doubling its size by moving the adjacent site, and continued to increase the quality of the goods they sold, with Young making buying trips to Europe to pick out English and Italian jewelry.

It was, in fact, political events in Europe that would be the making of this American luxury success story. In 1848, the status quo crumbled as republican revolutionaries sought to topple European monarchies and strip aristocrats of their power and wealth. It was a societal upheaval known as the Springtime of Nations. More than 50 countries were inspired by this, but none more so than France, where the monarchy was overthrown and replaced with a republic. Such widespread panic and disruption had an impact on the price of diamonds, and Tiffany, Young & Ellis occupied, by now, the firm

was manufacturing its own jewelry, and the opportunity to pick up diamonds at low prices per them as an advantage. The working of the antechamber also housed some important gems – the likes of which had never been seen in America before – and Tiffany secured a number of important fixtures, including the collection of Hungary's Prince Esterházy.

In 1853, Young and Ellis decided to retire from the business, but Charles Lewis Tiffany was far from finished. He found new partners to work with, and the business was, at this point, renamed Tiffany & Company. Tiffany would go on to build his empire, grabbing headlines along the way. By the 1860s, the business was well established as an exponent of choice for the rich and the famous, both for its jewelry and its top-quality silver. In 1862, President Abraham Lincoln purchased a set of pearl necklaces and earrings from Tiffany & Co. for his wife Mary Todd Lincoln, who wore them to her husband's inauguration ball.

In 1870, Tiffany & Co. moved into a large new store in New York's Union Square, marking the beginning of a major decade for the jeweller one in which Charles Lewis Tiffany would earn the title the King of Diamonds. It was a single purchase that would truly justify Tiffany into the high-jewellery atmosphere – a 237.42ct rough fancy yellow diamond. When cut and polished, what emerged was a diamond of staggering enormous proportions for a rare yellow diamond of that quality: it weighed 128.54ct and was named the Tiffany Diamond.

If the purchase of this rare world-famous stone, which is on permanent display at Tiffany & Co.'s Fifth Avenue store in New York, signalled Tiffany's intention to dominate the diamond market, his groundbreaking creation eight years later sealed the deal. Seeking to

celebrate the beauty of diamonds, Tiffany designed an engagement ring in 1886 that remains a sought-after classic to this day. The Tiffany Setting engagement ring kicked back against the over-fussy designs of the time with a clean, minimalist band and a six-prong setting that lifted the diamond above the ring. The purpose for this innovative setting was to allow light to flow through the stone, and therefore maximise the sparkle. It was a huge hit, and the iconic design has become synonymous with engagement rings.

Just 15 years before his death, Tiffany pulled off a final coup. The aftermath of the French Revolution that had gifted Tiffany an abundance of important gems in 1848 and its early credibility in high-jewellery circles rumbled on. In 1887, the French government was masterminding a plan to sell the crown jewels of its fallen monarchy. Outwardly, it claimed that a democracy such as France had no need for "objects of luxury, devoid of usefulness and moral worth". The rumour mill suggested that it was in fact afraid of a power grab by Bourbons, Orleanists or Bonapartists, who might use ownership of the jewels to claim a right to rule. Tiffany cared little for this political posturing, but he did see an opportunity in it. He travelled to Paris to attend the auction of the French crown jewels at the Louvre. He sat in the audience, ready to make his bids, along with fellow jewellers, including a young Frédéric Boucheron, and Orleanists, members of the French royal family, whose pockets proved too shallow on the day to win back their family heirlooms.

When the final strike of the gavel fell, Charles Lewis Tiffany had in his possession close to a third of the historic crown jewels. He placed them in specially crafted red-leather boxes, embossed in gold with the words *Diamants de la Couronne*, translating from French as Crown Diamonds. Inside, impressed on the silk lining in the lid, was Tiffany & Co. New York and Paris, thus securing Tiffany & Co.'s place in the history books as a purveyor of royal jewels and his own coronation as the King of Diamonds.

RIGHT: Representatives of watch firms in Geneva in 1908.

more wearable product would one day make the larger pocket watch obsolete. He set about trying to change the image of wristwatches.

A fundamental step was finding a manufacturer called Angler in the Swiss town of Besenat that was making precision movements that could fit inside a wristwatch. Wilsdorf placed a large order, and soon Wilsdorf & Davis became one of the leading British wristwatch firms.

In a bid to establish his business as a brand rather than simply a dealer, Wilsdorf wanted to create a new name for the company: a catchy one that would look good on a dial and be easy to pronounce in many languages. He had experimented with many combinations of letters in search of this made-up name but failed to find anything that worked. Then, while riding through London's Cheapside on the upper

deck of a horse-drawn in 1908, it came to him. Or as he would later just "A gentleman whispered 'Rolex' in my ear."

Under this new name, Wilsdorf continued his quest to create reliable wristwatches with quality movements. In 1910, Rolex had a breakthrough when one of its products, powered by an Angler movement, became the first wristwatch in the world to receive the Swiss Certificate of Chronometric Precision – a mark of homologated excellence. Four years later, another milestone would be achieved when the Kew Observatory in London awarded a Rolex wristwatch with a Class A precision certificate. This had previously only been given to marine chronometers used for navigation, and it further solidified the reputation of Rolex as a purveyor of precise timekeeping instruments.

In 1916, World War I broke out, and the following year the British government introduced a 33.3% customs duty as part of the war effort. By this time, Rolex's London office, which had a staff of 60 people, was exporting its watches all over the world and the tax change would make that difficult. As such, Wilsdorf made the decision to move the company to Geneva in Switzerland. It already had an office in La Chaux-de-Fonds, which it opened in 1917 for marketing purposes, but this move would remove it from the British watch industry altogether.

And, so, the legacy of Rolex's Swiss-made watches began, with the Swiss company Rolex S.A. registered in Geneva in 1920.

OPPOSITE TOP: A watchmaker operating in Rolex's movement factory in Geneva in 1942. It took four days to make a pocket watch movement.
OPPOSITE BOTTOM: A pocket watchmaker in the watchmaking industry in Geneva in 1908. It took four days to make a pocket watch movement.

The Origins of the Oyster

With Rolex settled into its new home in Switzerland, the company continued to develop its watch offering with a focus on precision and durability, as well as building its brand. Though certainly catchy, the name Rolex had not become an overnight success. Tired of waiting for it to catch on, Hans Wilsdorf launched a major marketing campaign in 1925, pledging to invest at least £12,000 a year – nearly £1 million in today's money. He also increased the number of watches Rolex was producing with its own branding on the dial, as it has been producing both branded and unbranded watches up until that time.

A major leap forward for Rolex's brand was the launch of the Oyster in 1926. This new style of watch promised to be waterproof and dustproof thanks to a hermetically sealed case, proving its durability. It also made it an obvious choice for sporting activities, which would prove to be a rich source of marketing for Rolex in the years ahead.

The Oyster case had a patented system of screwing down the bezel, crown and winding crown against the middle case to seal the movement inside securely. The winding crown, which is made from 10 individual parts, was key to its action as it goes between the bezel and the middle case and its functional external elements.

The Oyster case would become the backbone of Rolex. Nearly every watch in its contemporary range features an Oyster case, and the name of all the models reference it. A Submariner is technically named an Oyster Perpetual Submariner and a GMT-Master II is an Oyster Perpetual GMT-Master II, and so on. The only exception is the 1908 dress watch, which does not have an oyster case.

Rolex's iconic fluted bezel is a showstopper in the early Oyster cases. Although these fluted bezels are decorative now, the ridges originally served a purpose to allow a special tool to screw the bezel securely to the mid case.

OPPOSITE: A 1908 Rolex Oyster Perpetual on a brown alligator strap. ABOVE: A close-up of a Rolex Oyster Perpetual case and bezel bezel.

The World's Most Famous Watch Brand

Rolex has become shorthand for luxury. There is no watch you can strap on to your wrist that will be recognised for the status symbol it is quicker than a Rolex. And for many, this is the appeal.

Yet there was a time when the name Rolex – a word completely made up by the brand's founder Hans Wilsdorf – was not famous. It would take hard work, boundary pushing and a lot of self-belief on the part of Wilsdorf, a German orphan, to jettison the name into the upper echelons of horology; starting with convincing the pocket watch-wearing gentleman of the early 20th century that they wanted to wear the time on their wrist at all.

As you will discover, Rolex won its place in history by constantly questioning what was possible and innovating at all costs. It pioneered so many elements of watchmaking and design that are standard today, such as waterproof watches, placing a date window on the dial, and even removing the need to wind our watches.

It also found its way into some of the most exciting moments in history by placing Rolex watches on the wrists of adventurers and explorers. Its watches have travelled to the world's highest peaks and to the depths of the ocean; they have survived extremes of temperature, speed and pressure.

The story of Rolex is so much more than that of its watches. It is one of epic ambition and vision. What started out as a one-man band in London's Hatton Garden would become the epicentre of the Swiss watchmaking industry, and one of the most recognisable and coveted brands in the world.

Vivienne Westwood: The Story Behind the Style

Derbyshire Days

Vivienne Isabel Swire was born on April 8 1941 to Gordon and Dora Swire at the Paragon Maternity Home, Glossop. The future fashion revolutionist had one sister, Olga Swire, born 1945, and one brother, Gordon Swire, born 1946. She grew up in the parish of Tintwistle, Derbyshire (which was formerly part of Cheshire until 1974), both during and after World War II, enjoying what has been recounted as a fairly idyllic childhood, living at the semi-detached Millbrook Cottages and playing outside until late.

The young Swire clan were encouraged to be creative and make things more than they were encouraged to read. Vivienne knew from a young age that she was good at making things, notably models at school, and she especially enjoyed sewing classes. Her mother would often make their clothes, and worked as a weaver in a local cotton factory.

The young Vivienne – who remembers having a passion for art from an early age – attended Hollingworth and Tintwistle Primary Schools from 1946 to 1952, at which point she passed the scholarship exam for Glossop Grammar School. She continued to be good at art during her time at Glossop Grammar, and considered attending art school.

Among Westwood's most formative fashion memories are the make-do-and-mend philosophy that came to define

Britain in austerity, as well as the coronation of Queen Elizabeth II in 1953, when Vivienne was 12 years old. The influence of these two events can be seen throughout every era of her designs, and the make-do-and-mend philosophy is evident in the motto "Buy Less, Choose Well, Make it Last", which the brand still promotes to this day. She expertly blended the elements of customisation, tradition and antiretrograde together to create her own unique brand, which is now contrasted by her husband Andrew: *Konshalee*.

LEFT: Vivienne Westwood wearing a t-shirt sporting the brand slogan 'Buy Less'.

Malcolm McLaren

Westwood met Malcolm McLaren in 1965. An art student and a friend of her younger brother, Gordon, he would go on to become her creative collaborator for almost the next 20 years. Malcolm is an entrepreneur with the punk movement as Vivienne, and their partnership is legendary. He was something of a maverick of marketing rascally and disruption, before such things became commonplace in contemporary fashion. The pair were in a relationship for a time but never seem to have married.

Malcolm was interested in politics and was fascinated by the French Situationists, a creative enclave of writers and artists who wished to eradicate capitalism through acts of everyday life. He was a driving force in bringing politics, provocations, society and culture into Westwood's world. She found him to be charismatic and knowledgeable, but also full of contradictions.

In 1967, they had a son, Joseph Ferdinand Cecil, who would go on to follow in his parents' footsteps and enter the world of fashion. He founded the very successful lingerie company, *Agent Provocateur*.

It was in the early 1970s that McLaren and Westwood began to build their empire. Malcolm, in this period, had left art school and Vivienne was about to quit teaching. The plan had been to sell vintage records together, and there was talk of setting up a stall. But a retail opportunity – via a new

friend – on King's Road was about to arrive.

Tommy Roberts, of the legendary Mr Freedom fashion business, took over the lease of 438 King's Road in 1969. He and his business partner, the fashion entrepreneur Trevor Miller, were well-known for their eclectic and disorienting fashions which appealed to the glitterati of the 1960s. It was under Miller's control the shop was renamed *Parisian Garage*; the spot was already well-known for fashion.

Vivienne and Malcolm, who were regular on King's Road, ended up leasing the back of 438 King's Road, before taking the whole thing over and rebranding it. It would be known over the coming years as *Let It Beak*, *The Fun To Live*, *The Young To Die* and *Sex and Sublimation*, all of which would encompass the raucous, confrontational and non-conformist nature of McLaren and Westwood. Eventually the shop would come to define the varied-but-defined styles we know as punk today.

LEFT: Malcolm McLaren, teenage son of Vivienne Westwood, circa 1977.

A Revolutionary is Born

There are few British designers, or brands, that have made quite as much of an impact on the fashion landscape as Vivienne Westwood. A fashion designer of both cult and commercial success (which is a rare combination), she was a punk and a pioneer, a rebel and a provocateur, an activist and a change-maker.

Over the course of a career that spanned half a century, Dame Vivienne Westwood would become synonymous with the British punk scene. Punk is what immediately springs to mind for most when her name is mentioned, along with the King's Road, corsets, platforms, rarran, crinolines, pirate boots, sustainability and climate change awareness. The list goes on. Her shows and interviews have become legendary – she is famous for using fashion as a platform to speak out on the issues she cared most about.

There is no doubt that Westwood's affinity for fashion history has helped her designs stand out. They are often historically informed, yet never to the point that they look odd. Where something shouldn't work, it always did, thanks to Vivienne's ability to balance the old with the modern – she was a genius when it came to style mashups. And the original Vivienne Westwood aesthetic rooted in a DIY approach never fully went away. Her designs feel intrinsically British and perfectly eccentric.

Westwood was the original multi-hyphenate and, in many ways, light years ahead of her time. She has inspired generations of designers that came after her, whether established and successful or aspiring and eager. Fashion critics even noted whiffs of her spirit at the London Fashion Week collections of autumn/winter 2023, which took place in February 2023, after her death. It's no wonder that her name is up there with the likes of Yves Saint Laurent, Christian Lacroix and the late great Karl Lagerfeld.

Street Style: Dr. Martens

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

6

the upper and repurposed tyre rubbers to create an air-padded sole. The resulting shoe is equal parts built to last and equal parts built to live in. It's no wonder that punk rockers and hip-hop artists alike have graced thousands of stages in a pair of Dr. Martens over the years - it's a shoe made for those who live out loud. The story of how a purpose-driven product came to define one of today's most exciting lifestyle brands is one that spans a growing connection between clothing and culture. When you combine a timeless product with a chameleon-like ability to mean different things to different people, you get a shoe that is undeniably trend-proof.

ABOVE: A classic pair of Dr. Martens 1460 boots, broken in with wear.

7

NOT FINAL

Who Was Dr. Martens?

Dr. Martens may not be a real person, but Dr. Klaus Maertens certainly was. The brand as we know it today began with him. A doctor in the German Army, he found himself in post-war Munich at the age of 25, nursing a broken foot. The year was 1945, World War II had just ended, but his injury was one he earned from an unfortunate riding accident.

As he was recovering from his injury, he found that the standard issue, leather-soled Schürzenhaie lowboots that had been part of the German Army uniform since 1937 actually hurt his feet more than helped them. Unconquering and footless styles were undergoing a similar shift. It had been a little more than a century since the Industrial Revolution had commercialised the footwear industry, allowing for mass production for a craft that was once exclusively handmade. Concrete sidewalks were being made where it once was what was happening in the world of vulcanised soles.

American chemist Charles Goodyear discovered that heating up rubber and adding sulphur made it even more flexible. The vulcanised process had many industrial applications, but it also made it much easier to make durable, rubber-soled shoes. Yet while canvas plimolls and burgeoning sneaker companies like Converse explicitly were meant for athletic pursuits, Maertens saw an opportunity in making a shoe that had the classic, down-to-earth appeal of a military boot, combined with the comfort and orthopedic benefits of a rubber sole.

OPPOSITE: Dr. Klaus Maertens, creator of the original Dr. Martens boot.

8

NOT FINAL

The first prototype of what would become the Dr. Martens 1460 leather boot took design elements from the German Schürzenhaie and set it on top of a unique, air-cushioned sole originally made from heat-treated, repurposed tyre rubber. He made his proof-of-concept using a salvaged cobbler's last and a needle, but it would still take a couple of years before his brand-new shoe business got any proverbial legs behind it.

OPPOSITE: Standard issue German army footboots from World War II that were used to inspire Dr. Martens shoes.

9

NOT FINAL

The Spring Behind Every Step

It's hard to believe that an orthopedic shoe could be synonymous with rebellious style around the world. Yet that is what the Dr. Martens brand continues to represent to millions of its ardent fans.

It can be challenging to maintain one's cool factor over the decades, but by intentionally aligning itself with subcultural style, the nearly octogenarian footwear manufacturer hasn't lost a single step when it comes to cultivating an alternative type of timeless footwear. Considering the United Kingdom also has a rich history of fine Savile Row tailoring, Scottish wools and ruggedly elegant Harris Tweeds, fashion houses like Burberry and tastefully tough outerwear from brands like Barbour, Dr. Martens is singular in that canon of classic British style. Indeed, Dr. Martens is a staunch iconoclast, a bastion of anti-establishment ideals for people who prefer to dress against the grain.

But despite the modern connotation of what Dr. Martens has become, its roots are built on a comfortable foundation. Doctor Klaus Maertens first conceived of the footwear's signature "AirWair" sole while recuperating from a World War II foot injury.

Finding his standard-issue German Army boots severely uncomfortable for his ailing foot, he utilised soft leather for

6

the upper and repurposed tyre rubbers to create an air-padded sole. The resulting shoe is equal parts built to last and equal parts built to live in. It's no wonder that punk rockers and hip-hop artists alike have graced thousands of stages in a pair of Dr. Martens over the years - it's a shoe made for those who live out loud. The story of how a purpose-driven product came to define one of today's most exciting lifestyle brands is one that spans a growing connection between clothing and culture. When you combine a timeless product with a chameleon-like ability to mean different things to different people, you get a shoe that is undeniably trend-proof.

ABOVE: A classic pair of Dr. Martens 1460 boots, broken in with wear.

Disney Dreamlight Valley - The Official Guide

Official companion to the bestselling game.

- A mere ten days after its release in 2022, Disney Dreamlight Valley had attracted over one million players. As of January 2023, fans had played 76 million hours of Dreamlight Valley.
- Dreamlight Valley was awarded Best Early Access Game by PC Gamer in 2022.
- Dreamlight Valley can be played on Nintendo Switch, PlayStation 4, PlayStation 5, Windows, Xbox One, Xbox Series X/S and macOS. You can also play the Arcade Edition via Apple Arcade.
- Gameloft has released a 2024 Content Roadmap for Disney Dreamlight Valley, outlining exciting updates and additions to the game over the next twelve months. The game will continue to evolve, attracting new players as well as ensuring long-time players' attention is retained.

Disney Dreamlight Valley - The Official Guide

GEMS

Gems are rare minerals that can be sold to earn Star Coins, or used to craft a variety of decorative items from stoves to snow globes. You can gather gems by mining the rock spots around your valley with a pickaxe. Here's a handy guide for every gem, where you can find it and what it sells for.

Amethyst	Shiny Amethyst
Location: Forgotten Lands, Forest Heights Sells for: 500 Star Coins	Location: Forgotten Lands, Forest Heights Sells for: 2000 Star Coins

Diamond	Shiny Diamond	Emerald	Shiny Emerald
Location: Forgotten Lands Sells for: 600 Star Coins	Location: Forgotten Lands Sells for: 2400 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 325 Star Coins	Location: Forest of Valor, Circle of Trust Sells for: 600 Star Coins

Aquamarine	Shiny Aquamarine	Citrine	Shiny Citrine
Location: Double Beach, Forest of Valor Sells for: 250 Star Coins	Location: Double Beach, Forest of Valor Sells for: 600 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 300 Star Coins	Location: Sunlit Plateau, Circle of Trust Sells for: 600 Star Coins

Garnet	Shiny Garnet	Opal
Location: Pleasant Meadow, Plaza Sells for: 600 Star Coins	Location: Pleasant Meadow, Plaza Sells for: 640 Star Coins	Location: Rarely at any rock mine Sells for: 300 Star Coins

TIP Remember to take a mining companion with you when hunting for gems - you'll get additional drops!

Peridot	Shiny Peridot	Ruby	Shiny Ruby
Location: Double Beach, Pleasant Meadow Sells for: 200 Star Coins	Location: Double Beach, Pleasant Meadow Sells for: 800 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 300 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 600 Star Coins

Sapphire	Shiny Sapphire	Topaz	Shiny Topaz
Location: Sunlit Plateau, Plaza Sells for: 300 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 600 Star Coins	Location: Plaza Sells for: 240 Star Coins	Location: Plaza Sells for: 360 Star Coins

Tourmaline	Shiny Tourmaline	Violet Crystal
Location: Forest Heights, Sunlit Plateau, Plaza Sells for: 400 Star Coins	Location: Forest Heights, Sunlit Plateau, Plaza Sells for: 600 Star Coins	Location: Sunlit Plateau, Plaza Sells for: 12 Star Coins

TIP Make sure to mine all rock spots, not just the ones where you can see gems sticking out - a lack of visible gems doesn't mean there are no gems under!

MERLIN

Merlin is an all-powerful wizard who's been around since the Middle Ages - no wonder he's so knowledgeable! He's a great source of information and advice, and he's also a little eccentric which makes him endlessly entertaining. He's the first person you'll meet when you begin your adventure and will be there for you every step of the way.

House
The Dreamlight Library is an incredible feat of medieval architecture boasting several astronomical features. Inside, you'll find more books than you can shake a stick at.

Disney Fascinating Facts

Over 1,000 real-world facts to entertain all ages!

- Cover: gloss lam.
- Features facts about plants, the oceans, animals, the environment, the night sky, insects, literature, art, theatre, music, fashion, general history, Greek myths and legends, Mayan and Aztec history, Arthurian legend, space, robotics, chemistry, biology, physics, inventions, things that go, toys and games, sport, adventure and exploration, the continents and much more.

Disney Fascinating Facts

NATURE: PLANTS

There are around 75,000 different species of trees on Earth, and amazingly over 100 per cent of them can only be found in a single country! If you want to see the most unique trees in one place, head to Colombia and behold the tree that has the thickest trunk in the world.

Summer means giant sunflowers cropping up all over the place. But did you know that the 'bees' of a sunflower is a parasitoid, or parasitic wasp, and it's actually made up of many small flowers?

The Wolffia family of plants, also known as duckweed or watermeal, grow on the top of water and include the smallest flowering plants. Wolffia can be grown from seed, but can also grow itself on a rocky road. The fastest recorded flower took just under 30 hours to produce.

The baobab tree, sometimes known as the tree of life, is found largely in the continent of Africa and Australia. They can be massive in height and circumference, with some species reaching up to 22 metres tall and others 25 metres around!

NATURE: PLANTS

The tallest tree in the world is a coastal redwood in California, known as Hyperion. Coastal redwoods can grow super tall, but Hyperion is the tallest of them all, measuring in at just over 79.5 metres! Experts think it's somewhere between 600 and 800 years old!

Some fungi communicate via a system of underground threads called mycelium, which can connect them across several kilometres. If one of them dies by being eaten, it will send a signal through the mycelium to warn others and allow them to decompose a nutrient-rich meal.

Everybody knows the smell of freshly cut grass, however, it's actually a distress call that the grass is giving off. When cut, the grass releases phenolamines that some scientists believe is a call to help signal the attack!

The jatropha tree, also known as the Brazilian goose tree, doesn't have fruit dangling from branches like apples and lemons. Instead, the fruit grows directly from the trunk of the tree, so it looks like it's growing in jumpy boots!

You can tell the age of most trees when they're chopped down by counting the number of rings the trunk has, but it can also show how well the tree has grown each year. The ring will be thicker if you had an abundance of resources, or thinner when there haven't been as many.

We all know that trees need sunlight and water to survive, but aren't they much better at doing it? Some oak trees can drink up to 800 litres of water a day, but that's nothing compared to the giant sequoia, which will gulp up to four times that!

SCIENCE

It doesn't matter whether scientists are looking inside your body or to the far reaches of the universe, incredible discoveries are being made every day in the world of science. Now it's your turn to explore amazing facts from the laws of robotics and dwarf planets to the atoms that make up the Earth and everything in the cosmos!

SCIENCE: SPACE

Our solar system has eight planets and five moons. It also has the Sun, but there are some planets that don't orbit a star at all. Sometimes called rogue planets and they just float through interstellar space on their own. Some estimate there could be up to 200 billion rogue planets in our galaxy alone!

The first satellite, Sputnik 1, was launched into space in 1957. Since then, thousands of crafts have blasted off into the great unknown, though only a few have carried humans. Astronauts have orbited our planet and travelled to Earth's moon and, someday soon, spacewalk may take explorers to Mars and beyond.

A company called Mars One planned to build a human colony on the planet Mars by the year 2022 and over 400,000 people signed up to be the first to leave their comfortable homes! But Mars One went out of business in early 2019, so these adventures will have to wait for their Martian voyage.

Humans have barely scratched the surface of outer space. To the future, probes and human-accompanied expeditions will continue to explore. Technologies based on Earth, such as telescopes and space agencies that sense wavelengths invisible to the human eye, will also help scientists learn about our universe.

Space is completely empty! Sound travels in vibrations in the air, but space is a bit of a vacuum - it has no air or atmosphere! Astronauts have to use radio waves to communicate so that they can talk in space.

SCIENCE: SPACE

Some of our solar system's planets are pretty hot moons. Whereas Earth only has one moon, Saturn has 82 natural satellites that are four of its biggest moons. That's bigger than Mercury!

Venus rotates on its axis so slowly that one day there is equivalent to 283 days on Earth. However, it only takes Venus 225 Earth days to orbit the sun, meaning the Venusian day is longer than a Venusian year!

Earth isn't the only planet that has volcanoes! In fact, if you travel just one planet along to Mars, you'll find a volcano called Olympus Mons, which is over 600 kilometres wide and 21 kilometres tall. It's almost three times the height of Mount Everest and scientists think it could still be active!

Researchers at Yale University think they've discovered a new type of planet. It's called 55 Cancri e, a rocky planet that's possibly formed of diamonds! Unfortunately, it's 40 light years away, so we can't visit it (yet) - but some precious gems!

The hottest planet in our solar system isn't the one that's closest to the sun! The temperature on Venus can reach 462 degrees Celsius (332 Fahrenheit), helped by its super-thick atmosphere, which retains heat. Mercury has no temperature-regulating atmosphere, so its heat fluctuates more.

In the observable universe - that's all of it - there are more stars than grains of sand on all the beaches on Earth. It's estimated that a million Earths could fit into the space that the sun occupies!

Though it's always growing, the Sun is already pretty huge. It's estimated that a million Earths could fit into the space that the sun occupies!

NATURE

Whether you're looking at the creepy-crawly beneath your feet, or the starry sky above you, you're surrounded by the amazing natural world. Read on to discover incredible trivia about everything from mosquitoes and polar bears to talking mushrooms and bright stars millions of miles away!

NATURE: PLANTS

As well as being delicious, strawberries are one of the only fruits that grow their seeds on the outside - sometimes up to 200 of them! In fact, they're technically not seeds, but something called an achene, which is an individual fruit that holds a seed!

The biggest flower in the world is the *Rafflesia arnoldii*. It can grow to over 1 metre wide. It doesn't have its own root system, so latches onto other plants to grow. Don't sniff this flower though - its smell has been likened to rotting meat!

Pitcher plants have jug-shaped leaves and produce a nectar that entices insects and other small creatures inside. The leaves of the pitcher plant close once an animal falls in, and chemicals called enzymes digest the creature so the plant can use the nutrients!

No plant grows faster than bamboo. A Chinese bamboo variety called moso can grow almost a metre in a single day! It doesn't waste its energy growing any wider, so it can concentrate on shooting straight up.

Some animals only eat plants, but sometimes the plants bite back! The Venus fly trap has hinged leaves that look like a toothy mouth. If an insect touches the hairs inside the leaves, they snap shut so the insect can't escape. It can take the Venus fly trap up to five days to digest the trapped insect!

Disney Princess: Magical Worlds Search and Find Activity Book

An official Disney search and find activity book featuring the Disney Princesses!

- Features the twelve official Disney Princesses.
- Includes synopsis and character introductions for each film.
- Detailed search and find scenes based on the magical and enchanting worlds of the Disney Princesses.
- Disney Plus has 157.8 million paid subscribers globally as of August 2023 (was 87.6 million in 2022), and 7.14 million paid subscribers in the UK.
- The Disney Centenary celebrations will be happening throughout 2023 and include exclusive experiences, exhibitions, concerts and new products - this will be Disney's biggest ever marketing push.

Disney Pocket Classics: The Princess Collection

Three classic Princess stories

- Three stories in one book: *Snow White*, *Sleeping Beauty* and *Cinderella*.
- With vintage-style artwork, these books will appeal to collectors and fans of all ages.
- Cover finishes: arlin and foil.

Disney Pocket Classics: The Princess Collection

Frightened, Snow White fled through the woods. Branches tore at her clothes. Sharp twigs scratched her arms and legs. Strange eyes stared from the shadows. Danger lurked everywhere. Snow White ran on and on.

When Prince Phillip heard the news, he raced to the castle on his galloping white steed. Suddenly, a gigantic forest of thorns sprouted up all around the castle. Maleficent made the barbed trees grow to stop the prince from reaching Aurora. But the valiant prince slashed away at the terrible thorns and cleared a path to the palace.

The Prince's ball was under way. As soon as Cinderella appeared in the doorway, the Prince walked over and asked her to dance.

The King motioned to the musicians, and they struck up a dreamy waltz. The Prince and Cinderella swirled across the dance floor. And the King went happily off to bed.

When Snow White told her new friends about the Queen's plan to kill her, they decided that she should stay with them.

"We're askin' for trouble," huffed Grumpy.

"But we can't let her get caught by that kwicked ween – I mean, wicked queen!" said Doc.

The others agreed.

Snow White woke with a start and saw the Seven gathered around her. "Why, you're not children," she said. "You're little men!"

"I read your names on the beds," she continued. "Let me guess who you are. You're Doc. And you're Bashful. You're Sleepy. You're Sneezy. And you're Happy and Dopey. And you must be Grumpy!"

- Covers everything from the Golden Age of animation and original shorts to live action films and Disney+

LONG LIVE THE KING

In the last King (1939), a young boy gets stuck in a lion's den. So, he goes on a journey of discovery when the queen of the United Kingdom, according to the author, is the queen of the United Kingdom. The book is a celebration of the 70th anniversary of the film's release. It is a celebration of the 70th anniversary of the film's release. It is a celebration of the 70th anniversary of the film's release.

KEY TO PLATE

1. **Production design** As a concept artist and an art director, Peter Pan's design was a key element of the film's visual style.
2. **Character design** Peter Pan and his friends were designed by Ken Anderson for the film's production.
3. **Storyboard** Peter Pan's design was a key element of the film's visual style.

THE FROZEN PHENOMENON

In 2013, Disney Animation introduced the world to Anna and Elsa - the sisters of Arendelle. In this book, you'll discover the story behind the film's success and the creative process that led to its creation.

KEY TO PLATE

1. **Production design** Peter Pan's design was a key element of the film's visual style.
2. **Character design** Peter Pan and his friends were designed by Ken Anderson for the film's production.
3. **Storyboard** Peter Pan's design was a key element of the film's visual style.

SWASHBUCKLING PIRATES

In 1944, a Disney animation classic called *Captain Jack* was released. It was a celebration of the 70th anniversary of the film's release. It is a celebration of the 70th anniversary of the film's release.

KEY TO PLATE

1. **Production design** Peter Pan's design was a key element of the film's visual style.
2. **Character design** Peter Pan and his friends were designed by Ken Anderson for the film's production.
3. **Storyboard** Peter Pan's design was a key element of the film's visual style.

BELOVED CHARACTERS

Literary classics provided strong source material for a number of Disney films. *Alice in Wonderland* (1951) is Disney's version of classic Lewis Carroll children's novel; *Alice's Adventures in Wonderland and Through the Looking Glass*, and *What Alice Found There*. The books had fascinated Walt Disney since childhood. In the 1920s, they had loosely inspired his part animated, part live-action *Alice Comedies* and since then he had bought the film rights to the novel. Disney concept artist and colour stylist Mary Blair created exuberant, fantastical production artwork that inspired the look of the film. Music and songs hold the film's sequences together and propel the story along - the film features more songs than any other Disney film at the time. One of the film's most extravagant scenes, the Mad Hatter's tea party, was initially filmed in live-action to provide an aid to animators. Vaudeville actor Ed Wynn played the Mad Hatter and Wynn's extemporized voice track was so inspired it was used for the final film.

In 1913, Walt had seen a touring production of J.M. Barrie's stage play *Peter Pan* and, inspired by its combination of fantasy and swashbuckling adventure, acquired the film rights in 1939. As with *Alice in Wonderland*, Mary Blair created the signature production art for the film. Live-action footage was shot for the animators' reference, with the voice actors performing their roles. Meanwhile, the magic of Disney animation made the characters fly - Peter Pan even engages dastardly Captain Hook in mid-air sword fights. Tinker Bell, often represented merely as a spotlight in stage versions, became a fully realized character using actor Margaret Kerry and others, in live-action model. Released in 1953, after nearly two decades of work and thousands of drawings, *Peter Pan* was an immediate success and has remained a beloved Disney classic.

Literary works have remained a source of inspiration. *The Sword in the Stone* (1963), a whimsical adaptation of T.H. White's novel about the Arthurian legends, was the first Disney animated feature film to include songs by the Sherman Brothers, who would later work on *Mary Poppins* (1964), *The Jungle Book* (1967) and many others. *The Rescuers* (1977), a tale of an international rescue organisation run by mice, was based on a book series by English author Margery Sharp. Cruella DeVil nearly became the main villain in the film, but in the end the animation team created the fiery tempered, diamond-obsessed pawn shop owner Madame Medusa. Some classic tales are updated in inventive new ways: *Treasure Planet* (2002) is a version of Robert Louis Stevenson's 1883 novel *Treasure Island* set in outer space!

KEY TO PLATE

1. **Tea Party production art** As a concept artist and an art director, Peter Pan's design was a key element of the film's visual style.
2. **Peter Pan and friends** Peter Pan and his friends were designed by Ken Anderson for the film's production.
3. **Character design** Peter Pan and his friends were designed by Ken Anderson for the film's production.

Disney Brain Games: Maths

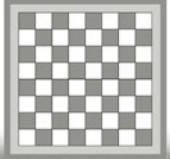

100 Disney-themed maths puzzles to exercise young minds!

- The first *Disney Brain Games* book has sold over 58,000 copies (as of August 2023)
- 100 fun and challenging maths-based puzzles
- Features a wide range of beloved Disney and Pixar characters, from Anna and Elsa to Woody and Buzz Lightyear.
- Varied and challenging puzzles with different levels of difficulty to keep bright minds entertained
- Supports KS2 Maths curriculum
- Disney+ has 157.8 million paid subscribers globally, and 7.14 million paid subscribers in the UK.

Disney Brain Games: Maths

Puzzle 28
EIGHT QUEENS

Mr Gao has a chess puzzle for you to solve! In chess, the queen can move any number of spaces in a straight line – horizontally, vertically or diagonally. **Place eight queens on the chess board so that no queens is in the same line as any other queen. How many different ways can you find?**

Puzzle 29
ARCHERY PRACTICE

Merida's practising her archery skills. To prove what a great archer she is, Merida must hit one number in the outer ring, one number in the inner ring and one number in the centre that add up to each of the three numbers below.

Can you figure out which three numbers she must hit to make each of the target scores?

Puzzle 39
MICKEY'S MAGICAL MIX UP!

The Sorcerer's Apprentice has accidentally jumbled all of his master's Plus and Minus potions over! Can you put the pluses and minuses back in the right places so that these sums work forwards, backwards, up and down?

Puzzle 40
...AND THE KITCHEN SINK

Every time Arthur tries to clean one of Merlin's dirty dishes, the number of dirty dishes doubles. He started with one dirty dish. Arthur has tried to clean 10 dirty dishes. **How many dirty dishes are there now?**

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10

Puzzle 49
SOLVE THE RIDDLE OF THE CAVE!

To enter the Cave of Wonders, Aladdin must find the missing numbers in this puzzle.

Each square needs to be filled with a number between 1 and 9, but you can use numbers more than once. The functions surrounded by stars are carried out first.

So:

$$2 \star 3 + 6 = 12$$

$$2 \times 3 \star 6 = 18$$

Puzzle 23
SHY COCONUTS

Some Kakamora have hidden themselves among Moana's coconut harvest. You can tell which coconuts are Kakamora in disguise, because the numbers they have stuck to them have made the questions they're hiding in incorrect.

Make the sums correct by removing 1 digit from each question.

$$32 + 70 = 73$$

$$42 + 35 = 37$$

$$41 - 60 = 35$$

$$15 - 13 = 12$$

$$63 \div 7 = 19$$

Disney Brain Games

100 exciting Disney puzzles to exercise young minds!

- Over 37,000 copies sold (as of August 2022)
- 100 puzzles across themes of word, logic, maths/number, memory and more
- Join your favourite Disney characters such as Moana, Anna and Elsa, Dory, Miguel, Belle, Aladdin, Mike and Sulley and many more as you complete the challenges.
- Features characters from across Disney and Pixar, including heroes, villains and Princesses!
- With varied and challenging puzzles with different levels of difficulty, there's enough puzzles to keep bright minds entertained.

Disney Brain Games

Puzzle 1
THE MISSING NOTE

Hector and Miguel share a passion for music, so they spend a lot of time singing and playing music together. They are rehearsing a song, but have encountered a problem – the song is missing the last note.

Find the path that connects the two singers, and discover which note is missing!

Cross off the notes in this list as you go:

C D E F G A B

The missing note is: _____

Puzzle 2
HERCULES AND THE HYDRA

Hercules is battling the terrible monster Hydra in the cave where it dwells. At the start of the battle, Hydra has only one head, but each time Hercules cuts a head off, three grow in its place. He has already cut off twelve heads.

How many heads does Hydra have now?

Heads in total: _____

Use the space if you need to work it out on paper.

Puzzle 3
I'M LATE, I'M LATE!

It's always "late" for the White Rabbit, and he's always checking his giant watch! Right now, it's 5:00 pm. The White Rabbit's next appointment is in 100 hours' time, but he is already worried about being late!

1. How many days is it until his appointment? _____

2. What time will it be at? _____

Use the space if you need to work it out on paper.

Puzzle 4
MEMORY SEQUENCE

During a test, Anger got into a fight with Fear, and that messed up Riley's memories. Luckily, Joy has a solution!

Start from memory 0 and plot the right path. Remember: each memory is equal to the sum of the two previous ones!

Use the space if you need to work it out on paper.

START

0 1 2 3 5 8 13 21

FINISH

Puzzle 5
THE GREAT RUG RACE

Woody has come up with a great idea to have fun with his toy friends: a rug race! But just after they cross the finish line, the toys hear Bonnie and they freeze.

Can you work out the order they finished in?

Bear in mind that:

Woody finished two places before Buzz	Hamm finished right after Woody	Buzz finished two places before Rex	Rex finished last
---------------------------------------	---------------------------------	-------------------------------------	-------------------

Use this space if you need to work it out on paper.

1ST _____

Marvel Brain Games

100 exciting Marvel puzzles to exercise young minds!

- 100 puzzles across themes of word, logic, maths/number, memory and more.
- Join your favourite Marvel characters such as Ant-Man, Shuri, Captain America and many more as you complete the challenges.
- Features characters from across Marvel comics including heroes, villains and agents!
- With varied and challenging puzzles with different levels of difficulty, there's enough puzzles to keep bright minds entertained.
- Marvel has 4 of the 10 biggest movies of all time (*Avengers*, *Avengers Endgame*, *Avengers Infinity War*, *Spider-Man No Way Home*).

Marvel Brain Games

**PUZZLE 1
SPEED TEST**

Using the clues below, can you work out – in 30 seconds or less – the identities of these four comic characters?

- Red – Twin brother – Telekinetic
- Artificial Intelligence – Robot – Hank Pym
- Radiation – Web – Peter Parker
- Spy – S.H.I.E.L.D. – Black

**PUZZLE 2
ANT-MAZE**

To escape from prison, Scott Lang needs to activate his suit and reduce himself to the size of an ant. He still needs to find the way out of the maze though... can you help him plot a path to freedom?

**PUZZLE 3
WHO AM I?**

One of Black Panther's enourage has gone missing. Can you work out who it is from the letter clues below? We've filled in a few letters to get you started.

Can you work out who it is from the letter clues below?

The right letter in the right place looks like this: **O** The right letter in the wrong place looks like this: **R**

And if the letter is not in the word it looks like this: **A**

Grid of letters:

G	R	A	S	P
P	I	V	O	T
C	H	A	S	M
P	O	U	N	D
S	H	A	R	P

**PUZZLE 4
IN THE SHADOWS**

Only one of these shadows is an exact match for Captain America. But which one is it?

**PUZZLE 5
LAB WORK**

Bruce Banner is hard at work on a formula in the lab. Can you help him calculate the final formula by filling in all the blanks? The number in each circle must be the sum of the two numbers below.

Example:

```

    33
   / \
  17 16
 /   \
8     9   7
/ \   / \
5 3 6 1
    
```

Grid numbers:

```

      87
     / \
    .....
   /   \
  19   .....   22
 / \   / \
..... .....
/   \ /   \
2     6   .....   7   .....
    
```

**PUZZLE 6
BUILD A HERO!**

Can you pair the word parts below to create the names of five super heroes?

Word parts:

- VAL
- MAG
- SH
- CON
- GR
- NETO
- KYRIE
- FAL
- URI
- OOT

Star Wars Brain Games

PUZZLE 10 BINARY BAFFLER

Luke Skywalker needs to fix a battered old astromech. The binary start-up sequence is incomplete – can you help him fill in the blanks to get the droid working again?

You must place three '0's and three '1's into each row and column, but there cannot be more than two '0's or two '1's in sequence in any row or column.

			1	1
0		0	1	0
1	1		1	0
1	1			

PUZZLE 11 JAWA JUNK

The Jawas have found a new droid while scavenging on the desert planet Tatooine, but the identification panels have been mixed up. Each set of four panels has been rearranged – but not rotated. Can you work out what two-character identification code was originally displayed on the panels?

PUZZLE 43 MIND CONNECTION

Qui-Gon will help you learn to see with the Force, by changing 'MIND' into 'SEES' in just four steps. At each step you should change just one letter to make a new word, without rearranging any of the letters. For example, you could start by changing MIND to MINE (though that will lead you down the wrong path.)

PUZZLE 44 TIE FIGHTER SHOOT OUT

Rey and Finn are being shot at by TIE fighters and must find their way to a vehicle to escape. Answer the sums and follow the correct answers to find out which vehicle they steal.

PUZZLE 75 FOLLOW THE PATH

Using the letters in order from the word EMPIRE, follow the correct path to find your way through the maze.

PUZZLE 76 TANGLED WIRES

The door controls have been destroyed! Connect the right wires so the Mandalorian, Din Djarin, and Grogu can escape! But be warned – the door is guarded by a noisy gatekeeper droid. Avoid it at all costs!

Look at the tangle of cables and figure out which button to push to open the door and which turns off the lights.

PUZZLE 9 SHADOW MATCH

The galaxy is full of heroes and villains, including the daring Resistance pilot Poe Dameron and scavenger-turned-fugitive Rey. Match the character's shadows to their names.

1. Rey
2. Stormtrooper
3. Poe Dameron
4. BB-8
5. Captain Phasma
6. Chewbacca
7. Kylo Ren
8. Finn

- Features a foreword by Marvel comics writer Ryan North.

Marvel: The Science of Super Heroes

SPIDER-MAN: ALLIES

Spider-Man has teamed up with countless other heroes in the comic fighting career, but there are some that he counts as friends.

DAVEDEVIL
A character created by Stan Lee, Dave Devildar is the right-hand man of the evil Doctor Doom. He is a powerful sorcerer and a master of the occult. He has the ability to control the minds of others and to create portals to other dimensions. He is a major antagonist in the Spider-Man universe.

IN THE REAL WORLD
The character of Dave Devildar is based on the real-life occultist Aleister Crowley. Crowley was a British occultist, ceremonial magician, and writer. He was known for his work in the occult and for his book 'The Magick in Theory and Practice'.

BLACK CAT
Felicia Hardy was initially one of Spider-Man's enemies, but she later became his ally. She is a skilled thief and acrobat. She has the ability to become invisible and to climb walls. She is a major character in the Spider-Man universe.

IN THE REAL WORLD
The character of Black Cat is based on the real-life thief and acrobat Felicia Hardy. Hardy was a real-life thief and acrobat who was known for her work in the underworld. She was known for her ability to become invisible and to climb walls.

SPIDER-WOMAN
Jessica Drew was a former member of the Skrull Empire. She has the ability to become invisible and to fly. She is a major character in the Spider-Man universe.

IN THE REAL WORLD
The character of Spider-Woman is based on the real-life superheroine Jessica Drew. Drew was a real-life superheroine who was known for her work in the superhero community. She was known for her ability to become invisible and to fly.

THE AVENGERS: CAPTAIN AMERICA

Several heroes have taken the mantle of Captain America, serving as a symbol of liberty and a beacon of freedom. Captain America is more than one person, he is a symbol of standing up for what is right. Steve Rogers started the legacy of Captain America during the darkest days of World War II, but other heroes have picked up the shield.

SAW WILSON'S WINGS
The original wings used by Steve Rogers were designed by Paul Fierman and made of lightweight aluminum. They were used to transport Rogers to the future, where he became the first Captain America. The wings were made of aluminum and were used to transport Rogers to the future.

IN THE REAL WORLD
The character of Captain America is based on the real-life superhero Steve Rogers. Rogers was a real-life superhero who was known for his work in the superhero community. He was known for his work in the superhero community.

THE WINTER SOLDIER'S SAM
James Buchanan 'Bucky' Barnes was the first Winter Soldier. He was a close friend of Steve Rogers and was recruited by the Red Room to become a Winter Soldier. He was known for his work in the superhero community.

IN THE REAL WORLD
The character of Bucky Barnes is based on the real-life superhero James Buchanan Barnes. Barnes was a real-life superhero who was known for his work in the superhero community. He was known for his work in the superhero community.

CAPTAIN AMERICA'S SHIELD
Cap's shield is made of vibranium, a rare metal that is stronger than steel. It is a symbol of liberty and a beacon of freedom. The shield is made of vibranium and is a symbol of liberty and a beacon of freedom.

IN THE REAL WORLD
The character of Captain America's shield is based on the real-life superhero Steve Rogers. Rogers was a real-life superhero who was known for his work in the superhero community. He was known for his work in the superhero community.

THE FANTASTIC FOUR: POWERS

The Fantastic Four get their powers when Reed Richards took the team on a mission into space where they were blasted by cosmic rays, changing them forever. They are a team of explorers, adventurers and heroes who have saved the world countless times.

NEED INCHES - MISTER FANTASTIC
Mister Fantastic is one of Earth's greatest heroes, and he has the ability to stretch his body to any size. He is a major character in the Fantastic Four universe.

IN THE REAL WORLD
The character of Mister Fantastic is based on the real-life superhero Reed Richards. Richards was a real-life superhero who was known for his work in the superhero community. He was known for his work in the superhero community.

COULD YOU STRETCH LIKE MISTER FANTASTIC?
Your body does change over the course of a day, but only very slightly. You are able to stretch your body up to the morning, and you may be able to do a little more at the end of the day, but you haven't stretched. Throughout the day, your body is constantly stretching and contracting.

IN THE REAL WORLD
The character of Mister Fantastic is based on the real-life superhero Reed Richards. Richards was a real-life superhero who was known for his work in the superhero community. He was known for his work in the superhero community.

SUE STORM: INVISIBLE WOMAN
Sue Storm is one of the most powerful women in the Marvel universe. She has the ability to become invisible and to fly. She is a major character in the Fantastic Four universe.

IN THE REAL WORLD
The character of Sue Storm is based on the real-life superheroine Sue Storm. Storm was a real-life superheroine who was known for her work in the superhero community. She was known for her work in the superhero community.

COINIC RAYS
Cosmic rays are not just a thing from a sci-fi movie. They are real and they can be dangerous. They are a type of radiation that is produced by stars and other celestial bodies. They are a type of radiation that is produced by stars and other celestial bodies.

IN THE REAL WORLD
The character of Cosmic Rays is based on the real-life phenomenon of cosmic rays. Cosmic rays are a type of radiation that is produced by stars and other celestial bodies. They are a type of radiation that is produced by stars and other celestial bodies.

SPIDER-MAN

The science behind Spider-Man is very interesting. I like him, but I would definitely NOT have named myself after an arachnid. Also, that's not how I would've made those webs, but I like what he did there. It must be some type of polymer. Cool. I've met more than one spider-guy, but I'm not sure how many there are.

- HOW DID SPIDER-MAN GET HIS POWERS?
- WHERE DOES SPIDER-MAN GET HIS WEBS FROM?
- WHAT GADGETS DOES SPIDER-MAN HAVE?
- DO THE DIFFERENT SPIDER-MEN HAVE DIFFERENT POWERS?
- HOW DO DOCTOR OCTOPUSS ARMS WORK?
- CAN THE VULTURE REALLY FLY?

Star Wars: Jedi Mind Training

A collection of more than 100 *Star Wars*-themed brain-training puzzles and exercises to keep your mind as sharp as a Jedi's.

- 100+ fascinating and devious logic problems and brain training exercises, with a Jedi theme
- Test yourself against three levels of complexity, from Padawan to Jedi Knight to Jedi Master
- A perfect gift for adult *Star Wars* fans who have enjoyed titles such as *Murdle*

Star Wars: Jedi Mind Training

PUZZLE 03 PADAWAN

UNEQUAL

Inequality, greater, and lesser are concepts that are all too often encountered in the universe. They are of interest for the Jedi, who do not deal in absolutes and who strive for knowledge over ignorance. Bigger is not always better; smaller is not always weaker.

The number square must be fully completed so that each number appears once only in each row and column. In addition, each greater than (>) or smaller than (<) symbol must be correct.

PUZZLE 03 PADAWAN

LOGICAL DEDUCTION

Han Solo's blaster pistol has been stolen in the Mos Eisley Cantina, and you have to work out who did it. There are three suspects.

There are five clues:

- Greedo trusted the suspect who used a lightsaber.
- Dr Cornelius Evazan was holding a Moo horn when you saw him.
- A glass of Blue Milk was not found in the booth.
- Luke was spotted hiding under the bar.
- The blaster was eventually found in the bandstand.

Use the clues to fill in the grid opposite and log what you know, then use logical deduction to work out what you don't!

Each suspect was found holding another item. And there are three places the theft could have happened:

PUZZLE 03 PADAWAN

BALANCE: DARK SIDE/LIGHT SIDE

For there to be peace, there should be balance. A Jedi will seek balance in everyday life, and will learn to concentrate and feel their way as different elements seek to dominate; order must be restored, balance must prevail.

In this puzzle, each row and column must contain the same number of dark side tiles and light side tiles, but care must be taken, for neither may have more than two next to each other, vertically or horizontally. No row may be identical in sequence to any other row; the same rule applies to columns, which must also all be unique.

PUZZLE 04 PADAWAN

PATTERN RECOGNITION

Allow your inner calm to enhance your focus and clarity of thought. First look at the pattern, looking for intricacies, repetitions, and any variations that may be apparent. Now think of the flow, noticing how one colour becomes another. Let your intuition guide you.

Which of the blocks a, b, c, d, e, f completes the sequence in line 3?
