TRIASSIC LIFE ON LAND

The Triassic Period

Around 251 million years ago, there was a mass extinction in which an incredible 96 per cent of all life forms died out. The Triassic period that followed saw a major growth of life on land, with both the early ancestors of mammals and dinosaurs appearing for the first time.

At the beginning of the Triassic, temperatures were warmer than they are today. There was no ice on the poles and a vast desert covered the interior of Pangaea. On higher, cooler ground, gymnosperms (plants with exposed seeds) could be found as well as coniferous forests.

The climate around the coast was now much wetter, and it was here that most life existed. There were mosses and ferns, spiders, scorpions, millipedes, centipedes and beetles. The Triassic also saw the appearance of the first grasshoppers.

The largest life forms on land were mammal-like reptiles, known as therapsids, and the archosaurs. By the mid-Triassic, the archosaurs had branched into the first dinosaurs, and by the Late Triassic, the winged pterosaurs, the first vertebrates capable of active flight.

The earliest mammal ancestors evolved at the very end of the Triassic, from the therapsids. These were tiny, shrew-like creatures that fed either on plants or insects.

- Key to plate**
- 1: **Protosuchia**
Length 1m; Weight 600kg
A top predator in North America. Protosuchia was an arboreal, web-footed upright leg, making a flat, rigid hunter. It had alongside the small dinosaur in its time, the Coelacanth. Its backbones were much shorter than its neckbones, suggesting it may have walked on two legs.
 - 2: **"Furred mammal"**
Wingless 1.1m; Weight uncertain
These mammals were all relatively small. The one discovered in 2015 and yet unnamed, had 130 teeth and four 25cm-long legs. It would have been capable of short flights and preyed on insects and by its last ancestor of mammals.
 - 3: **Bennettitales**
These palm-like plants flourished during the Triassic. They had tough leaves and woody trunks, with short, barrel-shaped stems.
 - 4: **Amecrocyclus intonsus**
A species of conifer forests of which covered North America in the Late Triassic. Its closest relative today is the monkey puzzle tree.
 - 5: **Horseshells**
These mollusk shells were an important food source for the herbivores of the time. They evolved new forms during the Triassic. They reproduced by spores rather than seeds, and were fast-growing and resilient, with underground stems.
 - 6: **Margherodon**
Length 1.5m; Weight 27-40kg
An early mammal ancestor. Margherodon still had monkey-like features, including the shape of its jaw. Its tail was probably small and bushy, and was most likely nocturnal.

Time Runs Like A River

Time runs like a river, never resting, moving steadily on. But if we notice how different each minute can be, we can appreciate them before they are gone.

- A beautiful new picture book to follow on from the bestselling *What Do You See When You Look At A Tree?*
- *What Do You See When You Look At A Tree?* was selected as a 2023 Empathy Labs title, and shortlisted for the Waterstone's Children's Prize 2023.
- Soft watercolour artwork encourages children to slow down and notice nature.
- Non-fiction spreads at the back of the book are full of mindful tips.
- **Celebrating 10 Years of Extraordinary Illustrated Books**

In the Swamp by the Light of the Moon

A lyrical picture book from the bestselling illustrator of *I am the Seed that Grew the Tree*.

- A lyrical read-aloud text and illustrations with atmospheric colours and loveable characters. A perfect bed-time book
- An inclusive message of the importance of listening to small voices
- Frann Preston-Gannon is a Greenaway nominated illustrator and recipient of the Sendak fellowship and illustrator of *I Am the Seed That Grew the Tree: A Nature Poem for Every Day of the Year* that has TCM sales 27,000.
- Cover treatment: Matt lam and foil
- Sold over 19,000 copies worldwide (as of July 2022) and winner of Bank Street College of Education's 2020 Best Children's Book of the Year.

In the Swamp by the Light of the Moon

But all by himself his voice was so quiet
so he croaked and he let out a sigh,
"Hopping alone is not much fun,
what a lonely wee froggy am I."

So he hopped and he jumped over lily-pads
and into the blue of the night,
to find someone else to join his song
to make it sound just right.

He found a friendly crocodile,
who was drumming and humming in time.
"My friend," he called, "will you sing with me?
Will you add your song to mine?"

So the crocodile hummed
and beat his drum,
while the little frog sang his tune.

But something was wrong
as they both sang along
in the **swamp**
by the light of the
moon.
