How To Draw Pets

Heads, paws and claws

Pets have many different types of heads, paws and claws. Studying and sketching the detailed features of a pet will help you with your final drawings.

Quick pencil sketches can help you to understand the structure of paws and claws.

Look for areas where bones should be darker and also for changes of texture.

The more you study a subject and your final drawing is the more accurate your drawing will become.

Always consider the lightness and add tone to the darker areas.

19

Using photos

Drawing from photographs of pets can help you develop both your drawing skills and your eye for detail.

Make a tracing of a photograph and line up all of squares in it.

Use this as a guide for drawing your pet. You can use the grid to help you get the proportions and sizes right. You can also use the grid to help you get the proportions and sizes right. You can also use the grid to help you get the proportions and sizes right.

Add a small circle for the ear.

Draw the shape of the tail with curved lines.

Sketch in the dog's body, adding its neck and legs.

How To Draw Manga

Heads

Manga heads have a distinct style and shape. This is the basic shape of a head from the side and front views.

A simple side view of a head:

Start with a line to help you to proportion your drawing.

Draw an oval to form the shape of the head.

Add a triangle above for the forehead.

Draw in the profile of the head and neck.

Add a line to show the back of the head.

Sketch in the curve of the chin and neck.

Draw in the neck and shoulders.

Add the jawline and the ear.

Finish any facial details.

A simple front view of a head:

Draw a large oval for the face. Draw two horizontal lines for the forehead and a vertical line through its center. Add two small ovals on the horizontal line for the eyes.

On the vertical line mark in the position of the forehead, the nose and the mouth. Draw in the features. Add two small ovals for the ears. Make the chin more angular by drawing a curved line from each ear to the center of the nose.

Draw in the curved shape of the eyes. Add the mouth nose and nostrils. Draw in the hair using jagged lines and add shading to the eyes. Finish off by adding any missing construction lines.

Martial arts

Manga figures are often shown in action, performing martial arts moves.

These two lines indicate the position and angle of the shoulder and hip. Draw the line for the spine.

Draw straight lines to position the torso.

Draw the limbs with straight lines.

Add an overlapping oval for the body and another for the legs.

Sketch in the position of the facial features.

Add circles for the joints.

Draw in the shape of the clothes, making certain they go around the body and don't fall out at the end of the limbs.

Add only hair and details to the face.

Draw in the shape of the fingers.

Draw the torso and neck.

Draw the hair and energy around the character's head to add a sense of movement.

Complete the feet and ankles.

Complete the head/limbs.

Add shading and hair to the clothes.

Add circles for the joints.

Dynamic bodyparts

A simple line drawing can give your drawing more impact. By drawing straight lines coming out from the figure you can make it look more lively.

How To Draw Fantasy Art

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Charcoal is very soft and malleable and is ideal for creating dramatic, expressive drawings with dynamic, gestural movement.

Wax crayons are great and soft, and are ideal for creating bright, vibrant drawings. They are also great for creating textured effects.

Pastels are great for creating soft, delicate drawings. They are also great for creating textured effects.

Pen and ink are great for creating sharp, precise drawings. They are also great for creating textured effects.

Character proportions

This page shows some of the more popular fantasy figures and their proportions compared to a normal human figure. On average, the length of a human head should fit eight times into its body length. When you draw a fantasy figure anything goes - so let your imagination go wild.

Head pencils are great and soft, and are ideal for creating bright, vibrant drawings. They are also great for creating textured effects.

Man beasts

Combining a human figure with an animal's head can create a great hybrid monster. You can get inspiration by drawing from life models. Photos from sports movies and figure reference manuals are a good source too. Why not try putting a snake or insect's head on a human body - see what you can create!

Worms! A human's feet hold on the shape of a well when there is a full moon.

How To Draw Christmas

Drawing materials

Try using different types of drawing paper and materials. Experiment with charcoal, wax crayons and pastels. All pens, from felt-tips to ballpoints, will make interesting marks - or try drawing with pen and ink on wet paper.

Small Drawings can include a vast amount of detail and focus. They're especially good for a range of light and dark effects to create drawing.

Medium Drawings are the best equipment and materials will not necessarily make the best drawing - only practice will.

Big Big drawings are a great way to get a range of light and dark effects to create drawing.

Don't forget to use a variety of drawing materials. The wide range is great for filling in large areas of the drawing.

Don't forget to use a variety of drawing materials. The wide range is great for filling in large areas of the drawing.

Christmas alphabet

It is fun to create your own hand-drawn lettering. Here is an example of how to design a job: Christmas-themed alphabet. Use it for cards, invitations and posters, or use it to spell out someone's name to personalise special gifts.

There are some ideas for a Christmas-themed alphabet.

A B C D E F G H I J K L M N O P Q R S T U V W X Y Z AEOA&

The construction lines for the letter 'E' are shown to help you understand how to draw it.

You can create a wide variety of different Christmas letters, such as a gift-wrapped letter or a letter with a reindeer or Santa Claus.

Santa Claus' sleigh

The modern idea of Santa's sleigh and the names of his reindeer comes from the poem *The Night Before Christmas*. It was originally published anonymously in 1823 in the New York Sentinel. Rudolph was not invented until 1939, when he featured in a booklet that was sold at Montgomery Ward department stores.

Draw in the reindeer using legs.

These additional reindeer heads and antlers help add texture to the drawing.

Add the harness and reins.

Use the drawing to create other scenes and features. Add drawing to the back view of reindeer legs.

Perspective

If you look at anything from different viewpoints, you will see that the part that is closest to you looks larger, and the part furthest away from you looks smaller. Drawing in perspective is a way of creating a feeling of space - of showing three dimensions on a flat surface.

The vanishing point (VP) is the place in a perspective drawing where parallel lines appear to meet. The position of the vanishing point depends on the viewer's eye level.

Two-point perspective uses two vanishing points: one for lines running along the length of the subject, and one on the opposite side for lines running across the width of the subject.

How To Draw Fantastic Beasts

Using photos

Drawing from photographs of real people and animals can help you identify shape and form. This will help to make your imaginary creatures more realistic and in proportion.

Make a drawing of a silhouette and draw a grid of squares over it.

Now take a piece of drawing paper and draw another grid, making sure the squares are the same proportions. You can now copy the silhouette from the grid to the drawing paper. This will help you to draw your creature in the same proportions as the original. Draw over the grid lines, and you will have a drawing of your creature in the same proportions as the original.

To make your drawing look more realistic, draw a grid over the light to coming from the top, and your grid is a small circle.

Sketch an animal, person and a grid. Use the grid to help you draw your creature in the same proportions as the original. Draw over the grid lines, and you will have a drawing of your creature in the same proportions as the original.

How To Draw Planes

Fokker DR1 Triplane

Triplanes have three sets of wings. One of the most famous triplanes was the Fokker Driveler (DR1), used by Germany in WW1 to battle the British Sopwith triplane. It had a single pilot and was armed with two machine guns. Its most famous pilot was Baron Manfred von Richthofen.

Try drawing a triplane from a side view. Take a line from the center of the fuselage to the center line of the plane.

Add lines for the fuselage.

Add lines for the wings.

Add lines for the tail.

Add lines for the landing gear.

Add lines for the propeller.

Add lines for the engine.

Add lines for the tail.

Add lines for the landing gear.

Add lines for the propeller.

Add lines for the engine.

The DR1 was a difficult aircraft to fly and was regarded as a machine strictly for experienced pilots.

Background
 The DR1 was designed by German designer Reinhold Platz for Fokker. It was the first triplane to be used in combat. It was used by the German ace Baron Manfred von Richthofen.

Light and dark
 Start with a light pencil sketch. Then use a darker pencil to add detail and shading.

Supermarine S6B

The Supermarine S6B Seaplane became the fastest aircraft on Earth in September 1931 when it achieved a record-breaking speed of 656 km/h.

Try drawing the fuselage. Then add the wings. Then add the tail. Then add the landing gear.

When you have finished, add the propeller and engine.

The S6B was designed by R. J. Mitchell, who later became famous for designing the Supermarine Spitfire.

Light and dark
 Start with a light pencil sketch. Then use a darker pencil to add detail and shading.

Airbus A380

The double-decker Airbus A380 is able to carry up to 853 passengers, making it the world's largest passenger-carrying airliner.

Try drawing the fuselage. Then add the wings. Then add the tail. Then add the landing gear.

When you have finished, add the propeller and engine.

The first flight took place on 4 April 2005. It was the world's largest passenger-carrying aircraft.

Think 3-D
 Draw a 3-D model of the plane. Use a ruler to draw straight lines.

Light and dark
 Start with a light pencil sketch. Then use a darker pencil to add detail and shading.

Sketching

We can't always rely on our memories, so it's important to look around and find real-life things to draw. Taking a sketchbook with you wherever you go is one of the best ways to improve your drawing skills. Learn to observe objects carefully: notice how they move, how they're made, and how they work. What you draw should be based on what you've seen.

Sketching
 A sketch that has taken a short time can say as much as a careful drawing that has taken many hours.

Sketching models
 Try drawing model planes. It will be good practice for seeing and observing. The larger the model is, the better it is to draw because its proportions are better.

Aviation museums are filled with many different types of plane from past and present.

You will be able to walk all the way around many of the planes and see them from different perspectives.

How To Draw Caricatures

Different treatments

Changing one feature can completely transform a face. For example, the size and shape of a chin can make a character look more or less bold. Superheroes often have large, pronounced chins, representing strength and power.

Amplify prominent features.

Add some detail to the face including bigger nose hair, wrinkles, and a more realistic chin crease. Darken the dark areas.

Exaggerate the top and base of the nose. Change the nostril and chin. There is a lot of facial features.

Draw the forehead. It has been completely described and would add extra age to the character.

The nose and size of the chin make the face look grumpy and full of pain.

Sampled character
You can create a caricature using any odd idea. The shape is what is important as well as their features.

Insulting vs complimenting

The angles and facial expressions chosen can radically change the look of a caricature to create an insulting or a complimentary expression of character or personality.

Good features are the best. Drawing a caricature that is insulting or complimentary is a matter of choice.

Henry VIII was the King of England between the years of 1509 and 1547. He had a very large nose.

Draw the drawing on a separate sheet of paper. Add a construction line for the nose. Then, draw the nose and mouth.

Add some detail to the face, including eye, ear, and hair. Formed the line and draw to the shape of a large, rounded nose.

Macaroni

In the mid-18th century, certain well-to-do men would dress in high-fashion clothes and wear large powdered wigs. They were known as macaroni and made great subjects for caricatures.

Looking like your pet

Scientists have found that we deliberately choose pets that look similar to us! Comparing owner and pet can be a fun caricature exercise, particularly if you exaggerate one common feature.

It's easier to choose just one similar feature to distort - large teeth or nose shapes both work very well.

Draw in a basic oval and construction lines as a guide.

For the owner, roughly sketch in the eyes, eyebrows, ears, nose and mouth. The dog's features will have exactly the same placement.

Exaggerate the features so that the facial creases will match up with the dog's saggy jaws.

When drawing the noses, make them both of a similar shape and size.

Think about your composition. By placing both characters face to face, their features are mirrored, making the similarity more obvious.

Finish off both caricatures by completing all details.

Add tone, shading in areas where light does not reach.

TATTOOS

In the early nineteenth century over 90 per cent of all sailors sported a tattoo. They marked milestones in a sailor's voyage and served as reminders of the places they had been. But mainly, tattoos were believed to be good luck talismans.

Spot the only tattoo opposite that matches this one above.

HOW TO DRAW A PIRATE CAPTAIN

Copy this step-by-step pencil drawing

Use simple ovals to draw in the main shapes of Blackbeard's head. Add construction lines for his pirate hat.

Draw in more details like the skin on his hat, his eyes, eyebrows, nostrils, ears and nostrils. Finally add his teeth and draw in the hairs of his beard.

Start drawing in his hat and his facial features.

Add Blackbeard's eyepatch, beard and moustache.

Use a soft pencil to build up tone by crosshatching.

BATTLESHIPS

YOU WILL EACH NEED:
2 grids (see page 81)
A black pen
A red pen

BATTLESHIP RULES (2 PLAYERS)

- Both players have two grids. Each player must secretly place (either horizontally or vertically) a Square rigger, a Brigantine, a Schooner and two Sloops on one grid. Use the key below to see how many squares each type of ship should fill.
- Players take turns to call out a 'co-ordinate' (a letter and a number) to guess where their opponent's ships are placed. Your opponent checks their grid, and shouts 'hit' if you have guessed correctly and 'miss' if not.
- Keep a record of all your guessed co-ordinates on your spare grid. Use black for a 'miss' and red for a 'hit'.
- The first player to sink all his enemy's ships is the winner.

	1 Square rigger (5 squares)	
	1 Brigantine (4 squares)	
	1 Schooner (3 squares)	
	2 Sloops (2 squares each)

ON THE LEVEL

If you pour water into a series of tubes that are connected together, the water finds the same level in all the tubes.

All tubes connected to jar A should have water reaching the same level as in jar A. All tubes connected to jar B should have the same water level as jar B.

But some of these tubes have been drawn wrongly! Can you find which tubes contain water at the wrong level?

HINT: It will help if you colour all the tubes connected to jar A red, and all the tubes connected to jar B blue.

TRICKS WITH LIGHT

Optical illusions are tricks that fool the eye. They make you see something that's not really there.

Hold the book up in front of you and tilt it to the left or right. What happens to the curved lines in the drawing below?

Can you see a triangle here? There isn't one in the drawing!

Stare very hard at the picture below, then slowly move it towards and away from you. What happens?

Are the sides of the square straight or curved? Check with a ruler.

Are the horizontal lines level or slanting?

PUT THE FISH IN THE BOWL

1. Trace the fish and bowl onto card. Colour them in, then cut out the two circles.

2. Tape the two pictures to a pencil, so both pictures face out.

3. Spin the pencil between your hands. Can you see the fish in the bowl?

DID YOU KNOW? Optical illusions aren't just for fun - they help scientists to understand how the eyes and brain work together.

GERMINATION

Most plants grow from seeds. If you plant a seed in a moist, sunny place it will start to germinate (sprout).

The tough seed coat splits open (1). First, a little root grows downwards (2), so the plant can take in water. Then, a little green shoot begins to grow upwards towards the sky (3). The new plant spreads its leaves in the light (4).

You can plant bean sprouts yourself and see how fast they grow!

BEANPROUT MAZE
Help the new shoot find its way through the soil towards the light.

RISING AIR

When air is heated it rises. This is what makes a hot-air balloon rise. Air spirals upwards in currents called thermals where the sun heats the air near the ground.

This experiment uses the warm air from a radiator.

Colour the snakes, then cut them out to make a spiral. Gently pull the head and tail apart. Use scissors to make a hole in the nose, and attach a string. Hang the snakes over a radiator and watch them spin around!

Why do giraffes have long necks?

Giraffes are the tallest animals in the world. Their long legs and necks help them to reach tasty leaves at the tops of trees.

Acacia tree

Giraffes have long thick tongues that can curl leaves from branches. They spend most of the day eating. An adult consumes about 34 kilograms (75 pounds) of leaves and twigs each day.

The leaves of the acacia tree are one of the giraffe's favourite foods.

Giraffe

Baby giraffes are called calves and are about 2 metres (6 feet) tall when they are born!

How Do I Hear?

Sound is vibrating air. When it reaches your ears it makes your eardrums vibrate. These vibrations send messages to your brain, which then makes sense of what kind of sound you are hearing.

Skull

Splash!
Woof!
Toot toot!
Bang!

Most of your ear is inside your head. The part of the ear you can see is like a funnel for sounds.

Why Do I Have Two Ears?
Having an ear on either side of your head helps you to work out the direction of sound better. It means you can hear better too.

What was the deadliest dinosaur?

Spinosaurus was the largest meat-eating dinosaur known to have existed. Unlike other dinosaurs, Spinosaurus must have been semi-aquatic (partly water-dwelling).

Spinosaurus's head and teeth were shaped like a crocodile's. Its broad feet and flat skin were ideal for paddling in water.

The deadliest dinosaur would have eaten sharks and crocodiles, as well as land animals.
